Procedures

Example: Switching Auto answer on/off

- 📞 📞 … use 🎤 to select 🎤 Settings 🎤 OK 🎤 Telephony 🎤 OK 🎤 Auto Answer 🎤 Change (☐ = on)

Step | Follow this procedure
--- | ---------------------
- 📞 | When in idle status press the centre of the control key. The main menu opens.
- 📞 ☐ | Navigate to the ☐ icon using the control key ☐. OK
- ☐ | Select OK to confirm. The submenu Settings opens.
- 📞 Telephony | Select the Telephony entry using the control key 📞. OK
- Telephony | Select OK to confirm. The submenu Telephony opens.
- 📞 Auto Answer | The function to switch Auto answer on/off appears as the first menu item.
- Change | Select Change to activate or deactivate. Function is activated ☐/deactivated ☐
### Safety precautions

**Read the safety precautions and the user guide before use.**

The device cannot be used in the event of a power failure. In case of a power failure it is also **not** possible to make **emergency calls**.

Emergency numbers **cannot** be dialled if the **keypad/display lock** is activated!

<table>
<thead>
<tr>
<th>Use only <strong>rechargeable batteries</strong> that correspond to the <strong>specification</strong> (see list of permitted batteries: <a href="http://www.gigaset.com/service">www.gigaset.com/service</a>). Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. Rechargeable batteries, which are noticeably damaged, must be replaced.</th>
</tr>
</thead>
<tbody>
<tr>
<td>The handset must not be operated if the battery cover is open.</td>
</tr>
<tr>
<td>Do not use the devices in environments with a potential explosion hazard (e.g. paint shops).</td>
</tr>
<tr>
<td>The devices are not splashproof. For this reason do not install them in a damp environment such as bathrooms or shower rooms.</td>
</tr>
<tr>
<td>Use only the power adapter indicated on the device. Whilst charging, the power socket must be easily accessible.</td>
</tr>
<tr>
<td>Remove faulty devices from use or have them repaired by our Service team, as these could interfere with other wireless services.</td>
</tr>
<tr>
<td>Do not use the device if the display is cracked or broken. Broken glass or plastic can cause injury to hands and face. Send the device to our Service department to be repaired.</td>
</tr>
<tr>
<td>Do not hold the rear of the handset to your ear when it is ringing or when speaker mode is activated. Otherwise you risk serious and permanent damage to your hearing. The phone may cause interference in analogue hearing aids (humming or whistling) or cause them to overload. If you require assistance, please contact the hearing aid supplier.</td>
</tr>
<tr>
<td>Keep small cells and batteries, which can be swallowed, out of the reach of children. Swallowing a battery can lead to burns, perforation of soft tissue and death. Severe burns can occur within 2 hours of swallowing. In the case of a swallowed cell or battery, seek medical care immediately.</td>
</tr>
<tr>
<td>Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.g. doctor’s surgery. If you use a medical device (e.g. a pacemaker), please contact the device manufacturer. They will be able to advise you regarding the susceptibility of the device to external sources of high frequency energy (for the specifications of your Gigaset product see “Technical data”).</td>
</tr>
</tbody>
</table>
Getting started

Contents of the package

• One base
• One power adapter for the base
• One phone cable
• One handset
• One battery cover
• Two batteries
• One charging cradle including power adapter
• One user guide

Models with multiple handsets, per handset:

• One handset
• One charging cradle including power adapter
• Two batteries and one battery cover

⚠️ The base station and charging cradle are designed for use in closed, dry rooms within a temperature range of +5 °C to +45 °C.

The device's feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on furniture, contact marks on the surfaces cannot be completely ruled out.

Never expose the telephone to heat sources, direct sunlight or other electrical devices.

Protect your telephone from moisture, dust, corrosive liquids and vapours.
Base

Insert the phone cable into the connection socket 1 at the rear of the base until it clicks into place.
Insert the power cable from the power adapter into the connection socket 2.
Depending on the model, if included in the delivery: Click the cover into place in the notches on the back of the base (not if mounting on a wall).
Plug in the power adapter 3 and the phone jack 4.

If connecting to a router:
Plug the phone cable into the telephone connection socket on the router 5.

The network cable must **always be connected** in order to function, as the phone will not operate without a power supply.

Handset

Connecting the charging cradle

Connect the flat plug of the power adapter 1.
Plug the mains unit into your power socket 2.

To remove the plug from the charging cradle again:
Disconnect the power adapter from the mains power supply.
Press the release button 3.
Pull out the plug 4.
Handset

Setting up the handset for use
The display is protected by a plastic film. ➤ Please remove the protective film!

Inserting the batteries

- Insert the batteries (for correct +/- direction, see diagram).
- Fit the battery cover from the top.
- Press the cover until it clicks into place.
To re-open the battery cover:
- Insert a fingernail behind the notch at the top of the cover and slide it downwards.

Charging the batteries

- Charge the batteries fully prior to first use in the charging cradle.

The batteries are fully charged when the power icon  disappears from the display.

Batteries may heat up during charging. This is not dangerous.
After a time, the charge capacity of the battery will decrease for technical reasons.
Handsets contained in the package have already been registered to the base. In the event that a handset is not registered however (indicated by Please register handset), register the handset manually (➡ page 48).
Changing the display language

You can change the display language, if the telephone has been set to an incomprehensible language.

- Press the centre of the control key.
- Press the keys 8 and 5 slowly and successively ... the language settings display appears, the set language (e.g. English) is highlighted ( = selected).
- To select a different language: Press the control key until the desired language is highlighted on the display, e.g. Francais press the key on the right directly underneath the display to activate the language.
- To revert to idle status: Press and hold the End call key.

Setting the date and time

Set the date/time so that the correct date and time can be assigned to incoming calls, and to enable the alarm to be used.

- Press the display key Time
- Enter date:
  - use to select Settings OK Date/Time
- Enter time:
  - use to select Settings OK Date/Time
- Save settings:
  - Press the display key Save. Saved is shown in the display and a confirmation tone sounds.
- Return to idle status:
  - Press and hold the End call key.

The telephone is now ready for use.
Getting to know your telephone

Using the telephone

Getting to know your telephone

Switch the handset on/off
Switch on:  ▶ When the handset is switched off, press and hold the End call key.
Switch off: ▶ When the handset is in idle status, press and hold the End call key.

Lock/unlock the keypad
The keypad lock prevents any accidental use of the telephone.
Lock/unlock the keypad: ▶ Press and hold

Keypad lock activated: the following symbol appears.

If a call is indicated on the handset, the keypad automatically unlocks and you can accept the call. It then locks again when the call is finished.

It is not possible to call emergency numbers either when keypad lock is activated.

Control key

The control key enables you to navigate the menus and input fields, and also to call up certain functions depending on the situation.

In the description below, the side of the control key (up, down, right, left) that you have to press in the different operating situations is marked in black, e. g. for "press right on the control key" or for "press the centre of the control key".

In idle status
Open the directory Press briefly
Open the main menu or
Open the list of handsets

In submenus, selection and entry fields
Confirm a function

During a conversation
Open the directory
Mute the microphone
Initiate an internal consultation call
Adjust the loudspeaker volume for receiver and handsfree mode
Extra-loud function
During a call or when listening to a message, make the volume for the handset or the loudspeaker very loud.

Press the control key until you reach the highest level.
The extra-loud setting only applies for the duration of the call.

This setting can result in harm to health in persons with a normal hearing ability and is only intended for persons with a hearing impairment or reduced hearing. Disruptive noises on the phone line can be increased.

Display keys
The display keys perform a range of functions depending on the operating situation.

Display key icons ➔ page 69.

The right display key is always preset with the Emergency function in idle mode. You can change the assignment of the left display key: ➔ page 58

Menu guidance
The functions of your telephone are displayed in a menu that consists of several levels. Menu overview ➔ page 71

Selecting/confirming functions
Confirm selection using OK or press the centre of the control key
One menu level back using Back
Change to idle status Press and hold
Switch function on/off using Change on / off
Activate/deactivate option using Select activated / not activated
Getting to know your telephone

Main menu
In idle status: ▶ Press the centre of the control key ▶ … use the control key ▶ to select a submenu ▶ OK

Submenus
The functions in the submenus are displayed as lists. The current selection is shown in large font and highlighted in orange.
To access a function: ▶ … use the control key ▶ to select a function ▶ OK
Return to the previous menu level:
▶ Press the display key Back
or
▶ Press the End call key briefly

Returning to idle status
▶ Press and hold the End call key

If a key is not pressed, after 2 minutes the display will automatically change to idle status.
Getting to know your telephone

Entering text

Input position

- Use the arrow to select an entry field. The cursor flashes in the active entry field, the title and the text entered turn orange and are shown in large font.
- Use the arrow to move the position of the cursor.

