Overview

Handset

1 Display
2 Status bar (page 69)
   Icons display current settings and operating status of the telephone
3 Emergency call display key
   Set up emergency call function; trigger an emergency call
4 Display keys (page 12)
   Various functions, depending on the operating situation
5 End call key / On/off key
   End call; Cancel function; one level back
   Back to idle mode; Switch the handset on/off
   Press briefly
   Press and hold
6 Hash key / Lock key
   Lock/unlock the keypad; enter a dialling pause
   Toggle between upper/lower case and digits
   Press and hold
   Press briefly
7 Recall key
   Consultation call (flash)
   Press and hold
8 Microphone
9 Star key
   Switch the ringtone on/off
   Open the table of special characters; switch from pulse dialling to tone dialling
   Press and hold
10 Key 1
   Select network mailbox
   Press and hold

11 Control key / Menu key (page 11)
   Open a menu; navigate in menus and entry fields; access functions
12 Talk key / Handsfree key
   Accept call; dial number displayed; switch between earpiece mode and handsfree mode; Send SMS; Open the redial list
   Start dialling
   Press briefly
   Press and hold

13 Message key (page 28)
   Access to the call and message lists;
   Flashes: new message or new call
   If multiple functions are listed, the button function depends on the situation.

Base

A Registration/paging key
   Locate a handset (paging)
   Register a handset
   Press briefly
   Press and hold
   The colour and shape of your device may be different from the illustration.

OK, Back, Select, Change, Save, . . . Display keys

Procedures

Example: Switching Auto answer on/off:

- . . . use to select Settings OK Telephony OK Auto Answer Change ( = on)

Step | Follow this procedure
--- | -------------------------------------------------
  | When in idle status press the centre of the control key. The main menu opens.
  | Navigate to the icon using the control key . Select OK to confirm. The submenu Settings opens.
  | Select the Telephony entry using the control key . Select OK to confirm. The submenu Telephony opens.
  | The function to switch Auto answer on/off appears as the first menu item.
  | Select Change to activate or deactivate. Function is activated / deactivated.
## Safety precautions

### Read the safety precautions and the user guide before use.

The device cannot be used in the event of a power failure. In case of a power failure it is also **not** possible to make emergency calls. Emergency numbers **cannot** be dialled if the keypad/display lock is activated!

### Use only rechargeable batteries that correspond to the specification (see list of permitted batteries [www.gigaset.com/service](http://www.gigaset.com/service)). Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. Rechargeable batteries, which are noticeably damaged, must be replaced.

The handset must not be operated if the battery cover is open.

### Do not use the devices in environments with a potential explosion hazard (e.g. paint shops).

The devices are not splashproof. For this reason do not install them in a damp environment such as bathrooms or shower rooms.

### Use only the power adapter indicated on the device.

Whilst charging, the power socket must be easily accessible.

### Remove faulty devices from use or have them repaired by our Service team, as these could interfere with other wireless services.

### Do not use the device if the display is cracked or broken. Broken glass or plastic can cause injury to hands and face. Send the device to our Service department to be repaired.

### Do not hold the rear of the handset to your ear when it is ringing or when speaker mode is activated. Otherwise you risk serious and permanent damage to your hearing.

The phone may cause interference in analogue hearing aids (humming or whistling) or cause them to overload. If you require assistance, please contact the hearing aid supplier.

### Keep small cells and batteries, which can be swallowed, out of the reach of children.

Swallowing a battery can lead to burns, perforation of soft tissue and death. Severe burns can occur within 2 hours of swallowing. In the case of a swallowed cell or battery, seek medical care immediately.

### Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.g. doctor’s surgery. If you use a medical device (e.g. a pacemaker), please contact the device manufacturer. They will be able to advise you regarding the susceptibility of the device to external sources of high frequency energy (for the specifications of your Gigaset product see “Technical data”).
Getting started

Contents of the package

• One **base**
• One power adapter for the base
• One phone cable
• One **handset**
• One battery cover
• Two batteries
• One charging cradle including power adapter
• One user guide

Models with multiple handsets, per handset:

• One handset
• One charging cradle including power adapter
• Two batteries and one battery cover

⚠️ The base station and charging cradle are designed for use in closed, dry rooms within a temperature range of +5 °C to +45 °C.

The device’s feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on furniture, contact marks on the surfaces cannot be completely ruled out.

Never expose the telephone to heat sources, direct sunlight or other electrical devices.

Protect your telephone from moisture, dust, corrosive liquids and vapours.
**Base**

- Insert the phone cable into the connection socket **1** at the rear of the base until it clicks into place.
- Insert the power cable from the power adapter into the connection socket **2**.
- Depending on the model, if included in the delivery: Click the cover into place in the notches on the back of the base (not if mounting on a wall).
- Plug in the power adapter **3** and the phone jack **4**.

If connecting to a router:
- Plug the phone cable into the telephone connection socket on the router **5**.

⚠️ The network cable must **always be connected** in order to function, as the phone will not operate without a power supply.

**Handset**

**Connecting the charging cradle**

- Connect the flat plug of the power adapter **1**.
- Plug the mains unit into your power socket **2**.

To remove the plug from the charging cradle again:
- Disconnect the power adapter from the mains power supply.
- Press the release button **3**.
- Pull out the plug **4**.
Setting up the handset for use
The display is protected by a plastic film. ➤ Please remove the protective film!

Inserting the batteries

Only use rechargeable batteries, as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the batteries could be destroyed or the batteries could explode. The device could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

➤ Insert the batteries (for correct +/- direction, see diagram).
➤ Fit the battery cover from the top.
➤ Press the cover until it clicks into place.
To re-open the battery cover:
➤ Insert a fingernail behind the notch at the top of the cover and slide it downwards.

Charging the batteries
➤ Charge the batteries fully prior to first use in the charging cradle.

The batteries are fully charged when the power icon disappears from the display.

Batteries may heat up during charging. This is not dangerous.
After a time, the charge capacity of the battery will decrease for technical reasons. Handsets contained in the package have already been registered to the base. In the event that a handset is not registered however (indicated by Please register handset), register the handset manually ( ➤ page 48).
Handset

Changing the display language
You can change the display language, if the telephone has been set to an incomprehensible
language.

- Press the centre of the control key.
- Press the keys slowly and successively ... the
  language settings display appears, the set language
  (e.g. English) is highlighted ( = selected).
- To select a different language: Press the control key until
  the desired language is highlighted on the display,
  e.g. Francais press the key on the right directly underneath
  the display to activate the language.
- To revert to idle status: Press and hold the End call key.

Setting the date and time
Set the date/time so that the correct date and time can be assigned to incoming calls, and to
enable the alarm to be used.

- Press the display key Time
  or, if the date and time have already been set:
- ... use to select Settings OK Date/Time OK

The active cursor position flashes ... change cursor position with
... switch between cursor positions with

Enter date:
... using enter the day, month and year in 8-digit format.

Enter time:
... using enter hours and minutes in 4-digit format.

Save settings:
- Press the display key Save. ... Saved is shown in the display and
  a confirmation tone sounds.

Return to idle status:
- Press and hold the End call key

The telephone is now ready for use.
Getting to know your telephone

Using the telephone

Switch the handset on/off
Switch on: When the handset is switched off, press and hold the End call key.
Switch off: When the handset is in idle status, press and hold the End call key.

Lock/unlock the keypad
The keypad lock prevents any accidental use of the telephone.
Lock/unlock the keypad: Press and hold.
Keypad lock activated: the following symbol appears.

If a call is indicated on the handset, the keypad automatically unlocks and you can accept the call. It then locks again when the call is finished.

It is not possible to call emergency numbers either when keypad lock is activated.

Control key

The control key enables you to navigate the menus and input fields, and also to call up certain functions depending on the situation.

In the description below, the side of the control key (up, down, right, left) that you have to press in the different operating situations is marked in black, e.g. for "press right on the control key" or for "press the centre of the control key".

In idle status
Open the directory
Open the main menu
Open the list of handsets

In submenus, selection and entry fields
Confirm a function

During a conversation
Open the directory
Mute the microphone
Initiate an internal consultation call
Adjust the loudspeaker volume for receiver and handsfree mode
Getting to know your telephone

Extra-loud function
During a call or when listening to a message, make the volume for the handset or the loudspeaker very loud.

- Press the control key \[\text{\textdownarrow}\] \[\text{\textuparrow}\] until you reach the highest level.

The extra-loud setting only applies for the duration of the call.

This setting can result in harm to health in persons with a normal hearing ability and is only intended for persons with a hearing impairment or reduced hearing. Disruptive noises on the phone line can be increased.

Display keys
The display keys perform a range of functions depending on the operating situation.

