<td>Tap Sleep.</td>
</tr>
<tr>
<td>Select time</td>
<td>Tap the required time</td>
</tr>
<tr>
<td></td>
<td>⏳ = Selected, ♨️ = Not selected</td>
</tr>
</tbody>
</table>
Safety precautions

Please read these instructions carefully. Failure to comply presents a risk of injury and damage to a device, as well as breaches of applicable laws.
Please explain the contents of this document as well as the potential risks associated with using this device to your children.

General information

Dispose of used mobile telephones in line with the instructions (Chapter Waste and environmental protection → p. 83).

- For your own safety, only use original, approved accessories from Gigaset for your mobile phone. Using incompatible accessories can damage the mobile phone and entail hazardous situations. Original accessories can be purchased from Gigaset Customer Service (see Customer service United Kingdom and Ireland → p. 79).
- The mobile phone is not waterproof. The device or its accessories must therefore not be kept or charged in damp environments (in bathrooms, shower rooms or kitchens, for example). Rain, moisture or any liquid can contain minerals which can cause the electrical circuitry to corrode. There is a risk of electric shock, fire or damage when the device is being charged.
- Permitted temperature range for charging and operation: 0-40°C. High temperatures can shorten the life of electronic devices and damage the battery; plastic parts can deform or melt. Using or keeping the mobile phone in refrigerated areas can result in condensation on the inside of the telephone which will destroy the electronic circuitry.
- The mobile phone must not be used or kept in dusty or dirty places. Dust can be a reason for the mobile phone to malfunction.
- Switch off your mobile phone when in potentially explosive areas and observe all warning signs. Potentially explosive areas also include places where switching off vehicle engines is normally recommended. It is at these kinds of places that flying sparks can be the cause of explosions or fires with resulting injuries, and there may be a risk to life. These areas include petrol stations, chemical factories, transport and storage systems for hazardous chemicals, spaces under ship decks, areas in which the air contains chemical substances or fine particles (such as dust or metal powder particles).
- Short-circuiting, disassembling and modifying the mobile phone are not permitted because they present a risk of injury, electric shock, fire or damage to the charger.
- The USB connection must be established with USB version 2.0 or higher.
- If the mobile telephone becomes hot, changes colour or shape or leaks whilst being used, charged or at any other time, contact Gigaset Customer Service immediately.

Battery and charging

- The battery is built-in. Do not disassemble, weld and/or modify the battery. Do not keep the mobile telephone where it is exposed to strong mechanical effects.
- The battery electrolyte coming into contact with eyes can cause a loss of eyesight. If electrolyte does enter an eye, please do not rub the eye with a hand. Immediately wash the affected eye thoroughly with clear water and consult a doctor. The electrolyte coming into contact with skin (or clothing) presents a risk of skin burns. Immediately wash the skin or clothing thoroughly with soap and clear water, and consult a doctor if required.
- The temperature of the mobile phone rises during the charging process. Do not store the mobile telephone in the same place as flammable products as this poses a risk of fire.
- Do not charge the battery for longer than 12 hours.
- Only charge the device indoors. Whilst the phone is charging, do not use the phone for calls or dial any numbers.
- The socket must be easily accessible during the charging process.
- Electrical storms pose a risk of electric shocks.
- Do not use the charger when the power cable is damaged because this poses a risk of electric shock and fire.
Safety precautions

Headset

High volumes can impair hearing. Listening to music or conversation with headphones set to a loud volume can be unpleasant and permanently impair hearing.

To prevent loss of hearing, do not have the volume turned up too high for long periods.

- If you wear headphones whilst out walking or running, please ensure that the cord does not wrap itself around your body or objects on your person.
- Only wear headphones in dry environments. The static electricity which builds up on the headphones can discharge via your ears as an electric shock. The static electricity can discharge if you touch the headphones with your hand or touch bare metal before connecting with the mobile phone.

Use in hospitals / medical devices

- The function of medical equipment near your mobile phone can be impaired. Bear in mind the technical conditions of the environment in question (such as in doctors’ surgery).
- If you use a medical device such as a pacemaker, please consult the manufacturer of the product before using your mobile phone. You will be provided information on the sensitivity of the device to external, high-frequency energy sources.
- Heart pacemakers, implantable cardioverter defibrillators:
  When you switch on your mobile phone, ensure that the distance between the phone and an implant is at least 152 mm. To reduce potential interference, use the mobile phone on the opposite side to the implant. Please switch the mobile phone off immediately if interference occurs. Do not keep the mobile phone in a shirt pocket.
- Hearing aids, cochlear implants:
  Some digital wireless devices can interfere with hearing aids and cochlear implants. Please consult the manufacturers of these products if interference occurs.
- Other medical devices:
  If you and the people around you use other medical devices, please contact the relevant manufacturer for information on whether such devices are protected from radio frequency signals in the environment. You can also consult your doctor about this.

Emergency calls

- Make sure the mobile phone is switched on and connected to the GSM network. Enter the emergency number as required and speak.
- Tell the person at the emergency call centre your location.
- Do not end the conversation until the person at the emergency call centre asks you to.

Children and pets

- Keep the mobile phone, chargers and accessories out of the reach of children and pets. Children and/or pets can swallow the small parts, posing a risk of suffocation and other hazards. A child may only use the mobile phone under the supervision of an adult.

Playing games

- Playing games on the mobile phone for long periods may mean assuming an unhealthy body posture. Take a 15 minute break every hour. Stop immediately if you feel unwell during game play. Consult a doctor straight away if your condition persists.

Aeroplanes, vehicles and road safety

- Switch off your mobile phone in aeroplanes. Please observe applicable restrictions and regulations. Wireless devices can interfere with the function of aeronautical equipment. Follow the instructions issued by flight personnel when using your mobile phone.
- The absolute priority for every vehicle driver and everyone in a vehicle is safety on the roads and for road users. Using a mobile phone whilst driving can be distracting and therefore lead to dangerous situations. You can also be violating applicable laws.
Safety precautions

SIM card, memory card and data connector cable
• Do not remove the card from the mobile phone whilst data is being sent or received as this presents a risk of data loss and damage to the mobile phone or memory card.
• Charges might apply when establishing Internet connections via the SIM card.

Defective devices
• The installation and repair of products are the sole preserves of qualified maintenance personnel.
• Dispose of faulty devices carefully or have them repaired by our Customer Service team. These devices could interfere with other wireless services.
• Careless handling of the mobile phone, such as dropping it, can shatter the display and damage the electronic circuitry and sensitive parts inside.
• Do not use the device if the display is cracked or shattered. Fragments of glass or plastic can injure hands and face.
• In the event of malfunction of your mobile phone, battery or accessories, please contact a Gigaset Service Centre for an inspection.

Other important information
• Never point the flash light directly at the eyes of people or animals. Pointing a flash light too near to human eyes poses a risk of temporary loss of eyesight or impairment of vision.
• The device can heat up when running power-intensive apps or programs for longer periods. This is normal and has no bearing on the performance of the device.
• When the device warms up, please put it aside for a while and stop the program you were running. Coming into contact with a hot device can cause minor skin irritations such as redness.
• Do not apply lacquer to the mobile phone. Lacquer and paint can damage the parts of the mobile phone and may cause malfunction.
Getting started

Contents of the package

• A Gigaset GS290 smartphone
• A charger cable with power adapter
• one SIM card needle
• one headset

Getting started

Inserting SIM and memory cards

You can insert two nano SIM cards or one nano SIM card and one memory card in the smartphone.

› Open the card slot. To do this, poke the SIM card needle (supplied) into the small opening on the card slot and press it.

› Pull out the card slot.

› Place the nano SIM card(s) / memory card (optional) into the card slot.

Do not exert any force when inserting the SIM or the memory card because doing so might damage the card slot.

› Plug the card slot back in and press it until it clicks into place.

The front of the smartphone is facing upwards.

The device detects memory cards with a storage capacity of 32 GB. Higher capacity cards (to 256 GB) can be used if formatted on the Gigaset GS290 (not on the PC).
Getting started

**Charging the battery**

- The battery is built-in. This means a higher battery capacity can be realised for the same device dimensions.
  - Plug the USB Type C connector on the charger cable provided into the USB Type C connector on the smartphone
  - Connect the power adapter to the USB connector of the charger cable and connect it to the power source.