Correcting incorrect entries

- Delete characters to the left of the cursor: Press briefly
- Delete words to the left of the cursor: Press and hold

Entering letters/characters

Multiple letters and numbers are assigned to each key between 2 and 9 and the 0 key. As soon as a key is pressed, the possible characters are displayed at the bottom of the display. The selected character is highlighted.

- Selecting letters/numbers: Press the key briefly several times in succession
- Switch between lower case, upper case and number entry mode: Press the hash key
  When editing a directory entry, the first letter and each letter following a space is automatically in upper case.
- Entering special characters: Press the star key use to navigate to the desired character

The availability of special characters depends on the language setting.
Making calls

Making calls

- . . . use [ ] to enter a number  Briefly press the Talk key [ ]
or
- Press and [ ] hold the Talk key  . . . use [ ] to enter the number
Cancel dialling:  Press the End call key [ ]

Information for Calling Line Identification:  page 21
If the display backlight is deactivated, you can reactivate it by pressing any key. Digit keys that are pressed appear in the display for pre-dialling, other keys have no further function.

Dialling from the directory

- . . . use [ ] to open the directory  . . . use [ ] to select an entry  press the Talk key [ ]
If multiple numbers are entered:
- . . . use [ ] to select a number  press the Talk key [ ] . . . the number is dialled

For fast access (quick dial): Assign numbers from the directory to the digit or display keys.

Dialling from the redial list

The redial list contains the 20 numbers last dialled with the handset.
- Briefly press the Talk key [ ] . . . the redial list is opened  . . . use [ ] to select an entry  press the Talk key [ ]
If a name is displayed:
- View . . . the number is displayed  . . . use [ ] to browse numbers if necessary  . . . when the desired number is reached press the Talk key [ ]

Managing entries in the redial list

- Briefly press the Talk key [ ] . . . the redial list is opened  . . . use [ ] to select an entry  Options . . . possible options:
  Copy an entry to the directory:  Copy to Directory  OK
  Copy the number to the display:
  Display number  OK  . . . use [ ] to amend or add numbers if necessary . . . use [ ] to save as a new entry in the directory
Delete the selected entry:  Delete entry  OK
Delete all entries:  Delete List  OK
Making calls

Dialling from the call list

The call lists (page 30) contain the most recent accepted, outgoing and missed calls.

- ... use Call Lists OK ... use OK to select a list OK ... use OK to select an entry

Press the Talk key

The call lists can be displayed directly by pressing the display key Calls if the relevant function has been assigned to the display key.

The Missed calls list can also be opened by pressing the Message key .

One touch call

A saved number is dialled by pressing any key. This allows children who are not yet able to enter a number to call a certain number, for example.

Activate one touch call mode:

- ... use Additional Features OK ... use OK One Touch Call OK ... use OK to activate Activation ... use OK Call to ... use OK to enter the number Save ... the active one touch mode is shown in the idle display

Make a one touch call: Press any key ... the saved number is dialled

Cancel dialling: Press the End call key .

End one touch call: Press and hold the End call key .

Incoming calls

An incoming call is indicated by ringing, by a display on the screen and by the flashing Talk key .

Accept a call:
- Press the Talk key or Accept
- If Auto Answer is activated: Remove the handset from the charging cradle

Switch off ringtone: Silence ... the call can be accepted for as long as it is shown on the display
Making calls

Information about the caller
The caller’s phone number is displayed. If the caller’s number is saved in the directory, the name is displayed.

⚠️ The caller’s number will be transferred (page 21).

Accepting/rejecting call waiting
A call waiting tone indicates a call during an external call. The number or the name of the caller is displayed if the phone number is transferred.
• Reject a call: Options ▶ Reject waiting call ▶ OK
• Accept a call: ▶ Accept ▶ . . . speak to the new caller. The previous call is placed on hold.
• End the call, resume the on-hold call: ▶ Press the End call key.

Making internal calls

⚠️ Multiple handsets have been registered to the base station (page 48).

➤ Press briefly . . . the handset list is opened, this handset is indicated by < ➤ . . . use ▶ to select handset or Call all (group call) ➤ Press the Talk key.

Fast access for group call:
➤ Press briefly ▶
or ➤ press and hold

Information about the caller

Making internal calls

Internal consultation call / Internal transfer
Call an external participant and transfer the call to an internal participant or hold a consultation call with him or her.

➤ . . . the list of handsets is opened ➤ . . . use ▶ to select a handset or Call all ➤ OK
... the internal participant(s) are called ... possible options:
Hold a consultation call:
➤ Speak to the internal participant
Return to the external call:
➤ Options ▶ End active call ▶ OK
Transfer the external call when the internal participant has answered:
➤ Announce an external call ▶ Press the End call key.
Making calls

Transfer the external call before the internal participant answers:
- Press the End call key . . . the external call is forwarded immediately. If the
  internal participant does not answer or the line is busy, the external call will
  automatically return to you.

End the internal call if the internal participant does not answer or the line is busy:
- End . . . You return to the external call

Accepting/rejecting call waiting
An external call arriving during an internal call is indicated with a call waiting tone. If the number
is transferred, you will see the number or the name of the caller on the display.
- Rejecting a call:  Reject
  The call waiting tone is turned off. The call continues to be indicated on the other registered
  handsets.
- Accepting a call:  Accept . . . Speak to the new caller, the previous call is placed on hold.

Internal call waiting during an external call
If an internal participant attempts to call you while you are involved in an external or internal call,
this call is shown on the display (Call Waiting).
- End display:  Press any key
- Accept the internal call:  End your current call
  The internal call is indicated in the usual way. You can accept the call.

Listening in to an external call
You are conducting an external call. An internal participant can listen in to this call and take part
in the conversation (conference).

The Listening In function must be activated.

Activating/deactivating internal listening in

-  . . . use  to select Settings  OK  Telephony  OK  Listening In  Change ( = on)

Internal listening in
The line is engaged with an external call. Your screen will display information to that effect. You
can listen in to the external call.
-  Press and hold . . . all participants will hear a signal tone

Ending listening in
- Press . . . all participants will hear a signal tone
Making calls

During a conversation

Handsfree mode
Activating/deactivating handsfree mode during a call and when establishing a connection:
- Press the handsfree key 

Placing the handset in the charging cradle during a call:
- Press and hold down the handsfree key for a further 2 seconds

Call volume
Applies to the current mode (handsfree, receiver or headset if the handset has a headset connection):
- Press and hold until the volume is set

Extra-loud function: Press the control key until the highest level is reached.

The setting is automatically saved after around 3 seconds, even if Save is not pressed. The extra-loud setting only applies for the duration of the call.

Muting the microphone
When the microphone is switched off, callers will no longer hear you.
Switch the microphone on/off during a call: Press .

20
Provider-specific functions (network services)

Network services depend on the network (analogue fixed line network or Internet telephony) and on the network provider (service provider) and must be requested from that provider if required.

You will find a description of the features on your network provider's website or at one of their store branches.

If you require assistance, please contact your network provider.

Requesting network services may incur additional costs. Please consult your network provider.

Network services fall into two distinct groups:

- Network services that are activated when in idle status for the following call or all subsequent calls (for example, "calling anonymously"). These are activated/deactivated via the Select Services menu.
- Network services that are activated during an external call, (for example;"consultation call" and "setting up conference calls"). These are made available during an external call either as an option or by using a display key (e.g. Ext. Call, Conference).

To activate/deactivate the features, a code is sent to the telephone network.

- After a confirmation tone from the telephone network, press .

It is not possible to reprogram the network services.

Calling Line Identification

During a call, the caller's number is transferred (CLI = Calling Line Identification) and may be displayed on the recipient's display (CLIP = CLI presentation). If the caller's number is withheld, it will not be displayed to the recipient. The call is made anonymously (CLIR = CLI Restriction).

Caller display for incoming calls

Calling Line Identification

The caller's phone number is displayed. If the caller's number is saved in the directory, the name is displayed.

No Calling Line Identification

Instead of name and number, the following is displayed:

- **External**: No number has been transferred.
- **Withheld**: Caller has withheld Calling Line Identification.
- **Unavailable**: Caller has not authorised Calling Line Identification.
Provider-specific functions (network services)

Call waiting during an external call

During an external call, a call waiting tone indicates another external caller. If the number is being transferred, you will see the number or the name of the caller on the display.

Reject waiting caller:

- Options ➤ Reject waiting call ➤ OK . . . the waiting caller hears the busy tone

Accept the waiting call:

- Accept

Once you have accepted the waiting call, you can switch between the two callers or speak to both simultaneously (Conference ➤ page 23).

Activating/deactivating call waiting

- ➤ . . . use ➤ to select ➤ Select Services ➤ OK ➤ Call Waiting ➤ OK . . . then
  - Switch on/off: ➤ Status: . . . use ➤ to select On or Off
  - Activate: ➤ Send

Call waiting is activated or deactivated for all registered handsets.