The right display key is always preset with the Emergency function in idle mode. You can change the assignment of the left display key: \(\Rightarrow\) page 58
Getting to know your telephone

Menu guidance
The functions of your telephone are displayed in a menu that consists of several levels. Menu overview ➔ page 71

Selecting/confirming functions
Confirm selection using OK or press the centre of the control key □
One menu level back using Back
Change to idle status Press and hold 
Switch function on/off using Change on ◐ / off □
Activate/deactivate option using Select activated ◐ / not activated ◐

Main menu
In idle status: ➔ Press the centre of the control key □ ➔ . . . use the control key ◐ to select a submenu ➔ OK

Submenus
The functions in the submenus are displayed as lists. The current selection is shown in large font and highlighted in orange.
To access a function: ➔ . . . use the control key ◐ to select a function ➔ OK
Return to the previous menu level:
➔ Press the display key Back
or
➔ Press the End call key ◐ briefly

Returning to idle status
➔ Press and hold the End call key ◐

If a key is not pressed, after 2 minutes the display will automatically change to idle status.
Getting to know your telephone

Entering text

Input position
- Use \( \text{select} \) to select an entry field. The cursor flashes in the active entry field, the title and the text entered turn orange and are shown in large font.
- Use \( \text{move} \) to move the position of the cursor.

Correcting incorrect entries
- Delete characters to the left of the cursor: \( \text{delete} \) Press briefly
- Delete words to the left of the cursor: \( \text{delete} \) Press and hold

Entering letters/characters
- Multiple letters and numbers are assigned to each key between \( 2 \) and \( 9 \) and the \( 0 \) key. As soon as a key is pressed, the possible characters are displayed at the bottom of the display. The selected character is highlighted.
- Selecting letters/numbers: \( \text{press} \) the key briefly several times in succession
- Switch between lower case, upper case and number entry mode: \( \text{press} \) the hash key \( # \)
  - When editing a directory entry, the first letter and each letter following a space is automatically in upper case.
- Entering special characters: \( \text{press} \) the star key \( * \) \( \text{use} \) to navigate to the desired character \( \text{insert} \)

The availability of special characters depends on the language setting.
Making calls

Making calls

› . . . use to enter the number  briefly press the Talk key
or
› Press and hold the Talk key  . . . use to enter the number

Cancel dialling:  Press the End call key

Information for Calling Line Identification:  page 20

If the display backlight is deactivated, you can reactivate it by pressing any key. Digit keys that are pressed appear in the display for pre-dialling, other keys have no further function.

Dialling from the directory

› . . . use to open the directory  . . . use to select an entry  press the Talk key

If multiple numbers are entered:
› . . . use to select a number  press the Talk key  . . . the number is dialled

For fast access (quick dial): Assign numbers from the directory to the digit or display keys.

Dialling from the redial list

The redial list contains the 20 numbers last dialled with the handset.
› Briefly press the Talk key  . . . the redial list is opened  . . . use to select an entry  press the Talk key

If a name is displayed:
› View . . . the number is displayed  . . . use to browse numbers if necessary  . . . when the desired number is reached press the Talk key

Managing entries in the redial list

› Briefly press the Talk key  . . . the redial list is opened  . . . use to select an entry

Options . . . possible options:

Copy an entry to the directory:  Copy to Directory  OK

Copy the number to the display:
› Display number  OK  . . . use to amend or add numbers if necessary . . . use to save as a new entry in the directory

Delete the selected entry:  Delete entry  OK

Delete all entries:  Delete List  OK
Making calls

Dialling from the call list

The call lists (page 30) contain the most recent accepted, outgoing and missed calls.

- " " press to select "Call Lists" OK " press to select a list OK " press to select an entry OK

Press the Talk key.

The call lists can be displayed directly by pressing the display key Calls if the relevant function has been assigned to the display key.

The Missed calls list can also be opened by pressing the Message key.

One touch call

A saved number is dialled by pressing any key. This allows children who are not yet able to enter a number to call a certain number, for example.

Activate one touch call mode:

- " " press to select "Additional Features" OK  " press to select "One Touch Call" OK " press to select "Call to" OK  " press to enter the number  " press to save

...the active one touch mode is shown in the idle display.

Make a one touch call: " press any key ...the saved number is dialled.

Cancel dialling: " press the End call key ".

End one touch call: " press and hold the End call key ".

Incoming calls

An incoming call is indicated by ringing, by a display on the screen and by the flashing Talk key.

Accept a call:

- Press the Talk key " or " Accept
- If Auto Answer is activated: " press the End call key

Switch off ringtone: " Silence ...the call can be accepted for as long as it is shown on the display.
Making calls

Information about the caller

The caller’s phone number is displayed. If the caller’s number is saved in the directory, the name is displayed.

- The caller’s number will be transferred (page 20).

Accepting/rejecting call waiting

A call waiting tone indicates a call during an external call. The number or the name of the caller is displayed if the phone number is transferred.

- Reject a call: Options → Reject waiting call → OK
- Accept a call: Accept → . . . speak to the new caller. The previous call is placed on hold.
- End the call, resume the on-hold call: Press the End call key .

Making internal calls

- Multiple handsets have been registered to the base station (page 48).

- Press briefly . . . the handset list is opened, this handset is indicated by < . . . use to select handset or Call all (group call) Press the Talk key .

Fast access for group call:

- Press briefly or press and hold

Internal calls to other handsets registered to the same base station are free of charge.

You hear the busy tone if:

- there is already an internal connection
- The handset being called is not available (deactivated, outside of range).
- The internal call is not accepted within 3 minutes.
Making calls

Internal consultation call / Internal transfer
Call an external participant and transfer the call to an internal participant or hold a consultation call with him or her.

- The list of handsets is opened and use \( \text{Call all} \) to select a handset or Call all OK
- The internal participant(s) are called

Possible options:
- Hold a consultation call:
  - Speak to the internal participant
- Return to the external call:
  - Options \( \text{End active call} \) OK
- Transfer the external call when the internal participant has answered:
  - Announce an external call \( \text{Press the End call key} \)
- Transfer the external call before the internal participant answers:
  - Press the End call key \( \text{End} \) the external call is forwarded immediately. If the internal participant does not answer or the line is busy, the external call will automatically return to you.
- End the internal call if the internal participant does not answer or the line is busy:
  - End \( \text{. . . You return to the external call} \)

Establishing a conference call / Call swapping
Conduct a call while a second call is being held. Both callers are indicated on the display.
- Call swapping: \( \text{Use} \) to swap between both participants.
- Establish a three-way conference call: \( \text{Conf.} \)
- End a conference call: \( \text{End Conf.} \). . . You have been connected back to external participant
  - Use \( \text{End} \) to swap between both participants
  - The other participants end the conference call using the End call key \( \text{End} \).

Accepting/rejecting call waiting
An external call arriving during an internal call is indicated with a call waiting tone. If the number is transferred, you will see the number or the name of the caller on the display.
- Rejecting a call: \( \text{Reject} \)
  - The call waiting tone is turned off. The call continues to be indicated on the other registered handsets.
- Accepting a call: \( \text{Accept} \). . . Speak to the new caller, the previous call is placed on hold.

Internal call waiting during an external call
If an internal participant attempts to call you while you are involved in an external or internal call, this call is shown on the display (Call Waiting).
- End display: \( \text{Press any key} \)
- Accept the internal call: \( \text{End your current call} \)
  - The internal call is indicated in the usual way. You can accept the call.
Making calls

**Listening in to an external call**

You are conducting an external call. An internal participant can listen in to this call and take part in the conversation (conference).

- The Listening In function must be activated.

**Activating/deactivating internal listening in**

- Press and hold . . . all participants will hear a signal tone

**Internal listening in**

The line is engaged with an external call. Your screen will display information to that effect. You can listen in to the external call.

- Press and hold . . . all participants will hear a signal tone

**Ending listening in**

- Press . . . all participants will hear a signal tone

---

**During a conversation**

**Handsfree mode**

Activating/deactivating handsfree mode during a call and when establishing a connection:

- Press the handsfree key

Placing the handset in the charging cradle during a call:

- Press and hold down the handsfree key . . . Place the handset in the charging cradle . . . hold for a further 2 seconds

**Call volume**

Applies to the current mode (handsfree, receiver or headset if the handset has a headset connection):

- Press . . . Use to set the volume . . . Save

**Extra-loud function:**

- Press the control key until the highest level is reached.

The setting is automatically saved after around 3 seconds, even if Save is not pressed. The extra-loud setting only applies for the duration of the call.

**Muting the microphone**

When the microphone is switched off, callers will no longer hear you.

Switch the microphone on/off during a call: Press .
Provider-specific functions (network services)

Network services depend on the network (analogue fixed line network or IP telephony) and on the network provider (service provider) and must be requested from that provider if required. You will find a description of the features on your network provider's website or at one of their store branches. If you require assistance, please contact your network provider.

Requesting network services may incur additional costs. Please consult your network provider.