The device is charged once the charge icon in the Status bar is filled completely.

> So your phone does not discharge during set-up, keeping it connected to the power is recommended until set-up is complete.

**Switching on the device**

- Keep the On/Off button pressed until the device vibrates.
When you are requested to unlock the SIM card,
  - use the keypad to enter the PIN of the SIM card

When switching on the device for the first time, a wizard starts which guides you through the initial configuration.

**Wizard for configuring the device**

When you switch on your phone for the first time, you are automatically guided through the most important configuration steps.

< Back: Check and change as required settings already configured.
Next > Apply the setting on the screen and jump to the next screen.
Skip Configure the setting later.

**Selecting the language**

- The set language is displayed.
  - Select another language as required tap Start

**Inserting SIM cards**

This screen is only shown when no SIM card is inserted:

- Insert card now (p. 9)

Insert SIM card later: Skip
Getting started

Establishing a WLAN connection
Wireless networks (WLANs) in range are displayed.
- Tap the required WLAN → Enter the WLAN password → Connect . . . A connection to the selected WLAN is established

Copying apps & data
You can now specify whether you want to set up the device as a completely new device or if you want to copy personal data (e.g. apps, photos, music) from another device or from Google Cloud.

Copying data

⚠️ You already have an Android smartphone, a Google account or an iPhone.

- Select the required option → Select the desired data source
- Follow the instructions on the screen.

Setting up a new device
Logging in to an existing Google account
- Enter the email address and password of your Google account
or
Creating a new account
- Tap Create account → Enter the email address and password for a new Google account.
- Specify more details to conclude setting up the Google account.

Using Google services
Various services are displayed.
- Use the switch to enable/disable the service you want to use → Next

⚠️ Performing this step also means you accept the conditions of use and data protection declaration of Google.
Getting started

Setting up protection for the phone
Protect your smartphone from unauthorised use.
Fingerprint
- Add fingerprint ➤ Next ➤ . . . A wizard opens to guide you through the necessary steps.
  Additional information ➤ p. 29
or
- Enter the PIN
or
- Select Options for the display lock
  - Select Pattern | PIN | Password ➤ Next
  - Enter the pattern, PIN or password ➤ Next ➤ Repeat ➤ Confirm

Enabling Google Assistant
Google Assistant answers questions and carries out a range of tasks. This page provides information about the authorisations required for Google Assistant.
If you want to enable Google Assistant: ➤ Tap Yes, enable.
If you do not want to enable Google Assistant: ➤ Tap No, thank you.
The data used for these settings can be taken from any device logged into the Google account. You can change these settings any time in your Google account at myaccount.google.com.

Setting up other functions
You can now configure other settings, such as set up Google Pay, set the background for the display or the font, and set up another email account.
Gmail is set up once you log in to your Google account. If you set up email addresses for other email accounts, these emails can also be displayed in the Gmail app.
- Select provider ➤ Enter access details ➤ Next
If you do not want to configure any more settings now: ➤ Done!
Finally, you can set up facial recognition.
For detailed information on this, refer to ➤ p. 53

Your smartphone is now ready to use.
Using the device

Getting to know your device

Switching the device on and off

Switching on
- Press and hold the On/Off button . . . The device is started

Unlocking the SIM card
- Enter the PIN for the SIM card

Removing notifications (if available)
Clear notification:  ➤ Swipe to the left or right
Deal with notification later:  ➤ Swipe upwards to the Notifications bar
Notifications ➤ p. 22

When a display lock is set up to protect against unauthorised use
- Swipe up  ➤ Unlock the display . . . The start screen is displayed
Display lock: ➤ p. 52

Switching off
- Press and hold the On/Off button  ➤ Tap  ➤ Power off  ➤ OK

Information: You can also switch the smartphone to Airplane mode. This only disables the wireless functions, the other device functions remain available.

Switching the device to and ending idle mode

Switching the device to idle mode
- Briefly press the On/Off button

Information: If the device is not used for a defined time, it automatically switches to idle mode.

Setting the period of inactivity for transitioning to idle mode
- ➤ ➤ ➤ Settings ➤ Display ➤ Sleep ➤ Select period

Ending idle mode
- Briefly press the On/Off button  ➤ Remove any notifications as required  ➤ Swipe up  ➤ Unlock the display

Information: Some apps can be accessed directly from idle mode with a fingerprint (➤ p. 29).
Getting to know your device

Using the touchscreen
Movements and gestures for using the touchscreen:

Tapping
▶ Briefly touch the screen with your finger
Examples:
Start an app, and select function or setting: ▶ tap the element
Enter text: ▶ Tap a text field . . . A keypad is shown

Touching and holding
▶ Keep your finger on an element until it responds.

Dragging and releasing
▶ Touch and hold the element ▶ Move your finger across the screen to the place required ▶ Release the element
Example: Moving apps on the start screen

Swiping or dragging
▶ Move your finger quickly across the screen without stopping
Example: Switching between the start screens

Double tapping
▶ Tap the screen twice quickly in succession.
App-dependent: e.g. Zoom, select text, ...

Spreading apart / pinching together your fingers
▶ Place two or more fingers on the screen at the same time
Zoom in: ▶ Spread your fingers apart
Zoom out: ▶ Pinch your fingers together
Example: Scaling screen content. Only possible for special screens (such as Google Maps and Chrome).

Operating the device using movements
Some functions can be used by picking up, turning or shaking the device.

Settings ▶ Intelligent assistance . . . The possible actions are displayed ▶ Enable the required actions with the switch
Getting to know your device

Setting volume and vibration from the Volume button
Change the volume for ringtone, music and alarm.
- Press the Volume button on the right-hand side of the device . . . the slider bar for the volume is opened.
- Adjust the volume with the slider bar.

Disabling the ringtone
- Drag the slider bar all the way down
or: 
- Tap

Switching between ringtone, vibration and mute
Disabling the ringtone, enabling vibration:
- Tap
Disabling vibration, disabling ringtone (mute):
- Tap
Enabling ringtone:
- Tap

Configuring advanced audio settings:
- Tap . . . menu Settings – Sound opens (p. 48)

Start screen
A start screen is displayed when you switch on or unlock the device, and no app is open.
You can create several start screens and configure them as you wish - to be able to quickly access favourite apps and content (p. 19).

Returning to the start screen from any user situation
- Tap the Home button in the navigation bar . . . the start screen open most recently is displayed

Switching between start screens
- Swipe left or right to the required start screen.

The Google feed is displayed on the very left of the screen.
For the selection of messages shown in the feed, Google uses information from your device, from other Google products and from data stored in your Google account.
You can specify in Settings which type of information is displayed in your feed.
Getting to know your device

Switching between start screens and apps

One or more navigation buttons are at the bottom of every screen depending on the user situation.

- Opens the screen last viewed. You can go back several times (only as far as the start screen).
- Home button
  - Briefly tap to: Open the start screen which was open last time.
  - Touch and hold to: Open the Google Assistant ➔ Google-Hilfe
  - Swipe up: Opens an overview of the apps and browser tabs used last time.
  - Open an app: ➔ Tap it
  - Close an app: ➔ Swipe the app up
  - Swipe up twice: Opens a list of all apps

Customising the navigation bar

- ➔ ➔ Settings ➔ Navigation bar

Quick settings

The quick settings enable you to access frequently used settings from all user situations, such as screen lighting, WLAN, Bluetooth and similar settings.

Opening the quick settings

- From the Status bar, swipe down
  - The most important quick settings are displayed
- Swipe down again . . . More quick settings are displayed ➔ Swipe left/right to display all the quick settings

Icons of the quick settings ➔ p. 85

Enabling and disabling a function

- Tap the setting . . . The symbol for the setting is coloured when it is enabled, and grey when it is disabled

Changing a setting (if available)

- Touch and hold the symbol ➔ Change the setting as required
Getting to know your device

Editing quick settings
You can make available more quick settings, remove any not used and rearrange the icons.

