Procedures

Example: Switching Auto answer on/off

- 📞 ... use ✉️ to select ✉️ Settings ✉️ OK ✉️ Telephony ✉️ OK ✉️ Auto Answer ✉️ Change ( ✉️ = on)

Step | Follow this procedure
--- | ----------------------
1. ✉️ | When in idle status press the centre of the control key. The main menu opens.
2. ✉️ ✉️ | Navigate to the ✉️ icon using the control key ✉️
3. OK | Select OK to confirm. The submenu Settings opens.
4. ✉️ Telephony | Select the Telephony entry using the control key ✉️
5. OK | Select OK to confirm. The submenu Telephony opens.
6. ✉️ Auto Answer | The function to switch Auto answer on/off appears as the first menu item.
7. ✉️ Change | Select Change to activate or deactivate. Function is activated ✉️ / deactivated ✉️
Safety precautions

Read the safety precautions and the user guide before use.

The device cannot be used in the event of a power failure. In case of a power failure it is also not possible to make emergency calls.

Emergency numbers cannot be dialled if the keypad/display lock is activated!

- Do not use the devices in environments with a potential explosion hazard (e.g. paint shops).
- The devices are not splashproof. For this reason do not install them in a damp environment such as bathrooms or shower rooms.
- Use only the power adapter indicated on the device.
- Use only rechargeable batteries that correspond to the specification (see "Specifications"). Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. Rechargeable batteries, which are noticeably damaged, must be replaced.
- Remove faulty devices from use or have them repaired by our Service team, as these could interfere with other wireless services.
- Do not use the device if the display is cracked or broken. Broken glass or plastic can cause injury to hands and face. Send the device to our Service department to be repaired.
- Do not hold the rear of the handset to your ear when it is ringing or when speaker mode is activated. Otherwise you risk serious and permanent damage to your hearing.
- The phone may cause interference in analogue hearing aids (humming or whistling) or cause them to overload. If you require assistance, please contact the hearing aid supplier.
- Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.g. doctor's surgery. If you use a medical device (e.g. a pacemaker), please contact the device manufacturer. They will be able to advise you regarding the susceptibility of the device to external sources of high frequency energy (for the specifications of your Gigaset product see "Specifications").
Getting started

Contents of the package

- One base,
- One power adapter for the base,
- One phone cable,
- One handset
- One battery cover (rear cover for the handset)
- One battery
- One charging cradle incl. power adapter
- One belt clip
- One user guide

Models with multiple handsets, per handset:
- One handset
- One charging cradle incl. power adapter
- One battery, one battery cover and one belt clip

The base station and charging cradle are designed for use in closed, dry rooms within a temperature range of +5 °C to +45 °C.

The device's feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on furniture, contact marks on the surfaces cannot be completely ruled out.

Never expose the telephone to heat sources, direct sunlight or other electrical devices.

Protect your telephone from moisture, dust, corrosive liquids and vapours.
Base

- Insert the phone cable into the right-hand connection socket [1] at the rear of the base until it clicks into place.
- Insert the power cable from the power adapter into the connection socket on the left [2].
- Push both cables into the appropriate cable channels [3].
- Place the cover in the notches on the back of the base [3a] (not if mounting on the wall).
- Connect the power [4] adapter
- Connect the phone [5] jack

! The network cable must **always be connected** in order to function, as the phone will not operate without a power supply.

Handset

Connecting the charging cradle

- Connect the flat plug of the power adapter [1].
- Plug the mains unit into your power socket [2].

To remove the plug from the charging cradle again:
- Disconnect the power adapter from the mains power supply.
- Press the release button [3].
- Pull out the plug [4].
Handset

Setting up the handset for use
The display is protected by a plastic film. Please remove the protective film!

Inserting the battery

Only use a rechargeable battery, as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the battery could be destroyed or the battery could explode. The device could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

1. Insert battery with the contact side pointing down 1.
2. Press the battery down until it clicks into place 2.
3. Orientate the battery cover with the side tabs fitting into the slots on the inside of the casing 3.
4. Press the cover until it clicks into place.

Re-opening the battery cover

1. Remove the belt clip (if attached).
2. To change the battery, place your fingernail in the recess in the housing and pull the battery cover up 2.
Charge the battery

Charge the battery fully prior to first use in the charging cradle or using a standard USB mains adapter.

The battery is fully charged when the power icon disappears from the display.

The battery may heat up during charging. This is not dangerous.

After a time, the charge capacity of the battery will decrease for technical reasons.

Handsets contained in the package have already been registered to the base. In the event that a handset is not registered however, (indicated by "Please register handset"), register the handset manually (p. 52).

Attaching the belt clip

The handset has notches on each side for attaching the belt clip.

- Attaching the belt clip: Press the belt clip onto the back of the handset so that the tabs on the belt clip click into place in the notches.
- Removing the belt clip: Press the centre of the belt clip firmly with your right thumb. Push the nail of your left thumb up between the clip and the casing. Slide the clip upwards to remove.

Changing the display language

You can change the display language, if the telephone has been set to an incomprehensible language.

- Press the centre of the control key.
- Press the keys and slowly and successively... the language settings display appears, the set language (e.g. English) is highlighted ( = selected).
- To select a different language: Press the control key until the desired language is highlighted on the display, e.g. Français press the key on the right directly underneath the display to activate the language.
- To revert to idle status: Press and hold the End call key.
**Handset**

**Setting the date and time**

Set the date/time so that the correct date and time can be assigned to incoming calls, and to enable the alarm to be used.

- Press the display key **Time**

or, if the date and time have already been set:

- . . . use to select **Settings** ➔ **OK** ➔ **Date/Time** ➔ **OK**

The active cursor position flashes ➔ . . . change cursor position with ➔ . . . switch between cursor positions with .

Enter date:

- . . . using enter the day, month and year in 8-digit format,
  e.g. \[1 \rightarrow 5 \rightarrow 0 \rightarrow 8 \rightarrow 2 \rightarrow 0 \rightarrow 1 \rightarrow 5\] for 15/08/2015.

Enter time:

- . . . using enter hours and minutes in 4-digit format,
  e.g. \[0 \rightarrow 7 \rightarrow 1 \rightarrow 5\] for 07:15.

Save settings:

- Press the display key **Save**. . . **Saved** is shown in the display and a confirmation tone sounds.

Return to idle status:

- Press and hold the End call key .

*The telephone is now ready for use.*

**Connecting the headset**

- Connect the headset with 2.5 mm jack to the left side of the handset .

  or

- Connect headset via Bluetooth ( p. 48).

The headset volume corresponds with the setting for the receiver volume ( p. 60).

**Connecting the USB data cable**

For data exchange between the handset and PC:

- Connect the USB data cable with micro-USB plug into the USB socket at the bottom of the handset .

  > Connect the handset directly to the PC, not via a USB hub.
Getting to know your telephone

Using the telephone

Getting to know your telephone

Switch the handset on/off
Switch on:  
- When the handset is switched off, press and hold the End call key.
Switch off:  
- When the handset is in idle status, press and hold the End call key.

Lock/unlock the keypad
The keypad lock prevents any accidental use of the telephone.
Lock/unlock the keypad:  
- Press and hold
Keypad lock activated: the following symbol appears.

If a call is indicated on the handset, the keypad automatically unlocks and you can accept the call. It then locks again when the call is finished.

It is not possible to call emergency numbers either when keypad lock is activated.

Control key

The control key enables you to navigate the menus and input fields, and also to call up certain functions depending on the situation.

In the description below, the side of the control key (up, down, right, left) that you have to press in the different operating situations is marked in black, e.g. for "press right on the control key" or for "press the centre of the control key".

In idle status
Open the directory  
- Press briefly
Open the main menu  
- or
Open the list of handsets

In submenus, selection and entry fields
Confirm a function

During a conversation
Open the directory
Mute the microphone
Initiate an internal consultation call
Adjust the loudspeaker volume for receiver and handsfree mode
Getting to know your telephone

Display keys
The display keys perform a range of functions depending on the operating situation.

Display key icons ➔ p. 75.

The display keys have a function preset by default in idle status. Change the assignment: ➔ p. 63

Menu guidance
The functions of your telephone are displayed in a menu that consists of several levels. Menu overview ➔ p. 77

Selecting/confirming functions
Confirm selection using OK or press the centre of the control key ☐
One menu level back using Back
Change to idle status Press and hold
Switch function on/off using Change on ☐ / off ☐
Activate/deactivate option using Select activated ☐ / not activated ☐

Main menu
In idle status: ➔ Press the centre of the control key ☐ ➔ … use the control key ☐ to select a submenu ➔ OK

The main menu functions are shown in the display as icons. The icon for the selected function is highlighted in colour and the name of the associated function appears in the display header.

Example

Back OK
Getting to know your telephone

Submenus
The functions in the submenus are displayed as lists.
To access a function:  use the control key  to select a function  OK
Return to the previous menu level:
› Press the display key Back
or
› Press the End call key  briefly

Returning to idle status
› Press and hold the End call key

If a key is not pressed, after 2 minutes the display will automatically change to idle status.

Entering text

Input position
› Use  to select an entry field. A field is activated when the cursor is blinking inside it.
› Use  to move the position of the cursor.

Correcting incorrect entries
• Delete characters to the left of the cursor:  Press briefly
• Delete words to the left of the cursor:  Press and hold

Entering letters/characters
Multiple letters and numbers are assigned to each key between  and  and the  key. As soon as a key is pressed, the possible characters are displayed at the bottom of the display. The selected character is highlighted.
• Selecting letters/numbers:  Press the key briefly several times in succession
• Switch between lower case, upper case and number entry mode:  Press the hash key

When editing a directory entry, the first letter and each letter following a space is automatically in upper case.
• Entering special characters:  Press the star key  . . .  use  to navigate to the desired character  Insert

The availability of special characters depends on the character set of the handset  p. 74.
Making calls

Making calls

Making calls

- . . . use [ ] to enter the number > briefly press the Talk key [ ]
  or
- Press and hold the Talk key [ ] > . . . use [ ] to enter the number

Cancel dialling: > Press the End call key [ ]

Information for Calling Line Identification: > p. 20

If the display backlight is deactivated, you can reactivate it by pressing any key. Digit keys that are pressed appear in the display for pre-dialling, other keys have no further function.