Network services fall into two distinct groups:

- Network services that are activated when in idle status for the following call or all subsequent calls (for example, "calling anonymously"). These are activated/deactivated via the Select Services menu.
- Network services that are activated during an external call, (for example, "consultation call" and "swapping between two callers" and "setting up conference calls"). These are made available during an external call either as an option or by using a display key (e.g. Ext. Call, Conference).

To activate/deactivate the features, a code is sent to the telephone network.

After a confirmation tone from the telephone network, press .

It is not possible to reprogram the network services.

Calling Line Identification

During a call, the caller's number is transferred (CLI = Calling Line Identification) and may be displayed on the recipient's display (CLIP = CLI presentation). If the caller's number is withheld, it will not be displayed to the recipient. The call is made anonymously (CLIR = CLI Restriction).

Caller display for incoming calls

Calling Line Identification

The caller's phone number is displayed. If the caller's number is saved in the directory, the name is displayed.

No Calling Line Identification

Instead of name and number, the following is displayed:

- **External**: No number has been transferred.
- **Withheld**: Caller has withheld Calling Line Identification.
- **Unavailable**: Caller has not authorised Calling Line Identification.
Provider-specific functions (network services)

Call waiting during an external call
During an external call, a call waiting tone indicates another external caller. If the number is being transferred, you will see the number or the name of the caller on the display.

Reject waiting caller:
- **Options** ➤ Reject waiting call ➤ OK ... the waiting caller hears the busy tone

Accept the waiting call:
- **Accept**

Once you have accepted the waiting call, you can switch between the two callers ([Call swapping ➤ page 23]) or speak to both simultaneously ([Conference ➤ page 23]).

Activating/deactivating call waiting
- ➤ ... use **Select Services** ➤ OK ➤ Call Waiting ➤ OK ... then
  - **Switch on/off:** ➤ Status: ... use **On** or **Off**
  - **Activate:** ➤ **Send**

Call waiting is activated or deactivated for all registered handsets.

Ringback

If busy/no answer
If a call recipient is unavailable, you can initiate a ringback.
- **If busy:** The ringback takes place as soon as the participant in question terminates the current call.
- **If no answer:** The ringback takes place as soon as the participant in question has made another call.

Initiate ringback
- **Options** ➤ Ringback ➤ OK ➤ Press the End call key

Cancelling ringback
- ➤ ... use **Select Services** ➤ OK ➤ Ringback Off ➤ OK ... You will receive a confirmation from the telephone network ➤ Press the End call key

You can only activate one ringback at a time. Activating a ringback will automatically cancel any ringback that is already active.

The ringback can only be received on the handset that activated the ringback.

If the ringback is indicated before you are able to cancel it: ➤ Press the End call key
Provider-specific functions (network services)

**Call divert**

When diverting a call, the call is forwarded to another connection.

- ✧ ✧ ✧ use ✧ to select ✧ Select Services ✧ OK ✧ ✧ Call Divert ✧ OK ✧ ✧ then

Switch on/off: ✧ Status: ✧ use ✧ to select On or Off

Enter the number for call diverting:

- ✧ ✧ ✧ use ✧ to enter the number

Set the time for call divert:

- ✧ ✧ ✧ use ✧ to select the time for call divert

**All Calls:** Calls are diverted immediately

**No Answer:** Calls are diverted if no one accepts the call within several rings.

**When Busy:** Calls are diverted if the line is busy.

Activate: ✧ Send

A connection is established to the telephone network . . . a confirmation is sent from the telephone network ✧ Press the End call key 0

⚠️ Diverting calls may incur **additional costs**. Please consult your network provider.

**Calls with three participants**

**Consultation calls**

Make another external call during an external call. The first call is placed on hold.

- ✧ Ext. Call ✧ ✧ ✧ use ✧ to enter the number of the second participant ✧ ✧ the active call is placed on hold and the second participant is called

If the second participant does not answer: ✧ End

**Ending a consultation call**

- ✧ Options ✧ ✧ ✧ End active call ✧ OK ✧ ✧ the connection to the first caller is reactivated

or

- ✧ Press the End call key ✧ ✧ ✧ a recall to the first participant is initiated
Provider-specific functions (network services)

Call swapping
Switching between two calls. The other call is placed on hold.
- During an external call, dial the number of a second participant (consultation call) or accept a waiting caller . . . the display shows the numbers and/or names of both call participants, the current participant is marked with .
- Use the control key to switch back and forth between participants

Ending a currently active call
- Options ➤ End active call ➤ OK . . . the connection to the other caller is reactivated

or
- Press the End call key . . . a recall to the first participant is initiated

Conference
Speaking to both participants at the same time.
- During an external call, dial the number of a second participant (consultation call) or accept a waiting caller . . . then
  Initiate conference call:
  - Conf. . . . all callers can hear one another and hold a conversation with one another
  Return to call swapping:
  - End Conf. . . . You will be reconnected to the participant with whom the conference call was initiated

End call with both participants:
- Press the End call key

Each of the participants can end their participation in the conference call by pressing the End call key or hanging up.
Directory

The local directory is unique to the handset. However, it is possible to send entries to other handsets.

Opening the directory

- Briefly press in idle status

Directory entries

- Number of entries: up to 200
- Information: First name and surname, up to three telephone numbers, anniversary with alert, VIP ringtone with VIP icon
- Length of the entries: Numbers: max. 32 digits
  First name, surname: max. 16 characters

Creating an entry

-  <New Entry>  OK

Name:
- . . . Use  to toggle between the entry fields First Name/Surname
  Use  to enter the first and/or last name

Numbers:
-  Tel.1 - Type  . . . Use  to select a number type (Home, Office or Mobile)
  Use  to enter a number
- Enter more numbers:  Use  to toggle between the entry fields Tel.1 - Type/Tel.2 - Type/Tel.3 - Type
  . . . Use  to enter a number

Anniversary:
- . . . use  to activate/deactivate Anniversary
  . . . use  to enter date and time
  . . . use  to select type of alert (Visual only or a ringtone)

Caller Melody (VIP):
- . . . use  to select the ringtone that will indicate a call from the participant
  . . . if a Caller Melody (VIP) has been assigned, the entry will appear in the directory with the VIP icon.

Save entry:  Save

The entry is only valid if it contains at least one number.
Directory

For Caller Melody (VIP): the telephone number of the caller must be supplied.

Searching for/selecting a directory entry

- Press and hold [ ] to browse searched names
- Use [ ] to enter initial letters (max. 8 letters) . . . the display jumps to the first name starting with these initial letters . . . use [ ] to continue browsing to the desired entry, if needed

Displaying/changing an entry

- Use [ ] to select entry [View] . . . use [ ] to select the field to be changed [Edit]
- Use [ ] to select an entry [Options] [Edit entry] [OK]

Deleting entries

Delete the selected entry: Press and hold [ ] to select an entry [Options] [ ] Delete entry [OK]
Delete all entries: Press and hold [ ] to select an entry [Options] [ ] Delete all [OK] [Yes]

Setting the order of the directory entries

Directory entries can be sorted by first name or surname.

- Use [ ] to select an entry [Options] [ ] Sort by Surname / Sort by First Name

If no name was entered, the default telephone number is shown in the surname field. These entries appear at the beginning of the list, regardless of how the entries are sorted.

The sort order is as follows:

Space | Digits (0-9) | Letters (alphabetically) | Other characters

Displaying the number of entries available in the directory

- Use [ ] to select an entry [Options] [ ] Available Memory [OK]
Directory

Copying number to the directory

Copy numbers to the directory:
• From a list e.g. the call list or the redial list
• From the text of an SMS
• When dialling a number

The number is displayed or highlighted.

▷ Press the display key  or Options  Copy to Directory  OK … possible options:
  Create a new entry:
  ▷ <New Entry>  OK … use  to select number type  OK  complete entry  Save
  Add number to an existing entry:
  ▷ … use  to select an entry  OK … use  to select number type  OK … the number is entered or a prompt to overwrite an existing number is displayed  … if required, answer the prompt with Yes/No  Save

Copying an entry/directory

⚠ The sending and receiving handset must both be registered to the same base station.

The other handset and the base station are able to send and receive directory entries.

⚠ An external call interrupts the transfer.

Sounds are not transferred. Only the date is transferred for an anniversary.

Both handsets support vCards:
• No entry with the name is available: a new entry is created.
• An entry with the name is already available: The entry is expanded to include the new numbers. If the entry contains more numbers than allowed by the recipient handset, a second entry is created with the same name.

The recipient handset does not support vCards:
A separate entry is created and sent for each number.

The sending handset does not support vCards:
A new entry is created on the receiving handset and the transferred number is added to the Phone (Home) field. If an entry with this number already exists, the copied number is discarded.
Copying individual entries

» [ ] [ ] ... use [ ] to select the desired entry » Options » [ ] Copy entry » OK » [ ] to Internal » OK » ... use [ ] to select the receiving handset » OK ... the entry is copied

Copy the next entry after successful transfer: » Press Yes or No

Use vCard via SMS to send a directory entry in vCard format by SMS.