Call divert

When diverting a call, the call is forwarded to another connection.

- ➤ . . . use ➤ to select ➤ Select Services ➤ OK ➤ Call Divert ➤ OK . . . then
  - Switch on/off: ➤ Status: . . . use ➤ to select On or Off
  - Enter the number for call diverting:
    - ➤ To Phone Number . . . use ➤ to enter the number
  - Set the time for call divert:
    - ➤ When . . . use ➤ to select the time for call divert
      - All Calls: Calls are diverted immediately
      - No Answer: Calls are diverted if no one accepts the call within several rings.
      - When Busy: Calls are diverted if the line is busy.
  - Activate: ➤ Send

A connection is established to the telephone network . . . a confirmation is sent from the telephone network ➤ Press the End call key ➤

Diverting calls may incur additional costs. Please consult your network provider.
Provider-specific functions (network services)

Calls with three participants

Consultation calls
Make another external call during an external call. The first call is placed on hold.

- **Ext. Call** ➤ use ➤ to enter the number of the second participant ➤ the active call is placed on hold and the second participant is called

If the second participant does not answer: ➤ **End**

Ending a consultation call
- **Options** ➤ ➤ End active call ➤ OK ➤ the connection to the first caller is reactivated

or

- Press the End call key to ➤ ➤ a recall to the first participant is initiated

Conference
Speaking to both participants at the same time.

- During an external call, dial the number of a second participant (consultation call) or accept a waiting caller ➤ then

Initiate conference call:
- **Conf.** ➤ all callers can hear one another and hold a conversation with one another

Return to call swapping:
- **End Conf.**

End call with both participants:
- Press the End call key ➤

Each of the participants can end their participation in the conference call by pressing the End call key or hanging up.
Directory

Directory
The local directory is unique to the handset. However, it is possible to send entries to other handsets.

Opening the directory
- Briefly press in idle status

Directory entries

Number of entries: up to 200
Information: First name and surname, up to three telephone numbers, anniversary with alert, VIP ringtone with VIP icon
Length of the entries: Numbers: max. 32 digits
First name, surname: max. 16 characters

Creating an entry
- Use to toggle between the entry fields First Name/Surname
- Use to enter the first and/or last name

Numbers:
- Use to select a number type (Home, Office or Mobile)
- Use to enter a number

Enter more numbers:
- Use to toggle between the entry fields

Anniversary:
- Use to activate/deactivate Anniversary
- Use to enter date and time
- Use to select type of alert (Visual only or a ringtone)

Caller Melody (VIP):
- Use to select the ringtone that will indicate a call from the participant
- If a Caller Melody (VIP) has been assigned, the entry will appear in the directory with the VIP icon.

Save entry: Save

Example

New Entry

First Name: Robert
Surname: Abc

Save

The entry is only valid if it contains at least one number.
For Caller Melody (VIP): the telephone number of the caller must be supplied.

**Directory**

**Searching for/selecting a directory entry**

- Use → to browse searched names
- Use → to enter initial letters (max. 8 letters) → the display jumps to the first name starting with these initial letters → use ← to continue browsing to the desired entry, if needed

**Displaying/changing an entry**

- Use → to select entry → View → use ← to select the field to be changed → Edit

**Deleting entries**

Delete the selected entry: Use → to select an entry → Options → Delete entry → OK

Delete all entries: Use → Options → Delete all → OK → Yes

**Setting the order of the directory entries**

Directory entries can be sorted by first name or surname.

- Options → Sort by Surname / Sort by First Name

If no name was entered, the default telephone number is shown in the surname field. These entries appear at the beginning of the list, regardless of how the entries are sorted.

The sort order is as follows:

Space | Digits (0-9) | Letters (alphabetically) | Other characters.

**Displaying the number of entries available in the directory**

- Options → Available Memory → OK
Directory

Copying number to the directory

Copy numbers to the directory:
- From a list e.g. the call list or the redial list
- From the text of an SMS
- When dialling a number

The number is displayed or highlighted.

- Press the display key or Options → Copy to Directory → OK … possible options:
  - Create a new entry:
    - <New Entry> → OK … use to select number type → OK → complete entry → Save
  - Add number to an existing entry:
    - … use to select an entry → OK … use to select number type → OK … the number is entered or a prompt to overwrite an existing number is displayed … if required, answer the prompt with Yes/No → Save

Copying an entry/directory

The sending and receiving handset must both be registered to the same base station.
The other handset and the base station are able to send and receive directory entries.

An external call interrupts the transfer.

Sounds are not transferred. Only the date is transferred for an anniversary.

Both handsets support vCards:
- No entry with the name is available: a new entry is created.
- An entry with the name is already available: The entry is expanded to include the new numbers. If the entry contains more numbers than allowed by the recipient handset, a second entry is created with the same name.

The recipient handset does not support vCards:

A separate entry is created and sent for each number.

The sending handset does not support vCards:

A new entry is created on the receiving handset and the transferred number is added to the Phone (Home) field. If an entry with this number already exists, the copied number is discarded.
Directory

Copying individual entries

- Use to select the desired entry
- Options
- Copy entry
- OK
- Internal
- OK
- Use to select the receiving handset
- OK
- the entry is copied

Copy the next entry after successful transfer: Press Yes or No

Use vCard via SMS to send a directory entry in vCard format by SMS.

Copying the entire directory

- Options
- Copy all
- OK
- Internal
- OK
- Use to select the receiving handset
- OK
- the entries are copied one after the other
Message lists

Notifications about missed calls, messages on the network mailbox, received SMS messages and missed alarms are saved in the messages list.

As soon as a new message arrives, an advisory tone will sound. The Message key also flashes (if activated page 29).

Icons for message types and the number of new messages are shown on the idle display.

Notification for the following message types is available:

- on the network mailbox
- in the missed calls list
- in the SMS message list
- in the missed alarms list

The icon for the network mailbox is always displayed, provided the number is stored in the telephone. The other lists are only displayed if they contain messages.

Display messages:

- Press the Message key . . . Messages lists that contain messages are displayed, Mailbox: is always displayed
  The number of new messages is shown in brackets.
- . . . use to select a list OK . . . the calls or messages are listed

  Network mailbox: The network mailbox number is dialled.

  The message list contains an entry for every answer machine assigned to the handset, e.g. for a network mailbox.
Activating/deactivating Message key flashing

Receipt of new messages is displayed by a flashing message key on the handset. This type of alert can be activated/deactivated for each message type.

In idle status:

- Press keys * (star) 5 followed by the entry (e.g. 975) is displayed, the current setting for the select message type flashes in the entry field (e.g. 0) use + to set the action for the arrival of new messages:
  - The Message key flashes
  - The Message key does not flash

- confirm selected setting with OK
- return to idle display without making changes: Back
Call lists

The telephone saves different types of calls (missed, accepted and outgoing calls) in lists.

List entry
The following information is displayed in the list entries:

- The list type (in the header)
- Icon for the type of entry:
  - Missed calls,
  - Accepted calls,
  - Outgoing calls (redial list)
- Caller's number. If the number is stored in the directory, the name and number type (Phone (Home), Phone (Office), Phone (Mobile)) are shown instead. In the event of missed calls, the number of missed calls from this number is also shown in square brackets.
- Date and time of call (if set)

Opening the call list

Via the display key:
  - Calls  ... use  to select the list  OK
Via the menu:
  -  ... use  to select  Call Lists  OK  ... use  to select the list  OK
Via the Message key (missed calls):
  - Press the Message key  Missed Calls:  OK

Calling back a caller from the call list

  -  ... use  to select  Call Lists  OK  ... use  to select list  OK  ... use  to select entry  Press the Talk key

Example
Network mailbox

The network mailbox has been requested from the network provider.

Entering a number

- Use \( \) to select Answer Machine > OK > Network Mailbox > OK
- Use \( \) to enter or amend the network mailbox number > Save

To activate/deactivate the network mailbox use the phone number and a function code of your network provider. Please contact the network provider if you require any further information.

Playing back messages

- Press and hold \( \)
- Or
- Press the Message key > Network Mailbox > OK
- Or
- Use \( \) to select Answer Machine > OK > Play Messages > OK

Listen to announcement out loud: Press the handsfree key \( \)
### Emergency call

You can set up up to four numbers as emergency numbers. If the Emergency function is activated, you can trigger an emergency call with the right display key **SOS** when the handset is idle.

<table>
<thead>
<tr>
<th>SOS activated</th>
<th>Calls</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>SOS</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SOS not activated</th>
<th>Calls</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>SOS</td>
</tr>
</tbody>
</table>

#### Process

1. **Press the display key **SOS**

You hear the following announcement through the speaker:

   "Emergency call being sent." The participant called is displayed.

The person receiving the emergency call hears the emergency call message:

   "This is an emergency call. Please press key 5 in order to accept the emergency call."