Dialling from the directory

- . . . use [ ] to open the directory > . . . use [ ] to select an entry > press the Talk key [ ]

If multiple numbers are entered:
- . . . use [ ] to select a number > press the Talk key [ ] > . . . the number is dialled

For fast access (quick dial): Assign numbers from the directory to the digit or display keys.

Dialling from the redial list

The redial list contains the 20 numbers last dialled with the handset.

- Briefly press the Talk key [ ] > . . . the redial list is opened > . . . use [ ] to select an entry > press the Talk key [ ]

If a name is displayed:
- View . . . the number is displayed > . . . use [ ] to browse numbers if necessary > . . . when the desired number is reached press the Talk key [ ]

Managing entries in the redial list

- Briefly press the Talk key [ ] > . . . the redial list is opened > . . . use [ ] to select an entry > Options . . . possible options:
  Copy an entry to the directory:
  - [ ] Copy to Directory > OK
  Copy the number to the display:
  - [ ] Display number > OK > . . . use [ ] to amend or add numbers if necessary > . . . use [ ] to save as a new entry in the directory
  Delete the selected entry:
  - [ ] Delete entry > OK
  Delete all entries:
  - [ ] Delete List > OK
Making calls

Set automatic line seizure:

- **Automatic Redial**...the dialled number is automatically dialled at fixed intervals (at least every 20 secs). The handsfree key flashes, "open listening" is activated.
  - The participant answers: Press the Talk key...the function is terminated
  - The participant does not answer: The call is interrupted after around 30 secs. The function is terminated after pressing any key or after ten unsuccessful attempts.

Dialling from the call list

The call lists (p. 27) contain the most recent accepted, outgoing and missed calls.

- use...to select Call Lists OK...use to select a list OK...use to select an entry
  - Press the Talk key

The call lists can be displayed directly by pressing the display key Calls if the relevant function has been assigned to the display key.

The Missed calls list can also be opened by pressing the Message key.

One touch call

A saved number is dialled by pressing any key. This allows children who are not yet able to enter a number to call a certain number, for example.

Activate one touch call mode:

- use...to select Additional Features OK...use One Touch Call OK...use to activate Activation
  - Call to...use to enter the number Save...the active one touch mode is shown in the idle display

Make a one touch call: Press any key...the saved number is dialled

Cancel dialling: Press the End call key.
End one touch call: Press and hold the End call key.
Making calls

Further information about making calls:
- Calling Line Identification,
- Managing entries in the redial list,
- One touch call,
- Dialling in extension systems

can be found in the detailed user guide for the Gigaset SL450 at

www.gigaset.com/manuals

Incoming calls

An incoming call is indicated by ringing, by a display on the screen and by the flashing Talk key. Accept a call:
- Press the Talk key or Accept
- If Auto Answer is activated: Remove the handset from the charging cradle
- Accept a call on the headset
- Accept a call with the Gigaset L410 handsfree clip: Press the Talk key.

Switch off ringtone: Silence … the call can be accepted for as long as it is shown on the display

Information about the caller

The caller’s phone number is displayed. If the caller’s number is saved in the directory, the name is displayed.

Accepting/rejecting call waiting

A call waiting tone indicates a call during an external call. The number or the name of the caller is displayed if the phone number is transferred.
- Reject a call: Options Reject waiting call OK
- Accept a call: Accept … speak to the new caller. The previous call is placed on hold.
- End the call, resume the on-hold call: Press the End call key.

The caller’s number will be transferred (p. 20).
Making calls

Making internal calls

- Press briefly ... the handset list is opened, this handset is indicated by < ... use arrow to select handset or Call all (group call) Press the Talk key

Multiple handsets have been registered to the base station (p. 52).

Fast access for group call:

- Press briefly
- press and hold

Internal consultation call/internal transfer

Call an external participant and transfer the call to an internal participant or hold a consultation call with him or her.

- ... the list of handsets is opened ... use arrow to select a handset or Call all OK

... the internal participant(s) are called ... possible options:

Hold a consultation call:

- Speak to the internal participant

Return to the external call:

- Options End active call OK

Transfer the external call when the internal participant has answered:

- Announce an external call Press the End call key

Transfer the external call before the internal participant answers:

- Press the End call key ... the external call is forwarded immediately. If the internal participant does not answer or the line is busy, the external call will automatically return to you.

End the internal call if the internal participant does not answer or the line is busy:

- End ... You return to the external call

Establishing a conference call/call swapping

Conduct a call while a second call is being held. Both callers are indicated on the display.

- Call swapping: Use arrow to swap between both participants.

- Establish a three-way conference call: Conf.

- End a conference call: End Conf. ... You have been connected back to external participant ... use arrow to swap between both participants

The other participants end the conference call using the End call key.
Making calls

Accepting/rejecting call waiting
An external call arriving during an internal call is indicated with a call waiting tone. If the number is transferred, you will see the number or the name of the caller on the display.

- Rejecting a call: Reject
  The call waiting tone is turned off. The call continues to be indicated on the other registered handsets.
- Accepting a call: Accept... Speak to the new caller, the previous call is placed on hold.

Internal call waiting during an external call
If an internal participant attempts to call you while you are involved in an external or internal call, this call is shown on the display (Call Waiting).

- End display: Press any key
- Accept the internal call: End your current call
  The internal call is indicated in the usual way. You can accept the call.

Listening in to an external call
You are conducting an external call. An internal participant can listen in to this call and take part in the conversation (conference).

The Listening In function must be activated.

Activating/deactivating internal listening in

- Press and hold... all participants will hear a signal tone

Internal listening in
The line is engaged with an external call. Your screen will display information to that effect. You can listen in to the external call.

- Press and hold... all participants will hear a signal tone

Ending listening in
- Press... all participants will hear a signal tone
Making calls

During a conversation

Handsfree mode
Activating/deactivating handsfree mode during a call and when establishing a connection:

- Press the handsfree key

Placing the handset in the charging cradle during a call:

- Press and hold down the handsfree key ... Place the handset in the charging cradle ... hold for a further 2 seconds

Call volume
Applies to the current mode (handsfree, receiver or headset):

- Press ... use to set the volume ... Save

The setting is automatically saved after around 3 seconds, even if Save is not pressed.

Muting the microphone
When the microphone is switched off, callers will no longer hear you.

Switch the microphone on/off during a call: Press
Provider-specific functions (network services)

Network services depend on the network (analogue fixed line network or IP telephony) and on the network provider (service provider) and must be requested from that provider if required.

You will find a description of the features on your network provider's website or at one of their store branches.

If you require assistance, please contact your network provider.

Requesting network services may incur additional costs. Please consult your network provider.

Network services fall into two distinct groups:

- Network services that are activated when in idle status for the following call or all subsequent calls (for example, "calling anonymously"). These are activated/deactivated via the Select Services menu.
- Network services that are activated during an external call, (for example, "consultation call", "swapping between two callers" and "setting up conference calls"). These are made available during an external call either as an option or by using a display key (e.g. Ext. Call, Conference).

To activate/deactivate the features, a code is sent to the telephone network. After a confirmation tone from the telephone network, press .

It is not possible to reprogram the network services.

Calling Line Identification

During a call, the caller’s number is transferred (CLI = Calling Line Identification) and may be displayed on the recipient’s display (CLIP = CLI presentation). If the caller’s number is withheld, it will not be displayed to the recipient. The call is made anonymously (CLIR = CLI Restriction).

Caller display for incoming calls

Calling Line Identification

The caller’s phone number is displayed. If the caller’s number is saved in the directory, the name is displayed.

No Calling Line Identification

Instead of name and number, the following is displayed:

- **External**: No number has been transferred.
- **Withheld**: Caller has withheld Calling Line Identification.
- **Unavailable**: Caller has not authorised Calling Line Identification.
Provider-specific functions (network services)

Call waiting during an external call

During an external call, a call waiting tone indicates another external caller. If the number is being transferred, you will see the number or the name of the caller on the display.

Reject waiting caller:

- **Options** ➤ Reject waiting call ➤ OK ... the waiting caller hears the busy tone

Accept the waiting call:

- **Accept**

Once you have accepted the waiting call, you can switch between the two callers ("Call swapping" ➤ p. 22) or speak to both simultaneously ("Conference" ➤ p. 23).

Activating/deactivating call waiting

- ➤ ... use to select Select Services ➤ OK ➤ Call Waiting ➤ OK ... then

Switch on/off: ➤ Status: ... use to select On or Off

Activate: ➤ Send

Call waiting is activated or deactivated for all registered handsets.

Call divert

When diverting a call, the call is forwarded to another connection.

- ➤ ... use to select Select Services ➤ OK ➤ Call Divert ➤ OK ... then

Switch on/off: ➤ Status: ... use to select On or Off

Enter the number for call diverting:

- ➤ To Phone Number ➤ ... use to enter the number

Set the time for call divert:

- ➤ When ➤ ... use to select the time for call divert
  
  All Calls: Calls are diverted immediately

  No Answer: Calls are diverted if no one accepts the call within several rings.

  When Busy: Calls are diverted if the line is busy.

