Safety precautions

Read the safety precautions and the user guide before use.

The device cannot be used in the event of a power failure. In case of a power failure it is also **not** possible to make **emergency calls**.

Emergency numbers **cannot** be dialled if the **keypad/display lock** is activated!

Use only **rechargeable batteries** that correspond to the **specification** (see list of permitted batteries [www.gigaset.com/service](http://www.gigaset.com/service)). Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. Rechargeable batteries, which are noticeably damaged, must be replaced.

The handset must not be operated if the battery cover is open.

Do not use the devices in environments with a potential explosion hazard (e.g. paint shops).

The devices are not splashproof. For this reason do not install them in a damp environment such as bathrooms or shower rooms.

Use only the power adapter indicated on the device.

Whilst charging, the power socket must be easily accessible.

Remove faulty devices from use or have them repaired by our Service team, as these could interfere with other wireless services.

Do not use the device if the display is cracked or broken. Broken glass or plastic can cause injury to hands and face. Send the device to our Service department to be repaired.

Do not hold the rear of the handset to your ear when it is ringing or when speaker mode is activated. Otherwise you risk serious and permanent damage to your hearing.

The phone may cause interference in analogue hearing aids (humming or whistling) or cause them to overload. If you require assistance, please contact the hearing aid supplier.

Keep small cells and batteries, which can be swallowed, out of the reach of children. Swallowing a battery can lead to burns, perforation of soft tissue and death. Severe burns can occur within 2 hours of swallowing. In the case of a swallowed cell or battery, seek medical care immediately.

Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.g. doctor’s surgery. If you use a medical device (e.g. a pacemaker), please contact the device manufacturer. They will be able to advise you regarding the susceptibility of the device to external sources of high frequency energy (for the specifications of your Gigaset product see “Technical data”).
Getting started

Package contents
- One base, one power adapter, one phone cable
- One handset, one charging cradle with power adapter, two batteries, one battery cover and one user guide
Models with multiple handsets, per handset:
- One handset, one charging cradle with power adapter, two batteries and one battery cover

The base and charging cradle are designed for use in closed, dry rooms within a temperature range of +5°C to +45°C.

Position the base on a level, non-slip surface at a central point in the flat or house. The device's feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on furniture, contact marks on the surfaces cannot be completely ruled out.

Never expose the telephone to heat sources, direct sunlight or other electrical devices. Protect your telephone from moisture, dust, corrosive liquids and vapours. This device is only suitable for a maximum installation height of 2 m.

Base

- Insert the phone plug into the connection socket 1 on the back of the base until it clicks into place.
- Insert the power cable from the power adapter into the connection socket 2.
- Plug in the power adapter 3 and phone connector 4.

If connecting to a router:
- Plug the phone connector into the phone connector socket on the router 4a.

The network cable must always be connected in order to function, as the phone will not operate without a power supply.
Getting started

Handset

Connect the charging cradle

- Connect the flat plug of the power adapter
- Plug the power adapter into the socket

To remove the plug from the charging cradle again:
- Press the release button
- Pull out the plug.

Setting up the handset for use

The display is protected by a plastic film. Please remove the protective film.

Inserting the batteries

Only use rechargeable batteries, as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the batteries could be damaged beyond repair or the batteries could explode. The device could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

- Insert the batteries with the polarity in the right direction (refer to the picture for +/- positions).
- Fit the battery cover from the top.
- Push the cover closed until it clicks into place.

To re-open the battery cover:
- Grip the notch on the cover and slide it downwards.

Charging the batteries

- Prior to initial use, fully charge the batteries in the charging cradle.

The batteries are fully charged when the battery icon disappears from the display.

Batteries can heat up during the charge process. This is not dangerous.

Over time, the charging capacity of the batteries will decrease for technical reasons.
Getting started

Setting up and registering a handset
When you switch on the handset for the first time, an installation assistant starts automatically, with which you can select the language and country (if available), and register the handset to a base.

Selecting the language
- Select the required language ▶ OK ... The language selected is set as the display language

Selecting the country (if available)
- Select the country where you use the phone ▶ OK ... Country-specific settings are configured

Registering a handset
Handsets in the packaging have already been registered to the base. In such cases, the installation assistant is ended and the idle display is shown.
If a handset is not yet registered, it now switches to Register mode.

On the base
- Press and hold the Register/Paging key on the base for about 3 seconds.
Once registration is complete, the handset returns to idle mode.

Cancelling the register process: ▶ Press the End call key

The phone is now ready for use.

If the assistant is interrupted, such as by an incoming call or because the charge level is too low, the installation assistant restarts as soon as the handset is back in idle mode.

Manually registering a handset: ➔ p. 32
Using the phone

Switch the handset on and off

Switching on: When the handset is switched off, press and hold the End call key.
Switching off: When the handset is in idle mode, press and hold the End call key.

When you place a switched off handset into the charging cradle, it switches itself on automatically.

Lock/unlock the keypad

The keypad lock prevents any accidental use of the phone.

Lock/unlock the keypad: Press and hold
Keypad lock enabled: The symbol is shown on the display

If a call is indicated on the handset, the keypad automatically unlocks and you can accept the call. It then locks again when the call is finished.

It is also not possible to call emergency numbers when keypad lock is enabled.

Control key

The control key enables you to navigate the menus and input fields, and also to call up certain functions depending on the situation.

In the description below, the side of the control key is marked with an arrow (up, down, left, right) that must be pressed in the different operating situations, e.g. for “press right on the control key”.

Using the phone

Display

Display keys
The display keys perform a range of functions depending on the operating situation.

› Press the display key ... Function shown in display above.

Changing the assignment of the right display key in idle mode
› Press and hold the right display key ➤ Select the function ➤ OK

Display functions accessed from the control key

- ➤ Menu Open the main menu / submenu
- OK Confirm menu function / save entry
- ➤ Menu Back one menu level
- OK Delete character by character to the left
- ➤ Menu Access the call list / message list

- ➤ to scroll up/down and set the volume
- OK Move the cursor left and right with
Using the phone

### Status bar

Icons display current settings and the status of the phone.

- ![Keypad lock activated](image)
- ![Ringtone deactivated](image)

### Radio contact between the base and handset

- ![Good to poor](image)
- ![No reception](image)
- ![ECO DECT mode No Radiation enabled](image)

### Answer machines

- ![Local answer machine switched on (if available)](image)

### Battery charge level

- ![0 - 10%](image)
- ![11 - 33%](image)
- ![34 - 66%](image)
- ![> 66%](image)

The symbol is shown at the front during the charge process.