The participant called **presses key 5**: You can speak to one another.

The participant called does not accept the emergency call:

After 60 seconds, the emergency function automatically dials the next emergency number (provided more than one number is stored).

The emergency function also automatically switches to the next emergency number after 60 seconds in the following situations:

- The answer machine of the emergency number selected is activated
- The emergency number is busy
- The telephone of the person receiving the emergency call is not set to "tone dialling".

**This process is repeated a maximum of 5 times.** If none of the calls are accepted, the emergency function is ended with an error tone.

2. **The telephone of the person receiving the emergency call must be set to tone dialling, otherwise the acceptance of the emergency call using the key 5 is not recognised.**
Emergency call

Cancelling an emergency call
If you have triggered an emergency call by mistake, you can cancel it.

Briefly press the End call key

Setting up emergency call
In order to be able to use the function you must
• save the emergency numbers and
• activate the emergency function.

The police, ambulance service or fire service must not be used for an emergency call.

Storing emergency numbers

Press the display key SOS . . . The message No SOS No. available is displayed. After a short time, the display is opened for entry of SOS number 1.

or

use to select Emergency Call OK use to select the emergency number (SOS 1-SOS 4) Edit

. . . use to enter the first name and/or last name and the number for the emergency call use to toggle between the entry fields Save . . . The emergency call is automatically activated . . . Enter more emergency numbers if required

If your telephone is connected to a PABX, you must enter the access code (outside line code) as the first digit of your entry, if necessary (user guide of your PABX).

You should carry out a test run to ensure that the emergency function has been correctly set up.

Activating/deactivating the emergency call function

Activate with the SOS display key

The function is deactivated. At least one SOS number has been entered.

Press the display key SOS Activation: Edit ( = activated)

Changing/deleting an emergency number

Use to select Emergency Call OK Use to delete the entry Use to enter a new number if required Save
Calendar

If no valid numbers are entered, the Emergency Call function is automatically deactivated.

Calendar

You can remind yourself of up to 30 appointments.

In the calendar, the current day is outlined in white; on days with appointments, the numbers are displayed in colour. When a day is selected, it will be outlined in colour.

Saving appointments to the calendar

- Date and time have been set.

- Use to select Additional Features → OK → Calendar → OK → use to select desired day → OK → then

  Switch on/off:  
  - Activation: ... use to select On or Off

  Enter date:  
  - Date ... the selected day has been pre-set ... use to enter new date

  Enter time:  
  - Time ... use to enter hours and minutes of the appointment

  Set name:  
  - Text ... use to enter a description of the appointment (e.g. evening meal, meeting)

  Set alarm tone:  
  - Signal ... use to select the melody of the reminder alarm or deactivate the acoustic signal

  Save appointment:  
  - Save

- If an appointment has already been entered:  
  - <New Entry> → OK → Then enter information for the appointment.

Notification of appointments/anniversaries

Anniversaries are transferred from the directory and displayed as an appointment. An appointment/anniversary is displayed in idle status and the selected ringtone plays for 60 seconds as a notification.

Acknowledge and stop the reminder:  
- Press the display key OFF

Respond with SMS:  
- Press the display key SMS ... the SMS menu is displayed
During a call, a reminder is indicated on the handset once with an advisory tone on the handset.

**Displaying missed appointments/anniversaries**

The following appointments and anniversaries are saved in the Missed Alarms list:

- The appointment/anniversary call was not acknowledged.
- The appointment/anniversary was notified during a phone call.
- The handset was switched off at the time of the appointment/anniversary.

The last 10 entries are stored. The icon and the number of new entries are shown in the display. The most recent entry appears at the top of the list.

**Opening the list**

- Press the Message key Missed Alarms: OK . . . use to browse through the list of any appointments

or

-  use to select Additional Features Missed Alarms OK

Each entry is displayed with the number or name, date and time. The most recent entry appears at the top of the list.

Delete an appointment/anniversary: Delete

Compose an SMS: SMS (only if the list has been opened via the menu) . . . the SMS menu is opened

**Displaying/changing/deleting stored appointments**

- use to select Additional Features Calendar OK . . . use to select day OK . . . the appointment list is displayed . . . use to select date . . . possible options:

  Display appointment details:
  - View . . . The appointment settings are displayed

  Change appointment:
  - View Edit
  or Options Edit entry OK

  Activate/deactivate appointment:
  - Options Activate/Deactivate OK

  Delete appointment:
  - Options Delete entry OK

  Delete all appointments for a day:
  - Options Delete all Appoints. OK Yes

35
**Timer**

**Setting the timer (countdown)**

- Use 

  

  Additional Features

  OK

  Timer

  OK

  . . . then

  Enable/disable:

  - Activation: . . . Select with 

    On or Off

  Set the duration:

  - Duration . . . Use 

    to enter the hours and minutes for the timer

    Min.: 00:01 (one minute); Max.: 23:59 (23 hours, 59 minutes)

  Save the timer:

  - Save

The timer starts the countdown. In the idle display, icon 

and the remaining hours and minutes are displayed until one minute is left. From this point, the remaining seconds are counted down. At the end of the countdown, the alarm is triggered.

**Disabling/repeating the alarm**

- Switch off the alarm: 

  OFF

- Repeat the alarm: 

  Restart . . . the timer display is displayed again

  set another duration

  as required

  Save . . . the countdown is restarted

**Alarm clock**

- Date and time have been set.

**Activating/deactivating the alarm clock and setting the wake-up time**

- Use 

  to select 

  AlarmClock

  OK

  . . . then

  Switch on/off:

  - Activation: . . . Select with 

    On or Off

  Setting the wake-up time:

  - Time . . . Use 

    to enter hours and minutes

  Set days:

  - Occurrence . . . Use 

    to switch between Monday-Friday

    and Daily

  Set the volume:

  - Volume . . . Use 

    to set volume in 5 levels or select crescendo (increasing volume)

  Set alarm:

  - Melody . . . Use 

    to select a ringtone for the alarm

  Save settings:

  - Save

When the alarm clock is activated, the icon 

and the wake-up time are displayed in idle display.
Alarm

An alarm is shown on the display and indicated by the selected ringtone melody. The alarm sounds for 60 seconds. If no key is pressed, the alarm is repeated after 5 minutes. After the second repetition, the alarm call is deactivated for 24 hours.

During a call, the alarm is only indicated by a short tone.

Switching off /repeating the alarm after an interval (snooze mode)

Deactivate the alarm:  ➤ OFF
Repeat the alarm (snooze mode):  ➤ Press Snooze or any key . . . the alarm is switched off and repeated after 5 minutes.

Baby monitor

When the baby monitor is switched on, the stored (internal or external) destination number is called as soon as a defined noise level is exceeded in the vicinity of the handset. The alarm to an external number is cancelled after approximately 90 seconds.

You can answer the alarm using the Two Way Talk function. This function is used to switch the loudspeaker of the handset located in the baby’s room on or off.

In baby monitor mode, incoming calls are only indicated on the display (without ringtone). The display backlight is reduced to 50%. Advisory tones are deactivated. All keys are locked, with the exception of the display keys and the centre of the control key.

If you accept an incoming call, the baby monitor mode is suspended for the duration of the call, but the function remains activated. The baby monitor mode is not deactivated by switching the handset off and on again.

The handset should be positioned 1 to 2 metres away from the baby. The microphone must point towards the baby.

Activating the function reduces the operating time of your handset. For that reason, place the handset in the charging cradle if necessary.

The baby monitor is activated 20 seconds after switching on.

The answer machine for the destination number must be switched off.

After switching on:

➤ Test sensitivity.
➤ Test the connection, if the alarm is being forwarded to an external number.
Activating and setting the baby monitor

- Use the arrow keys to select Additional Features, then select Baby Monitor and OK. Then:
  - Switch on/off:
    - Press the arrow keys to select Activation, then use the arrow keys to select On or Off.
  - Enter destination:
    - Press the arrow keys to select Send alarm to, then use the arrow keys to select External or Internal.
      - External: Press the number keys to select the number or select a number from the directory.
      - Internal: Press the arrow keys to select the handset, then press OK.
  - Activate/deactivate two-way talk:
    - Press the arrow keys to select Two Way Talk, then use the arrow keys to select On or Off.
  - Set microphone sensitivity:
    - Press the arrow keys to select Sensitivity, then use the arrow keys to select High or Low.
  - Save settings: Press Save.

The destination number is displayed in idle display when the baby monitor is activated.

Deactivate baby monitor / Cancel alarm

Deactivate the baby monitor: In idle status press the display key OFF.
Cancel the alarm: Press the End call key during an alarm.

Deactivate the baby monitor remotely

The alarm is forwarded to an external destination number.
The receiving phone supports tone dialling.