Activate: ➤ Send

A connection is established to the telephone network ... a confirmation is sent from the telephone network ➤ Press the End call key

Diverting calls may incur additional costs. Please consult your network provider.
Provider-specific functions (network services)

Calls with three participants

Consultation calls
Make another external call during an external call. The first call is placed on hold.
- Ext. Call  ➤  use to enter the number of the second participant  ➤  the active call is placed on hold and the second participant is called

If the second participant does not answer:  ➤  End

Ending a consultation call
- Options  ➤  End active call  ➤  OK  ➤  the connection to the first caller is reactivated
  or
- Press the End call key  ➤  a recall to the first participant is initiated

Call swapping
Switching between two calls. The other call is placed on hold.
- During an external call, dial the number of a second participant (consultation call) or accept a waiting caller  ➤  the display shows the numbers and/or names of both call participants, the current participant is marked with .
- Use the control key  ➤  to switch back and forth between participants

Ending a currently active call
- Options  ➤  End active call  ➤  OK  ➤  the connection to the other caller is reactivated
  or
- Press the End call key  ➤  a recall to the first participant is initiated
Conference
Speaking to both participants at the same time.
- During an external call, dial the number of a second participant (consultation call) or accept a waiting caller . . . then
  Initiate conference call:
  - **Conf. . . .** all callers can hear one another and hold a conversation with one another
  Return to call swapping:
  - **End Conf. . . .** You will be reconnected to the participant with whom the conference call was initiated
End call with both participants:
- Press the End call key
Each of the participants can end their participation in the conference call by pressing the End call key or hanging up.

Activating/deactivating the network mailbox
You can activate and deactivate your network provider’s network mailbox.
- . . . use to select **Select Services** > **OK** > **Network Mailbox** . . . then
  Activate/deactivate function:
  - **Status** . . . use to select **On** or **Off**
  Activate:
  - **Send**
Network mailbox

Entering a number
- Use to select Answer Machine > OK > Network Mailbox > OK...
- Use to enter or amend the network mailbox number > Save

Playing back messages
- Press and hold
- Press the Message key > Network Mailbox > OK
- Use to select Answer Machine > OK > Play Messages > OK

Listen to announcement out loud: Press the handsfree key

The network mailbox has been requested from the network provider.

To activate/deactivate the network mailbox use the phone number and a function code of your network provider. Please contact the network provider if you require any further information.
Message lists

Notifications about missed calls, messages on the network mailbox, received SMS messages and missed alarms are saved in the messages list.

As soon as a new message arrives, an advisory tone will sound. The Message key also flashes (if activated p. 26). Icons for message types and the number of new messages are shown on the idle display.

Notification for the following message types is available:
- on the network mailbox
- in the missed calls list
- in the SMS message list
- in the missed alarms list

The icon for the network mailbox is always displayed, provided the number is stored in the telephone. The other lists are only displayed if they contain messages.

Display messages:
- Press the Message key . . . Messages lists that contain messages are displayed, Mailbox: is always displayed
  - An entry is marked in bold: new messages are available. The number of new messages is shown in brackets.
  - An entry is not marked in bold: no new messages. The number of old messages is shown in brackets.
- . . . use to select a list OK . . . the calls or messages are listed

Network mailbox: The network mailbox number is dialled ( p. 24).
Message lists

Activating/deactivating Message key flashing

Receipt of new messages is displayed by a flashing message key on the handset. This type of alert can be activated/deactivated for each message type.

In idle status:

- Press keys * 5 to 9 appears in the display
- Use to select the message type:
  - Messages on the network mailbox
  - missed calls
  - new SMS
- The number 9 followed by the entry (e.g. 975) is displayed, the current setting for the select message type flashes in the entry field (e.g. 0)
- Use to set the action for the arrival of new messages:
  - The Message key flashes
  - The Message key does not flash
- Confirm selected setting with OK

or

- return to idle display without making changes: Back
Call lists

The telephone saves different types of calls (missed, accepted and outgoing calls) in lists.

List entry

The following information is displayed in the list entries:

- The list type (in the header)
- Icon for the type of entry:
  - Missed calls,
  - Accepted calls,
  - Outgoing calls
- Caller’s number. If the number is stored in the directory, the name and number type (Phone (Home), Phone (Office), Phone (Mobile)) are shown instead. In the event of missed calls, the number of missed calls from this number is also shown in square brackets.
- Date and time of call (if set)

Opening the call list

Via the display key:
- Calls → use to select the list → OK
Via the menu:
- → use to select Call Lists → OK → use to select the list → OK

Via the Message key (missed calls):
- Press the Message key → Missed Calls: → OK

Calling back a caller from the call list

- → use to select Call Lists → OK → use to select list → OK → use to select entry → Press the Talk key

Additional options

- → use to select Call Lists → OK → use to select list → OK → use to select entry → Options → Copy to Directory
- → use to select entry → Options → Delete entry → OK
- Options → Delete List → OK → Yes

Example

<table>

View Options
Directory

The local directory is unique to the handset. However, it is possible to send entries to other handsets (⇒ p. 30).

Opening the directory

- Briefly press in idle status
- . . . use to select Directory ⇒ OK

Directory entries

Number of entries: up to 500
Information: First name and surname, up to three telephone numbers, e-mail address, anniversary with alert, VIP ringtone with VIP icon, CLIP-picture
Length of the entries: Numbers: max. 32 digits
First name, surname: max. 16 characters
E-mail address: max. 64 characters

Creating an entry

- . . . use to switch between the entry fields and enter data for an entry:

  Names/numbers:
  - . . . use to enter first names and/or surnames, at least one number (personal, office, or mobile) and an e-mail address, if applicable
  Anniversary:
  - . . . use to activate/deactivate Anniversary . . . use to enter date and time . . . use to select type of alert (Visual only or a ringtone)
  Caller Melody (VIP):
  - . . . use to select the ringtone that will indicate a call from the participant . . . if a Caller Melody (VIP) has been assigned, the entry will appear in the directory with the VIP icon.
  Caller Picture:
  - . . . use to select a picture that is to be displayed during a call from the participant (⇒ Resource Directory).

Save entry: ⇒ Save

The entry is only valid if it contains at least one number.
For **Caller Melody (VIP)** and **Caller Picture**: the telephone number of the caller must be supplied.

### Searching for/selecting a directory entry

- Use ⏽ to browse searched names

or

- Use ⏽ to enter initial letters (max. 8 letters) . . . the display jumps to the first name starting with these initial letters . . . use ⏽ to continue browsing to the desired entry, if needed

Scroll through directory: ⏽ Press and hold ⏽

### Displaying/changing an entry

- Use ⏽ to select entry ⏽ View ⏽ . . . use ⏽ to select the field to be changed ⏽

or

- Use ⏽ to select an entry ⏽ Options ⏽ Edit entry ⏽ OK

### Deleting entries

Delete the selected entry: ⏽ ⏽ . . . use ⏽ to select an entry ⏽ Options ⏽ ⏽ Delete entry ⏽ OK

Delete all entries: ⏽ ⏽ Options ⏽ ⏽ Delete List ⏽ OK ⏽ Yes

### Setting the order of the directory entries

Directory entries can be sorted by first name or surname.

- Options ⏽ Sort by Surname / Sort by First Name

If no name was entered, the default telephone number is shown in the surname field. These entries appear at the beginning of the list, regardless of how the entries are sorted.

The sort order is as follows:

Space  |  Digits (0-9)  |  Letters (alphabetically)  |  Other characters.

### Displaying the number of entries available in the directory

- Options ⏽ Available Memory ⏽ OK
Directory

Copying number to the directory

Copy numbers to the directory:
• From a list e.g. the call list or the redial list
• From the text of an SMS
• When dialling a number

The number is displayed or highlighted.

Press the display key or Options → Copy to Directory → OK … possible options:

Create a new entry:

<New Entry> → OK … use → select number type → OK → complete entry → Save

Add number to an existing entry:

… use → to select an entry → OK → … use → to select number type → OK … the number is entered or a prompt to overwrite an existing number is displayed … if required, answer the prompt with Yes/No → Save

Copying an entry/directory

The sending and receiving handset must both be registered to the same base station.

The other handset and the base station are able to send and receive directory entries.

An external call interrupts the transfer.

 Caller pictures and sounds are not transferred. Only the date is transferred for an anniversary.

Both handsets support vCards:
• No entry with the name is available: a new entry is created.
• An entry with the name is already available: The entry is expanded to include the new numbers. If the entry contains more numbers than allowed by the recipient handset, a second entry is created with the same name.

The recipient handset does not support vCards:
A separate entry is created and sent for each number.

The sending handset does not support vCards:
A new entry is created on the receiving handset and the transferred number is added to the Phone (Home) field. If an entry with this number already exists, the copied number is discarded.

Copying individual entries

… use → to select the desired entry → Options → Copy Entry → OK → → to Internal → OK … use → to select the receiving handset → OK … the entry is copied

Copy the next entry after successful transfer: → Press Yes or No

Use vCard via SMS to send a directory entry in vCard format by SMS.
Directory

Copying the entire directory

▷ Options ▷ Copy List ▷ OK ▷ to Internal ▷ OK ▷ ... use ▷ to select the receiving handset ▷ OK ... the entries are copied one after the other

Copying a vCard using Bluetooth

Copy directory entries in vCard format, e.g. to exchange entries with a mobile phone.

⚠ Bluetooth mode is activated
The other handset/mobile phone supports Bluetooth.

▷ ... use ▷ to select an entry if needed ▷ Options ▷ Copy Entry / Copy All ▷ vCard via Bluetooth ... the Known Devices list is displayed ▷ ... use ▷ to select device ▷ OK

Receiving a vCard using Bluetooth

If a device in the Known Devices list sends a vCard to your handset, a directory entry is automatically created and a message is shown in the display.

If the sending device is not in the list: ▷ ... use ▷ to enter the PIN of the sending Bluetooth device ▷ OK ... the copied vCard is available as a directory entry

Synchronising the phonebook with the PC address book (Gigaset QuickSync)

⚠ The Gigaset QuickSync programme has been installed on the computer.
The handset is connected via Bluetooth or via a USB data cable to the computer.