- ![Flashing Battery almost flat (less than 10 minutes of talk time)](image)

### Menu navigation

The functions of your phone are displayed in a menu comprising several levels. Menu overview:

- When the phone is in **idle**, press the Display key **Menu** or the control key **Menu** (right) ... the menu opens.
- Use the control key **Menu** to scroll to the function required. Confirm with **OK**

Back one level: Press the **key or briefly press the End call key**

Return to idle: Press and **hold** the End call key

The display automatically returns to idle mode after two minutes of inactivity.
Making calls

Making calls

Making a call

- Enter the number ➤ Press the Talk key ➤ The number is dialled

or

- Press and hold the Talk key ➤ The dial tone can be heard ➤ Enter the number

To change the receiver volume during a call: ➤ Use ➤ Set the volume

Ending a call / cancelling dialling: ➤ Press the End call key

You can automatically prefix every number with a network provider prefix (Preselection).

Dialling from the directory

- Open the directory with ➤ Scroll to the required entry ➤ Press the Talk key

Or

- Open the directory with ➤ Enter the first letter of the name ➤ The first entry matching the input is displayed ➤ Scroll as needed to the entry required ➤ Press the Talk key

Dialling from the redial list

The list contains the 10 numbers last dialled with the handset.

- Press briefly ➤ Select entry ➤

Managing entries in the redial list

- Press briefly ➤ Select ➤ Menu ➤ Select function ➤ OK

Possible functions: Use Number / Copy to Directory / Delete Entry / Delete List

Dialling from the call list

Open the call list: ➤ Press the Display key ➤ Call List ➤ OK

➤ Scroll to the required entry and press the ➤ Talk key

Dialling with speed dial key

Entries from the directory are assigned to keys 2 to 9.

- Press and hold the quick dial key to which the required number is assigned
Making calls

One touch call
A predefined number is dialled by pressing any key. This allows children, who are unable to enter a number, to call a certain number for example.
Enabling one touch call mode:

1. Menu ➤ Call Manager ➤ OK ➤ One Touch Call ➤ OK ➤ Activation ➤ OK ➤ 
   Enter the number or use 1 to take it from the directory ➤ OK (✓ = enabled)

Make a one touch call: ➤ Press any key ... the saved number is dialled
Cancel dialling: ➤ Press the End call key
End one touch call: ➤ Press and hold the # key

Accepting a call
The handset indicates an incoming call by ringing and by a display on the screen.

Press the Talk key
Function Auto Answer enabled: Simply take the handset out of the charging slot

Enabling function Auto Answer:

1. Menu ➤ Settings ➤ OK ➤ Telephony ➤ OK ➤ Auto Answer ➤ OK
   (✓ = enabled)

Switch the ringtone off: ➤ Mute ... The call can continue to be accepted whilst it is being shown on the display

Handsfree mode
In handsfree mode, you switch on the loudspeaker so that you can hear the caller without holding the handset to your ear.

Enabling/disabling handsfree mode during a call and when listening to the answer machine:

Press the handsfree key

Placing the handset in the charging cradle during a call:

Press and hold down the Handsfree key ➤ Place the handset into the charging cradle

Adjusting the loudspeaker volume:

1. Menu ➤ Audio Settings ➤ OK ➤ Call Volume ➤ OK ➤ Handsfree ➤ OK ➤
   Use ➤ to adjust the volume ➤ OK

Muting

During a call, press the control key (right) ... The handset microphone is switched off
Making calls

Making internal calls

Internal calls are free calls to other handsets registered to the same base.

Calling a specific internal subscriber:

- when more than two handsets are registered: Use \( \) to select the internal subscriber \( \) OK oder \( \) . . . The handset selected is called

Calling all handsets ("group call"):

- Press and hold or \( \) \( \) \( \) \( \) \( \) \( \) \( \) \( \) \( \) . . . All registered handsets are called. You speak to the first internal subscriber to pick up.

Ending the internal call: \( \) Press the End call key \( \) .

Making an internal consultation call / Forwarding a call

Call an external subscriber and transfer the call to an internal subscriber or hold a consultation call with him or her.

- Select as required the handset or Call All \( \) OK . . . The internal subscriber(s) is/are called, the external subscriber hears music on hold

Possible options:

- Hold a consultation call: \( \) Speak to the internal subscriber
- Return to the external call: \( \) Press the Display key \( \)
- Transfer the external call when the internal subscriber has answered:
  - Announce an external call \( \) Press the End call key \( \)
- Transfer the external call before the internal subscriber answers:
  - Press the End call key \( \) . . . The external call is forwarded immediately
Making calls

Listening in to an external call
You are holding an external call. An internal subscriber can listen in to this call and take part in the conversation (conference).

![The Listening-In function is enabled.]

Enabling/disabling internal listening in

- Menu > Settings > OK > Telephony > OK > Listening-In > OK

(= enabled)

Initiating an internal conference call
You want to join an existing external call on a different handset.
- Press and hold the Talk key . . . All subscribers hear a signal tone

Ending a conference call:
- Press the End call key . . . All subscribers hear a signal tone

When the first internal subscriber presses the End call key , the handset which joined the conference call remains connected to the external subscriber.

Calling Line Identification
During a call, the caller’s number is transferred (CLI = Calling Line Identification) and can be displayed on the recipient’s display (CLIP = CLI Presentation). When the caller’s number is withheld, it is not show on the called party’s display. The call is made anonymously (CLIR = CLI Restriction).

![You have authorised your network provider to show the number of the caller (CLIP) on your display.
The caller has authorised the network provider to send the phone number (CLI).]

Caller display for incoming calls

Calling Line Identification
The caller’s phone number is displayed. If the caller’s number is saved in the directory, the name is displayed.

No Calling Line Identification
Instead of name and number, the following is displayed:

- **External Call**: No number is transferred.
- **Withheld**: Caller has withheld Calling Line Identification.
- **Unavailable**: Caller has not authorised Calling Line Identification.
Making calls

Automatic network provider selection (preselection)

You can store a Call-by-Call number (preselection number), which automatically prefixes the number you dial. If you want to make calls abroad through a particular network provider for example, you can store its prefix here.

In the With Preselect list, enter the (initial digits of the) prefix numbers for which you want to use the preselection number.