- Accept alarm call Press keys 9 #
  - The baby monitor is deactivated and the handset is in idle status. The baby monitor settings on the handset (e.g. no ringtone) will remain activated until you press the display key OFF.

The baby monitor cannot be reactivated remotely.
Reactivate: (page 38)
ECO DECT

The device range is set to maximum as default. This guarantees the best connection between the handset and the base station. In idle status, the handset will not function (as it is not transmitting). Only the base station will maintain contact with the handset via a low wireless signal. During a call, the transmission power automatically adapts to the distance between the base station and handset. The smaller the distance to the base, the lower the radiation.

To reduce the radiation further:

**Reducing radiation by up to 80%**

- Use \(\text{Settings} \rightarrow \text{ECO DECT} \rightarrow \text{Maximum Range} \rightarrow \text{Change} \) (on = off)

  The range is also reduced with this setting.

  It is not possible to use a repeater to increase the range.

**Deactivating radiation in idle status**

- Use \(\text{Settings} \rightarrow \text{ECO DECT} \rightarrow \text{No Radiation} \rightarrow \text{Change} \) (on = on)

  To benefit from the advantages of the setting No Radiation, all registered handsets must support this feature.

  If the setting No Radiation is activated and a handset is registered to the base that does not support this feature, No Radiation is automatically deactivated. As soon as this handset is de-registered, No Radiation will automatically be re-activated.

  The wireless connection will only be established for an incoming or outgoing call and the connection will be delayed by about 2 seconds.

  In order that a handset can establish a wireless connection with the base station more quickly for an incoming call, it must "listen" to the base station more often, i.e. scan the environment. This increases power consumption and reduces the standby and talk-time of the handset.

  When No Radiation is activated, there will be no range display/range alarm on the handset. Contactability can be tested by attempting to establish a connection.

  - Press and hold the Talk key \(\text{... the dialling tone sounds.}\)
Protection against unwanted calls

Time control for external calls

Date and time have been set.

Enter a time period during which the handset should suspend ringing to indicate external calls e.g. during the night.

- Use the scroll key to select Audio Settings > OK
- Use the scroll key to select Ringtones (Handset) > OK
- Use the scroll key to select Time Control > OK

Switch on/off:
- Use the scroll key to select On or Off

Enter time:
- Use the scroll key to switch between Suspend ring. from and Suspend ring. until
- Use the scroll key to enter start and end in 4-digit format

Save:
- Select Save

Example

<table>
<thead>
<tr>
<th>Time Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>For external calls:</td>
</tr>
<tr>
<td>On</td>
</tr>
<tr>
<td>Suspend ring. from:</td>
</tr>
<tr>
<td>22:00</td>
</tr>
<tr>
<td>Suspend ring. until:</td>
</tr>
<tr>
<td>07:00</td>
</tr>
</tbody>
</table>

The time control only applies to the handset for which the setting is configured.

The telephone will continue to ring for numbers that have been assigned to a VIP group in the directory.

Protection from anonymous callers

The handset will not ring if callers' numbers are not revealed. This setting can be applied to only one or to all registered handsets.

For one handset

- Use the scroll key to select Audio Settings > OK
- Use the scroll key to select Ringtones (Handset) > OK
- Use the scroll key to select Anon. Calls Silent > Edit (= on) ... the call is only signalled on the display

For all handsets

- Use the scroll key to select Settings > OK
- Use the scroll key to select Telephony > OK
- Use the scroll key to select Anonymous Calls > Edit (= on) ... use the scroll key to select Protection Mode:
  - No Protection: Anonymous calls are indicated in the same way as identified numbers
  - Silent Call: The telephone will not ring and the incoming call will only appear in the display.
  - Block Call: The telephone will not ring and the incoming call will not appear in the display. The caller will hear the busy tone.

Save settings: Select Save
Protection against unwanted calls

Black list

When the black list function is activated, calls from black list numbers are not indicated or are only indicated in the display. These settings apply to all registered handsets.

Displaying/editing the black list

Use OK to select Settings OK Telephony OK Black List OK Blocked Numbers OK the list of blocked numbers is displayed.

Create an entry: New OK to enter a number Save

Delete an entry: OK to select an entry Delete OK the entry is deleted

Transferring a number from a call list to the black list

Call Lists OK Accepted calls/ Missed calls OK Options Copy to Blacklist OK

Setting the protection mode

Settings OK Telephony OK Black List OK Protection Mode OK . . . use OK to select desired protection:

No Protection All calls are indicated, including from callers whose numbers are on the black list.

Silent Call The telephone will not ring and the incoming call will only appear in the display.

Block Call The telephone will not ring and the incoming call will not appear in the display. The caller will hear the busy tone.

Save settings: Save
SMS (text messages)

SMS (text messages)
It is possible to send SMS messages as soon as the telephone has been connected.

Calling Line Identification is enabled (page 21).
The network provider supports the SMS service.
The call number of at least one SMS service centre has been entered (page 46).
If no SMS service centre is entered, the submenu SMS only consists of the entry Settings.

Writing and sending SMS messages
An SMS may be up to 612 characters in length. If the number of characters exceeds 160, the SMS is sent as linked SMS messages (up to four individual SMS messages).
The remaining number of characters is shown in the top right corner of the display, followed by an indication in brackets of which part of a linked SMS is currently being written. Example: 405(2).

• ... use to select SMS OK ... then
Write an SMS: • New SMS OK ... use to enter SMS text
Send an SMS: • Press the End call key
or • Options Send OK
Enter number (Send SMS to):
From the directory: • ... use to select number OK
or • ... use to enter number directly
If sending SMS messages to an SMS mailbox: add the mailbox ID to the end of the number.
Send: • Send

The number must include the local area code (even if you are in that area).
If an external call comes in, or if you interrupt writing for more than 2 minutes, the text is automatically saved in the draft message list.

Sending SMS messages may incur additional costs. Please consult your network provider.
**SMS (text messages)**

### Sending SMS messages to an e-mail address

The network provider supports this feature.

- . . use to select SMS > OK > New SMS > OK . . then
- Enter address: . . use to enter the e-mail address at the start of the SMS message
- or
- Options > Insert eMail address > . . use to select a directory entry containing an e-mail address > OK
- Write text: . . use to complete the SMS message
- Send: Options > Send > OK . . use to enter the number of the e-mail service (if not entered) > Send . . the SMS is sent to the e-mail service of the SMS send service centre

### Temporary storing of an SMS (draft message list)

You can temporarily store text messages, change and send them later.

#### Saving SMS in the draft message list

- . . use to select SMS > OK > New SMS > OK . . use to write
- SMS > Options > Save > OK

#### Opening and editing an SMS from the draft message list

- . . use to select SMS > OK > Draft > OK . . use to select saved SMS . . possible options:

- Delete all entries: 
  - Options > Delete List > OK > Yes
SMS (text messages)

Receiving an SMS
Incoming SMS messages are saved in the incoming message list, linked SMS messages are generally displayed as one SMS.

SMS message list
The incoming SMS message list contains all the received SMS messages and those SMS messages that could not be sent due to an error.
New SMS messages are indicated on all Gigaset handsets by the icon on the display, the flashing Message key and an advisory tone.

Open the SMS message list
• With the Message key: the messages list is opened
  The messages list shows the number of SMS messages it contains: bold = new messages, not bold = read messages
  Open list: . . . use to select SMS: OK
• Via the SMS menu: . . . use SMS OK
  Incoming OK
Every entry in the list contains:
• the number or name of the sender,
• arrival date and time.

Forward SMS to recipient of your choice:
➤ Options ✅ Forward ✅ OK
Display text in a different character set:
➤ Options ✅ Character Set ✅ OK ➤ ... use ✅ to select character set ✅ Select ( cerco = selected)

Saving numbers from SMS text to the directory

If a telephone number in the SMS text is recognised, it is automatically highlighted.
• Save the number in the directory: ✅
  If the number is to also be used to send an SMS, save the number including the local area code (dialling code).
• Dial a number: ✅ Press the Talk key ✅
• Select the next number, if an SMS contains multiple numbers: ✅ ... use ✅ to scroll down until the first number has disappeared from the display.

The + icon is not copied for international area codes.
➤ You should then enter "00" at the start of the number.

SMS with vCard

The vCard is an electronic business card. It is indicated by the ✅ icon in the SMS text. A vCard can contain a name, home number, work number, mobile number and a birthday. Individual entries in a vCard can be saved to the directory one after the other.

When reading an SMS containing the vCard: ✅ View ✅ Save

The directory is opened automatically. The number and name are copied. If a birthday is entered on the vCard, the date is copied to the directory as an anniversary. If necessary, edit the entry in the directory and save it. You will return to the vCard automatically.

SMS notification

Receive notifications of missed calls and/or new messages on the answer machine.