Free download and further information at ➔ www.gigaset.com/quicksync
Sound profiles

Additional functions

Sound profiles

The telephone has 3 sound profiles for adapting the handset to the environmental conditions: **Profile Loud, Profile Silent, Profile Personal**

- Use  to switch between the profiles . . . the profile is changed straight away without a prompt

The profiles are set as follows by default:

<table>
<thead>
<tr>
<th>Default setting</th>
<th>Profile Loud</th>
<th>Profile Silent</th>
<th>Profile Personal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ringtone</td>
<td>On</td>
<td>Off</td>
<td>On</td>
</tr>
<tr>
<td>Ringtone volume</td>
<td>Internal</td>
<td>5</td>
<td>Off</td>
</tr>
<tr>
<td></td>
<td>External</td>
<td>5</td>
<td>Off</td>
</tr>
<tr>
<td>Handset volume</td>
<td>Receiver</td>
<td>5</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Handsfree</td>
<td>5</td>
<td>3</td>
</tr>
<tr>
<td>Advisory tones</td>
<td>Key click</td>
<td>Yes</td>
<td>No</td>
</tr>
<tr>
<td></td>
<td>Confirmation tone</td>
<td>Yes</td>
<td>No</td>
</tr>
<tr>
<td></td>
<td>Battery tone</td>
<td>Yes</td>
<td>Yes</td>
</tr>
</tbody>
</table>

Activate alert tone for an incoming call for **Profile Silent**: after switching to **Profile Silent** press the display key **Beep** . . . the icon appears in the status bar

Changes to the settings listed in the table:

- apply in the **Loud** and **Silent** profiles as long as the profile is not changed.
- are permanently saved in **Profile Personal** for this profile.

The set profile remains set when switching the phone off and back on.
Calendar

You can remind yourself of up to 30 appointments.

In the calendar, the current day is outlined in white; on days with appointments, the numbers are displayed in colour. When a day is selected, it will be outlined in colour.

Saving appointments to the calendar

Date and time have been set.

- Use to select Organizer OK Calendar OK use to select desired day OK...then

Switch on/off:
- Activation: use to select On or Off

Enter date:
- Date...the selected day has been pre-set...use to enter new date

Enter time:
- Time...use to enter hours and minutes of the appointment

Set name:
- Text...use to enter a description of the appointment (e.g. evening meal, meeting)

Set alarm tone:
- Signal...use to select the melody of the reminder alarm or deactivate the acoustic signal

Save appointment: Save

If an appointment has already been entered: <New Entry> OK...Then enter information for the appointment.

Notification of appointments/anniversaries

Anniversaries are transferred from the directory and displayed as an appointment. An appointment/anniversary is displayed in idle status and the selected ringtone plays for 60 seconds as a notification.

- Acknowledge and stop the reminder: Press the display key OFF
- Respond with SMS: Press the display key SMS...the SMS menu is displayed

During a call, a reminder is indicated on the handset once with an advisory tone on the handset.
Calendar

Displaying missed appointments/anniversaries
The following appointments and anniversaries are saved in the Missed Alarms list:
- The appointment/anniversary call was not acknowledged.
- The appointment/anniversary was notified during a phone call.
- The handset was switched off at the time of the appointment/anniversary.

The last 10 entries are stored. The icon and the number of new entries are shown in the display. The most recent entry appears at the top of the list.

Opening the list
- Press the Message key Missed Alarms: OK . . . use to browse through the list of any appointments

or
- use to select Organizer OK Missed Alarms OK

Each entry is displayed with the number or name, date and time. The most recent entry appears at the top of the list.
- Delete an appointment/anniversary: Delete
- Compose an SMS: SMS (only if the list has been opened via the menu) . . . the SMS menu is opened

Displaying/changing/deleting stored appointments
- use to select Organizer OK Calendar OK . . . use to select day OK . . . the appointment list is displayed . . . use to select date . . . possible options:
  Display appointment details:
    - View . . . The appointment settings are displayed
  Change appointment:
    - View Edit
    or Options Edit entry OK
  Activate/deactivate appointment:
    - Options Activate/Deactivate OK
  Delete appointment:
    - Options Delete entry OK
  Delete all appointments for a day:
    - Options Delete all Appoints. OK Yes
Alarm clock

Date and time have been set.

Activating/deactivating the alarm clock and setting the wake-up time

- Use → to select Organizer → OK → Alarm Clock → OK … then

Switch on/off:  
- Activation: … use → to select On or Off

Setting the wake-up time:
- Time → … use → to enter hours and minutes

Set days:
- Occurrence → … use → to switch between Monday-Friday and Daily

Set the volume:
- Volume → … use → to set volume in 5 increments or select crescendo (increasing volume)

Set alarm:
- Melody → … use → to select a ringtone for the alarm

Save settings:
- Save

When the alarm clock is activated, the icon ⌁ and the wake-up time are displayed in idle display.

Alarm

An alarm is shown on the display and indicated by the selected ringtone melody. The alarm sounds for 60 seconds. If no key is pressed, the alarm is repeated after 5 minutes. After the second repetition, the alarm call is deactivated for 24 hours.

During a call, the alarm is only indicated by a short tone.

Switching off /repeating the alarm after an interval (snooze mode)

Deactivate the alarm: → OFF

Repeat the alarm (snooze mode): → Press S nooze or any key … the alarm is switched off and repeated after 5 minutes.
Baby monitor

When the baby monitor is switched on, the stored (internal or external) destination number is called as soon as a defined noise level is exceeded in the vicinity of the handset. The alarm to an external number is cancelled after approximately 90 seconds.

You can answer the alarm using the **Two Way Talk** function. This function is used to switch the loudspeaker of the handset located in the baby’s room on or off.

In baby monitor mode, incoming calls are only indicated on the display (without ringtone). The display backlight is reduced to 50%. Advisory tones are deactivated. All keys are locked, with the exception of the display keys and the ability to press the centre of the control key.

If you accept an incoming call, the baby monitor mode is suspended for the duration of the call, but the function remains activated. The baby monitor mode is not deactivated by switching the handset off and on again.

The handset should be positioned 1 to 2 metres away from the baby. The microphone must point towards the baby.

Activating the function reduces the operating time of your handset. For that reason, place the handset in the charging cradle if necessary.

The baby monitor is activated 20 seconds after switching on.

The answer machine for the destination number must be switched off.

After switching on:
- Test sensitivity.
- Test the connection, if the alarm is being forwarded to an external number.

**Activating and setting the baby monitor**

- **Switch on/off:**
  - **Activation:** use to select On or Off

**Enter destination:**
- **Send alarm to**:
  - **External:** use to select Number or select a number from the directory:
  - **Internal:** use to select the handset

**Activate/deactivate two-way talk:**
- **Two Way Talk** use to select On or Off

**Set microphone sensitivity:**
- **Sensitivity** use to select High or Low

**Save settings:** Save

The destination number is displayed in idle display when the baby monitor is activated.
Baby monitor

Deactivate baby monitor/cancel alarm

Deactivate the baby monitor:  In idle status press the display key OFF
Cancel the alarm:                  Press the End call key during an alarm

Deactivate the baby monitor remotely

The alarm is forwarded to an external destination number.
The receiving phone supports tone dialling.

Accept alarm call Press keys \# \# \# the call is ended
The baby monitor is deactivated and the handset is in idle status. The baby monitor settings on the handset (e.g. no ringtone) will remain activated until you press the display key OFF.

Reactivate baby monitor with the same number: . . . Activation to switch back on (p. 36) Save
ECO DECT

The device range is set to maximum as default. This guarantees the best connection between the handset and the base station. In idle status, the handset will not function (as it is not transmitting). Only the base station will maintain contact with the handset via a low wireless signal. During a call, the transmission power automatically adapts to the distance between the base station and handset. The smaller the distance to the base, the lower the radiation.

To reduce the radiation further:

Reducing radiation by up to 80%
- ... use [Settings] to select [OK] [ECO DECT] [OK] [Maximum Range] [Change (off)]

The range is also reduced with this setting.
- It is not possible to use a repeater to increase the range.

Deactivating radiation in idle status
- ... use [Settings] to select [OK] [ECO DECT] [OK] [No Radiation] [Change (on)]

To benefit from the advantages of the setting No Radiation, all registered handsets must support this feature.

If the setting No Radiation is activated and a handset is registered to the base that does not support this feature, No Radiation is automatically deactivated. As soon as this handset is de-registered, No Radiation will automatically be re-activated.

The wireless connection will only be established for an incoming or outgoing call and the connection will be delayed by about 2 seconds.

In order that a handset can establish a wireless connection with the base station more quickly for an incoming call, it must "listen" to the base station more often, i.e. scan the environment. This increases power consumption and reduces the standby and talk-time of the handset.

When No Radiation is activated, there will be no range display/range alarm on the handset. Contactability can be tested by attempting to establish a connection.
- Press and hold the Talk key [... the ringing tone will sound.

Further information can be found at www.gigaset.com.
Protection against unwanted calls

Time control for external calls

Enter a time period during which the handset should suspend ringing to indicate external calls e.g. during the night.

- Use to select Settings OK Audio
  - Settings OK Ringtones (Handset) OK Time
  - Switch on/off: use to select On or Off
  - Enter time: use to switch between Suspend ring. from and Suspend ring. until
  - ... use to enter start and end in 4-digit format
  - Save: Save

Example

<table>
<thead>
<tr>
<th>Time Control</th>
<th>For external calls:</th>
<th>On</th>
</tr>
</thead>
<tbody>
<tr>
<td>Suspend ring. from:</td>
<td>22:00</td>
<td></td>
</tr>
<tr>
<td>Suspend ring. until:</td>
<td>07:00</td>
<td></td>
</tr>
</tbody>
</table>

The time control only applies to the handset for which the setting is configured.
The telephone will continue to ring for numbers that have been assigned to a VIP group in the directory.