- Tap . . . Quick settings not being used are shown at the bottom
  - Touch and keep your finger on the icon, and drag it to the required position

Restore to default settings:
- Tap Reset

Finish editing:
- Tap ← in the top left

The required setting is not available as a quick setting:
- Tap Ω . . . the Settings app is opened; here you can access all of your smartphone settings.

Writing and editing text
Use the Google keypad to write text.

Opening the keypad
- Tap a place where text can be entered

You can enter letters, digits and special characters.

Switching between entry of letters and digits / special characters:
- Tap

Closing the keypad
- Tap in the navigation bar

Adding text

Entering letters and symbols:
- Tap a key

Entering uppercase letters:
- Tap the shift key (⇧)

Enabling/disabling Caps Lock:
- Double tap the shift key (⇧)

Showing umlauts:
- Touch and hold the key

Whilst text is being entered, suggestions from the keypad dictionary are shown above the keypad.

Using a suggestion:
- Tap the word . . . The word is included and a space is inserted automatically
Getting to know your device

Editing text

Positioning the cursor: Tap the place in the text where you want to position the cursor
Moving the cursor: Swipe left or right on the text
Deleting a character: Touch and hold the backspace key
Selecting text: Touch and hold a word ▶ Select more or less text with tabs on both sides
Selecting all: Touch and hold a word ▶ Select all
Cutting selected text: Tap Cut
Copying selected text: Tap Copy
Pasting text: Position the cursor ▶ Tap on the cursor ▶ Paste

If there is not enough of space to display all options: ▶ Tap

Changing the keypad settings

You can change various keypad settings, such as the language for the keypad assignment, the response to keypresses and the keypad design.

▶ Settings ▶ System ▶ Languages & input ▶ Virtual keyboard ▶ Gboard

Setting voice entry

If an app permits it, you can also enter text by speaking into the microphone. The function is enabled by default.

Enable/disable voice input:

▶ Settings ▶ System ▶ Languages & input ▶ Virtual keyboard ▶ Manage keyboards ▶ Enable/disable Google Voice input with the switch

Voice input settings:

▶ Settings ▶ System ▶ Languages & input ▶ Virtual keyboard ▶ Google Voice input
Configuring the start screens

You can create several start screens and configure them as you wish - to be able to quickly access favourite apps and content.

Tailoring the Favourites bar

At the bottom of every start screen is the Favourites bar, from which you are able to quickly access the apps you use most frequently.

- Opening the menu with all the apps:
  - Swipe up the screen twice from the Home button
  - The apps in the App menu are in alphabetical order.
  - Scrolling through the list: swipe up or down

Removing apps from the Favourites bar

- Touch an app in the Favourites bar and drag it upwards
  - Drag the app to the Forget button at the top of the screen and release your finger
  - Drag it to somewhere else on the screen and release your finger

Adding an app

- Select the required app
  - Touch and hold the app
  - The start screen is shown in the background
  - Drag the app to a free space in the Favourites bar and release your finger.

Changing the wallpaper

- Touch and hold the wallpaper
  - Tap Wallpapers
  - Select picture from the predefined backgrounds or a separate photo from the photo gallery
  - Tap Choose wallpaper from
  - Select what the background/photo is being used for (Home, Lock screen, Home screen and lock screen)

- More wallpaper images can be downloaded from Google Play.

Adding an app to a start screen

- Open the App menu
  - Look for the required app
  - Touch and drag the app
  - The start screen is displayed in the background
  - Drag the app to a free space in a start screen and release your finger
Configuring the start screens

Adding a widget to a start screen
Widgets are components that are specifically intended to be displayed on a start screen, e.g. a clock, a calendar extract for the current day, an important entry from the contact list or a direct dial.

- Touch and hold a free space on a start screen ▶ Tap Widgets
- Touch and hold the required widget . . . The start screen is displayed in the background ▶ Drag the widget to a free space in a start screen and release your finger

The sizes of some widgets can be changed:
- Touch and hold a widget ▶ Release your finger . . . If the size of the widget can be changed, you see a dotted frame on the edges ▶ Change the size of the widget by dragging the dots

Once the correct size is set: ▶ Tap anywhere outside the widget

Moving apps and widgets

- Touch and hold an app or widget on a start screen ▶ Drag the app or widget to the required position and release your finger, or drag it to the left or right to another start screen and release your finger

Creating folders for apps

- Touch and hold an app on a start screen ▶ Drag the app icon over another app icon . . . A shared symbol is created for both apps

Adding apps:
- Touch and hold an app ▶ Drag it to the folder

To remove the app:
- Open folder ▶ Touch and hold the app ▶ Drag it from the folder to the background

Renaming a folder:
- Open the folder ▶ Tap the name . . . The keypad opens ▶ Delete the old name ▶ Enter the new name

Removing an app or widget

- Touch and hold an app or widget on a start screen ▶ Drag it up to option Remove and release your finger

Adding, rearranging and removing start screens
The number of start screens is shown by dots above the Favourites bar.

Adding start screens

- Touch and hold an app ▶ Drag the app all the way to the right until a blank start screen is shown ▶ Release your finger . . . A new start screen is created and the app is placed on it
Configuring the start screens

Removing a start screen
▶ Remove all apps and widgets from a start screen (by deleting them or moving them to another start screen) . . . When the last app or widget has been removed, the start screen is deleted.

Other settings for the start screen
You can configure other settings for the design of the start screen, such as the appearance of the app symbols.
▶ Touch and hold a free place on a start screen ▶ Tap **Home settings** ▶ Select the required option and set it if required.

Browse smartphone and Internet
At the bottom of the start screen is the Google search widget, enabling you to search on your smartphone and browse the Internet.

Entering a search term
▶ Tap the Search bar ▶ Enter a search term using the keypad ▶

Search using voice entry
▶ Tap the Microphone icon ▶ Speak your search term into the microphone

Additional information ➔ **Google Help**
Notifications

Notifications inform you about various events, such as the arrival of a new voice message or email, appointments or wake-up calls.

Notifications are displayed as follows:

- In the Notifications bar: Swipe over the screen from the top down
  An icon in the Notifications bar denotes which notifications are available (p. 86).
- On the lock screen: when the phone starts and when returning from idle mode
- At the top of the screen whilst you are doing something else on your phone, such as reading an email or watching a video
- Briefly on the idle screen

Changing the settings for displaying notifications: p. 23

Dealing with notifications

Viewing and responding to notifications

- Tap the notification . . . The contents of the message are displayed in the associated app. If there are several possible apps, you can select one.

Which information is displayed and which actions are possible depend on the app which triggers a notification.

Some apps allow actions to respond to a notification. You can for example reply directly to a mail, switch off a wake-up call or show on the map the meeting place for an appointment.

Changing the display options of the app for notifications: p. 23

Deleting and resetting notifications

Deleting a notification:

- Swipe the notification to the left or right

Deleting all notifications on the Notifications screen:

- Scroll down to the end of the notifications ➔ CLEAR ALL

Resetting a notification on the lock screen or at the top of the screen to read it later:

- Swipe the notification up

Show most recent incoming notifications

- ➔ Settings ➔ Apps & notifications ➔ Notifications

Listed in Recently sent are the apps that sent the most recent notifications.
Notifications

Settings for notifications

Changing the default notification sound

Settings ➤ Apps & notifications ➤ Notifications ➤ Default notification sound ➤ Select the notification tone ➤ OK

or

Settings ➤ Sound ➤ Default notification sound ➤ Select the notification tone ➤ OK

No notification sound: ➤ Select None (first entry in the list)

- If you do not wish to be disturbed, you can mute your device. No notification sound is then played.
  Use the “Do not disturb” function to mute your device ➤ p. 30
- In some apps, sound and vibration settings for notifications can be set directly in the app from the Settings menu.
- If the volume for the ringtone is reduced down to Vibration mode ➤ p. 48, the device vibrates for notifications instead of playing a sound. The smartphone continues to vibrate for notifications for which Vibration mode is already selected.

Changing the settings for app notifications

Specify how and when notifications for an app are displayed

Settings ➤ Apps & notifications ➤ Display all apps ➤ Select an app ➤ Notifications

or

Touch and hold an app notification ➤ Tap ➤ Notifications

The possible app notifications are displayed. You can specify which app notifications are displayed.