Copying the entire directory

» [ ] » Options » [ ] Copy all » OK » [ ] to Internal » OK » ... use [ ] to select the receiving handset » OK ... the entries are copied one after the other
Message lists

Notifications about missed calls, messages on the network mailbox, received SMS messages and missed alarms are saved in the messages list.

As soon as a **new message** arrives, an advisory tone will sound. The **Message key** also flashes (if activated ➝ page 29).

Icons for message types and the number of new messages are shown on the idle display.

Notification for the following message types is available:

- on the network mailbox
- in the missed calls list
- in the SMS message list
- in the missed alarms list

The icon for the network mailbox is always displayed, provided the number is stored in the telephone. The other lists are only displayed if they contain messages.

Display messages:

- Press the **Message key** ➝ Messages lists that contain messages are displayed, **Mailbox** is always displayed. The number of new messages is shown in brackets.
- ➝ use ➝ to select a list ➝ **OK** ➝ the calls or messages are listed.

Network mailbox: The network mailbox number is dialled.

The message list contains an entry for every answer machine assigned to the handset, e.g. for a network mailbox.
Activating/deactivating Message key flashing

Receipt of new messages is displayed by a flashing message key on the handset. This type of alert can be activated/deactivated for each message type.

In idle status:

- Press keys \* 4 \# . . . the number 9 appears in the display . . . use \# to select the message type:
  - Messages on the network mailbox
  - missed calls
  - new SMS

- . . . the number 9 followed by the entry (e.g. 975) is displayed, the current setting for the select message type flashes in the entry field (e.g. 0) . . . use \# to set the action for the arrival of new messages:
  - The Message key flashes
  - The Message key does not flash

- . . . confirm selected setting with OK
  or
- return to idle display without making changes: \# Back
Call lists

The telephone saves different types of calls (missed, accepted and outgoing calls) in lists.

List entry

The following information is displayed in the list entries:

- The list type (in the header)
- Icon for the type of entry:
  - Missed calls,
  - Accepted calls,
  - Outgoing calls (redial list)
- Caller's number. If the number is stored in the directory, the name and number type (Phone (Home), Phone (Office), Phone (Mobile)) are shown instead. In the event of missed calls, the number of missed calls from this number is also shown in square brackets.
- Date and time of call (if set)

Opening the call list

Via the display key:  
Call Lists  OK
Via the menu:  
Call Lists  OK
Via the Message key (missed calls):
Press the Message key  Missed Calls:  OK

Calling back a caller from the call list

Press the Call Lists key  OK

Network mailbox

The network mailbox has been requested from the network provider.

Entering a number

- Use [0] to select Answer Machine ➔ OK ➔ Network Mailbox ➔ OK...
- Use [1] to enter or amend the network mailbox number ➔ Save

To activate/deactivate the network mailbox use the phone number and a function code of your network provider. Please contact the network provider if you require any further information.

Playing back messages

- Press and hold [1]...

or

- Press the Message key ➔ Network Mailbox ➔ OK

or

Listen to announcement out loud: ➔ Press the handsfree key [1]...
Emergency call

**Additional functions**

### Emergency call

You can set up up to four numbers as emergency numbers. If the Emergency function is activated, you can trigger an emergency call with the right display key **SOS** when the handset is idle.

<table>
<thead>
<tr>
<th>Emergency call activated:</th>
<th>The display key <strong>SOS</strong> is shown in red on a white background.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency call not activated:</td>
<td>A question mark on a red background is displayed next to the display key <strong>SOS</strong>.</td>
</tr>
</tbody>
</table>

**SOS activated**

**Calls**

**SOS not activated**

**Calls**

---

**Process**

1. **Press the display key **SOS****

You hear the following announcement through the speaker:

"Emergency call being sent." The participant called is displayed.

The person receiving the emergency call hears the emergency call message:

"This is an emergency call. Please press key 5 in order to accept the emergency call."

**The participant called presses key 5:** You can speak to one another.

**The participant called does not accept the emergency call:**

After 60 seconds, the emergency function automatically dials the next emergency number (provided more than one number is stored).

The emergency function also automatically switches to the next emergency number after 60 seconds in the following situations:

- The answer machine of the emergency number selected is activated
- The emergency number is busy
- The telephone of the person receiving the emergency call is not set to "tone dialling".

**This process is repeated a maximum of 5 times.** If none of the calls are accepted, the emergency function is ended with an error tone.

**Cancelling an emergency call**

If you have triggered an emergency call by mistake, you can cancel it.

- **Briefly press the End call key **

---

32
Emergency call

Setting up emergency call
In order to be able to use the function you must
• save the emergency numbers and
• activate the emergency function.

⚠️ The police, ambulance service or fire service must not be used for an emergency call.

Storing emergency numbers
- Press the display key SOS . . . The message No SOS No. available is displayed. After a short time, the display is opened for entry of SOS number 1.

or
- . . . use to select SOS Emergency Call OK use to select the emergency number (SOS 1-SOS 4) Edit

. . . use to enter the first name and/or last name and the number for the emergency call use to toggle between the entry fields Save . . . The emergency call is automatically activated Enter more emergency numbers if required

If your telephone is connected to a PABX, you must enter the access code (outside line code) as the first digit of your entry, if necessary (user guide of your PABX).

You should carry out a test run to ensure that the emergency function has been correctly set up.

Activating/deactivating the emergency call function
- . . . use to select SOS Emergency Call OK Activation: Edit ( = activated)

Activate with the SOS display key

⚠️ The function is deactivated. At least one SOS number has been entered.

- Press the display key SOS Activation: Edit ( = activated)

Changing/deleting an emergency number
- . . . Use to select SOS Emergency Call OK Use to select the emergency number (SOS 1-SOS 4) Edit

. . . Use to delete the entry Enter a new number if required Save

If no valid numbers are entered, the Emergency Call function is automatically deactivated.
Calendar

You can remind yourself of up to 30 appointments.
In the calendar, the current day is outlined in white; on days with appointments, the numbers are displayed in colour. When a day is selected, it will be outlined in colour.

Saving appointments to the calendar

Date and time have been set.

Switch on/off: Use \( \text{On}\) or \( \text{Off}\) to select desired day.

Enter date: Use \( \text{Date}\) to enter new date.

Enter time: Use \( \text{Time}\) to enter hours and minutes of the appointment.

Set name: Use \( \text{Text}\) to enter a description of the appointment (e.g. evening meal, meeting).

Set alarm tone: Use \( \text{Signal}\) to select the melody of the reminder alarm or deactivate the acoustic signal.

Save appointment: Use \( \text{Save}\).

If an appointment has already been entered: Use \( \text{<New Entry>}\) to enter information for the appointment.

Notification of appointments/anniversaries

Anniversaries are transferred from the directory and displayed as an appointment. An appointment/anniversary is displayed in idle status and the selected ringtone plays for 60 seconds as a notification.

Acknowledge and stop the reminder: Press the display key \( \text{OFF}\).

Respond with SMS: Press the display key \( \text{SMS}\) to display the SMS menu.

During a call, a reminder is indicated on the handset once with an advisory tone on the handset.
Displaying missed appointments/anniversaries

The following appointments and anniversaries are saved in the Missed Alarms list:
- The appointment/anniversary call was not acknowledged.
- The appointment/anniversary was notified during a phone call.
- The handset was switched off at the time of the appointment/anniversary.

The last 10 entries are stored. The icon and the number of new entries are shown in the display. The most recent entry appears at the top of the list.

Opening the list
- Press the Message key Missed Alarms: OK . . . use to browse through the list of any appointments

or
- . . . use to select Additional Features Missed Alarms OK

Each entry is displayed with the number or name, date and time. The most recent entry appears at the top of the list.

Delete an appointment/anniversary: Delete

Compose an SMS: SMS (only if the list has been opened via the menu) . . . the SMS menu is opened

Displaying/changing/deleting stored appointments
- . . . use to select Additional Features Calendar OK . . . use to select day OK . . . the appointment list is displayed . . . use to select date . . . possible options:
  - View . . . The appointment settings are displayed
  - Change appointment: View Edit
    or Options Edit entry OK
  - Activate/deactivate appointment:
    Options Activate/Deactivate OK
  - Delete appointment:
    Options Delete entry OK
  - Delete all appointments for a day:
    Options Delete all Appoints. OK Yes
Timer

Setting the timer (countdown)

- Use to select Additional Features
  - OK
  - Timer
  - OK

  Enable/disable:
  - Activation: Select with On or Off

  Set the duration:
  - Duration
  - Use to enter the hours and minutes for the timer
  - Min.: 00:01 (one minute); Max.: 23:59 (23 hours, 59 minutes)

  Save the timer:
  - Save

The timer starts the countdown. In the idle display, icon and the remaining hours and minutes are displayed until one minute is left. From this point, the remaining seconds are counted down. At the end of the countdown, the alarm is triggered.