In the Without Presel. list, enter the exceptions to the With Preselect list.

Example:

<table>
<thead>
<tr>
<th>Presel. Number</th>
<th>0999</th>
</tr>
</thead>
<tbody>
<tr>
<td>With Preselect</td>
<td>08</td>
</tr>
<tr>
<td>Without Presel.</td>
<td>081 084</td>
</tr>
</tbody>
</table>

All numbers beginning with 08, with the exception of 081 and 084, are dialled using preselection number 0999.

<table>
<thead>
<tr>
<th>Number</th>
<th>Selected number</th>
</tr>
</thead>
<tbody>
<tr>
<td>07112345</td>
<td>07112345</td>
</tr>
<tr>
<td>08912345</td>
<td>0999 08912345</td>
</tr>
<tr>
<td>08412345</td>
<td>08412345</td>
</tr>
</tbody>
</table>

Entering a preselection number

- Menu ➔ Settings ➔ OK ➔ Telephony ➔ OK ➔ Preselection ➔ OK ➔ Enter the number or use number from directory ➔ OK

Create list of prefix numbers with preselection

- Menu ➔ Settings ➔ OK ➔ Telephony ➔ OK ➔ Preselection ➔ OK ➔ With Preselect ➔ OK ➔ Select the list entry (1 – 11) ➔ OK ➔ Enter (the initial digits of) the prefix number for which the preselection number is to be used ➔ OK ➔ Select different list entry as required and enter more numbers

Create list of prefix numbers without preselection

- Menu ➔ Settings ➔ OK ➔ Telephony ➔ OK ➔ Preselection ➔ OK ➔ Without Presel. ➔ OK ➔ Select the list entry (1 – 11) ➔ OK ➔ Enter the exceptions for the With Preselect list ➔ OK ➔ Select another list entry as required and enter more numbers

Disabling preselection permanently

- Menu ➔ Settings ➔ OK ➔ Telephony ➔ OK ➔ Preselection ➔ OK ➔ Presel. Number ➔ OK ➔ Clear the preselection number with the Display key ➔ OK
Call/message lists

The phone saves information about various events in lists:
- Call list: Numbers of all incoming and missed calls
- Answer machine list: Messages on the local answer machine (if available)
- Network mailbox list: Messages on the network mailbox

An advisory tone sounds as soon as a new entry appears on one of the lists. The default setting is the message key flashing (= left display key) and the following shown on the display:

+ number for missed calls
+ number for new voice messages

Disabling the display of new messages

- Menu ➤ Settings ➤ Telephony ➤ Call list type ➤ Missed Calls / All Calls ➤ OK (selected)

Setting the actions for new messages:

- Press key 5 for missed calls
- Press key 7 for messages on the local answer machine (if available)/network mailbox

Save setting: ✔ OK

A change to the setting only becomes effective once the next new message is received.

If calls are stored in the network mailbox, you receive a message when the setting is configured (dependent on the network provider).

Call list

Prerequisite: CLIP

Depending on the type of list set, all numbers for the last 25 incoming calls are saved, or only the missed calls are saved.

Setting the list type

Menu ➤ Settings ➤ OK ➤ Telephony ➤ OK ➤ Call list type ➤ OK ➤ Missed Calls / All Calls ➤ OK (selected)
Call/message lists

Opening the call list
- Press the display key \[\text{...}\] The list selection is opened \[\text{Call List}\]
The entry shows: number of new entries + number of old, read entries
Open list: \[\text{OK}\] ... The last incoming call is displayed
- Use \[\text{...}\] to scroll through the list

Using other functions
- \[\text{Select entry} \text{Menu} \text{...} \text{to select the function:}\]
  - Delete Entry: Delete current entry
  - Copy to Dir.: Copy an entry to the directory
  - Copy to Blacklist: Copy a number to the black list
  - Delete List: Delete all entries
  - Note: All old and new entries are deleted

Message list
You can listen to messages on the answering machine (if available) or the network mailbox. from
the answering machine list / network mailbox list.
Open the answer machine list:
- Press the Display key \[\text{...}\] The list selection is opened \[\text{Voice Mail}\] \[\text{OK}\]
Open the network mailbox list:
- Press the Display key \[\text{...}\] The list selection is opened \[\text{Network Mailbox}\] \[\text{OK}\]
Directory

The local directory is unique to a handset. Entries can be sent to other handsets however (p. 22).

Up to 150 phone numbers (max. 30 digits) with associated names (max. 16 characters) can be stored.

Open the directory: Press down the control key or:

Menu  Directory  OK

Creating a directory entry

First entry:

No entries. New entry?  OK  Enter the phone number  OK  Enter the name  OK

More numbers:

Menu  New Entry  OK  Enter the phone number  OK  Enter the name  OK

Marking an entry as VIP

Every existing entry can be marked as a VIP contact. VIP contacts are assigned their own ringtones and are displayed with symbol in the directory and when they call.

Creating a VIP entry:

Use to scroll to the entry you want to make a VIP contact  Menu  Select VIP Caller Melody  OK ( = enabled)  Select the ringtone melody  OK

Resetting a VIP mark:  Select No Melody as the ringtone melody

Selecting/editing the directory entry

Open the directory

Use to scroll to the entry until the required name is selected

or

Enter the first character of the name  scroll as required with to the entry

Display number:

Menu  Show Number  OK

Change entry:

Menu  Edit Entry  OK  Delete characters with  change entry with  OK
Directory

Assigning quick-dial keys

- Select entry ▶ Menu ▶ Shortcut ▶ OK ▶ Select key ▶ OK
  (✓ = selected)

Clearing a key assignment:

- Select entry ▶ Menu ▶ Shortcut ▶ OK ▶ No Shortcut ▶ OK
  (✓ = selected)

Deleting a directory (entry)

Deleting a directory entry

- Select entry ▶ Menu ▶ Delete Entry ▶ OK

Deleting a directory

- Menu ▶ Delete List ▶ OK ▶ Confirm deletion with OK

Transferring a directory (entry) to another handset

The sending and receiving handsets must both be registered with the same base.
The other handset and the base are able to send and receive directory entries.

Transferring a directory entry to another handset

- Select entry ▶ Menu ▶ Send Entry ▶ OK ▶ Select internal number of the recipient handset ▶ OK

Transferring a directory to another handset

- Menu ▶ Send List ▶ OK ▶ Select internal number of the recipient handset ▶ OK
Local answer machine (if available)

The handset is used to personalise settings on and operate the answering machine.

