

How can I dial from the Calls List list via the menus?

1. Open the menu, press control key  (on the dark displayed side).

2. Select "Base Settings", press control key  and confirm with display key **OK**.

3. Select "Missed calls" or "Accepted calls" with display key **↓** or **↑**. Confirm with display key **OK**.

4. Select the required call with display key **↓** or **↑**. Confirm with display key **OK**.

5. Select "Dial number" with display key **↓** or **↑**. Confirm with display key **OK**.

The call number is dialled. If a call is established in this way the entry is automatically deleted from the relevant Calls list.

It is possible to dial from the Calls List list before or after the off-hook key  is pressed (the menu item "Base Settings" is no longer used).