Notifications on the lock screen

The following settings are available for the lock screen:
- Don’t show notifications at all
- Show all notification content
- Hide sensitive content

You can use this setting as the default for all apps.

Settings ➤ Apps & notifications ➤ Notifications ➤ On lock screen ➤ Select the required option

or

Settings ➤ Security & location ➤ Lock screen settings ➤ On lock screen
Apps

The apps available on the device are stored in the App menu. The device is supplied with a
number of default apps. Additional apps from your mobile operator are installed as soon as you
insert a SIM card.

You can download and install more apps, or disable and uninstall existing apps.

You can place frequently used apps directly on a start screen (⇒ p. 19), and the five
most important in the Favourites bar (⇒ p. 19).

Opening and exiting apps

Opening an app from the App menu

The start screen is open. If not: ▶ Tap

▶ Swipe up twice from the bottom . . . All apps are displayed (sorted alphabetically) ▶ Tap
the app you want to open

Switching between apps

▶ From the Home button , swipe up . . . the apps last used are displayed ▶ swipe left/
right to scroll through the list ▶ Tap the app you want to open

Ending/exiting apps

Exiting an app

▶ Tap in the Navigation bar . . . The start screen is displayed. The app stays open and is
included in the app overview.

Ending an app

▶ From the Home button , swipe up . . . all apps opened recently are displayed in an
overview ▶ swipe up the apps to delete

Ending all the apps: ▶ Swipe all the way to the left ▶ Tap

Looking for an app

▶ . . . All apps are displayed ▶ Tap Search apps above the app list ▶ Enter the first
letter of the app you are looking for . . . All matching apps are displayed
Apps

Installing/uninstalling apps

Installing new apps
Downloading apps from Google Play:

1. Play Store → The Google Play Store is opened → Look for the app you want → Open the app screen → Install

Uninstalling or disabling apps
You can delete apps you no longer need from the device.
You can uninstall apps you have downloaded. They are completely removed from the device. Apps preinstalled on the device (system apps) can be disabled but not completely removed. Disabled apps are not show on the device.

Disabling a system app can cause problems with other apps.

1. Settings → Apps & notifications → Display all apps → Select the app that you wish to uninstall → Uninstall / Disable
   or (for apps which can be uninstalled)
1. Touch and hold the app you want to uninstall → Drag it to UNINSTALL and release your finger

Show system apps and processes:
1. Settings → Apps & notifications → Display all apps → Tap → Show system

Preinstalled default Google apps
The smartphone makes available many of the default apps from Google, including:

- Google Browser Internet and search smartphone
- Chrome Browser for surfing on the Internet
- Gmail Receive, write and send emails
- Maps Look for and find out about places in all corners of the globe
- YouTube Play YouTube videos and playlists
Apps

- Files: File manager
- Drive: Store data centrally
- Google Play Music: Listen to music
- Google Play Movies & TV: Watch films and series
- Hangouts: Communicate with friends with voice calls, messages and videos
- Photos: Save and manage photos centrally
- Duo: Make calls with video view
- Google Play Store: Download apps

More information on Google apps ➔ Google Help

Using two apps at the same time
Split screen mode enables you to display two apps next to or above each other on the screen, and to work with both apps in parallel.

Both apps support the function.

Starting Split screen mode
- Open the first app from a start screen or from the app menu ➔ from the Home button ➔ swipe up ➔ touch and hold the icon at the top in the app image ➔ Tap Share screen . . . the app is displayed at the top (or on the side)

Selecting the second app
- Open the second app from a start screen or the app menu . . . The app is loaded into the second screen area
  or
- In the list of recently used apps in the second screen area, tap the title of the second app . . . The app is loaded into the second screen area

Changing the second app
- Tap ➔ Select a different app from a start screen or the app menu
  or
- From the Home button ➔ swipe up ➔ tap another app

Ending Split screen mode
- Drag the black bar between the two apps all the way up/down or left/right . . . The second app is ended and the device returns to Default mode
Apps

Protection from harmful apps

Downloading apps from sources other than Google Play

If you want to download apps from sources other than Google Play, you must permit it explicitly. You can find this function in the settings for the app that allows the download, e.g. browser or mail program.

Settings > Apps & notifications > Display all apps > Select the app that you wish to use to load apps from other sources > Install unknown apps > Enable the Allow from this source switch.

If you intend to use apps that Google classifies as insecure, you must permit the use of such apps explicitly. Find out about the associated security risks from Google beforehand.

Apps from unknown sources can represent a security risk for your smartphone. A download can corrupt your smartphone, and personal details can be misused or go missing.

Checking the device for security threats

Google Play Protect checks apps when they are installed, and regularly and automatically checks your device for security threats. In the event Play Protect finds a potentially harmful app, you are notified.

Enable the Scan apps with Play Protect switch.

Manually starting a check: Tap Play Protect > Information is displayed on apps checked recently.

Enabling/disabling automatic checking:

Tap Play Protect > Enable/disable Scan apps with Play Protect with switch

Improving the detection of harmful apps

If the function is enabled, Google also receives anonymous information on all apps installed which are not from the Google Play Store. This helps Google to provide better protection for users against harmful apps.

Tap Play Protect > Enable the Improve harmful app detection switch

This option might not work for all apps because developers are able to disable this function to prevent their apps being subjected to verification.
Downloads

You can download files from websites onto your device. Downloaded files are mainly stored in the file manager app available, e.g. Files.

Content such as music, TV programs and books are generally not stored in the file manager but in the app with which the download was performed.

Working with downloaded files

- Display with large/small icons: Tap /
- Opening a file: Tap the file
- Deleting a file: Touch and hold the file Tap
- Sharing a file: Touch and hold the file Tap
Fingerprint sensor

The device has a fingerprint sensor. This enables you for example to authorise purchases, register with certain apps and quickly open a contact from idle mode.

Setting up the fingerprint

Settings ▶ Security & location ▶ Fingerprint . . . A wizard opens which guides you through the necessary steps ◀ Next

When a display lock is set up: ◀ Enter the pattern, PIN or password
If a display lock is not yet set up: ◀ Set up screen lock (☞ p. 52)

Pattern, PIN and password are alternatives to the fingerprint.
The alternative method must be used in the following cases:
• The fingerprint is not recognised after several attempts
• For editing fingerprint settings
• When it has been more than 48 hours since the alternative method was used for unlocking

Scanning a fingerprint

Place your finger onto the sensor on the back of the device. Hold the device as you will also hold it later for unlocking. ◀ Next

Keep tapping the sensor until the Fingerprint added message is shown. Keep changing the position of your finger.

Ending the scan: ◀ Done
Add more fingerprints ◀ Fingerprint ◀ Add fingerprint

You can add up to five fingerprints. They are saved as Finger 1 to Finger 5.
Note that all those who add their fingerprints are able to unlock the phone and authorise purchases with your account.
Fingerprints are stored securely and never outside the device.

Changing a fingerprint name

Assign a suitable name for the fingerprint, e.g. “Index finger left”.

Settings ▶ Security & location ▶ Fingerprint ▶ Use the alternative method for unlocking (pattern, PIN or password) ▶ Touch a name ▶ Enter the new name in the text field (max. 15 characters) ▶ OK
“Do not disturb”

Using a fingerprint
If an action can be authorised with a fingerprint, the icon or alternative pattern is displayed if a display lock with fingerprint is set up.

- Tap the fingerprint sensor with a finger which has been scanned ▶ Repeat the process as required

The alternative method is enabled automatically if the fingerprint is not recognised after several attempts.

“Do not disturb”
The “Do not disturb” function mutes the device. It does not ring or vibrate. It prevents for example the phone ringing at night and during meetings, and all interruptions apart from a wake-up call.