Setting up the answer machine
The default setting is answer machine already set up. You can change this.

Recording your own announcements
You can record your own announcements using the handset. The pre-recorded announcement is used if no personal announcement is available.

- **Menu** [Answering Machine] [OK] [Announcements] [OK] [Rec
 announce.] [OK] [Start recording?] [OK]...You hear the ready tone (short tone) [Record
 the announcement (min. 3 seconds) [Confirm with OK

Cancelling and discarding an announcement: [Press [ or []
After the recording, the announcement is played back for you to check.
Recording ends automatically when the max. recording time of 170 seconds is reached or there is a pause in speaking of longer than 2 seconds.

Play back the announcement:
- **Menu** [Answering Machine] [OK] [Announcements] [OK] [Play
 announce.] [OK]

Delete announcement:
- **Menu** [Answering Machine] [OK] [Announcements] [OK] [Del
 announce.] [OK]

Changing settings
- **Menu** [Answering Machine] [OK] Select the setting you want to change

Time to Auto Answer:
- **Ring Delay** [OK] [Immediately / 10 sec / 18 sec / 30 sec / Auto [OK

Auto: the answer machine answers a call:
- after **18 seconds** if there are no new messages.
- after **10 seconds** if there are new messages.

Select **Auto** when you want to retrieve messages while you are out. So for remote access (p. 26), it is clear after 10 seconds that there are no new messages. No call costs are incurred if the call is ended immediately.

Recording time:
- **Message Length** [OK] [Maximum / 1 Minute / 2 Minutes / 3 Minutes [OK

Listening in during recording:
- **Call Screening** [OK] [Handset [OK] (= enabled)
Local answer machine (if available)

Disabling listening in for the current recording:
- Press the End call key 📊.

Setting a different language (if available)
You can change the voice prompt language and language of the standard announcement.
- Menu 📈 Answering Machine 🔄 OK 📈 Language 🔄 OK 📈 Select the language 🔄 OK

Operation using the handset

Enabling/disabling an answer machine
- Menu 📈 Answering Machine 🔄 OK 📈 Answ. Mach. 🔄 OK (✓ = enabled)

If the answer machine is enabled, the display shows icon 📈.

If the memory is full, the display shows Memory full and the answer machine switches off automatically. Delete old messages so that it switches on again automatically.

Playing back messages
- Press and hold key 1 ⏯️ (key 1 is assigned to the answer machine)
  or
- Menu 📈 Answering Machine 🔄 OK 📈 Play Messages 🔄 OK

If the network mailbox is enabled: 📈 Answ. Mach. 🔄 OK
  or
- Press the Display key 📈 … The list selection is opened 📈 Voice Mail 🔄 OK

The answer machine list is shown as follows: [Answer 01+02]
Number of new messages + number of old entries which have already been played back

If there are new messages, playback starts with the first new message, otherwise with the first old message. First an info block is played, then the content. The display shows the caller's number or the caller's name.
The handset loudspeaker switches on automatically.
Switch off the loudspeaker: > Press the handsfree key 📧.
Local answer machine (if available)

**Actions during playback**

Stop playback:
- Press **2**

Continue playback:
- Press **2** again

or **Menu** ➡ Continue

Go to the next message:
- **Menu** ➡

During playback of the info block
Go to the start of the previous message:
- **Menu** ➡

Skip the information block:
During playback of the content
- **Menu** ➡

Go to the start of the current message:
- **Menu** ➡

Go to the content of the next message:
- **Menu** ➡

Call back a caller:
- **Menu** ➡ Dial Number ➡ OK

Change volume:
- **Menu** ➡ Volume ➡ OK

Copy a number to the directory:
- **Menu** ➡ Copy to Dir. ➡ OK

Delete a single message:
- **Menu** ➡ Delete ➡ OK

Delete all old messages:
- **Menu** ➡ Delete all old ➡ OK

Confirm the prompt

**Picking up a call from the answer machine**

Even if the answer machine has already answered or is recording a call, you can still take it:
- Press the Talk key ➡

or
- Remove the handset from the base / charging cradle (Auto Answer is enabled)

or
- **Menu** ➡ Accept ➡ OK

Recording stops and you can speak to the caller.

If Call Screening via the handset is enabled (p. 23) and the call can already be heard through the handset, you can only take the call with **Menu** ➡ Accept ➡ OK.

Pressing the Talk/handsfree key ➡ only enables and disables handsfree mode.
Local answer machine (if available)

Operation when on the move (remote operation)
You can check and enable your answer machine from any other phone (hotel, pay phone, etc.).

The system PIN is not 0000.
The other phone has tone dialling (DTMF).

Enabling the answer machine
- Call the telephone connection and let it ring until the announcement Please enter your PIN (approx. 50 seconds). Use to enter the phone's system PIN within 10 seconds. The answer machine is enabled, the remaining memory is announced and messages are played back.

The answer machine cannot be disabled remotely.

Checking an answer machine
- Call the telephone connection, press key 9 during the announcement, the announcement is interrupted, enter the system PIN.

The answer machine is operated using the following keys:

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>During playback of the info block: Skip to previous message.</td>
</tr>
<tr>
<td>2</td>
<td>During message playback: Go to the start of the current message.</td>
</tr>
<tr>
<td>3</td>
<td>Pause playback. Press again to resume. After a pause of approx. 60 seconds, the connection is ended.</td>
</tr>
<tr>
<td>0</td>
<td>Go to the next message.</td>
</tr>
<tr>
<td></td>
<td>During message playback: Delete current message.</td>
</tr>
</tbody>
</table>

Assigning key 1
When you use a local and a network mailbox, you can specify which one is opened with the key.

Settings for quick access are handset-specific. A different answer machine can be assigned to key on every handset registered.
Device without network mailbox: the network mailbox is automatically linked to key .

Menu Answering Machine OK Set Key 1 OK Answ. Mach. / Net Mailbox OK ( = selected)
Network mailbox

Network mailbox

The network mailbox is registered with the network provider.

Entering a number

Menu ➤ Answering Machine ➤ OK ➤ Net Mailbox ➤ OK ➤ Enter the number ➤ OK . . . The network mailbox is enabled

To enable and disable the network mailbox, use the number and a function code from your network provider. Contact the network provider if you require any further information.