Disabling/repeating the alarm

- Switch off the alarm: OFF
- Repeat the alarm: Restart . . . the timer display is displayed again set another duration as required Save . . . the countdown is restarted

Alarm clock

Date and time have been set.

Activating/deactivating the alarm clock and setting the wake-up time

- Use to select AlarmClock
  - OK . . . then

  Switch on/off:
  - Activation: Select with On or Off

  Setting the wake-up time:
  - Time
  - Use to enter hours and minutes

  Set days:
  - Occurrence
  - Use to switch between Monday-Friday and Daily

  Set the volume:
  - Volume
  - Use to set volume in 5 levels or select crescendo (increasing volume)

  Set alarm:
  - Melody
  - Use to select a ringtone for the alarm

Save settings:

When the alarm clock is activated, the icon and the wake-up time are displayed in idle display.
Alarm

An alarm is shown on the display and indicated by the selected ringtone melody. The alarm sounds for 60 seconds. If no key is pressed, the alarm is repeated after 5 minutes. After the second repetition, the alarm call is deactivated for 24 hours.

During a call, the alarm is only indicated by a short tone.

Switching off /repeating the alarm after an interval (snooze mode)

Deactivate the alarm: ➤ OFF

Repeat the alarm (snooze mode): ➤ Press Snooze or any key . . . the alarm is switched off and repeated after 5 minutes.

Baby monitor

When the baby monitor is switched on, the stored (internal or external) destination number is called as soon as a defined noise level is exceeded in the vicinity of the handset. The alarm to an external number is cancelled after approximately 90 seconds.

You can answer the alarm using the Two Way Talk function. This function is used to switch the loudspeaker of the handset located in the baby’s room on or off.

In baby monitor mode, incoming calls are only indicated on the display (without ringtone). The display backlight is reduced to 50%. Advisory tones are deactivated. All keys are locked, with the exception of the display keys and the centre of the control key.

If you accept an incoming call, the baby monitor mode is suspended for the duration of the call, but the function remains activated. The baby monitor mode is not deactivated by switching the handset off and on again.

The handset should be positioned 1 to 2 metres away from the baby. The microphone must point towards the baby.

Activating the function reduces the operating time of your handset. For that reason, place the handset in the charging cradle if necessary.

The baby monitor is activated 20 seconds after switching on.

The answer machine for the destination number must be switched off.

After switching on:

➤ Test sensitivity.
➤ Test the connection, if the alarm is being forwarded to an external number.
Baby monitor

Activating and setting the baby monitor

◊ ◊ ... use ◊ to select Additional Features ◊ OK ◊

Baby Monitor ◊ OK ◊

The destination number is displayed in idle display when the baby monitor is activated.

Deactivate baby monitor / Cancel alarm

Deactivate the baby monitor:  ◊ In idle status press the display key OFF

Cancel the alarm:  ◊ Press the End call key ◊ during an alarm

Deactivate the baby monitor remotely

The alarm is forwarded to an external destination number.

The receiving phone supports tone dialing.

◊ Accept alarm call ◊ Press keys ◊

The baby monitor is deactivated and the handset is in idle status. The baby monitor settings on the handset (e.g. no ringtone) will remain activated until you press the display key OFF.

The baby monitor cannot be reactivated remotely.

Reactivate: (⇒ page 38)
The device range is set to maximum as default. This guarantees the best connection between the handset and the base station. In idle status, the handset will not function (as it is not transmitting). Only the base station will maintain contact with the handset via a low wireless signal. During a call, the transmission power automatically adapts to the distance between the base station and handset. The smaller the distance to the base, the lower the radiation.

To reduce the radiation further:

### Reducing radiation by up to 80%

- Use the navigation keys to select **Settings** → OK → **ECO DECT** → OK → **Maximum Range** → Change (default setting = off)

The range is also reduced with this setting.

It is not possible to use a repeater to increase the range.

### Deactivating radiation in idle status

- Use the navigation keys to select **Settings** → OK → **ECO DECT** → OK → **No Radiation** → Change (default setting = on)

To benefit from the advantages of the setting **No Radiation**, all registered handsets must support this feature.

If the setting **No Radiation** is activated and a handset is registered to the base that does not support this feature, **No Radiation** is automatically deactivated. As soon as this handset is de-registered, **No Radiation** will automatically be re-activated.

The wireless connection will only be established for an incoming or outgoing call and the connection will be delayed by about 2 seconds.

In order that a handset can establish a wireless connection with the base station more quickly for an incoming call, it must "listen" to the base station more often, i.e. scan the environment. This increases power consumption and reduces the standby and talk-time of the handset.

When **No Radiation** is activated, there will be no range display/range alarm on the handset. Contactability can be tested by attempting to establish a connection.

- Press and hold the Talk key . . . the dialling tone sounds.
Protection against unwanted calls

Protection against unwanted calls

Time control for external calls

Date and time have been set.

Enter a time period during which the handset should suspend ringing to indicate external calls e.g. during the night.

- \( \) use to select Audio Settings \( \) OK
- \( \) Ringtones (Handset) \( \) OK \( \) \( \) Time Control \( \) OK \( \) . . . then

Switch on/off:

Enter time:

- \( \) use to select On or Off
- \( \) use to switch between Suspend ring. from and Suspend ring. until
- \( \) use \( \) to enter start and end in 4-digit format

Save:

Example

<table>
<thead>
<tr>
<th>Time Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>For external calls:</td>
</tr>
<tr>
<td>On</td>
</tr>
<tr>
<td>Suspend ring. from:</td>
</tr>
<tr>
<td>22:00</td>
</tr>
<tr>
<td>Suspend ring. until:</td>
</tr>
<tr>
<td>07:00</td>
</tr>
<tr>
<td>Back Save</td>
</tr>
</tbody>
</table>

The time control only applies to the handset for which the setting is configured.
The telephone will continue to ring for numbers that have been assigned to a VIP group in the directory.

Protection from anonymous callers

The handset will not ring if callers' numbers are not revealed. This setting can be applied to only one or to all registered handsets.

For one handset

- \( \) . . . use to select Audio Settings \( \) OK \( \) \( \) Ringtones (Handset) \( \) OK \( \) \( \) Anon. Calls Silent \( \) Edit \( \) ( = on) . . . the call is only signalled on the display

For all handsets

- \( \) . . . use to select Settings \( \) OK \( \) \( \) Telephony \( \) OK \( \) \( \) Anonymous Calls \( \) Edit \( \) ( = on) . . . use to select Protection Mode:

No Protection Anonymous calls are indicated in the same way as identified numbers

Silent Call The telephone will not ring and the incoming call will only appear in the display.

Block Call The telephone will not ring and the incoming call will not appear in the display. The caller will hear the busy tone.

Save settings: \( \) Save
Protection against unwanted calls

Black list

When the black list function is activated, calls from black list numbers are not indicated or are only indicated in the display. These settings apply to all registered handsets.

Displaying/editing the black list

- . . use \(\bullet\) to select Settings \(\rightarrow\) OK \(\rightarrow\) Telephony \(\rightarrow\) OK \(\rightarrow\) Black List \(\rightarrow\) Edit \(\rightarrow\) Blocked Numbers \(\rightarrow\) OK . . the list of blocked numbers is displayed . . . possible options:
  - Create an entry: New . . use \(\bullet\) to enter a number \(\rightarrow\) Save
  - Delete an entry: . . use \(\bullet\) to select an entry \(\rightarrow\) Delete . . the entry is deleted

Transferring a number from a call list to the black list

- . . use \(\bullet\) to select Call Lists \(\rightarrow\) OK . . use \(\bullet\) to select Accepted calls/ Missed calls \(\rightarrow\) OK . . use \(\bullet\) to select entry \(\rightarrow\) Options \(\rightarrow\) Copy to Blacklist \(\rightarrow\) OK

Setting the protection mode

- . . use \(\bullet\) to select Settings \(\rightarrow\) OK \(\rightarrow\) Telephony \(\rightarrow\) OK \(\rightarrow\) Black List \(\rightarrow\) Edit \(\rightarrow\) Protection Mode \(\rightarrow\) OK . . use \(\bullet\) to select desired protection:
  - No Protection All calls are indicated, including from callers whose numbers are on the black list.
  - Silent Call The telephone will not ring and the incoming call will only appear in the display.
  - Block Call The telephone will not ring and the incoming call will not appear in the display. The caller will hear the busy tone.

Save settings: \(\rightarrow\) Save
It is possible to send SMS messages as soon as the telephone has been connected.

Calling Line Identification is enabled (page 20).

The network provider supports the SMS service.

The call number of at least one SMS service centre has been entered (page 45).

If no SMS service centre is entered, the submenu SMS only consists of the entry Settings.

Writing and sending SMS messages

An SMS may be up to 612 characters in length. If the number of characters exceeds 160, the SMS is sent as linked SMS messages (up to four individual SMS messages).