Enabling/disabling "Do not disturb"
- From the status bar, swipe down . . . The quick settings are displayed

Enabling:
- Tap ▶ "Do not disturb" is enabled with the rules currently set; the symbol turns coloured; is shown in the status bar

Disabling:
- Tap . . . all signals are enabled again; the symbol turns grey

Specifying the rules for "Do not disturb"
- Touch and hold the / icon . . . the settings screen for Do not disturb is opened

Smartphone functions for which "Do not disturb" are not to apply
Here for example you can exclude the alarm clock from the “Do not disturb” function.
- Tap Sound & vibration ▶ Enable tone and vibration for the functions required ( = enabled, i.e. "Do not disturb" does not apply for this function)

Rules for notifications
It is possible to set more detailed settings for how notifications are handled when "Do not disturb" is enabled.
- Tap Notifications ▶ select the setting; follow the explanations and instructions on the display

Permitting calls
You can select whether and which calls are permitted when "Do not disturb" is enabled.
- Tap Calls ▶ Allow calls ▶ select the permitted calls (From anyone, From contacts only, From starred contacts only, None)
“Do not disturb”

**Editing the list of selected contacts**

If you select *From starred contacts only*, you can edit the list of these contacts. Selected contacts are the favourites in your contact list.

- Tap **Calls > Starred contacts** . . . a list of your contacts with Favourite status is opened

** Cancelling a selection:**

- Tap the contact Tap ⭐ . . . the contact is removed from the list

** Adding marked contacts:**

- Tap **Add marked contacts**  ➤ Select a contact

**Permitting repeated calls**

So as not to miss important calls, you can permit repeated calls within 15 minutes.

- Tap **Calls > Enable the switch next to Allow repeat callers**

**Permitting messages, events and reminders**

- Tap **Messages, events & reminders**  ➤ specify the events to be permitted

**Setting a schedule**

Specify how long the "Do not disturb" function is to stay enabled:

- Tap **Duration**  ➤ select the setting required

**Specifying rules for automatic enabling:**

- Tap **Turn on automatically** . . . predefined rules Sleeping and Event are shown  ➤
  change the predefined rules or add your own rules  ➤ Enable a rule with **Use rule**

**Enabling rules**

- Tap **TURN ON NOW** . . . the "Do not disturb" function is enabled with all of the rules defined
Additional functions

Setting up multiple users
You can enable the device for more users. All users receive a separate area they can set up themselves, such as own start screen, apps, accounts and contacts. Different user icon colours denote different users.

Setting up users

- Settings ➤ System ➤ Multiple users ➤ All available users are displayed ➤ Add user ➤ OK ➤ A user is entered ➤ Set up now ➤ The device switches to the new user’s area

The Setup Wizard is opened.
- Configure user-specific settings with the Wizard. Once you have finished with the assistant, the user is displayed in the quick settings

Changing the name:

-Swipe the toolbar down ➤ Tap MORE SETTINGS ➤ Select the user ➤ Enter the name ➤ OK

Switching user

-Swipe the toolbar down ➤ Tap ➤ All available users are displayed ➤ Tap the required user ➤ The settings for the selected user are loaded

Deleting a user

-Swipe the toolbar down ➤ Tap MORE SETTINGS ➤ Select the user ➤ Tap ➤ Delete the new user from the device ➤ Delete

It is only possible to set up new users from the Settings menu of the main user. The updating of apps is possible and applicable for all users.

Creating screenshots
Take a screenshot of the smartphone as an image, and edit, share and send it.

Taking a screenshot

- Open the screen for which you want to create a screenshot.

- Press and hold the On/Off button ➤ Screenshot

or

- Press the On/Off and Volume buttons at the bottom at the same time.

The screen content is stored in the internal memory of the device. The 📸 icon is displayed in the Notifications bar.
Additional functions

Viewing a screenshot
- Swipe the Notifications bar down  Tap the notification ... The screenshot is displayed
If more than one app is available for editing images, such as Photos and Gallery:
- Select the desired app

Screenshots can be edited with app resources.
For more detailed information on the app Photos ➜ Google Help

Sending files between a computer and the smartphone
Use a USB cable to send photos, music, ringtones and other files between a computer and the smartphone.

A computer detects the device connected via USB. It is linked in as a drive.

Connecting the USB cable
- Use the USB cable provided to connect the device to a computer

Transferring files
For data interchange with a Mac: Android File Transfer is installed and started on the computer.
- Swipe the Notifications bar down  Tap the USB notification  Select File Transfer
or
- ➜ Settings ➜ USB ➜ File Transfer

Windows: Automatic drive detection is opened on the computer ➜ Open Windows Explorer ➜ Use drag-and-drop to move files as for other external drives
Mac: The Android File Transfer window is opened on the computer ➜ Use Drag-and-Drop to move the files

Managing music
Use the Music Manager to upload music from the computer to the Google Play media library.
For information on managing music with Google Play Music: ➜ Google Help
Additional functions

Printing
Apps with a print function enable you to print from your device.

A printer is available that is set up and able to receive data over a WLAN connection or mobile network.

- Settings → Display → Printing → Select service
  
  Default Print Service: The printers in the network are displayed
  
  Add service: Download other print service from Google Play and install it

The procedure for printing depends on the used app.

- Open the menu from icon or → Tap Printing

Printing the screen content: → Take a screenshot (p. 32) and then print it.

Sending the screen content to another device (streaming)
Send the image and sound of your smartphone to a TV device.

The TV device is fitted with a streaming unit (such as Chromecast) and accessible via WLAN.

Starting transmission

- Start video on the smartphone

- From the Status bar, swipe down using two fingers → The quick settings are opened

- Tap → Cast → Streaming units within range are searched → In the list, tap the streaming unit to which the screen is to be sent → The transmission is started. The icon is displayed in the Notifications bar

You might need to make the streaming symbol available in the quick settings (p. 17).

Stopping transmission

- From the Notifications bar, swipe down → In the Cast message, tap Stop casting

Permitting, enabling and disabling streaming units

- Settings → Connected devices → Connection preferences → Cast → Streaming units within range are searched → Select unit → It is entered in the list

Removing a device from the list: → Select the device → Forget

For information on Cromecast → Google Help
Making calls

To make calls, use the Phone app. It is in the Favourites bar on the start screen by default (p. 19).

Making a call

- Phone ...

Entering the number

- Tap ... The dialpad is shown
- Type in the phone number
- Tap

Whilst a number is being entered, contacts with a potential matching phone number are displayed. If there are no matching entries, you can add the entered number to the contact list.

Using a phone number from a contact

- Tap Contacts ... The contact list opens
- Select an entry ... All phone numbers stored for the contact are shown
- Tap the required phone number

Using a phone number of a favourite contact

- Tap ... The Favourites list opens
- Tap the required contact ... The main phone number of the contact is selected

Adding contacts to Favourites (p. 42)

Using a phone number from the call log

- Tap ... The call log opens
- Tap the required phone number

Ending a call

- Tap

Calls can be initiated from some other apps or widgets, e.g. from the app Contacts.
Making calls

Incoming calls
With an incoming call, the phone number of the caller is displayed, if available. Information on the contact or the Caller ID is also displayed.

Accepting a call
Display lock enabled: Touch the white circle and swipe up
No display lock: Tap Answer

Rejecting a call
Display lock enabled: Touch the white circle and swipe down
No display lock: Tap Decline

Rejecting a call and sending an SMS to the caller
- Touch the Message icon select a predefined quick response or write your own message... The caller receives a message with the selected text

Changing predefined messages ➔ p. 37

If your mobile network operator has set up a mailbox for you, callers whose calls have been rejected by you can leave a message.
If you accept a call whilst talking to somebody else, the current call is put on hold.

Options during a call
Showing the dialpad during a call
- Tap 🔌

Switching between headset, speaker and connected Bluetooth headset
- Tap 🔊

Muting and switching back on the microphone
- Tap 🗣️ / 🔊

Interruption and continuing a call
- Tap ⏯️

Consultation, call swapping
- Tap 📞 Enter the call number for a second person with 🔌 or select this person from the contacts with 📱 Tap 📞... The call is initiated. The first call is put on hold.

The call number of the call on hold is displayed as On hold at the top of the screen.