Playing messages

From the menu: Menu ➤ Answering Machine ➤ OK ➤ Play Messages ➤ OK ➤ Net Mailbox ➤ OK

Using key 1: Press and hold key 1 ➤ (key 1 is assigned to the network mailbox)

From the message list: Press the Display key ➤ . . . The list selection is opened ➤ Net Mailbox ➤ OK
Additional functions

Additional functions

⚠️ The functions actually available on your telephone and how they are operated depends on the base/router to which the handset is registered.

The procedure required for your telephone may differ from the procedures described here.

Additional information

Regarding the telephone system, if the handset is connected to a Gigaset base:

➡️ User guide for your Gigaset telephone

Regarding the telephone system, if the handset is connected to another base/router:

➡️ Documentation regarding your base/your router

All Gigaset user guides are available from

➡️ www.gigaset.com/manuals

Alarm clock

⚠️ Date and time have been set.

Turning the alarm clock on and off

- Menu ➤ Alarm Clock ➤ OK ➤ Activation ➤ OK (✔️ = turned on)
- Enter the ⏰️ wake-up time in minutes and second ➤ OK

Alarm clock turned on: Instead of the date, the display shows the wake-up time and left of it the alarm clock symbol.

Setting/changing the wake-up time

- Menu ➤ Alarm Clock ➤ OK ➤ ⏰️ Wake-up Time ➤ OK ➤ ⏰️ Enter the wake-up time in hours and minutes ➤ OK

Setting days

Select when the alarm is to be active, daily or only on workdays.

- Menu ➤ Alarm Clock ➤ OK ➤ ⏰️ Occurrence ➤ OK ➤ ⏰️ Select Daily / Monday-Friday ➤ OK

Turning off the wake-up call

A wake-up call is shown on the display and indicated by the ringtone melody selected.

- Off... The alarm call is switched off for 24 hours

or

- Press Later or any key... Snooze is shown on the display, the alarm call is repeated after five minutes
Additional functions

Baby monitor (Room monitoring)
When the baby monitor is switched on, the stored external phone numbers or all handsets registered to the phone (internal) are called as soon as a defined noise level is exceeded in the vicinity of the handset. The alarm to an external number is cancelled after about 90 seconds.

You can answer the alarm using the Two-Way Talk function. This function is used to switch the loudspeaker of the handset located in the baby’s room on or off.

In baby monitor mode, incoming calls are only indicated on the display (without ringtone). The display backlight is reduced to 50%. Advisory tones are deactivated. Advisory tones are disabled. All keys with the exception of the display keys are disabled.

If you accept an incoming call, the baby monitor mode is suspended for the duration of the call, but the function remains activated. The baby monitor mode is not deactivated by switching the handset off and on again.

The handset should be positioned 1 to 2 metres away from the baby. The microphone must point towards the baby.

Activating the function reduces the operating time of your handset. For that reason, place the handset in the charging cradle if necessary.

The baby monitor is activated 20 seconds after switching on.

The answer machine for the destination number must be switched off.

After switching on:
- Test sensitivity.
- Test the connection, if the alarm is being forwarded to an external number.

Activating and setting the baby monitor

- Menu ▶ Baby Monitor ▶ OK

Enable/disable:
- Activation ▶ OK (☑ = enabled) … if a phone number to call is already entered, the baby monitor is enabled immediately

Entering/changing call number:
- Call Target ▶ OK ▶ Select Internal or External Call ▶ OK ▶ for External Call, enter phone number ▶ OK

Baby Monitor and the number to call are displayed when the baby monitor is enabled and in idle mode.

Activate/deactivate two-way talk:
- Two-Way Talk ▶ OK (☑ = enabled)

Deactivate baby monitor / Cancel alarm

Deactivate the baby monitor:
- In idle status press the display key Off

Cancel the alarm:
- Press the End call key Off during an alarm
Additional functions

Deactivate the baby monitor remotely

The alarm is forwarded to an external destination number.
The receiving phone supports tone dialling.

- Accept alarm call ➤ Press keys 9 #
  The baby monitor is deactivated and the handset is in idle status. The baby monitor settings on the handset (e.g. no ringtone) will remain activated until you press the display key Off.

The baby monitor cannot be reactivated remotely.
Reactivate: ➤ p. 29

ECO DECT

The device range is set to maximum by default. This guarantees the best connection between handset and base. In idle mode, the handset does not transmit (it is radiation-free). Only the base maintains contact with the handset, using weak wireless signals. During a call, the transmit power automatically adapts to the distance between base and handset. The shorter the distance to the base, the lower the radiation.

Reducing radiation by up to 80%

Enabling/disabling the maximum range:

- Menu ➤ Settings ➤ OK ➤ ECO DECT ➤ OK ➤ Max. Range ➤ OK ( □ = range and radiation reduced)

It is not possible to use a repeater to increase the range.

Disabling radiation in idle mode

The wireless signals of the base are also disabled with the No Radiation setting.

- Menu ➤ Settings ➤ OK ➤ ECO DECT ➤ OK ➤ No Radiation ➤ OK ( ☑ = Radiation disabled)

All handsets registered must support this feature.

For speedy set-up of connections for incoming calls, the handset keeps switching to “ready to receive” momentarily. This increases the power consumption and so reduces the standby and talk times.

When No Radiation is enabled, there is no range display / range alarm on the handset. Contactability can be tested by attempting to establish a connection.

- Press and hold the Talk key ☑ . . . the ringing tone sounds.
Additional functions

Protection from undesired calls

Black list

You can enter up to 32 numbers in a black list. When the black list is enabled, calls from black list numbers are not signalled acoustically. These settings apply to all registered handsets.

Enabling/disabling the black list

 Menu  Call Manager  OK  Blacklist  OK  Activation  OK ( = enabled)

Displaying/editing the black list

 Menu  Call Manager  OK  Blacklist  OK  Blacklist  OK . . . the list of blocked numbers is displayed  use  to scroll through the list

Create an entry:  New  enter the number  OK

Delete entry:  Select the entry  Delete

Transferring a number from a call list to the black list

 Open the call list: Press the Display key  Call List  OK  Select an entry  OK  Copy to Blacklist  OK

Enabling/disabling ringtone with time control

Enter a time period during which the handset should suspend ringing to indicate external calls, such as during the night.

Enabling/disabling time control

 Menu  Call Manager  OK  Time Control  OK  Activation  OK ( = enabled)

Setting the time period

 Menu  Call Manager  OK  Time Control  OK  Settings  OK  Off from:  Enter the 4-digit time  OK  Off until:  Enter the 4-digit time  OK

Permit/block VIP calls

Specify whether, when time control is enabled, calls from those marked as VIP contacts in the directory are also suppressed.