➤ ... use ✅ to select ✅ SMS ✅ OK ✅ Settings ✅ OK ✅ Notification ✅ Change ( cerco = on) ... then
Enter number: ✅ To ... use ✅ to enter the number to which the SMS should be sent
Missed calls: ✅ ✅ Missed calls ✅ ... use ✅ to select On or Off
Save settings: ✅ Save
SMS (text messages)

Do not enter your own fixed line network number for notification of missed calls. This can create an endless loop that will incur charges.

**SMS notification may incur additional costs.**

**SMS service centres**

The number for at least one SMS service centre must be saved in the device to be able to send SMS messages. The SMS service centre number can be obtained from the service provider.

SMS messages are received from **every** entered SMS service centre as long as they are registered with their service provider.

Your SMS messages are sent via the SMS service centre that is entered as the active send centre. However, you can activate any other SMS service centre as the active send service centre to send a current message.

**Entering/changing the SMS service centre / Setting the send service centre**

-  

  - Use ➤ to select SMS ➤ OK ➤ Settings ➤ OK ➤ Service Centres ➤ OK ➤ Use ➤ to select SMS service centre (✓ = current send service centre) ➤ Edit...

  - Activate send service centre:

    - **Active Send:** ➤ Use ➤ to select Yes or No (Yes = SMS messages are sent via the SMS service centre)
      
      For the SMS service centres 2 to 4, the setting only applies to the next SMS.

  - Enter the number of the SMS service:

    - Use ➤ SMS Service Centre Number ➤ Use ➤ to enter the number

  - Save settings: ➤ Save

If you have agreed a flat fixed line network rate, the chargeable numbers with dialling code 0900 are often blocked. If, in this case, a 0900 number is entered for the SMS service centre, you will not be able to send text messages from your phone.

If the attempt to send fails, the SMS is saved in the incoming messages list and indicated as failed.

**SMS to PABXs**

- **The Call Line Identification must be forwarded** to the extension of the PABX (CLIP).
- If necessary, the access code/outside line code must be prefixed to the number of the SMS service centre (depending on your PABX). To test: Send an SMS to your own number, once with the access code and once without.
- If the SMS is sent without the extension number, it will not be possible for the recipient to answer directly.
**Activating/deactivating first ring muting**

Every incoming SMS is indicated by a single ring. If such a "call" is answered, the SMS is lost. To prevent this, mute the first ring for all external calls. In idle status:

- The current setting flashes in the input field (e.g. 1) then
- Do not mute the first ringtone:
- Mute the first ringtone (default setting):

**SMS troubleshooting**

E0  Calling Line Identification permanently withheld (CLIR) or Calling Line Identification not activated.

FE  Error occurred while sending SMS.

FD  Connection to SMS service centre failed, see self-help.

**Self-help with errors**

You cannot send messages

- You have not requested the CLIP service (Calling Line Identification Presentation).
  - Ask your network provider to enable the feature.
- SMS sending was interrupted (e.g. by a call).
  - Re-send the SMS.
- The network provider does not support this feature.
- No number or an incorrect one has been entered for the send service centre.
  - Enter the number (page 46).

SMS text is incomplete

- The phone's memory is full.
  - Delete old SMS messages.
- The network provider has not yet sent the rest of the SMS.

You have stopped receiving SMS messages

- Call divert has been activated for All calls.
  - Change call divert (page 22).

The SMS is played back

- The "display call number" service is not activated.
  - Ask the network provider to enable this feature (subject to a fee).
- Your mobile phone operator and SMS service provider are not working in partnership.
  - Obtain information from your SMS service provider.
- The phone is not registered with the SMS service provider.
  - Send an SMS to register the phone for receiving SMS.
Multiple handsets

Expanding the functionality of the telephone

Multiple handsets

Up to six handsets can be registered to the base station.

Each registered device is assigned an internal number (1 – 6) and an internal name (INT 1 – INT 6). The number or name assigned can be changed.

If all internal numbers have already been assigned at the base station: ▶ de-register a handset that is no longer needed

Registering the handset

A handset can be registered on up to four base stations.

Registration must be initiated on the base station and on the handset.
Both must be carried out within 60 secs.

On the base station

▶ Press and hold the Registration/Paging key on the base station (approx. 3 secs).

On the handset

▶ . . . use to select Settings OK Registration OK Register Handset OK an available base station is sought . . . Enter system PIN (default setting: 0000) OK

If the handset is already registered with four bases, select the base to be replaced by the new base.

Once registration is complete, the handset returns to idle status. The internal number of the handset appears in the display, e.g. INT 1. If not, repeat the procedure.

Maximum possible number of handsets registered to the base station (all internal numbers assigned): The handset with the highest internal number is replaced by the new one. If this is not possible, because a conversation is being held on this handset, for example, the message No available internal number is given. ▶ De-register a handset that is no longer required and repeat the registration procedure
Multiple handsets

Registering a handset to multiple base stations

Your handset can be registered to up to four base stations. The active base station is the base station to which the handset was last registered. The other base stations remain saved in the list of available base stations.

1. . . use to select Settings OK Registration OK Select Base OK . . . possible options:
   1. Change active base station:
      1. . . use or Best Base to select base station Select ( = select)
      2. Best Base: The handset chooses the base station with the best reception as soon as it loses connection to the current base station.
   2. Change name of a base station:
      1. . . use to select a base station Select ( = selected) Name
      2. change name Save

De-registering the handset

1. . . use to select Settings OK Registration OK De-register Handset OK . . . the handset being used is selected . . . use to select a different handset if desired OK . . . enter system PIN if desired OK . . . Confirm de-registration with Yes

If the handset is still registered to other bases, it switches to the base with the best reception (Best Base).

Locating a handset (Paging)

1. Briefly press the Registration/paging key on the base station.
   All handsets will ring at the same time ("paging"), even if ringtones are switched off. Exception: handsets on which the baby monitor is activated.

Ending the search

1. Briefly press the registration/paging key on the base station
   1. or Press the End call key on the handset
   2. or Press the display key Silence on the handset
   3. or No action. After approx. 30 seconds, the paging call will end automatically.
Changing the handset name and internal number

When registering multiple handsets, they will automatically be assigned the names INT 1, INT 2 etc. Each handset will automatically be assigned the lowest unassigned internal number. The internal number is shown as the name of the handset on the display e.g. INT 2. You can change the names and the numbers of handsets. The name must not exceed 10 characters in length.

To select a handset:

- Use ↑ or → to highlight a handset.
- Press OK to select the handset.

Possible options:

- Rename
- Enter a new name

Edit name:

- Press OK to change the name.
- Press Rename to delete the current name.
- Press Enter to enter a new name.

Edit number:

- Press OK to change the number.
- Press Edit Handset No. to select a number.

Repeater

A repeater increases the receiving range between the Gigaset handset and the base station. The registration procedure for a repeater depends on the version of the repeater being used.

- Repeater without encryption, e.g. Gigaset repeater prior to Version 2.0
- Repeater with encryption, e.g. Gigaset repeater later than Version 2.0

Further information about the Gigaset repeater can be found in the repeater user guide and at www.gigaset.com.

Repeater without encryption

Activate Maximum Range / Deactivate No Radiation

- Use ↑ or → to select Settings.
- Press OK.
- Press ECO DECT.
- Press OK.
- Press Maximum Range.
- Press Change (on).
- Press No Radiation.
- Press Change (off).

Deactivate encryption

- Use ↑ or → to select Settings.
- Press OK.
- Press System.
- Press OK.
- Press Encryption.
- Press Change (deactivated).

Registering a repeater

- Connect the repeater to the mains power supply.
- Press and hold the Registration/paging key on the telephone base station (min. 3 secs) until the repeater is automatically registered.

It is possible to register more than one Gigaset repeater.
Repeater with encryption

Encryption is activated (default setting).

Registering a repeater

- Connect the repeater to the mains power supply
- Press and hold the Registration/paging key on the telephone base station (min. 3 secs) . . . the repeater is automatically registered

Up to 2 repeaters may be registered.

The ECO DECT function **Maximum Range** is activated and the **No Radiation** function is deactivated. The settings cannot be changed whilst the repeater is registered.

As soon as a repeater is registered, it will appear in the repeater list under

- Settings ▶ System ▶ Repeater

De-registering a repeater

- . . . use to select Settings ▶ OK ▶ System ▶ OK ▶ Repeater ▶ OK . . . use to select repeater ▶ De-reg. ▶ Yes

Operation with a router

When operating on the analogue connection of a router, any **echoes** that may occur can be reduced by activating **XES mode 1** (**XES** = eXtended Echo Suppression).

If the **XES mode 1** does not sufficiently suppress the occurring echoes: activate **XES mode 2**.