Switching between calls (call swapping):
- Tap ⏯️... The call on hold becomes the active call
Making calls

Merging two calls into a conference call
One call active, one call on hold.
› Tap  . . . The calls are merged

Ending a conference call:    Tap  . . . The participants’ phone numbers are displayed
› Tap  next to a phone number . . . The connection to this participant will be ended
or
› Tap  next to a phone number . . . The calls are ended but the connections remain open

Call settings

Display of caller name in the call log and contact list of the Phone app
› Phone  Tap  Settings  Display options . . .
Specify how calls are sorted:
› Sort by  First name or Last name
Specify how the names of contacts are displayed:
› Name format  First name first or Last name first

Setting tones and vibration
› Phone  Tap  Settings  Sounds and vibration . . .
Changing the ringtone:    Phone ringtone  Select ringtone  OK
Vibrate for incoming calls:    Enable the Also vibrate for calls option
Tones when tapping the dialpad:    Enable the Keypad tones option

Editing quick SMS responses
If you do not want to accept a call, you can send a predefined SMS instead ( p. 36).
Editing automatically sent SMS text:
› Phone  Tap  Settings  Quick responses . . . Four predefined messages are listed  Tap a reply  Edit the reply  OK

Other settings for sounds via the app  Settings  p. 48
Making calls

Blocking incoming numbers
Protect yourself against unwanted calls and texts.

- Phone ➤ Tap ➤ Settings ➤ Blocked numbers . . . Blocked numbers are listed
  Add a number:
  - Add number ➤ Enter the number ➤ BLOCK

Enable the number again:
  - Tap ✗ next to the number ➤ UNBLOCK

Using TTY for calls
In TTY mode (Telephone Typewriter), those with speech and hearing impediments can communicate by entering text on a smartphone.

The smartphone is connected to a special teletypewriter or other TTY service via USB.

Enabling TTY mode:
- Phone ➤ Tap ➤ Settings ➤ Accessibility ➤ TTY mode ➤ Select the desired mode
  TTY (full mode) See the call as text and hear it as audio.
  TTY HCO Hear what the other person is saying, reply by entering text.
  TTY VCO See as text what the other person is saying, reply by speaking.

Network-dependent settings
Depending on your mobile network operator, you can use additional network services such as a mailbox, Call divert and Call waiting. You can set up these services and enable and disable them as required from the Settings menu in the Phone app.

- Phone ➤ Tap ➤ Settings ➤ Calling accounts ➤ Tap the SIM card of the operator whose network services you want to edit
Making calls

Call log
The call log shows all outgoing, accepted and missed calls.

Showing the call log
- Phone Tap . . . The calls are listed with name or call number, place and date. Arrow icons show the types of calls:
  - Missed call
  - Accepted call
  - Outgoing call

Show all missed, accepted and outgoing calls for this phone number with more information
- Tap Call access history

Contacting the caller
- Phone Tap . . .
Calling:
  - Tap next to the entry
Sending an SMS:
  - Tap the call Send message Enter a message Tap

Adding a phone number to the contacts
- Phone Tap Tap the call Add to contact or Create new contact

Deleting calls from the call log
- Phone Tap . . .
Deleting a call:
  - Touch and hold Call Call details Tap
Deleting all entries:
  - Tap Call history Tap Clear call history Confirm with OK
Contacts

You can use the app Contacts to enter and organise all information on your contacts, e.g. different numbers, address, mail address and much more. Other apps, such as the Phone app, access the information and make it available where it is needed.

Using contacts

Viewing contacts

- Contacts . . . Favourites are shown first. All the contacts follow in alphabetical order.

Specify how the contacts are sorted:
- Tap  Settings  Sort by  First name or Last name

Specify how the names of contacts are displayed:
- Tap  Settings  Name format  First name first or Last name first

Adapting the view

Contacts can be stored at different places - locally on the smartphone, on the SIM card or in the Cloud of an account. All contacts are shown by default. You can restrict the display, such as by hiding certain labels (groups).

Only display certain contacts:
- Tap  Customize view  Customize . . .  All sources for contacts are displayed
- Mark the required contacts  Save . . .  Only the selected contacts are displayed

Using a contact for communication

Calling a contact, sending an email or SMS to a contact.

- Contacts . . .  Scroll through the list and select the required contact  Select an action . . .

  Calling:  Tap the number or . . .  The call is initiated
  Sending an SMS:  Tap  . . .  Enter the text message  Tap
  Sending an email:  Tap the mail address or  . . .  Write the email  Tap

Grouping contacts

You can group contacts under a common label into groups. You can then, for example, send a group notification or a group email to the members of a label. Different labels are predefined, such as Family and Friends.

- Contacts . . .  Existing labels are listed

Creating a new label:
- Create label  . . .  Enter label name  OK  Add contacts  . . .  The label is created with this contact
Contacts

Adding contacts to a label:

- Open Contacts > Tap ☐ ☐ > Select label

Add a new contact:

- Tap ☐ ☐ ☐ Enter contact details > Save

Add a contact from the contact list:

- Tap ☐ ☐ ☐ ☐ All contacts belonging to the account are listed > Select contact

- A contact can belong to more than one group.

Removing a contact from a label:

- Tap label > Touch and hold the contact > Tap ☐ ☐ > Remove from label

Deleting a label:

- Open Contacts > Tap ☐ ☐ > Select label > Tap ☐ ☐ > Delete label

Adding contacts

- If you have set up a Google account, you can also set up and manage your contacts from your computer. The contacts are automatically synchronised with the smartphone.

Creating a contact

- Open Contacts > Tap ☐ ☐ ☐ > Enter name, phone numbers and other details for the contact > Save

Importing/exporting contacts

Contacts can be exported from any location and be imported into a different location, e.g. the contacts stored on the SIM card can be imported into your Google account, and the contacts of the Google account can be stored as vCards in the device’s internal memory.

Exporting contacts:

- Open Contacts > Tap ☐ ☐ ☐ > Settings > Export > Select the destination for the export (account and/or device) > Export to .vcf file > Enter the name for the VCF file > Save

Importing contacts:

- Open Contacts > Tap ☐ ☐ > Settings > Import > Select the source for the import (VCF file or SIM card) > OK

VCF file:

- Select the storage location for the imported contacts (account or device)

SIM card:

- . . . The contacts on the SIM card are displayed > Select the contacts to be imported ✔

A contact can belong to more than one group.
Contacts

Editing contacts

Editing contact details

- Contacts ▸ Select the contact to edit ▸ Tap 
- Tap the field you wish to edit ▸ Change the contents ▸ Save

or

- Scroll down ▸ Tap More fields ▸ Fill in the required fields ▸ Save

Adding contacts to Favourites

Add people you contact frequently to your Favourites. Favourites are shown in the Phone app in a separate list (p. 35). Also, the "Do not disturb" function can be used for the rules (p. 30).

- Contacts ▸ Select a contact ▸ Tap . . . The contact is displayed in the Phone app in the Favourites list

Creating a special ringtone for a contact

- Contacts ▸ Select a contact ▸ Tap ▸ Set ringtone ▸ Select ringtone ▸ OK

Diverting calls from a contact to the mailbox

- Contacts ▸ Select a contact ▸ Tap ▸ Route to voicemail

Deleting contacts

- Contacts ▸ Select a contact ▸ Tap ▸ Delete ▸ OK

Deleting more than one contact at the same time:

- Touch and hold down the contact ▸ Select more contacts ▸ Tap ▸ Delete

Adding contacts for direct dialling on the start screen

- Contacts ▸ Select a contact ▸ Tap ▸ Add to Home screen ▸ Add automatically

Resetting changes to the contact list

You can reset the contact list to how it was earlier.

- Contacts ▸ Tap ▸ Settings ▸ Undo changes ▸ Select the time period ▸ Confirm
Messages (SMS/MMS)

To send and receive messages, use the Messages app. It is in the Favourites bar on the start screen by default (p. 19).

Help on the Messages app:
- Messages Tap Help & feedback

Information on the app settings is also here.

Sending and replying to messages

Sometimes apps send text messages using billable Premium services. Android detects every attempt by an app to send an SMS in your name. A warning is displayed when there is a suspicion that an SMS entails additional charges. Text messages can be discarded, or sent anyway, in these cases.