 Menu  Call Manager  OK  Time Control  OK  Suppress VIP Calls  OK ( = enabled)

Off for anonymous calls

You can set your handset so that it does not ring for calls where Calling Line Identification has been withheld. The call is only signalled on the display.

 Menu  Call Manager  OK  Mute Anonym. Calls  OK ( = enabled)
Extending the functionality of the phone

Multiple handsets
Up to four handsets can be registered with the base. Every device is assigned an internal name and internal number (INT 1 – INT 4). The assignment can be changed. All internal numbers are already assigned: de-register any devices no longer needed

Registering a handset
The Please register handset display flashes or you want to register the handset with a different base.

Registering from the display key or menu
Registration must be initiated both on the base and on the handset. Both must be within 60 seconds.

On the handset
› Press the display key Registr.
or
› Menu ➤ Settings ➤ OK ➤ Registration ➤ Register Handset ➤ Enter as required the system PIN of the base (default: 0000) ➤ OK . . . The display shows Registering...

On the base
› Within 60 seconds, press and hold the registration/paging key for a minimum of 3 seconds.

The registration process takes about 1 minute. Handsets are assigned the lowest available internal number (1 to 4). If internal numbers 1 to 4 are already assigned to other devices, number 4 is overwritten.

Some Gigaset bases and bases/routers from third party manufacturers might not be fully compatible with the handset and not all functions are displayed correctly. In such cases, use menu entry Legacy (GAP) Registration. This guarantees correct displays on the handset, but can entail restrictions for some functions.
Extending the functionality of the phone

De-registering a handset

You can de-register any other registered handset from any registered Gigaset handset.

› Menu ➤ Settings ➤ OK ➤ Registration ➤ Deregister Handset ➤ OK

› ➤ Select the internal user to be de-registered. (The handset you are currently using is marked with <.) ➤ OK ➤ Enter the system PIN of the base (default: 0000) ➤ OK . . . the handset is registered. Please register handset flashes on the display

Locating a handset (paging)

Locate a handset using the base.

› Briefly press the Register/Paging key on the base . . . all handsets registered ring at the same time even when their ring tones are turned off.

Exit:

› Briefly press the Register/Paging key on the base

or

› Press or on a handset

Repeater support

A repeater increases the receiving range between the Gigaset handset and base.

Enabling Repeater mode for the base:

Menu ➤ Settings ➤ OK ➤ System ➤ OK ➤ Repeater ➤ OK (= enabled)

Register repeater on the base: ➤ User guide for the repeater

Repeater support and ECO DECT mode No Radiation are mutually exclusive.
Extending the functionality of the phone

Operating the base on a router/PABX

Operation with a router
When operating on the analogue connection of a router, any echoes occurring can be reduced by enabling XES Mode (XES = eXtended Echo Suppression).

- Menu ➤ Settings ➤ OK ➤ System ➤ OK ➤ XES Mode ➤ OK (☑ = enabled)

If there are no problems with echoes, this function should be disabled.

Operation with a PABX
The following settings are only necessary when your PABX requires them (refer to the PABX user guide). Enter the digits slowly one after the other.

Changing the dialling mode

- Menu ➤ [0] ➤ [5] ➤ [1] ➤ [8] ➤ The digit for the dialling mode set flashes: 0 = Tone dialling (DTMF); 1 = Pulse dialling (PD) ➤ Enter digit ➤ OK

Setting the flash time

- Menu ➤ [0] ➤ [5] ➤ [1] ➤ [0] ➤ The digit for the current flash time flashes: 0 = 80 ms; 1 = 100 ms; 2 = 120 ms; 3 = 400 ms; 4 = 250 ms; 5 = 300 ms; 6 = 600 ms; 7 = 800 ms ➤ Enter digit ➤ OK

Changing pause after line seizure
You can set the length of the pause inserted between pressing the Talk key (_ends) and sending the phone number.

- Menu ➤ [0] ➤ [5] ➤ [1] ➤ [6] ➤ The digit for the current pause length flashes: 1 = 1 sec.; 2 = 3 sec.; 3 = 7 sec. ➤ Enter digit ➤ OK

Changing pause after recall key

- Menu ➤ [0] ➤ [5] ➤ [1] ➤ [2] ➤ The digit for the current pause length flashes: 1 = 800 ms; 2 = 1600 ms; 3 = 3200 ms ➤ Enter digit ➤ OK
Phone settings

Date and time

Setting
Set the date/time so that the correct date and time can be assigned to incoming calls and to enable the alarm to be used.

- Menu | Settings | OK | Date and Time | OK | Set Date and Time | OK | Enter the date (day, month and year) in 8-digit format | OK | Enter the time (hours and minutes) in 4-digit format | OK

Accept
If date and time are also to be sent to your phone by your network operator (or a router/PABX) during calling line identification, you can specify whether and when these are accepted:

- Menu | Settings | OK | Date and Time | OK | The digit for the current setting flashes:
  - 1 = Never
  - 2 = Once, if the date and time are not set on your phone or
  - 3 = Always
- Enter the required digit | OK

Setting the time format
Display the time in 12-hour format instead of 24-hour format.

- Menu | Settings | OK | Date and Time | OK | Time Format | OK | Select 24-hour or 12-hour | OK ( = selected)

Changing the calendar (if available)
Show the date in Persian calendar format not the Gregorian.

- Menu | Settings | OK | Date and Time | OK | Calendar | OK | Select Gregorian or Persian | OK ( = selected)
Phone settings

Country and language (if available)

Country
Select the country where you use the phone.

- Menu → Settings → OK → Country → OK → Select the country → OK
  (☑ = enabled)

Display language

- Menu → Settings → OK → Language → OK → Select the language → OK
  (☑ = enabled)

  If you accidentally choose a language you do not understand:
  - Menu → 4 2 Press keys one after the other → Select the language → OK

Display

Screensaver
The screensaver is enabled when the phone is not used over a longer period of time. The time is shown as the screensaver.

- Menu → Settings → OK → Display → OK → Screensaver → OK → Select the required option (☑ = enabled)

Large dial keys
Show large dial keys when dialling

- Menu → Settings → OK → Display → OK → Larger Font → OK (☑ = enabled)

Contrast
Adjust the display contrast on 9 levels.