The remaining number of characters is shown in the top right corner of the display, followed by an indication in brackets of which part of a linked SMS is currently being written. Example: 405(2).

\[\text{SMS} \rightarrow \ldots \text{use } \quad \text{to select } \quad \text{OK } \ldots \text{then}\]

Write an SMS: \[\text{New SMS } \quad \text{OK } \quad \ldots \text{use } \quad \text{to enter SMS text}\]

Send an SMS: \[\text{Press the End call key } \quad \text{OK}\

or \[\text{Options } \quad \text{Send } \quad \text{OK}\

Enter number (Send SMS to):

- From the directory: \[\text{use } \quad \text{to select number } \quad \text{OK}\]
- or \[\text{use } \quad \text{to enter number directly}\]

If sending SMS messages to an SMS mailbox: add the mailbox ID to the end of the number.

Send: \[\quad \text{Send}\]

The number must include the local area code (even if you are in that area).

If an external call comes in, or if you interrupt writing for more than 2 minutes, the text is automatically saved in the draft message list.

Sending SMS messages may incur additional costs. Please consult your network provider.
SMS (text messages)

Sending SMS messages to an e-mail address

The network provider supports this feature.

» . . . use 🔄 to select 🔄 SMS 🔄 OK 🔄 New SMS 🔄 OK . . . then
Enter address:   » . . . use 🔄 to enter the e-mail address at the start of the SMS message

  Delete an entry:
    Options  Delete entry  OK
  Save the number in the directory:
    Options  Copy to Directory  OK
  Delete all entries in the SMS message list:
    Options  Delete List  OK

Reading and managing SMS messages

  . . . use to select SMS  OK  OK . . . use to select
  SMS  Read . . . possible options:
  Answer SMS:
    Options  Reply  OK
  Edit SMS text and send to recipient of your choice:
    Options  Edit  OK . . . use to edit text  Options

  Forward SMS to recipient of your choice:
    Options  Forward  OK
  Display text in a different character set:
    Options  Character Set  OK . . . use to select
    character set  Select (= selected)

Saving numbers from SMS text to the directory

If a telephone number in the SMS text is recognised, it is automatically highlighted.
• Save the number in the directory:  
  If the number is to also be used to send an SMS, save the number including the local area code (dialling code).
• Dial a number:  Press the Talk key
• Select the next number, if an SMS contains multiple numbers:  . . . use to scroll down
  until the first number has disappeared from the display.
The + icon is not copied for international area codes.

- You should then enter "00" at the start of the number.

SMS with vCard

The vCard is an electronic business card. It is indicated by the icon in the SMS text. A vCard can contain a name, home number, work number, mobile number and a birthday. Individual entries in a vCard can be saved to the directory one after the other.

When reading an SMS containing the vCard:

- View
- Save

The directory is opened automatically. The number and name are copied. If a birthday is entered on the vCard, the date is copied to the directory as an anniversary. If necessary, edit the entry in the directory and save it. You will return to the vCard automatically.

SMS notification

Receive notifications of missed calls and/or new messages on the answer machine.

-  
-  
- Change ( = on) ... then

Enter number: 
- To use to enter the number to which the SMS should be sent

Missed calls: 
-  
- Missed calls ... use to select On or Off

Save settings: 
-  
- Save

Do not enter your own fixed line network number for notification of missed calls. This can create an endless loop that will incur charges. 

SMS notification may incur additional costs.

SMS service centres

The number for at least one SMS service centre must be saved in the device to be able to send SMS messages. The SMS service centre number can be obtained from the service provider.

SMS messages are received from every entered SMS service centre as long as they are registered with their service provider.

Your SMS messages are sent via the SMS service centre that is entered as the active send centre. Only one SMS service centre can be the active send centre at any one time.
SMS (text messages)

Entering/changing the SMS service centre / Setting the send service centre

- Use settings to select SMS service centre (current send service centre) → Use to select SMS service centre → Enter the number of the SMS service:
- Use to enter the number
- Save

° If you have agreed a flat fixed line network rate, the chargeable numbers with dialling code 0900 are often blocked. If, in this case, a 0900 number is entered for the SMS service centre, you will not be able to send text messages from your phone. If the attempt to send fails, the SMS is saved in the incoming messages list and indicated as failed.

SMS to PABXs

- The Call Line Identification must be forwarded to the extension of the PABX (CLIP).
- If necessary, the access code/outside line code must be prefixed to the number of the SMS service centre (depending on your PABX). To test: Send an SMS to your own number, once with the access code and once without.
- If the SMS is sent without the extension number, it will not be possible for the recipient to answer directly.

Activating/deactivating first ring muting

Every incoming SMS is indicated by a single ring. If such a "call" is answered, the SMS is lost. To prevent this, mute the first ring for all external calls. In idle status:

- Use settings to select SMS service centre (current send service centre) → Use to select SMS service centre → Enter the number of the SMS service:
- Save

° If you have agreed a flat fixed line network rate, the chargeable numbers with dialling code 0900 are often blocked. If, in this case, a 0900 number is entered for the SMS service centre, you will not be able to send text messages from your phone. If the attempt to send fails, the SMS is saved in the incoming messages list and indicated as failed.

° Do not mute the first ringtone:
- Use to select Yes or No (Yes = SMS messages are sent via the SMS service centre)

° Mute the first ringtone (default setting):
- Use to select Yes or No (Yes = SMS messages are sent via the SMS service centre)
SMS status report
If the function is activated, you will receive an SMS with status information from the SMS service centre for each SMS that has been sent.

- Use \( \Rightarrow \) to select \( \square \) SMS \( \Rightarrow \) OK \( \Rightarrow \) Settings \( \Rightarrow \) OK \( \Rightarrow \) Status Report \( \Rightarrow \)

!! Requesting a status report may incur additional costs.

SMS troubleshooting
E0 Calling Line Identification permanently withheld (CLIR) or Calling Line Identification not activated.
FE Error occurred while sending SMS.
FD Connection to SMS service centre failed, see self-help.

Self-help with errors
You cannot send messages
- You have not requested the CLIP service (Calling Line Identification Presentation).
  - Ask your network provider to enable the feature.
- SMS sending was interrupted (e.g. by a call).
  - Re-send the SMS.
- The network provider does not support this feature.
- No number or an incorrect one has been entered for the send service centre.
  - Enter the number (→ page 45).

SMS text is incomplete
- The phone’s memory is full.
  - Delete old SMS messages.
- The network provider has not yet sent the rest of the SMS.

You have stopped receiving SMS messages
- Call divert has been activated for All calls.
  - Change call divert (→ page 22).

The SMS is played back
- The "display call number" service is not activated.
  - Ask the network provider to enable this feature (subject to a fee).
- Your mobile phone operator and SMS service provider are not working in partnership.
  - Obtain information from your SMS service provider.
- The phone is not registered with the SMS service provider.
  - Send an SMS to register the phone for receiving SMS.
Multiple handsets

Expanding the functionality of the telephone

Multiple handsets

Up to six handsets can be registered to the base station.
Each registered device is assigned an internal number (1 – 6) and an internal name (INT 1 – INT 6). The number or name assigned can be changed.
If all internal numbers have already been assigned at the base station: ► de-register a handset that is no longer needed

Registering the handset

A handset can be registered on up to four base stations.

Registration must be initiated on the base station and on the handset.
Both must be carried out within 60 secs.

On the base station

► Press and hold the Registration/Paging key on the base station (approx. 3 secs).

On the handset

| ► . . . use to select Settings OK Registration OK Register
| Handset OK OK . . . an available base station is sought ► . . . Enter system PIN (default setting: 0000) OK

If the handset is already registered with four bases, select the base to be replaced by the new base.

Once registration is complete, the handset returns to idle status. The internal number of the handset appears in the display, e.g. INT 1. If not, repeat the procedure.

Maximum possible number of handsets registered to the base station (all internal numbers assigned): The handset with the highest internal number is replaced by the new one. If this is not possible, because a conversation is being held on this handset, for example, the message No available internal number is given. ► De-register a handset that is no longer required and repeat the registration procedure
Multiple handsets

Registering a handset to multiple base stations
Your handset can be registered to up to four base stations. The active base station is the base
station to which the handset was last registered. The other base stations remain saved in the list
of available base stations.

- . . use to select Settings OK Registration OK Select Base OK . . possible options:

  Change active base station:
  - . . use or Best Base to select base station Select
  - Best Base: The handset chooses the base station with the best
  reception as soon as it loses connection to the current base station.

  Change name of a base station:
  - . . use to select a base station Select
  - Name change name Save

De-registering the handset

- . . use to select Settings OK Registration OK De-
  register Handset OK . . the handset being used is selected . . use to select a
different handset if desired OK . . enter system PIN if desired OK . . Confirm de-
  registration with Yes

If the handset is still registered to other bases, it switches to the base with the best reception
(Best Base).