Writing an SMS

A text message (SMS) can comprise a maximum of 160 characters. If you enter more characters, the message is sent in several sub-messages (if this function is supported by your mobile network operator).

- Messages . . . The list of conversations is displayed
Message in an existing conversation: Tap the conversation
Create a new conversation: Tap 

- Enter the phone number, name or email address . . . Whilst you are doing so, matching contacts from the contact list are suggested Tap a suggestion or continue with your entry or
- Select one or more contacts to whom to send the message

Enter a message: Tap Enter the text

Inserting a Smiley (Emoticon)

- When writing a message, next to the text field tap Select the required symbol
Back to the keypad: Tap the text field

Saving a message as a draft

- Whilst entering a text message, tap . . . The message is stored in the list of conversations as a draft
Continue with your entry: Tap this conversation.
Messages (SMS/MMS)

Writing an MMS

Multimedia messages (MMS) can contain text, images, voice messages, camera pictures or videos, preconfigured stickers (animated symbols) and information about a location.

- When writing a message, tap  to the left of the text field  ➤ Select the required attachment(s) . . .

GIF videos (giphies)

- Tap  . . . different categories are displayed (e.g. excited, unhappy, Yes, No, ...) ➤ Select the category ➤ Select the GIF video

Stickers

- Tap  . . . Stickers are displayed ➤ Select a sticker

Map with location

- Tap  . . . A map in which your current location is entered is displayed
  ➤ Send location
  or: ➤ Drag the map up, move the location and select another position

Voice messages

- Touch and hold the microphone symbol  ➤ Record the voice message ➤ Release the symbol

Voice messages are not stored on the device.

Contacts

- Tap  . . . the contact list is opened ➤ Select the contact

File

- Tap  . . . Files in the internal memory of your smartphone are displayed ➤ Select another source as required from ➤ Select the file

Pictures and videos

- When writing a message, tap  to the left of the text field ➤ Take a photo or select the required image from the gallery or screenshots. Multiple selections are possible . . .

The files appended are displayed in the message.

Show preview: ➤ Tap the attachment

Delete attachment: ➤ Tap the  in the top right

Sending a message

- Write a text or multimedia message ➤ Tap ➤ . . . The message is sent

Back to the list of conversations: ➤ Tap

The message is the start of a conversation. It is stored in the message list under the name or phone number of the recipient. Responses from the message recipient are displayed in the same conversation.
Responding to received messages
When a new message arrives, you receive a notification and the ☰ icon is shown in the Notifications bar.
- Tap the notification . . . The message opens
or
- Messages . . . The list of conversations is displayed ▶ Tap the conversation with the new message
- Enter the reply ▶ Tap ▶

Reading and managing messages

Reading messages
- Messages . . . The list of conversations is displayed ▶ Tap a conversation . . . All messages in this conversation are displayed in chronological order

Managing messages
- Touch and hold the message . . . An options bar is shown at the top ▶ Select an option . . .

Sharing a message:
- Tap ▶ Share . . . Apps with which you can edit and forward the message are shown, such as other Messengers, email and Google Drive.

Forwarding a message to a contact or another recipient:
- Tap ▶ Forward ▶ Select the recipient . . . A new conversation is started with the text ▶ Complete the text as required and send it with ▶

Copying message text:
- Tap ▶ . . . The text is copied to cache. You can use it for any text entry.
  Pasting copied text: ▶ Touch and hold the place in the entry field ▶ Paste

Displaying more information on the message and sender:
- Tap ▶ View details . . . Detailed information depending on the message is displayed

Saving MMS pictures and videos on the device:
- Tap ▶ . . . The picture is saved in the internal device memory under Pictures/Messages

Deleting a message from a conversation:
- Tap ▶ Confirm with Delete

Searching in messages
- Messages ▶ Tap ▶ ▶ Enter the search term . . . Messages in which text matching the search term occurs are displayed
Messages (SMS/MMS)

Managing conversation

- **Messages** ... The list of conversations is displayed ➔ Touch and hold one or more conversations

  ... All conversations selected are denoted by ✅. An options bar is shown at the top ➔ Select the required option ...

Deleting conversions

- Tap/Delete ➔ Confirm with Delete

Archiving conversations

Archived conversations are no longer shown on the start screen of the app, but you can still read them.

- Tap/... The conversations selected are archived

  Open archive: ➔ Tap/... Archived/... The conversations archived are displayed

  Retrieve conversations from the archive: ➔ Touch and hold the conversations ➔ Tap/... The conversations are displayed again on the start screen

Blocking conversations

If you do not want to receive any more calls or messages from certain contacts, you can block them.

- Touch and hold the conversation ➔ Tap/ BLOCK ... There is no longer notification of calls and messages from the contacts selected

Cancelling a block for contact: ➔ Tap/... Blocked contacts/ Tap/X next to the number ➔ UNBLOCK
Settings

Device

Language
Change the language for the displays.

- Settings > System > Languages & input > Languages . . . All available languages are displayed in a list. The language being used at the moment is at the very top.

Make available other languages:
- Add a language > Scroll through the list and select the language > Select the country . . . The language is included in the list

Select language:
- Touch and hold the entry > Drag up and release

Delete language from list:
- Tap ••• > Remove > Select the languages to delete > Tap OK

Display

Brightness
Change the screen brightness or adapt it to the surroundings.

- From the Status bar, swipe down using two fingers . . . The quick settings are opened

or

- Settings > Display > Brightness level

Set the brightness level with the slider bar

Automatically adapting the brightness level depending on the ambient light available

- Settings > Display > Automatic brightness > Enable/disable with the switch

Even if the brightness is set to adjust automatically, you can change the brightness level using the slider bar.
Device

Night light
To protect your eyes from bright light, you can reduce the display lighting with time control.

- Settings → Display → Night Light
- Use the slider bar to set the light intensity required

Enable:
- Tap Turn on now . . . The night light is enabled immediately

Enable with time control:
- Schedule → Select the required setting → Set the start and end times as required → Enable the function . . . the night light is enabled as per your settings

Font size
Change the display size of text.

- Settings → Display → Font size → Select one of the four levels for font size using the slider bar

Display orientation
Set what the screen content does when you rotate the device.

- Settings → Display → Enable/disable Auto-rotate screen

You can also enable/disable this option in the accessibility features and quick settings.

Tones and volume
Configure extensive audio settings for your smartphone in the Sound menu.
The "Do not disturb" function is available for particularly quiet settings (→ p. 30).

- Configure audio settings from the Volume button: → p. 15

Adjusting the volume
Adjust the volumes independently for ringtone, notifications, music and other media, and alarm clock.

- Settings → Sound → Adjust the ringtone, media, call and alarm clock volumes using the slider bars

Enabling vibration
- Settings → Sound → Enable/disable the Also vibrate for calls option with the switch
Ringtones

Changing the default ringtone

- Settings > Sound > Phone ringtone > Select a ringtone > OK

Adding new ringtones

Ringtone apps: Download and install ringtone apps from the Google Play Store

Transferring a music file (MP3) from a computer:

- Use the USB cable provided to connect the device to a computer → p. 33
- Transferring a music file (MP3) in the File Manager to folder Ringtones or the memory card

- Settings > Sound > Phone ringtone > Scroll all the way down > Add ringtone > Select as required from the menu a different folder or the memory card
  - Select the ringtone file
  - or
  - tap Sound Recorder > Record the ringtone with the sound recorder

Enabling/disabling other tones

Set whether tones are sounded or the device vibrates when the dialpad is used - for every touch when the display lock is enabled.

- Settings > Sound > Enable/disable required option under Other sounds and vibrations with the switch.

Setting keypad tones

You are using the standard Android keypad.

- Settings > System > Languages & input > Virtual keyboard > Gboard > Preferences > Enter settings for keypad tones under Keypress

Power management

To prolong the life of your smartphone as long as possible, the device has various ways to make best possible use of the battery capacity.

Showing the battery charge level

The icon in the Status bar shows the charge level (→ p. 85).

Showing the charge level in the battery icon (as %):

- Settings > Battery > Enable/disable the Battery percentage function with the switch
Device

Showing the power consumption

- Settings > Battery . . . The current charge level is displayed

Show more information:

- Tap . . . Battery usage . . . Information on the charge level and usage of various apps is also displayed

Using Power Save mode

Save power until the device can be charged again.