Protection from anonymous callers

The handset will not ring if callers' numbers are not revealed. This setting can be applied to only one or to all registered handsets.

For one handset

- ... use to select Settings OK Audio Settings OK
  - Ringtones (Handset) OK Anon. Calls Silent Edit (= on) ... the call is only signalled on the display

For all handsets

- ... use to select Settings OK Telephony OK Anonymous Calls Edit (= on) ... use to select Protection Mode:
  - No Protection: Anonymous calls are indicated in the same way as identified numbers
  - Silent Call: The telephone will not ring and the incoming call will only appear in the display.
  - Block Call: The telephone will not ring and the incoming call will not appear in the display. The caller will hear the busy tone.

Save settings: Save
Protection against unwanted calls

Black list
When the black list function is activated, calls from black list numbers are not indicated or are only indicated in the display. These settings apply to all registered handsets.

Transferring a number from a call list to the black list
• \(\text{Call Lists} \to \text{OK} \to \text{Accepted calls/Missed calls} \to \text{OK} \to \text{Options} \to \text{Copy to Blacklist} \to \text{OK}\)

Displaying/editing the black list
• \(\text{Settings} \to \text{OK} \to \text{Telephony} \to \text{OK} \to \text{Black List} \to \text{Edit} \to \text{Blocked Numbers} \to \text{OK} \to \) the list of blocked numbers is displayed … possible options:
- Create an entry: \(\text{New} \to \) use \(\text{to enter a number} \to \text{Save}\)
- Delete an entry: \(\) use \(\text{to select an entry} \to \text{Delete} \to \) the entry is deleted

Setting the protection mode
• \(\text{Settings} \to \text{OK} \to \text{Telephony} \to \text{OK} \to \text{Black List} \to \text{Edit} \to \text{Protection Mode} \to \text{OK} \to \) use \(\) to select desired protection:
- No Protection: All calls are indicated, including from callers whose numbers are on the black list.
- Silent Call: The telephone will not ring and the incoming call will only appear in the display.
- Block Call: The telephone will not ring and the incoming call will not appear in the display. The caller will hear the busy tone.

Save settings: \(\text{Save}\)

Switch off ringtone when in charging cradle
The handset will not ring when placed in the charging cradle. The call is only indicated on the display.
• \(\text{Settings} \to \text{OK} \to \text{Audio Settings} \to \text{OK} \to \text{Ringtones (Handset)} \to \text{OK} \to \text{Silent Charging} \to \text{Change} \) \(\checkmark\) = ringtone is switched off when in charging cradle)
SMS (text messages)

It is possible to send SMS messages as soon as the telephone has been connected.

Calling Line Identification is enabled (→ p. 20).

The network provider supports the SMS service.

If no SMS service centre is entered, the submenu SMS only consists of the entry Settings.

Writing and sending SMS messages

An SMS may be up to 612 characters in length. If the number of characters exceeds 160, the SMS is sent as linked SMS messages (up to four individual SMS messages).

The remaining number of characters is shown in the top right corner of the display, followed by an indication in brackets of which part of a linked SMS is currently being written. Example: 405(2).

Write an SMS:
- New SMS OK
- use to enter SMS text

Send an SMS:
- Press the End call key
- or Options Send OK

Enter number (Send SMS to):
- From the directory: 
- or
- If sending SMS messages to an SMS mailbox: add the mailbox ID to the end of the number.

Send:
- Send

The number must include the local area code (even if you are in that area).

If an external call comes in, or if you interrupt writing for more than 2 minutes, the text is automatically saved in the draft message list.

Sending SMS messages may incur additional costs. Please consult your network provider.
SMS (text messages)

Sending SMS messages to an e-mail address

The network provider supports this feature.

- Press OK to select SMS, press OK to New SMS, enter the e-mail address at the start of the SMS message, or press Options to select a directory entry containing an e-mail address.
- Press OK to write SMS.
- Use Options to select e-mail addresses.
- Press OK to enter the number of the e-mail service (if not entered).
- Press Send. The SMS is sent to the e-mail service of the SMS send service centre.

Temporary storing of an SMS (draft message list)

You can temporarily store, change later and send SMS messages.

Saving SMS in the draft message list

- Press OK to select SMS, press OK to New SMS, enter the e-mail address at the start of the SMS message, or press Options to write SMS.
- Press OK to save SMS.

Opening and editing an SMS from the draft message list

- Press OK to select SMS, press OK to Draft, select saved SMS, press Options, press Edit.

Receive an SMS

Incoming SMS messages are saved in the incoming message list, linked SMS messages are generally displayed as one SMS.

SMS message list

The incoming SMS message list contains all the received SMS messages and those SMS messages that could not be sent due to an error.

New SMS messages are indicated on all Gigaset handsets by the icon on the display, the flashing Message key and an advisory tone.
SMS (text messages)

Open the SMS message list
- With the Message key: the messages list is opened
  The messages list shows the number of SMS messages it contains: **bold** = new messages, **not bold** = read messages
  Open list: use to select SMS: OK
- Via the SMS menu: use select SMS > OK

Every entry in the list contains:
- the number or name of the sender,
- arrival date and time.

Functions of the incoming message list
- use select SMS > OK > OK... possible options:
  - Call the sender of the SMS:
    - use to select an SMS > Press the Talk key
  - Delete an entry: Options > Delete entry > OK
  - Save the number in the directory:
    - Options > Copy to Directory > OK (p. 30)
  - Delete all entries in the SMS message list:
    - Options > Delete List > OK > Yes

Reading and managing SMS messages
- use select SMS > OK > OK... possible options:
  - Answer SMS:
    - Options > Reply > OK
  - Edit SMS text and send to recipient of your choice:
    - Options > Edit > OK... use to edit text > Options > Forward > OK
  - Forward SMS to recipient of your choice:
    - Options > Forward > OK
  - Display text in a different character set:
    - Options > Character Set > OK... use to select character set > Select ( = selected)
SMS (text messages)

Saving numbers from SMS text to the directory
If a telephone number in the SMS text is recognised, it is automatically highlighted.

• Save the number in the directory: ➤ ➤ (☞ p. 28)
  If the number is to also be used to send an SMS, save the number including the local area
code (dialling code).
• Dial a number: ➤ Press the Talk key
• Select the next number, if an SMS contains multiple numbers: ➤ . . . use ➤ to scroll down
  until the first number has disappeared from the display.

The + icon is not copied for international area codes.
➤ You should then enter "00" at the start of the number.

SMS with vCard
The vCard is an electronic business card. It is indicated by the icon in the SMS text. A vCard
can contain a name, home number, work number, mobile number and a birthday. Individual
entries in a vCard can be saved to the directory one after the other.

When reading an SMS containing the vCard: ➤ View ➤ Save
The directory is opened automatically. The number and name are copied. If a birthday is entered
on the vCard, the date is copied to the directory as an anniversary. If necessary, edit the entry in
the directory and save it. You will return to the vCard automatically.

SMS notification
Receive notifications of missed calls and/or new messages on the answer machine.
➤ ➤ . . . use ➤ select SMS ➤ OK ➤ ➤ Settings ➤ OK ➤ ➤ Notification ➤
Change (☐ on) . . . then
Enter number: ➤ To . . . use ➤ to enter the number to which the SMS should be sent
Missed calls: ➤ Missed calls ➤ . . . use ➤ to select On or Off
Save settings: ➤ Save

Do not enter your own fixed line network number for notification of missed calls. This
can create an endless loop that will incur charges.

SMS notification may incur additional costs.

SMS service centres
The number for at least one SMS service centre must be saved in the device to be able to send
SMS messages. The SMS service centre number can be obtained from the service provider.
SMS messages are received from every entered SMS service centre as long as they are registered
with their service provider.

Your SMS messages are sent via the SMS service centre that is entered as the active send centre.
However, you can activate any other SMS service centre as the active send service centre to send
a current message.
SMS (text messages)

Entering/changing the SMS service centre, setting the send service centre

- use \( \text{OK} \) to select SMS \( \text{OK} \) Settings \( \text{OK} \) Service Centres \( \text{OK} \) to select SMS service centre (\( \text{OK} \) = current send service centre) \( \text{Edit} \) then

Activate send service centre:

- Active Send: ... use \( \text{OK} \) to select Yes or No (Yes = SMS messages are sent via the SMS service centre)

For the SMS service centres 2 to 4, the setting only applies to the next SMS.

Enter the number of the SMS service:

- \( \text{SMS Service Centre Number} \) ... use \( \text{OK} \) to enter the number

Save settings: \( \text{Save} \)

If you have agreed a flat fixed line network rate, the chargeable numbers with dialling code 0900 are often blocked. If, in this case, a 0900 number is entered for the SMS service centre, you will not be able to send text messages from your phone. If the attempt to send fails, the SMS is saved in the incoming messages list and indicated as failed.

SMS to PABXs

- The Call Line Identification must be forwarded to the extension of the PABX (CLIP).
- If necessary, the access code/outside line code must be prefixed to the number of the SMS service centre (depending on your PABX). To test: Send an SMS to your own number, once with the access code and once without.
- If the SMS is sent without the extension number, it will not be possible for the recipient to answer directly.