- . . . press one of the following keys
  - OK Normal mode
  - OK XES mode 1
  - OK XES mode 2

If there are no problems with echoes, the normal mode (factory settings) should be activated.
Operation with a PABX

Setting Tone or Pulse dialling mode

Select Settings > OK > Telephony > OK > Dialling Mode > OK > ... use < to select Tone or Pulse > Select ( = selected)

Setting the flash time

Select Settings > OK > Telephony > OK > Recall > OK ... possible flash times are listed > ... use < to select flash time > Select ( = selected)

Saving an access code (outside line code)

Setting the access code (e.g. "0") for dialling using the fixed line network.

Select Settings > OK > Telephony > OK > Access Code > OK > ... then

Fixed line network: Access external line with: ... use < to enter or change access code, max. 3 digits

Rule: For ... use < to select when the access code should be dialled

Call Lists: The access code will only prefix numbers from a list (list of answered calls, list of missed calls, SMS list). All calls: The access code prefixes all numbers dialled. Off: The access code is deactivated and does not prefix any telephone number.

Save: Save

The access code never prefixes any SMS service centre numbers.
Setting pauses

▷ [ • ] [ * ] [ • ] [ 0 ] [ 5 ] [ • ] ... then

Pause after line seizure:
- 1 sec: 1 [ • ] 6 [ • ] OK
- 3 secs: 1 [ • ] 6 [ • ] 2 [ • ] OK
- 7 secs: 1 [ • ] 6 [ • ] 3 [ • ] OK

Pause after Recall key:
- 800 ms: 1 [ • ] 2 [ • ] 1 [ • ] OK
- 1600 ms: 1 [ • ] 2 [ • ] 2 [ • ] OK
- 3200 ms: 1 [ • ] 2 [ • ] 3 [ • ] OK

Dialling pause (pause after access code):
- 1 sec: 1 [ • ] 1 [ • ] 1 [ • ] OK
- 2 secs: 1 [ • ] 1 [ • ] 1 [ • ] 2 [ • ] OK
- 3 secs: 1 [ • ] 1 [ • ] 1 [ • ] 3 [ • ] OK
- 6 secs: 1 [ • ] 1 [ • ] 1 [ • ] 4 [ • ] OK

To enter dialling pause when dialling:
- Press and hold the hash key [ • ] ... a P appears in the display.

Switching temporarily to tone dialling (Tone)

After dialling the external number or after establishing the connection:
- Press the Star key [ * ] briefly.

After the call ends, pulse dialling is automatically reactivated.
Handset

Adjusting the telephone settings

Handset

Changing the language

- Use  to select Settings  OK  Language  OK  use  to select language  Select ( = selected)

If the handset has been set to an incomprehensible language:

- Press the keys 8 5 slowly one after the other  use  to select the correct language  press the right display key

Display

Screensaver

A digital or analogue clock can be selected to be displayed as a screensaver when in idle status.

- Use  to select Settings  OK  Display  OK  Screensaver  Edit ( = on)  then
  - Switch on/off:  Activation:  use  to select On or Off
  - Select screensaver:  Selection  use  to select a screensaver  (Digital Clock / Analog Clock)
  - View screensaver:  View
  - Save selection:  Save

The screensaver is activated approx. 10 seconds after the display has changed to idle status.

End screensaver

- Press the End call key briefly  the display changes to idle status

Large font

Show text and icons in call lists and in the directory in a larger size in order to improve legibility. Only one entry is shown in the display and names are abbreviated if necessary. The number is displayed in large font when it is dialled.

- Use  to select Settings  OK  Display  OK  Large Font  Change ( = activated)
Colour scheme
You can choose from a range of colour combinations for the display.

- [ ] Use [ ] to select [ ] Settings [ ] OK [ ] Display [ ] OK [ ] Colour Schemes [ ] OK [ ] . . . use [ ] to select the desired colour scheme [ ] Select [ ] = selected

Display backlight
The display backlight always illuminates when the handset is taken out of the base station/charging cradle or when a key is pressed. Any digit keys that are pressed appear on the display for pre-dialling.

Switch the display backlight on/off when in idle status:

- [ ] Use [ ] to select [ ] Settings [ ] OK [ ] Display [ ] OK [ ] Backlight [ ] OK . . . then
  - Backlight when in the charging cradle:
    - In Charger . . . use [ ] to select On or Off
  - Backlight when not in the charging cradle:
    - Out of Charger . . . use [ ] to select On or Off
  - Backlight during a call:
    - In Talk State . . . use [ ] to select On or Off
  - Save selection: [ ] Save

The handset's standby time may be significantly reduced if the display backlight is switched on.

Activating/deactivating Auto Answer
When set to Auto Answer, the handset accepts an incoming call as soon as it is removed from the charging cradle.

- [ ] Use [ ] to select [ ] Settings [ ] OK [ ] Telephony [ ] OK [ ] Auto Answer [ ] Change [ ] = on

Regardless of the Auto Answer setting, the connection ends as soon as you place the handset back in the charging cradle.

Changing the earpiece and handsfree volume
You can set the volume of the earpiece and speaker at 5 levels independently of each other.

During a conversation

- [ ] Handset Volume . . . use [ ] to select volume [ ] Save . . . the setting is saved

Without saving, the setting is automatically saved after around 3 seconds.
Handset

In idle status

- "" ➔ use "" to select "Audio Settings ➔ OK ➔ Handset Volume ➔ OK" ... then
  - For the earpiece: "Earpiece: "  ➔ use "" to set the volume
  - For the speaker: "Speaker ➔ ... use "" to set the volume
  - Save settings: "Save"

Earpiece and handsfree profile

Select a profile for the earpiece and handsfree mode in order to adapt the telephone as much as possible to the surroundings. Check which is the most comfortable profile for you and your caller.

56
Handset

Switching the ringtone on/off

Switching the ringtone off permanently
- Press and hold \( \text{Hold} \) . . . the following icon appears in the status bar \( \text{Ringtone Off} \)

Switching the ringtone on permanently
- Press and hold \( \text{Hold} \)

Switching the ringtone off for the current call
- Press Silence or the End call key \( \text{Silence} \)

Switching the alert tone (beep) on/off

Switch on an alert tone (beep) instead of the ringtone:
- Press and hold the star key \( \text{Star} \) \( \text{Star} \) Press Beep within 3 seconds . . . the following icon appears in the status bar \( \text{Beep} \)

Switching off the alert tone:
- Press and hold the star key \( \text{Star} \)

Switching advisory tones on/off

The handset notifies acoustically about different activities and statuses. These advisory tones can be switched on/off independently of each other.
- \( \text{Menu} \) \( \text{Menu} \) . . . use \( \text{Select} \) to select \( \text{Audio Settings} \) \( \text{OK} \) \( \text{Advisory Tones} \) \( \text{OK} \) . . . then
  - Tone when keys are pressed:
    - Key Tones: . . . use \( \text{Select} \) to select On or Off
  - Confirmation/error tone after making entries, advisory tone when a new message has been received:
    - Confirmation . . . use \( \text{Select} \) to select On or Off
  - Warning tone when there are fewer than 10 minutes of talktime remaining (every 60 seconds):
    - Battery . . . use \( \text{Select} \) to select On or Off
  - Warning tone when the handset is moved out of range of the base station:
    - Out of Range: . . . use \( \text{Select} \) to select On or Off
  - Save settings:

There is no battery warning when the baby monitor is switched on.
Handset

Fast access to numbers and functions

Number keys: It is possible to assign a number from the directory to the keys 0, 1, 2, and 9.

Display keys: The left display key has a function preset by default, but the key can be re-assigned.

You can then dial the number or start the function by simply pressing a key.

Assigning a number to digit keys (quick dial)

- Press and hold the digit key
- Briefly press the digit key
  - Press the display key QuickDial
  - The directory opens.
  - ... use to select an entry OK ... use to select a number if necessary OK...
  - the entry is saved to the digit key

If the entry in the directory is deleted later, this will not affect the assignment of the digit key.

Dialling a number

- Press and hold the digit key ... the number is dialled immediately
- Briefly press the digit key ... the number/name (possibly in abbreviated form) is shown on the left display key ... press the display key ... the number is dialled

Changing the digit key assignment

- Briefly press the digit key Change ... the directory is opened ... possible options:
  - Change the assignment: ... use to select an entry OK ... select a number if required OK
  - Delete the assignment: Clear Key
Assigning display keys / Changing assignments

- Press and hold the left display key in idle status . . . the list of possible key assignments is opened ➤ . . . use ➤ to select function ➤ OK . . . possible options:

</tbody>
</table>

Activating/deactivating music on hold

- use ... to select Audio Settings OK Music on hold OK

Example

- Change [Music on hold = on]
Changing the system PIN

Secure the telephone’s system settings with a system PIN. You have to enter the system PIN when you register or de-register a handset, change local network settings, perform a firmware update or reset the phone to default settings.