- Menu → Settings → OK → Display → OK → Contrast → OK → Select the level → OK (☑ = selected)

Backlight
The display light is switched off when the handset is not used over a long period of time. You can enable/disable this function separately for situations handset in charging cradle and handset not in charging cradle.

- Menu → Settings → OK → Display → OK → Backlight Control → OK → Display On Out of Charg. or Display On In Charger → OK (☑ = enabled)

  The Display On Out of Charg. setting reduces the standby time.

36
Phone settings

During a call, the display is off

During a call, the display normally stays on. When the function is enabled, the display is switched off during calls.

\[ \text{Menu} \rightarrow \text{Settings} \rightarrow \text{Display} \rightarrow \text{OK} \rightarrow \text{Backlight Control} \rightarrow \text{Display Off During Calls} \rightarrow \text{OK} \rightarrow \checkmark = \text{enabled} \]

If the function is disabled, talk time is reduced.

The display flashes for new messages

\[ \text{Menu} \rightarrow \text{Settings} \rightarrow \text{Display} \rightarrow \text{OK} \rightarrow \text{Backlight Control} \rightarrow \text{Flash Display for Notifications} \rightarrow \text{OK} \rightarrow \checkmark = \text{enabled} \]

Tones and signals

Call volume

Adjust the receiver volume or handsfree function on 5 levels.

\[ \text{Menu} \rightarrow \text{Audio Settings} \rightarrow \text{Call Volume} \rightarrow \text{OK} \rightarrow \text{Earpiece / Handsfree} \rightarrow \text{OK} \ldots \text{The current setting is displayed} \rightarrow \text{Select the volume} \rightarrow \text{OK} \rightarrow \checkmark = \text{selected} \]

Changing the volume during a call

During a call, set the volume of the receiver on 5 levels.

\[ \text{Press the control key} \rightarrow \text{set the volume with} \]

Tone quality

Change the tone quality of the receiver to how you want it.

\[ \text{Menu} \rightarrow \text{Audio Settings} \rightarrow \text{Acoustic Profile} \rightarrow \text{Low / High} \rightarrow \text{OK} \rightarrow \checkmark = \text{selected} \]

Ringtone volume (ringer volume)

Adjust the volume of the ringtone on 5 levels or select Crescendo.

\[ \text{Menu} \rightarrow \text{Audio Settings} \rightarrow \text{Ringer Volume} \rightarrow \text{Select volume or Crescendo} \rightarrow \text{OK} \rightarrow \checkmark = \text{selected} \]

Set the ringtone melody for external calls, internal calls or the alarm.

\[ \text{Menu} \rightarrow \text{Audio Settings} \rightarrow \text{Ringtones (Handset)} \rightarrow \text{Select External Calls / Internal Calls / Alarm Clock} \rightarrow \text{Select ringtone required} \rightarrow \text{OK} \rightarrow \checkmark = \text{selected} \]
Phone settings

Disabling/re-enabling the ringtone permanently

When the phone is idle, press and hold the Star key. When the ringtone is disabled, symbol 🔄 is shown on the display.

Deactivating the ring tone for the current call

Menu ➤ Silent ➤ OK

Enabling/disabling advisory and warning tones

The handset provides acoustic notification of different activities and statuses.

Advisory tone: e.g. keypress tones, error tone, a new message

Battery warning tone:

The battery charge falls below a certain level during a call.

Range warning tone:

The handset moves outside the range of the base.

You can enable and disable advisory and warning tones separately.

Menu ➤ Audio Settings ➤ OK ➤ Advisory Tones / Battery Low / Out-of-Range Warning ➤ OK (✓ = enabled)

Music on hold

You can choose whether an external caller hears music on hold during an internal consultation or when a call is being forwarded.

Menu ➤ Advisory Tones ➤ OK ➤ Silent ➤ OK ➤ Menu ➤ 0 ➤ 5 ➤ 1 ➤ 7 ➤ OK

... The digit for the current setting flashes:

0 = disabled; 1 = enabled ➤ enter required digit ➤ OK
Phone settings

System

Changing the system PIN
- Menu ➔ Settings ➔ OK ➔ System ➔ OK ➔ System PIN ➔ OK ➔ Enter the current 4-digit system PIN (default: 0000) ➔ OK ➔ Enter the new 4-digit system PIN ➔ OK

Resetting the system PIN
Resetting the base to the original PIN code 0000:
- Remove the power cable from the base ➔ Keep pressed the Registration/paging key on the base ➔ At the same time, reconnect the power cable to the base ➔ press and hold the key for at least 5 seconds . . . the base is reset and the system PIN is set to 0000

All handsets are de-registered and must be re-registered. All settings are reset to the defaults.

Resetting the handset
You can reset individual settings. Entries in the directory and call list, and the handset’s registration to the base, are maintained.
- Menu ➔ Settings ➔ OK ➔ System ➔ OK ➔ Reset Handset ➔ OK . . . Perform factory reset? ➔ OK

Resetting the base
A reset disables mode No Radiation, resets individual settings and deletes all lists.
The system PIN is reset to the original code 0000.
The time and date are not affected. The answer machine (if available) is not ready until after about 15 seconds after the base is reset.

Resetting the base from the menu
The handsets remain registered. The system PIN is not reset.
- Menu ➔ Settings ➔ OK ➔ System ➔ OK ➔ Reset Base ➔ OK . . . Reset? ➔ OK

Resetting the base using a key on the base
All handsets are de-registered. The system PIN is set back to the original code 0000.
- Remove the power cable from the base ➔ Keep pressed the Registration/paging key on the base ➔ At the same time, reconnect the power cable to the base ➔ Keep the key pressed for at least another 5 seconds

Customer Service Switzerland: 0848 212 000
(0.09 Fr. per minute from the Swiss phone network. For calls from mobile phone networks, other prices may apply)
Please have your proof of purchase ready when calling.

Please note that if the Gigaset product is not sold by authorised dealers in the national territory the product may not be fully compatible with the national telephone network. It is clearly specified on the box near the CE mark for which country/countries the equipment has been developed. If the equipment is used in a manner inconsistent with this advice or with the instructions of the manual and on the product itself, this may have implications on the conditions for warranty or guarantee claims (repair or exchange of product).