Activating/deactivating first ring muting

Every incoming SMS is indicated by a single ring. If such a "call" is answered, the SMS is lost. To prevent this, mute the first ring for all external calls. In idle status:

- \( \text{OK} \) ... \( \text{OK} \) ... the current setting flashes in the input field (e.g. 1) ... then

Do not mute the first ringtone:

- \( \text{0} \) \( \text{OK} \)

Mute the first ringtone (default setting):

- \( \text{1} \) \( \text{OK} \)
SMS (text messages)

**SMS troubleshooting**

- **E0** Calling Line Identification permanently withheld (CLIR) or Calling Line Identification not activated.
- **FE** Error occurred while sending SMS.
- **FD** Connection to SMS service centre failed, see self-help.

**Self-help with errors**

**You cannot send messages**

- You have not requested the CLIP service (Calling Line Identification Presentation).
  - Ask your network provider to enable the feature.
- SMS sending was interrupted (e.g. by a call).
  - Re-send the SMS.
- The network provider does not support this feature.
- No number or an incorrect one has been entered for the send service centre.
  - Enter the number (\(\rightarrow\) p. 44).

**SMS text is incomplete**

- The phone's memory is full.
  - Delete old SMS messages.
- The network provider has not yet sent the rest of the SMS.

**You have stopped receiving SMS messages**

- Call divert has been activated for All calls.
  - Change call divert (\(\rightarrow\) p. 21).

**The SMS is played back**

- The "display call number" service is not activated.
  - Ask the network provider to enable this feature (subject to a fee).
- Your mobile phone operator and SMS service provider are not working in partnership.
  - Obtain information from your SMS service provider.
- The phone is not registered with the SMS service provider.
  - Send an SMS to register the phone for receiving SMS.
Resource Directory

Sounds for ringtones and images that can be used as caller pictures (CLIP pictures) or as a screensaver are saved in the handset’s resource directory. A range of monophonic and polyphonic sounds and pictures have been pre-set but further images and sounds can be downloaded using a PC (➔ Gigaset QuickSync).

Media types:

<table>
<thead>
<tr>
<th>Type</th>

Bluetooth

The handset is able to use Bluetooth™ to communicate wirelessly with other devices that also use this technology, e.g. for connecting a Bluetooth headset.

The following devices can be connected:

- A Bluetooth headset
  e.g. Gigaset ZX530 (www.gigaset.com/zx530)
  or Gigaset ZX830 (www.gigaset.com/zx830)

- Up to 5 data devices (PCs, tablets or mobile phones) for the transmission of address book entries as a vCard or for the exchange of data with the computer.
  In order for telephone numbers to be used further, the area code (international and local area code) must be saved to the telephone.

Operating Bluetooth devices ➔device user guides

Activating/deactivating Bluetooth mode

➤ . . . use to select Bluetooth OK Activation

➤ Change (¯ = activated)
  If the local area code is still not saved: . . . use to enter local area code OK

When in idle status, the activated Bluetooth mode is indicated on the handset by the icon.

Registering Bluetooth devices

The distance between the handset in Bluetooth mode and the active Bluetooth device (headset or data device) should not exceed 10 m.

The registration of a headset overwrites a previously registered headset.
If a headset is to be registered that is already registered with a different device, this connection must be deactivated before registering.

➤ . . . use to select Bluetooth OK Search for Headset / Search Data Device OK . . . the search starts (may take up to 30 seconds) . . . the names of found devices are displayed . . . possible options:

Register device: ➤ Options ➤ Trust Device OK ➤ . . . use to enter the PIN of the Bluetooth device to be registered OK . . . the device is added to the list of known devices
Bluetooth

Display information about a device:
- . . use Bluetooth on the device to select the device, if applicable — View — the device name and device address are displayed

Repeat search:
- Options — Repeat Search — OK

Cancel search:
- Cancel

Editing the list of known (trusted) devices

Open the list
- Bluetooth — OK — Known Devices — OK — the known devices are listed, an icon indicates the type of device
  - Bluetooth headset
  - Bluetooth data device

If a device is connected, the relevant icon is shown in the display header instead of .

Edit an entry
- . . use Bluetooth on the device to select Bluetooth — OK — Known Devices — OK — . . use Bluetooth on the device to select an entry — . . possible options:
  - View — the device name and device address are displayed
  - Press OK to go back

De-register a Bluetooth device:
- Options — Delete entry — OK

Edit name:
- Options — Edit Name — OK — . . use Bluetooth on the device to edit name — Save

If an active Bluetooth device is de-registered, it may try to re-connect as a "non-registered device".

Rejecting/accepting a non-registered Bluetooth device

If a Bluetooth device that is not registered in the list of known devices tries to connect to the handset, a prompt will appear asking you to enter the PIN of the Bluetooth device (Bonding).

Reject:
- Briefly press the End call key .

Accept:
- . . use Bluetooth on the device to enter the PIN of the Bluetooth device to be accepted — OK — . . Wait for PIN confirmation — then

Add the device to the list of known devices:
- Yes

Use the device temporarily:
- No — the Bluetooth connection can be used, as long as the device is located within transmission range or until it is switched off

Changing the Bluetooth name of the handset

The handset is shown by this name on another Bluetooth device.
- . . use Bluetooth on the device to select Bluetooth — OK — Own Device — OK — the name and the device address are shown — Change — . . use Bluetooth on the device to change the name — Save
Additional functions using the PC interface

The Gigaset QuickSync program has been installed on the computer.
Free to download at ➔ www.gigaset.com/quicksync

QuickSync functions:
• Sync the handset's directory with Microsoft® Outlook®
• Upload CLIP-pictures (.bmp) from the computer to the handset
• Upload pictures (.bmp) as screensavers from the computer to the handset
• Upload sounds (ringtone melodies) from the computer to the handset
• Update firmware
• Cloud synchronisation with Google™

› Connecting the handset to the computer via Bluetooth or via a USB data cable.

Connect the handset directly to the PC, not via a USB hub.

Transferring data

Data transfer using Bluetooth:
• The computer has Bluetooth capability.
• A USB data cable is not plugged in. If a USB data cable is plugged in during an existing Bluetooth connection, the Bluetooth connection is interrupted.

› Launch the Gigaset QuickSync program on the computer.
The message Data transfer in progress is shown on the display during data transfer between the handset and PC. During this time, it is not possible to enter any data using the keypad and incoming calls are ignored.
Additional functions using the PC interface

Carrying out a firmware update

- Connect the telephone and the PC using a USB data cable
- Launch Gigaset QuickSync
- Establish connection to the handset
- Start firmware update in Gigaset QuickSync

Information about this can be found in Gigaset QuickSync help feature.

The update process may take up to 10 minutes (not including download time).

⚠️ Do not interrupt the process and do not remove the USB data cable.

The data are first downloaded from the online update server. The time required for this depends on Internet connection speed.

The display on your telephone is switched off and the Message key and the Talk key will flash.

Once the update is complete, your telephone will automatically restart.

Procedure in the event of an error

If the update procedure fails or the telephone no longer functions properly after the update, repeat the update procedure:

- End the Gigaset QuickSync program on the PC
- Remove the USB data cable from the telephone
- Remove the battery
- Replace the battery
- Carry out the firmware update again as described above

If the update procedure fails more than once or it is no longer possible to connect to the PC, carry out the Emergency Update:

- End the Gigaset QuickSync program on the PC
- Remove the USB data cable from the telephone
- Remove the battery
- Press and hold keys 4 and 6 at the same time with the forefinger and middle finger
- Replace the battery
- Release keys 4 and 6 ... the Message key and the Talk key will flash alternately
- Carry out the firmware update as described above

ℹ️ Always save pictures and sounds uploaded onto the handset on the PC, as they are deleted during an Emergency Update.
Multiple handsets

Expanding the functionality of the telephone

Multiple handsets
Up to six handsets can be registered to the base station.
Each registered device is assigned an internal number (1 – 6) and an internal name (INT 1 – INT 6). The number or name assigned can be changed.
If all internal numbers have already been assigned at the base station: de-register a handset that is no longer needed

Registering the handset
A handset can be registered on up to four base stations.

Registration must be initiated on the base station and on the handset.
Both must be carried out within 60 secs.

On the base station
▷ Press and hold the Registration/Paging key on the base station (approx. 3 secs).

On the handset
▷  

Maximum possible number of handsets registered to the base station (all internal numbers assigned): The handset with the highest internal number is replaced by the new one. If this is not possible, because a conversation is being held on this handset, for example, the message No available internal number is given. De-register a handset that is no longer required and repeat the registration procedure
Multiple handsets

Registering a handset to multiple base stations
Your handset can be registered to up to four base stations. The active base station is the base station to which the handset was last registered. The other base stations remain saved in the list of available base stations.

- . . use to select Settings OK Registration OK Select Base OK . . possible options:
  - Change active base station:
    - . . use or Best Base to select base station Select
    - Best Base: The handset chooses the base station with the best reception as soon as it loses connection to the current base station.
  - Change name of a base station:
    - . . use to select a base station Select ( = selected)
    - Name change name Save

De-registering the handset
- . . use to select Settings OK Registration OK De-register Handset OK . . the handset being used is selected . . use to select a different handset if desired OK . . enter system PIN if desired OK . . Confirm de-registration with Yes

If the handset is still registered to other bases, it switches to the base with the best reception (Best Base).

Locating a handset (Paging)
- Briefly press the Registration/paging key on the base station.
  - All handsets will ring at the same time (“paging”), even if ringtones are switched off. Exception: handsets on which the baby monitor is activated.

Ending the search
- Briefly press the registration/paging key on the base station or Press the End call key on the handset or Press the display key Silence on the handset or No action. After approx. 30 seconds, the paging call will end automatically.
Changing the handset name and internal number

When registering multiple handsets, they will automatically be assigned the names "INT 1", "INT 2" etc. Each handset will automatically be assigned the lowest unassigned internal number. The internal number is shown as the name of the handset on the display e.g. INT 2. You can change the names and the numbers of handsets. The name must not exceed 10 characters in length.