Change the telephone’s 4-digit system PIN (default setting: 0000):

- Use to select Settings
- OK
- System
- OK
- System PIN
- OK
- Use to enter the current PIN (if other than 0000)
- OK
- Use to enter new system PIN
- Save

Resetting system PIN

Resetting the base station to the original PIN 0000:

- Unplug the network cable from the base station
- Press and hold the Registration/Paging key on the base station
- At the same time reconnect the network cable to the base station
- Press and hold the key for at least 5 secs...the base station is reset and the system PIN is set to 0000

All handsets are de-registered and must be re-registered. All settings are returned to default settings.

Restoring the phone to default settings

When the settings are reset

- the date and time are retained,
- handsets are still registered,
- the system PIN is retained,
- Maximum Range is activated and No Radiation is deactivated.

- Use to select Settings
- OK
- System
- OK
- Base Reset
- OK
- Use to enter system PIN
- OK
- Yes...the base station is restarted. The restart takes around 10 seconds.
Questions and answers

Appendix

Questions and answers
Possible solutions are available online at ➔ www.gigaset.com/service

Troubleshooting

The display is blank.
• The handset is not activated. ➔ Press and hold  hold.
• The battery is empty. ➔ Charge the battery or replace it

"No Base" flashes on the display.
• The handset is outside the range of the base station. ➔ Move the handset closer to the base station
• The base is not activated. ➔ Check the base station power adapter
• The base station's range is reduced because Maximum Range is deactivated.
  ➔ Activate Maximum Range or reduce the distance between the handset and base station

"Please register handset" flashes on the display.
• The handset has not yet been registered or was de-registered due to the registration of an additional handset (more than 6 DECT registrations). ➔ Re-register the handset

The handset does not ring.
• The ringtone is deactivated. ➔ Activate ringtone
• Call forwarding is set. ➔ Deactivate call forwarding.
• The phone does not ring if the caller has withheld his number.
  ➔ Activate the ringtone for anonymous calls.
• The phone does not ring during a specific period or for certain numbers.
  ➔ Check the time control for external calls

No ringtone/dial tone from the fixed line network.
• Incorrect phone cable. ➔ Please always use the phone cable supplied or ensure that the pin connections are correct when purchasing from a retailer.

The connection always terminates after approx. 30 seconds.
• A repeater (earlier than Version 2.0) has been activated or deactivated. ➔ Switch the handset off and back on again.

Error tone sounds after system PIN prompt.
• You have entered the wrong system PIN. ➔ Repeat the process, reset the system PIN to 0000 if required

Forgotten system PIN.
  ➔ Reset the system PIN to 0000

The other party cannot hear you.
• The handset is "muted". ➔ Activate the microphone again

Some of the network services do not work as specified.
• Features are not enabled. ➔ Contact the network provider for details.
Questions and answers

The caller's number is not displayed.
• **Calling Line Identification (CLI)** is not enabled for the caller. ➤ The caller should ask the network provider to enable Calling Line Identification (CLI).
• **Calling Line Identification Presentation (CLIP)** is not supported or enabled by the network provider. ➤ Ask the network provider to enable Caller Line Identification Presentation (CLIP).
• The telephone is connected via a PABX or a router with an integrated PABX (gateway) that does not transmit all information.
  ➤ Reset the system: Briefly pull out the power plug. Reinsert the plug and wait until the device restarts.
  ➤ Check the settings on the PABX and activate phone number display, if necessary. To do this, search for terms such as CLIP, calling line identification, telephone number identification, caller ID, ... in the system user guide or ask the system manufacturer.

You hear an error tone when keying in (descending tone sequence).
• Action has failed/invalid input. ➤ Repeat the process. Read the display and refer to the user guide if necessary.

You cannot listen to messages on the network mailbox.
• Your PABX is set to pulse dialling. ➤ Set your PABX to tone dialling.

No time is specified for a message in the call list.
• Date/time are not set. ➤ Set the date/time.
Customer Service & Assistance

Do you have any questions? As a Gigaset customer, you can find help quickly in this User Manual and in the service section of our Gigaset online portal www.gigaset.com/service.

Please register your phone online right after purchase.

This enables us to provide you with even better service regarding questions or a warranty claim. In order to contact our customer service via email, please use the email contact form from our Gigaset online portal after selecting your home country.

Our representatives are also available on the telephone hotlines for consultation.

Customer Service & Assistance

Please have your record of purchase ready when calling.

Replacement or repair services are not offered in countries where our product is not sold by authorised dealers.
Exclusion of liability
Your handset’s display consists of pixels. Each pixel consists of three sub-pixels (red, green, blue).
It may be the case that a sub-pixel is missing or has a colour deviation.
A warranty claim is only valid if the maximum number of permitted pixel errors is exceeded.

<table>
<thead>
<tr>
<th>Description</th>
<th>Maximum number of permitted pixel errors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colour illuminated sub-pixels</td>
<td>1</td>
</tr>
<tr>
<td>Dark sub-pixels</td>
<td>1</td>
</tr>
<tr>
<td>Total number of coloured and dark sub-pixels</td>

</tr>
</tbody>
</table>

Signs of wear on the display and casing are excluded from the warranty.

Manufacturer’s advice

Authorisation
This device is intended for analogue phone lines in your network.
Country-specific requirements have been taken into consideration.
Hereby, Gigaset Communications GmbH declares that the radio equipment type Gigaset E370 is in compliance with Directive 2014/53/EU.
The full text of the EU declaration of conformity is available at the following internet address: www.gigaset.com/docs.
This declaration could also be available in the "International Declarations of Conformity" or "European Declarations of Conformity" files.
Therefore please check all of these files.

Environment

Our environmental statement
We at Gigaset Communications GmbH are aware of our social responsibility. That is why we actively take steps to create a better world. In all areas of our business – from product planning and production to sales and waste of disposal – following our environmental conscience in everything we do is of utmost importance to us.
Learn more about our earth-friendly products and processes online at www.gigaset.com.

Environmental management system
Gigaset Communications GmbH is certified pursuant to the international standards ISO 14001 and ISO 9001.
ISO 14001 (Environment): Certified since September 2007 by TÜV SÜD Management Service GmbH.
ISO 9001 (Quality): Certified since 17/02/1994 by TÜV SÜD Management Service GmbH.
Manufacturer's advice

Disposal

Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority.

All electrical and electronic equipment must be disposed of separately from general household waste using the sites designated by local authorities.

If a product displays this symbol of a crossed-out rubbish bin, the product is subject to European Directive 2012/19/EU.

The appropriate disposal and separate collection of used equipment serve to prevent potential harm to the environment and to health. They are a precondition for the re-use and recycling of used electrical and electronic equipment.

For further information on disposing of your used equipment, please contact your local authority or your refuse collection service.

Care

Wipe the device with a damp cloth or an antistatic cloth. Do not use solvents or microfibre cloths.

Never use a dry cloth; this can cause static.

In rare cases, contact with chemical substances can cause changes to the device's exterior. Due to the wide variety of chemical products available on the market, it was not possible to test all substances.

Impairments in high-gloss finishes can be carefully removed using display polishes for mobile phones.

Contact with liquid

If the device comes into contact with liquid:

1. Disconnect the power supply.
2. Remove the batteries and leave the battery compartment open.
3. Allow the liquid to drain from the device.
4. Pat all parts dry.
5. Place the device in a dry, warm place for at least 72 hours (not in a microwave, oven etc.) with the battery compartment open and the keypad facing down (if applicable).

6. Do not switch on the device again until it is completely dry.

When it has fully dried out, you will normally be able to use it again.
## Technical data

### Batteries

Technology: 2 x AAA NiMH  
Voltage: 1.2 V  
Capacity: 750 mAh

### Handset operating times/charging times

The operating time of your Gigaset depends on the capacity of the battery, its age and the way it is used. (All times are maximum possible times.)

<table>
<thead>
<tr>

# Display icons

The following icons are displayed depending on the settings and the operating status of your telephone.

## Icons in the status bar

<table>
<thead>
<tr>
<th>Icon</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Icon" /></td>
<td>Signal strength (<em>No Radiation</em> off)</td>
</tr>
<tr>
<td><img src="image2" alt="Icon" /></td>
<td>1% - 100%</td>
</tr>
<tr>
<td><img src="image3" alt="Icon" /></td>
<td><em>Maximum Range</em> on; white, if <em>Maximum Range</em> off; green, if <em>Maximum Range</em> off</td>
</tr>
<tr>
<td><img src="image4" alt="Icon" /></td>
<td><em>No Radiation</em> activated: white, if <em>Maximum Range</em> on; green, if <em>Maximum Range</em> off</td>
</tr>
<tr>
<td><img src="image5" alt="Icon" /></td>
<td>Ringtone switched off</td>
</tr>
<tr>
<td><img src="image6" alt="Icon" /></td>
<td>&quot;Beep&quot; ringtone activated</td>
</tr>
</tbody>
</table>

## Display key icons

<table>
<thead>