In order to make use of the warranty, the product purchaser is asked to submit a receipt which proves the date of purchase (date from which the warranty period starts) and the type of goods that have been purchased.
Warranty certificate for Switzerland

The consumer (customer) is covered by a durability warranty against the vendor without prejudice to his claims for defects and under the following conditions:

- New devices and their components in which a defect is detected within 24 months from the date of purchase resulting from a manufacturing and/or materials fault will, at the customer’s discretion, be exchanged free of charge for a technologically current device or repaired by Gigaset Communications. For wearing parts (such as batteries, keypads, casing, small casing parts and protective covers as included in the delivery), this guarantee of durability applies for six (6) months from the date of purchase.
- This warranty does not apply in the event a defect to devices is attributable to improper treatment and/or a failure to follow the operating guides.
- This warranty does not cover any services provided by the appointed dealer or the customer itself (such as installation, configuration and software downloads). Manuals and, where applicable, accompanying software on a separate data carrier are also excluded from the warranty.
- Proof of purchase with date of purchase is required as evidence of a valid warranty. Warranty claims must be asserted within two (2) months of the awareness of a warranty event.
- Replaced devices or their components returned to Gigaset Communications during the course of an exchange are transferred to the ownership of Gigaset Communications.
- This warranty applies for new devices purchased in Switzerland. The warrantor is Gigaset Communications Schweiz GmbH, Bielstrasse 20, 4500 Solothurn, Switzerland.
- No further or different claims arising from this manufacturer’s warranty will be accepted. Gigaset Communications accepts no liability for operational interruptions, loss of profit and loss of data, software additionally installed by the customer or other information. The customer is responsible for safeguarding these. The disclaimer does not apply if liability is mandatory, for example under the Product Liability Act, in cases of wilful intent, gross negligence, and as a result of loss of life, limbs or health.
- Successful assertion of a warranty claim does not extend the term of the warranty.
- Unless there is a warranty event, Gigaset Communications reserves the right to charge the customer for an exchange or repair. Gigaset Communications will inform the customer of this in advance.
- Gigaset Communications reserves the right to have its service work carried out by a subcontractor. Refer to www.gigaset.com/service for the address.
- Any change to the rules governing burden of proof to the detriment of the customer is not connected with the above rules.

To redeem a warranty, please contact our hotline (Tel. 0848 212 000).
Manufacturer's advice

Authorisation
This device is intended for analogue phone lines in Switzerland.
Country-specific requirements have been taken into consideration.
Hereby, Gigaset Communications GmbH declares that the radio equipment type Gigaset Box 90(A) - Gigaset CL390H is in compliance with Directive 2014/53/EU.
The full text of the EU declaration of conformity is available at the following internet address: www.gigaset.com/docs.
This declaration could also be available in the "International Declarations of Conformity" or "European Declarations of Conformity" files.
Therefore please check all of these files.

Data protection
We at Gigaset take the protection of our customers’ data very seriously. It is precisely for this reason that we are ensuring all our products feature "Privacy by Design" as standard. All information we collect is used to make our products as good as possible. In the process, we ensure your details are protected and only used for the purposes of making available to you a product or service. We know which path your data takes through the company and ensure this happens in line with data protection specifications in a secure and protected manner.
The full text of the privacy policy is available from: www.gigaset.com/privacy-policy

Environment

Our environmental statement
We at Gigaset Communications GmbH are aware of our social responsibility. That is why we actively take steps to create a better world. In all areas of our business – from product planning and production to sales and waste of disposal – following our environmental conscience in everything we do is of utmost importance to us.
Learn more about our earth-friendly products and processes online at www.gigaset.com.

Environmental management system
Gigaset Communications GmbH is certified pursuant to the international standards ISO 14001 and ISO 9001.
ISO 14001 (Environment): Certified since September 2007 by TÜV SÜD Management Service GmbH.
ISO 9001 (Quality): Certified since 17/02/1994 by TÜV SÜD Management Service GmbH.
Manufacturer’s advice

Disposal

Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority.

Information about disposal

At the end of its service life, this product must not be disposed of with normal household waste, but must be handed in at the place of purchase or at a collection point for recycling electrical and electronic devices in accordance with the ordinance governing the return, acceptance and disposal of electrical and electronic equipment (VREG).

The materials can be recycled according to their identification. By reusing and recycling materials along with other methods of recycling used equipment, you can make an important contribution to protecting the environment.

Care

Wipe the device with a damp cloth or an antistatic cloth. Do not use solvents or microfibre cloths.

Never use a dry cloth; this can cause static.

In rare cases, contact with chemical substances can cause changes to the device’s exterior. Due to the wide variety of chemical products available on the market, it was not possible to test all substances.

Impairments in high-gloss finishes can be carefully removed using display polishes for mobile phones.

Contact with liquid

If the device comes into contact with liquid:

1 Unplug all cables from the device.
2 Remove the batteries and leave the battery compartment open.
3 Allow the liquid to drain from the device.
4 Pat all parts dry.
5 Place the device in a dry, warm place for at least 72 hours (not in a microwave, oven etc.) with the battery compartment open and the keypad facing down (if applicable).
6 Do not switch on the device again until it is completely dry.

When it has fully dried out, you will normally be able to use it again.
Technical data

Batteries
Technology: Nickel metal hydride (NiMH)
Size: AAA (Micro, HR03)
Voltage: 1.2 V
Capacity: 400 - 1000 mAh

Handset operating times/charging times
The operating time of your Gigaset depends on the capacity of the battery, its age and the way it is used. (All times are maximums).

<p>| | |</p>

</tbody>
</table>

* No Radiation switched on/off, without display backlight in idle mode

Power consumption of the handset in the charging cradle
When charging: approx. 2.10 W
To maintain the charge status: approx. 1.30 W

Base power consumption
Without answer machine
Standby:
• Handset in the charging cradle (charging) approx. 2.00 W
• Handset in the charging cradle (sustained charge) approx. 0.60 W
• Handset away from the charging cradle approx. 0.55 W
During a call: approx. 0.65 W

With answer machine
Standby:
• Handset in the charging cradle (charging) approx. 2.80 W
• Handset in the charging cradle (sustained charge) approx. 1.00 W
• Handset away from the charging cradle approx. 0.65 W
During a call: approx. 0.75 W

Character set tables

The character set used on the handset is dependent on the language set.

Entering letters/characters

- Press the relevant key several times.
- Briefly press the Hash key to switch from mode “Abc” to “123”, from “123” to “abc” and from “abc” to “Abc”.
- Press and hold the Hash key... The available characters of the key are shown in sequence for selection.