Locating a handset (Paging)

- Briefly press the Registration/paging key on the base station.

All handsets will ring at the same time ("paging"), even if ringtones
are switched off. Exception: handsets on which the baby monitor is
activated.

Ending the search

- Briefly press the registration/paging key on the base station
or Press the End call key on the handset
or Press the display key Silence on the handset
or No action. After approx. 30 seconds, the paging call will end
automatically.
Multiple handsets

Changing the handset name and internal number

When registering multiple handsets, they will automatically be assigned the names INT 1, INT 2, etc. Each handset will automatically be assigned the lowest unassigned internal number. The internal number is shown as the name of the handset on the display e.g. INT 2. You can change the names and the numbers of handsets. The name must not exceed 10 characters in length.

- ... the list of handsets is opened, the current handset is highlighted with < ... use to select a handset ... possible options:
  - Edit name: Options Rename OK ... use to delete the current name ... use to enter a new name OK
  - Edit number: Options Edit Handset No. OK ... use to select a number Save
Repeater

A repeater increases the receiving range between the Gigaset handset and the base station. The registration procedure for a repeater depends on the version of the repeater being used.

- Repeater without encryption, e.g. Gigaset repeater prior to Version 2.0
- Repeater with encryption, e.g. Gigaset repeater later than Version 2.0

Further information about the Gigaset repeater can be found in the repeater user guide and at www.gigaset.com.

Repeater without encryption

Activate Maximum Range/deactivate No Radiation

- Press and hold Settings, OK, ECO DECT, OK, Maximum Range, Change (on), No Radiation, Change (off)

Deactivate encryption

- Press and hold Settings, OK, System, OK, Encryption, Change (deactivated)

Registering a repeater

- Connect the repeater to the mains power supply
- Press and hold the Registration/paging key on the telephone base station (min. 3 secs) . . . the repeater is automatically registered

It is possible to register more than one Gigaset repeater.

Repeater with encryption

Encryption is activated (default setting).

Registering a repeater

- Connect the repeater to the mains power supply
- Press and hold the Registration/paging key on the telephone base station (min. 3 secs) . . . the repeater is automatically registered

Up to 2 repeaters may be registered.

The ECO DECT function Maximum Range is activated and the No Radiation function is deactivated. The settings cannot be changed whilst the repeater is registered.

As soon as a repeater is registered, it will appear in the repeater list under Settings ▶ System ▶ Repeater

De-registering a repeater

- Press and hold Settings, OK, System, OK, Repeater, OK, . . . use to select repeater ▶ De-reg. ▶ Yes
Operation with a router

When operating on the analogue connection of a router, any echoes that may occur can be reduced by activating XES mode 1 (XES = eXtended Echo Suppression).

If the XES mode 1 does not sufficiently suppress the occurring echoes: activate XES mode 2.

Press one of the following keys:
- OK Normal mode
- OK XES mode 1
- OK XES mode 2

If there are no problems with echoes, the normal mode (factory settings) should be activated.

Operation with a PABX

To find out which settings are required for a PABX, please refer to the PABX user guide.

You cannot send or receive SMS messages on PABXs that do not support Calling Line Identification.

Setting Tone or Pulse dialling mode

- Use to select Settings
- OK Telephony
- OK Dialling Mode
- OK

Use to select Tone or Pulse
- Select (selected)

Setting the flash time

- Use to select Settings
- OK Telephony
- OK Recall

Possible flash times are listed
- Use to select flash time
- Select (selected)
Saving an access code (outside line code)

Setting the access code (e.g. “0”) for dialling using the fixed line network.

- Press ‹ to select Settings › OK › ☏ Telephony › OK › ☏ Access Code › OK › . . . then

Fixed line network: 
- Access external line with: . . . use ☏ to enter or change access code, max. 3 digits

Rule: 
- ☏ For . . . use ☏ to select when the access code should be dialled

Call Lists: The access code will only prefix numbers from a list (list of answered calls, list of missed calls, SMS list).

All calls: The access code prefixes all numbers dialled.

Off: The access code is deactivated and does not prefix any telephone number.

Save: 
- Save

The access code never prefixes any SMS service centre numbers.

Setting pauses

- Press ‹ . . . use ‼ ‼ ‼ 0 ✻ 5 ‼ ‼ ‼ ‼ ‼ . . . then

Pause after line seizure:
- 1 sec: 1 ✻ 6 1 ✻ OK
- 3 secs: 1 ✻ 6 2 ✻ OK
- 7 secs: 1 ✻ 6 3 ✻ OK

Pause after Recall key:
- 800 ms: 1 ✻ 2 1 ✻ OK
- 1600 ms: 1 ✻ 2 2 ✻ OK
- 3200 ms: 1 ✻ 2 3 ✻ OK

Dialling pause (pause after access code):
- 1 sec: 1 ✻ 1 ✻ 1 ✻ 1 ✻ OK
- 2 secs: 1 ✻ 1 ✻ 1 ✻ 2 ✻ OK
- 3 secs: 1 ✻ 1 ✻ 1 ✻ 3 ✻ OK
- 6 secs: 1 ✻ 1 ✻ 1 ✻ 4 ✻ OK

To enter dialling pause when dialling:
- Press and hold the hash key ‼ . . . a P appears in the display.

Switching temporarily to tone dialling (Tone)

After dialling the external number or after establishing the connection:

- Press the Star key ‼ briefly.

After the call ends, pulse dialling is automatically reactivated.
Handset

Adjusting the telephone settings

Handset

Changing the language

› [ ]  ➤ ... use [ ] to select [ ] Settings ➤ OK ➤ [ ] Language ➤ OK ➤ ... use [ ] to select language ➤ Select ( [ ] = selected)

If the handset has been set to an incomprehensible language:

› [ ]  ➤ Press the keys 8 5 slowly one after the other ➤ ... use [ ] to select the correct language ➤ press the right display key

Display

Screensaver

A digital or analogue clock can be selected to be displayed as a screensaver when in idle status.

› [ ]  ➤ ... use [ ] to select [ ] Settings ➤ OK ➤ [ ] Display ➤ OK ➤ [ ] Screensaver ➤ Edit ( [ ] = on) ... then

Switch on/off: ➤ Activation: ... use [ ] to select On or Off
Select screensaver ➤ [ ] Selection ➤ ... use [ ] to select a screensaver
(Digital Clock / Analog Clock)

View screensaver: ➤ View
Save selection: ➤ Save

The screensaver is activated approx. 10 seconds after the display has changed to idle status.

End screensaver

› Press the End call key ( [ ] = on) briefly ... the display changes to idle status

Large font

Show text and icons in call lists and in the directory in a larger size in order to improve legibility. Only one entry is shown in the display and names are abbreviated if necessary. The number is displayed in large font when it is dialled.

› [ ]  ➤ ... Use [ ] to select [ ] Settings ➤ OK ➤ [ ] Display ➤ OK ➤ [ ] Large Font ➤ Change ( [ ] = activated)
Colour scheme
You can choose from a range of colour combinations for the display.

结晶你想选择的颜色方案。 OK 选择 Colour

Display backlight
The display backlight always illuminates when the handset is taken out of the base station/charging cradle or when a key is pressed. Any digit keys that are pressed appear on the display for pre-dialling.

Switch the display backlight on/off when in idle status:

结晶你想选择的颜色方案。 OK 选择 Colour

Handset’s standby time may be significantly reduced if the display backlight is switched on.

Activating/deactivating Auto Answer
When set to Auto Answer, the handset accepts an incoming call as soon as it is removed from the charging cradle.

结晶你想选择的颜色方案。 OK 选择 Colour

Regardless of the Auto Answer setting, the connection ends as soon as you place the handset back in the charging cradle.

Changing the earpiece and handsfree volume
You can set the volume of the earpiece and speaker at 5 levels independently of each other.

During a conversation

结晶你想选择的颜色方案。 OK 选择 Colour

Without saving, the setting is automatically saved after around 3 seconds.
**Handset**

**In idle status**

Reset any individual settings and changes that you have made.

➤ . . . use ➤ to select ➤ **Settings** ➤ OK ➤ ➤ **System** ➤ OK ➤ ➤ **Handset**

**Reset** ➤ OK ➤ **Yes** . . . the handset’s settings are reset

**i**

The following settings are not affected by a reset

- Registration of the handset to the base station
- Date and time
- Directory entries and call lists
- SMS lists
System

Date and time
To ensure you have the correct time for incoming calls and to use the alarm clock and calendar, for example, the date and time must be set.

If the date and time have not yet been set on the handset, the display key Time appears.

- Press the display key Time

or

- . . . use to select Settings OK Date/Time OK . . . then

Set the date: . . . use to enter the day, month and year in 8-digit format
Set the time: . . . use to enter hours and minutes in 4-digit format
Save settings: . . . Save

Own area code
Your area code (international and local area code) must be saved on the phone before you can transfer phone numbers (e.g. in vCards).