¤ . . . the list of handsets is opened, the current handset is highlighted with < . . . use to select a handset . . . possible options:

   Edit name:
   ¦ Options ¦ Rename ¦ OK ¦ . . . use to delete the current name ¦ . . . use to enter a new name ¦ OK
   Edit number:
   ¦ Options ¦ Edit Handset No. ¦ OK ¦ . . . use to select a number ¦ Save

Repeater

A repeater increases the receiving range between the Gigaset handset and the base station.

The registration procedure for a repeater depends on the version of the repeater being used.

• Repeater without encryption, e.g. Gigaset repeater prior to Version 2.0
• Repeater with encryption, e.g. Gigaset repeater later than Version 2.0

Further information about the Gigaset repeater can be found in the repeater user guide and at www.gigaset.com/gigasetrepeater.

Repeater without encryption

Activate Maximum Range/deactivate No Radiation

¤ . . . use to select Settings ¦ OK ¦ ECO DECT ¦ OK ¦ Maximum Range ¦ Change ( = on) ¦ No Radiation ¦ Change ( = off)

Deactivate encryption

¤ . . . use to select Settings ¦ OK ¦ System ¦ OK ¦ Encryption ¦ Change ( = deactivated)

Registering a repeater

¤ Connect the repeater to the mains power supply ¦ Press and hold the Registration/paging key on the telephone base station (min. 3 secs) . . . the repeater is automatically registered

It is possible to register more than one Gigaset repeater.
Repeater with encryption

Encryption is activated (default setting).

Registering a repeater

- Connect the repeater to the mains power supply  
- Press and hold the Registration/paging key on the telephone base station (min. 3 secs) . . . the repeater is automatically registered

Up to 2 repeaters may be registered.

The ECO DECT function Maximum Range is activated and the No Radiation function is deactivated. The settings cannot be changed whilst the repeater is registered.

As soon as a repeater is registered, it will appear in the repeater list under

Settings  System  Repeater

De-registering a repeater

. . . use to select Settings  OK  System  OK  Repeater  OK  . . . use to select repeater  De-reg.  Yes

Operation with a router

When operating on the analogue connection of a router, any echoes that may occur can be reduced by activating XES mode 1 (XES = eXtended Echo Suppression).

If the XES mode 1 does not sufficiently suppress the occurring echoes: activate XES mode 2.

. . . press one of the following keys

0 7  OK  Normal mode
1 7  OK  XES mode 1
2 7  OK  XES mode 2

If there are no problems with echoes, the normal mode (factory settings) should be activated.
Operation with a PABX

To find out which settings are required for a PABX, please refer to the PABX user guide. You cannot send or receive SMS messages on PABXs that do not support Calling Line Identification.

Setting Tone or Pulse dialling mode

- Use to select Settings > OK > Telephony > OK > Dialling Mode > OK
- Use to select Tone or Pulse > Select ( = selected)

Setting the flash time

- Use to select Settings > OK > Telephony > OK > Recall > OK
- Possible flash times are listed
- Use to select flash time > Select ( = selected)

Saving an access code (outside line code)

Setting the access code (e.g. "0") for dialling using the fixed line network.

- Use to select Settings > OK > Telephony > OK > Access Code > OK
- Fixed line network: Access external line with: Use to enter or change access code, max. 3 digits
- Rule: For use to select when the access code should be dialled
  - Call Lists: The access code will only prefix numbers from a list (list of answered calls, list of missed calls, SMS list).
  - All calls: The access code prefixes all numbers dialled.
  - Off: The access code is deactivated and does not prefix any telephone number.
- Save: Save

The access code never prefixes any SMS service centre numbers.
Operation with a PABX

Setting pauses

¤ · · · · 0 5 · · · · · · then

Pause after line seizure:
- 1 sec
- 3 secs
- 7 secs

Pause after Recall key:
- 800 ms
- 1600 ms
- 3200 ms

Dialling pause (pause after access code):
- 1 sec
- 2 secs
- 3 secs
- 6 secs

To enter dialling pause when dialling:
¤ Press and hold the Hash key · · · · a P appears in the display.

Switching temporarily to tone dialling (Tone)

After dialling the external number or after establishing the connection:
¤ Press the Star key · · · briefly.

After the call ends, pulse dialling is automatically reactivated.
Handset

Adjusting the telephone settings

Handset

Changing the language

- Use [Settings] > [OK] > [Language] > [OK] > [Select] (selected)

If the handset has been set to an incomprehensible language:

- Press the keys 9 5 slowly one after the other > [Select] to select the correct language > press the right display key

Display and keypad

Screensaver

A digital or analogue clock and a range of pictures can be selected to be displayed as a screensaver when in idle status.

- Use [Settings] > [OK] > [Display & Keypad] > [OK] > [Edit] (on) > then

  Switch on/off:
  - Activation: ... use [Select] to select On or Off

  Select screensaver:
  - Selection > ... use [Select] to select a screensaver (Digital Clock / Analog Clock / <Pictures> / Slideshow)

  View screensaver:
  - View

  Save selection:
  - Save

The screensaver is activated approx. 10 seconds after the display has changed to idle status.

- All pictures from the Screensaver folder of the Resource Directory are available for selection.

End screensaver

- Press the End call key briefly ... the display changes to idle status

Large font

Show text and icons in call lists and in the directory in a larger size in order to improve legibility. Only one entry is shown in the display and names are abbreviated if necessary.

- Use [Settings] > [OK] > [Display & Keypad] > [OK] > [Large Font] > [Change] (on)
**Handset**

**Colour scheme**
The display may appear in a range of colour combinations.

- ... use ➔ to select ➔ Settings ➔ OK ➔ Display & Keypad ➔ OK ➔
- ➔ Colour Schemes ➔ OK ➔ ... use ➔ to select the desired colour scheme ➔
- Select (☐ = selected)

**Display backlight**
The display backlight always illuminates when the handset is taken out of the base station/charging cradle or when a key is pressed. Any digit keys that are pressed appear on the display for pre-dialling.

Switch the display backlight on/off when in idle status:

- ... use ➔ to select ➔ Settings ➔ OK ➔ Display & Keypad ➔ OK ➔ ➔
  Display Backlight ➔ OK ... then
  - In Charger: ... use ➔ to select On or Off
  - Backlight when not in the charging cradle:
    - ➔ Out of Charger ➔ ... use ➔ to select On or Off
  - Save selection: ➔ Save

The handset’s standby time may be significantly reduced if the display backlight is switched on.

**Keypad illumination**
You can set the brightness of keypad illumination in 5 increments.

- ... use ➔ to select ➔ Settings ➔ OK ➔ Display & Keypad ➔ OK ➔ ➔
  Key Illumination ➔ OK ➔ ... use ➔ to select Brightness (1 - 5) ➔ Save

**Activating/deactivating automatic keypad lock**
Automatically lock the keypad when the handset has been in idle status for around 15 seconds.

- ... use ➔ to select ➔ Settings ➔ OK ➔ Display & Keypad ➔ OK ➔ ➔
  Auto Keypadlock ➔ Change (☑ = on)
Handset

Activating/deactivating Auto Answer
When set to Auto Answer, the handset accepts an incoming call as soon as it is removed from the charging cradle.

Regardless of the Auto Answer setting, the connection ends as soon as you place the handset back in the charging cradle. Exception: Press and hold the handsfree key for a further 2 seconds while placing the handset in the charging cradle.

Changing the earpiece and handsfree volume
You can set the volume of the earpiece and speaker at 5 levels independently of each other.

Changes are only saved permanently in Profile Personal.

During a conversation
- Handset Volume . . . use to select volume Save . . . the setting is saved

Without saving, the setting is automatically saved after around 3 seconds.

In idle status
- Volume . . . then
  For the earpiece: Earpiece: . . . use to set the volume
  For the speaker: Speaker . . . use to set the volume
  Save settings: Save

Earpiece and handsfree profile
Select a profile for the earpiece and handsfree mode in order to adapt the telephone as much as possible to the surroundings. Check which is the most comfortable profile for you and your caller.

Earpiece Profiles: High or Low (default setting)
Handsfree Profiles: Profile 1 (default setting) . . . Profile 4

< C Save
Changing the system PIN

Secure the telephone's system settings with a system PIN. You have to enter the system PIN when you register or de-register a handset, change local network settings, perform a firmware update or reset the phone to default settings.

Change the telephone's 4-digit system PIN (default setting: 0000):

- . . . use \( \) to select \( \) Settings \( \rightarrow \) OK \( \rightarrow \) System \( \rightarrow \) OK \( \rightarrow \) System PIN \( \rightarrow \) OK . . . use \( \) to enter the current PIN (if other than 0000) \( \rightarrow \) OK . . . use \( \) to enter new system PIN \( \rightarrow \) Save

Resetting system PIN

Resetting the base station to the original PIN 0000:

- Unplug the network cable from the base station . Press and hold the Registration/Paging key on the base station . At the same time reconnect the network cable to the base station . Press and hold the key for at least 5 secs . . . the base station is reset and the system PIN is set to 0000

All handsets are de-registered and must be re-registered. All settings are returned to default settings.

Restoring the phone to default settings

When the settings are reset

- the date and time are retained,
- handsets are still registered,
- the system PIN is retained,
- Maximum Range is activated and No Radiation is deactivated.

- . . . use \( \) to select \( \) Settings \( \rightarrow \) OK \( \rightarrow \) System \( \rightarrow \) OK \( \rightarrow \) Base Reset \( \rightarrow \) OK . . . use \( \) to enter system PIN \( \rightarrow \) OK \( \rightarrow \) Yes . . . the base station is restarted. The restart takes around 10 seconds.
Appendix

Questions and answers
Possible solutions are available online at www.gigaset.com/faq

Troubleshooting

The display is blank.
• The handset is not activated. Press and hold the button.
• The battery is empty. Charge the battery or replace it

"No Base" flashes on the display.
• The handset is outside the range of the base station. Move the handset closer to the base station.
• The base is not activated. Check the base station power adapter.
• The base station’s range is reduced because Maximum Range is deactivated.
  ✴ Activate Maximum Range or reduce the distance between the handset and base station

"Please register handset" flashes on the display.
• The handset has not yet been registered or was de-registered due to the registration of an additional handset (more than 6 DECT registrations). Re-register the handset

Your settings are not accepted.
• The wrong profile has been set. Set Profile Personal, then make changes to the device settings.