Some of these numbers are already preset.

- . . . use to select Settings OK

Telephony OK Area Codes OK Check
(pre-)set area code

Edit the number:

- . . . use to select/switch entry field . . . use to change entry position . . . delete digit if desired . . .

use to enter digit Save

Activating/deactivating music on hold

- . . . use to select Audio Settings OK

Music on hold Change (= on)
Changing the system PIN
Secure the telephone’s system settings with a system PIN. You have to enter the system PIN when you register or de-register a handset, change local network settings, perform a firmware update or reset the phone to default settings.
Change the telephone’s 4-digit system PIN (default setting: 0000):

- . . use to select Settings OK System OK System PIN
- . . use to enter the current PIN (if other than 0000) OK . . use to enter new system PIN Save

Resetting system PIN
Resetting the base station to the original PIN 0000:

- Unplug the network cable from the base station
- Press and hold the Registration/Paging key on the base station
- At the same time reconnect the network cable to the base station
- Press and hold the key for at least 5 secs . . . the base station is reset and the system PIN is set to 0000

All handsets are de-registered and must be re-registered. All settings are returned to default settings.

Restoring the phone to default settings
When the settings are reset
- the date and time are retained,
- handsets are still registered,
- the system PIN is retained,
- Maximum Range is activated and No Radiation is deactivated.

- . . use to select Settings OK System OK Base Reset
- . . use to enter system PIN OK Yes . . . the base station is restarted. The restart takes around 10 seconds.
Appendix

Questions and answers
Possible solutions are available online at www.gigaset.com/service

Troubleshooting

The display is blank.
• The handset is not activated. Press and hold hold.
• The battery is empty. Charge the battery or replace it.

"No Base" flashes on the display.
• The handset is outside the range of the base station. Move the handset closer to the base station.
• The base is not activated. Check the base station power adapter.
• The base station’s range is reduced because Maximum Range is deactivated.
  ➤ Activate Maximum Range or reduce the distance between the handset and base station.

"Please register handset" flashes on the display.
• The handset has not yet been registered or was de-registered due to the registration of an additional handset (more than 6 DECT registrations). Re-register the handset.

The handset does not ring.
• The ringtone is deactivated. Activate ringtone.
• Call forwarding is set. Deactivate call forwarding.
• The phone does not ring if the caller has withheld his number.
  ➤ Activate the ringtone for anonymous calls.
• The phone does not ring during a specific period or for certain numbers.
  ➤ Check the time control for external calls.

No ringtone/dial tone from the fixed line network.
• Incorrect phone cable. Please always use the phone cable supplied or ensure that the pin connections are correct when purchasing from a retailer.

The connection always terminates after approx. 30 seconds.
• A repeater (earlier than Version 2.0) has been activated or deactivated. Switch the handset off and back on again.

Error tone sounds after system PIN prompt.
• You have entered the wrong system PIN. Repeat the process, reset the system PIN to 0000 if required.

Forgotten system PIN.
➤ Reset the system PIN to 0000.

The other party cannot hear you.
• The handset is "muted". Activate the microphone again.

Some of the network services do not work as specified.
• Features are not enabled. Contact the network provider for details.
Questions and answers

The caller's number is not displayed.

- Calling Line Identification (CLI) is not enabled for the caller. ▶ The caller should ask the network provider to enable Calling Line Identification (CLI).
- Calling Line Identification Presentation (CLIP) is not supported or enabled by the network provider. ▶ Ask the network provider to enable Caller Line Identification Presentation (CLIP).
- The telephone is connected via a PABX or a router with an integrated PABX (gateway) that does not transmit all information.
  ▶ Reset the system: Briefly pull out the power plug. Reinsert the plug and wait until the device restarts.
  ▶ Check the settings on the PABX and activate phone number display, if necessary. To do this, search for terms such as CLIP, calling line identification, telephone number identification, caller ID, ... in the system user guide or ask the system manufacturer.

You hear an error tone when keying in (descending tone sequence).

- Action has failed/invalid input. ▶ Repeat the process. Read the display and refer to the user guide if necessary.

You cannot listen to messages on the network mailbox.

- Your PABX is set to pulse dialling. ▶ Set your PABX to tone dialling.

No time is specified for a message in the call list.

- Date/time are not set. ▶ Set the date/time.
Customer Service & Assistance

Do you have any questions? As a Gigaset customer, you can find help quickly in this User Manual and in the service section of our Gigaset online portal www.gigaset.com/service.

Please register your phone online right after purchase. This enables us to provide you with even better service regarding questions or a warranty claim. In order to

Please have your record of purchase ready when calling.

Replacement or repair services are not offered in countries where our product is not sold by authorised dealers.

64
Exclusion of liability

Your handset’s display consists of pixels. Each pixel consists of three sub-pixels (red, green, blue).
It may be the case that a sub-pixel is missing or has a colour deviation.
A warranty claim is only valid if the maximum number of permitted pixel errors is exceeded.

<table>
<thead>
<tr>

Signs of wear on the display and casing are excluded from the warranty.

Manufacturer’s advice

Authorisation

This device is intended for analogue phone lines in your network.
Country-specific requirements have been taken into consideration.
Hereby, Gigaset Communications GmbH declares that the radio equipment type Gigaset E370 is in compliance with Directive 2014/53/EU.
The full text of the EU declaration of conformity is available at the following internet address:
www.gigaset.com/docs.
This declaration could also be available in the "International Declarations of Conformity" or "European Declarations of Conformity" files.
Therefore please check all of these files.
Manufacturer’s advice

Environment

Our environmental statement
We at Gigaset Communications GmbH are aware of our social responsibility. That is why we actively take steps to create a better world. In all areas of our business – from product planning and production to sales and waste of disposal – following our environmental conscience in everything we do is of utmost importance to us. Learn more about our earth-friendly products and processes online at www.gigaset.com.

Environmental management system
Gigaset Communications GmbH is certified pursuant to the international standards ISO 14001 and ISO 9001.
ISO 14001 (Environment): Certified since September 2007 by TÜV SÜD Management Service GmbH.
ISO 9001 (Quality): Certified since 17/02/1994 by TÜV SÜD Management Service GmbH.

Disposal
Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority.
All electrical and electronic equipment must be disposed of separately from general household waste using the sites designated by local authorities.

If a product displays this symbol of a crossed-out rubbish bin, the product is subject to European Directive 2012/19/EU.
The appropriate disposal and separate collection of used equipment serve to prevent potential harm to the environment and to health. They are a precondition for the re-use and recycling of used electrical and electronic equipment.
For further information on disposing of your used equipment, please contact your local authority or your refuse collection service.

Care
Wipe the device with a damp cloth or an antistatic cloth. Do not use solvents or microfibre cloths.
Never use a dry cloth; this can cause static.
In rare cases, contact with chemical substances can cause changes to the device’s exterior. Due to the wide variety of chemical products available on the market, it was not possible to test all substances.
Impairments in high-gloss finishes can be carefully removed using display polishes for mobile phones.

Contact with liquid
If the device comes into contact with liquid:
1 Unplug all cables from the device.
2 Remove the batteries and leave the battery compartment open.
3 Allow the liquid to drain from the device.
4 Pat all parts dry.
5 Place the device in a dry, warm place for at least 72 hours (not in a microwave, oven etc.) with the battery compartment open and the keypad facing down (if applicable).
6 Do not switch on the device again until it is completely dry.
When it has fully dried out, you will normally be able to use it again.
## Technical data

### Batteries
Technology: 2 x AAA NiMH  
Voltage: 1.2 V  
Capacity: 750 mAh

### Handset operating times/charging times
The operating time of your Gigaset depends on the capacity of the battery, its age and the way it is used. (All times are maximum possible times.)

# Display icons

The following icons are displayed depending on the settings and the operating status of your telephone.

## Icons in the status bar

<table>
<thead>
<tr>
<th>Icon</th>
<th>Meaning</th>
</tr>
</thead>
</table>
| ![Signal strength icon](image) | Signal strength (*No Radiation* off) 1% - 100%  
white, if *Maximum Range* on;  
green, if *Maximum Range* off  
Red: no connection to the base station |
| ![No Radiation icon](image) | *No Radiation* activated:  
white, if *Maximum Range* on;  
green, if *Maximum Range* off  |
| ![Ringtone switched off icon](image) | Ringtone switched off |
| !["Beep" ringtone activated icon](image) | "Beep" ringtone activated |

<table>
<thead>
<tr>
<th>Icon</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Keypad lock activated icon" /></td>
<td>Keypad lock activated</td>
</tr>
</tbody>
</table>
| ![Battery charge status icon](image) | Battery charge status:  
White: between 11% and 100% charged  
Red: less than 11% charged  
Flashes red: battery almost empty (approx. 5 minutes of talktime left) |
| ![Battery is charging icon](image) | Battery is charging (current charge status):  
0% - 100% |

## Display key icons