The handset does not ring.
• The ringtone is deactivated. Activate ringtone.
• Call forwarding is set. Deactivate call forwarding.
• The phone does not ring if the caller has withheld his number.
  ✴ Activate the ringtone for anonymous calls.
• The phone does not ring during a specific period or for certain numbers.
  ✴ Check the time control for external calls.

No ringtone/dial tone from the fixed line network.
• Incorrect phone cable. Please always use the phone cable supplied or ensure that the pin connections are correct when purchasing from a retailer.

The connection always terminates after approx. 30 seconds.
• A repeater (earlier than Version 2.0) has been activated or deactivated. Switch the handset off and back on again.

Error tone sounds after system PIN prompt.
• You have entered the wrong system PIN. Repeat the process, reset the system PIN to 0000 if required

Forgotten system PIN.
✴ Reset the system PIN to 000

The other party cannot hear you.
• The handset is "muted". Activate the microphone again

Some of the network services do not work as specified.
• Features are not enabled. Contact the network provider for details.
Questions and answers

The caller's number is not displayed.

- **Calling Line Identification** (CLI) is not enabled for the caller.  The caller should ask the network provider to enable Calling Line Identification (CLI).
- **Calling Line Identification Presentation** (CLIP) is not supported or enabled by the network provider.  Ask the network provider to enable Caller Line Identification Presentation (CLIP).
- The telephone is connected via a PABX or a router with an integrated PABX (gateway) that does not transmit all information.
  - Reset the system: Briefly pull out the power plug. Reinsert the plug and wait until the device restarts.
  - Check the settings on the PABX and activate phone number display, if necessary. To do this, search for terms such as CLIP, calling line identification, telephone number identification, caller ID, ... in the system user guide or ask the system manufacturer.

You hear an error tone when keying in (descending tone sequence).

- Action has failed/invalid input.  Repeat the process. Read the display and refer to the user guide if necessary.

You cannot listen to messages on the network mailbox.

- Your PABX is set to pulse dialling.  Set your PABX to tone dialling.

No time is specified for a message in the call list.

- Date/time are not set.  Set the date/time.

Registration or connection problems with a Bluetooth headset.

- Reset the Bluetooth headset (see headset user guide).
- Delete the registration data on the handset by de-registering the device.
- Repeat the registration procedure.

Service Greece +30 2111 98 1778
(0.026 € per minute from the Greek phone network. For calls from mobile phone networks, other prices may apply.)
Please have your proof of purchase ready when calling.

Please note that if the Gigaset product is not sold by authorised dealers in the national territory the product may not be fully compatible with the national telephone network. It is clearly specified on the box near the CE mark for which country/countries the equipment has been developed. If the equipment is used in a manner inconsistent with this advice or with the instructions of the manual and on the product itself, this may have implications on the conditions for warranty or guarantee claims (repair or exchange of product).

In order to make use of the warranty, the product purchaser is asked to submit a receipt which proves the date of purchase (date from which the warranty period starts) and the type of goods that have been purchased.
Customer Service & Assistance

Guarantee Certificate
Without prejudice to any claim the user (customer) may have in relation to the dealer, the customer shall be granted a manufacturer's Guarantee under the conditions set out below:

- In the case of new devices and their components exhibiting defects resulting from manufacturing and/or material faults within 24 months of purchase, Gigaset Communications shall, at its own option and free of charge, either replace the device with another device reflecting the current state of the art, or repair the said device. In respect of parts subject to wear and tear (e.g., batteries, keypads, casings), this warranty shall be valid for six months from the date of purchase.
- This Guarantee shall be invalid if the equipment defect is attributable to improper treatment and/or failure to comply with information contained in the user manuals.
- This Guarantee shall not extend to services performed by the authorised dealer or the customer themselves (e.g. installation, configuration, software downloads). User manuals and any software supplied on a separate data medium shall be excluded from the Guarantee.
- The purchase receipt, together with the date of purchase, shall be required as evidence for invoking the Guarantee. Claims under the Guarantee must be submitted within two months of the Guarantee default becoming evident.
- Ownership of devices or components replaced by and returned to Gigaset Communications shall vest in Gigaset Communications.
- This Guarantee shall apply to new devices purchased in the European Union. The Guarantee is issued by Gigaset Communications Austria GmbH, Businesspark Maximum Objekt 2 / 3.Stock, Modecenterstraße 17, 1110 Vienna, Austria.
- Any claims that differ from or extend beyond these mentioned in this manufacturer's warranty shall be excluded, except from cases expressly specified in the applicable law. (In no event shall Gigaset Communications be liable for any loss of business, profits or data, additional software loaded by the customer or other information. The customer shall also bear the responsibility for the creation of backup copies of their files. The limitation of liability shall not apply if and to the extent liability is mandatory under the applicable law, e.g. according to product liability law or in the event of intentional misconduct, severe negligence, personal injury, damage to parts of the human body or to personal health, or in case of violations of conventional obligations. However, the claims for damages related to violation of conventional obligations shall be limited to predictable damages, representative of such conventions, as long as there is no intention or severe negligence, personal injury, damage to parts of the human body or to personal health, according to the product liability law.)
- The duration of the Guarantee shall not be extended by services rendered under the terms of the Guarantee.
- Insofar as no Guarantee default exists, Gigaset Communications reserves the right to charge the customer for replacement or repair.
- The above provisions do not imply a change in the burden of proof to the detriment of the customer.

To invoke this Guarantee, please contact the Gigaset Communications telephone service. The relevant number is to be found in the accompanying user guide.

Exclusion of liability
Your handset's display consists of pixels. Each pixel consists of three sub-pixels (red, green, blue). It may be the case that a sub-pixel is missing or has a colour deviation. A warranty claim is only valid if the maximum number of permitted pixel errors is exceeded.

<table>
<thead>
<tr>
<th>Description</th>
<th>Maximum number of permitted pixel errors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colour illuminated sub-pixels</td>
<td>1</td>
</tr>
<tr>
<td>Dark sub-pixels</td>
<td>1</td>
</tr>
<tr>
<td>Total number of coloured and dark sub-pixels</td>
<td>1</td>
</tr>
</tbody>
</table>

Signs of wear on the display and casing are excluded from the warranty.
Manufacturer's advice

Authorisation
This device is intended for analogue phone lines in the Greek telephone net.
Country-specific requirements have been taken into consideration.
We, Gigaset Communications GmbH, declare that this device meets the essential requirements and other relevant regulations laid down in Directive 1999/5/EC.
The EC declaration of your country according to 1999/5/EC can be found at: www.gigaset.com/docs.
This declaration could also be available in the "International Declarations of Conformity" or "European Declarations of Conformity" files.
Therefore please check all of these files.

Environment

Our environmental statement
We at Gigaset Communications GmbH are aware of our social responsibility. That is why we actively take steps to create a better world. In all areas of our business – from product planning and production to sales and waste of disposal – following our environmental conscience in everything we do is of utmost importance to us.
Learn more about our earth-friendly products and processes online at www.gigaset.com.

Environmental management system
Gigaset Communications GmbH is certified pursuant to the international standards ISO 14001 and ISO 9001.
ISO 14001 (Environment): Certified since September 2007 by TÜV SÜD Management Service GmbH.
ISO 9001 (Quality): Certified since 17/02/1994 by TÜV SÜD Management Service GmbH.

Disposal
Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority.
All electrical and electronic equipment must be disposed of separately from general household waste using the sites designated by local authorities.

If a product displays this symbol of a crossed-out rubbish bin, the product is subject to European Directive 2002/96/EC.
The appropriate disposal and separate collection of used equipment serve to prevent potential harm to the environment and to health. They are a precondition for the re-use and recycling of used electrical and electronic equipment.
For further information on disposing of your used equipment, please contact your local authority or your refuse collection service.
Manufacturer's advice

Care
Wipe the device with a damp cloth or an antistatic cloth. Do not use solvents or microfibre cloths. **Never** use a dry cloth; this can cause static.

In rare cases, contact with chemical substances can cause changes to the device's exterior. Due to the wide variety of chemical products available on the market, it was not possible to test all substances. Impairments in high-gloss finishes can be carefully removed using display polishes for mobile phones.

Contact with liquid

If the device comes into contact with liquid:

1. **Disconnect the power supply.**
2. **Remove the batteries and leave the battery compartment open.**
3. **Allow the liquid to drain from the device.**
4. **Pat all parts dry.**
5. **Place the device in a dry, warm place** for at least 72 hours **(not** in a microwave, oven etc.) with the battery compartment open and the keypad facing down (if applicable).
6. **Do not switch on the device again until it is completely dry.**

When it has fully dried out, you will normally be able to use it again.
Technical data

Battery
Technology: Lithium ion (Li-Ion)
Voltage: 3.7 V
Capacity: 750 mAh

Handset operating times/charging times
The operating time of your Gigaset depends on the capacity of the battery, its age and the way it is used.
(All times are maximum possible times.)

<table>
<thead>
<tr>

<td>2.5</td>
</tr>
</tbody>
</table>

* No Radiation deactivated/activated, without display backlight in idle status
(Setting the display backlight ➔ p. 59)

The telephone operating times will increase if a more efficient battery is used.

Base power consumption
Standby: approx. 0.5 W
During a call: approx. 0.6 W