Some of the device’s functions are limited in Power Save mode:
- Google Maps Navigation cannot be used.
- The vibration function, location services and most background data are restricted.
- Email, SMS/MMS and other apps requiring the synchronisation function are only updated when opened.

Enabling/disabling Power save mode:

- From the Status bar, swipe down > tap the Power Save icon . . . Power Save mode will be switched on or off.

The Battery Saver function must be available in the quick settings (p. 16).

or

- Settings > Battery > Battery Saver > Enable/disable the function with the switch

Automatically enabling Power save mode for low charge level

- Settings > Battery > Battery Saver > Turn on automatically > Use the slide bar to set the charge level at which Power save mode is enabled

Using Intelligent Power Save mode

In Intelligent power save mode in standby, unused peripherals are disabled and system performance is optimised.

- Settings > Battery > Enable/disable the function with the switch
Storage
The device differentiates between permanent device storage (which can be extended with a memory card) and main memory. The permanent storage area is for data such as music and photos. Main memory is temporary storage used by the device to run apps and the overall system.

Device storage management without memory card
Check the available storage capacity and memory usage of apps.

- Settings ▶ Storage . . . The total storage capacity available, and that being used at the moment, are displayed, as well as a list of components using storage capacity

Show more information: Tap an entry

Device storage management with memory card

- Settings ▶ Storage . . .

Checking the available storage capacity and memory usage of apps:

- Tap Internal shared storage next to . . . The contents of the memory card are displayed.

Ejecting memory card:

- Next to the memory card, tap . . . The memory card is deactivated. It can no longer be used as storage and the information on it is no longer available.

Using the memory card again:

- Next to , tap the name of the memory card ▶ Mount

Freeing up device memory

- Uninstall apps which are not used ( p. 25)
- Delete saved photos and videos and/or save them in the Cloud (e.g. using Google Photos)
- Remove downloaded music, films and other media
- Empty/clear the cache or data for individual apps ( p. 62)
**Security**

**Accessibility features**
For those with disabilities, there are a number of useful settings for adapting the usage of the smartphone to personal needs.

- Settings ➤ System ➤ Accessibility ➤ Enable/disable or set up the required function

More information on accessibility features is available from: ✅Google Help

**Security**

**Display lock**
The display lock protects the device from unauthorised use. When you switch the device on or enable the display, you are prompted to unlock the device.

The display lock becomes active after a defined time after the device has switched to idle mode.

A pattern, PIN or password is used as the display lock.

**Setting up a display lock**

- Settings ➤ Security & location ➤ Screen lock ➤ Enter the PIN, pattern or password if you have already specified a lock ➤ Select the method ...

**None**  ➤  No security

**Swipe**  ➤  The display can be unlocked by swiping over the screen

For **Pattern:**
- Draw the pattern - join together at least four dots  ➤  Continue ➤  Repeat the pattern ➤  Confirm

For **PIN:**
- Enter at least four letters or digits  ➤  Continue ➤  Repeat the PIN ➤  Confirm

For **Password:**
- Enter at least four letters or digits  ➤  Continue ➤  Repeat the password ➤  Confirm

**Settings for the display lock**

- Settings ➤ Security & location ➤ Tap next to Screen lock ➤ Make the setting

**Showing/hiding the pattern**

Only for a display lock with pattern. When entering the pattern to unlock the device, the pattern is shown as a line by default. You are able to change this for security reasons.

- Enable/disable the switch next to Make pattern visible
Security

Setting the time for automatic display lock
The display lock is enabled once the device has been in idle mode for a certain time.

- **Automatically lock** ▶ Select the duration of idle mode

Enabling the display lock when switching on and off

- Enable/disable the switch next to **Power button instantly locks**

The settings for **Automatically lock** and **Power button instantly locks** can be cancelled with Smart Lock.

Settings for the lock screen

- **Settings** ▶ **Security & location** ▶ **Lock screen settings**

Entering a lock screen message
Enter the text to be displayed when the screen lock is enabled, such as your name and address, or an emergency message. All those picking up the phone can read the message without unlocking the smartphone.

- **Lock screen message** ▶ **Enter the text** ▶ **Save**

Settings for notifications on the lock screen: ► p. 23

Automatically unlocking the device with Smart Lock
Smart Lock enables the smartphone to be unlocked automatically under certain circumstances, such as when you have it on you or are at home.

A display lock is set up.
- **Smart Lock** must be enabled as a trustworthy function (Trust Agent):
  - **Settings** ▶ **Security & location** ▶ **Trust agents**

Configuring Smart Lock:
- **Settings** ▶ **Security & location** ▶ **Smart Lock**

More information on Smart Lock: ► **Google Help**

Cancel display lock with facial recognition
The phone is unlocked when it recognises a trustworthy face. For this, scan your face and other trustworthy people as required. When the phone is then switched on, it performs facial recognition and unlocks when a face is recognised.

Facial recognition is not as secure as a PIN, pattern or password. Somebody who looks like you can unlock your smartphone.
Security

Setting up facial recognition

- Settings ➤ Security & location ➤ Face recognition ➤ Register face ➤ use the current method for screen locking (pattern, PIN, password) . . . the assistant for setting up face unlocking is opened ➤ follow the instructions on the screen

Disabling facial recognition:

- Settings ➤ Security & location ➤ Face recognition ➤ Delete face data

Enabling/disabling face unlocking

- Settings ➤ Security & location ➤ Face recognition ➤ Enable/disable Screen unlocking with the switch . . . facial recognition is performed when you swipe from bottom to top after the phone is switched on

Deleting face details

- Settings ➤ Security & location ➤ Face recognition ➤ Tap Delete face data ➤ Use the current screen lock method (pattern, PIN, password)

Other settings

Face unlocking is enabled immediately once you switch the device on:

- Enable/disable Use face unlock when screen on with the switch

For facial recognition to also work when it is dark, the screen lighting must be switched on:

- Enable/disable Supplementary lighting for screen with the switch

Vibration indicates when facial recognition fails:

- Enable/disable Vibration feedback with the switch

The details used for facial recognition are only stored on the device. The details can not be accessed by apps and are not stored on Google servers.

Screen pinning

When you pass on the smartphone to someone else, you can restrict its usage to a single app. For this, you pin a certain view of this app.

Enabling/disabling screen pinning

- Settings ➤ Security & location ➤ Screen pinning ➤ Enable/disable the function with the switch

- Use the switch to specify whether the PIN, pattern or password needs to be entered to unpin the screen.

Pinning the screen

- Open the screen to be pinned ➤ Swipe up the navigation button to open the app overview ➤ Touch and hold the icon at the top in the app image ➤ Tap Pin . . . only this app can now be used
Security

Unpinning the screen
- Touch and hold at the same time the and Navigation buttons ▶ Enter the PIN, pattern or password as required . . . The screen is unpinned

SIM card lock
The SIM card lock prevents unauthorised use of the device. For every locked SIM card, the PIN must be entered when the device is started.
The PIN lock is enabled when the device is purchased. The PIN is available from your mobile network operator.
- Settings ▶ Security & location ▶ SIM card lock ▶ When there are two SIM cards, select the provider of the SIM card from the header

Enabling/disabling the SIM card lock:
- Enable/disable the switch next to Lock SIM card ▶ Enter the valid PIN ▶ OK

Changing the PIN:
- Change SIM PIN ▶ Enter the valid PIN ▶ OK ▶ Enter the new 4-digit PIN ▶ OK

App permissions
When downloading an app from Google Play, specify the functions and data to which this app has access, e.g. to contacts or your location.
You can check and change permissions for apps on your device. With App permissions management, you have quick access to all permissions granted to apps on the device.

Permissions when installing apps
Many apps downloaded from Play Store request access to particular information before installation. For apps developed for Android 6.0 and higher, you can grant or deny permissions on initial use.

Enabling/disabling permissions for apps on the smartphone
- Settings ▶ Apps & notifications . . . All installed apps are listed

Setting the permissions for an app:
- Select the app for which you want to change the permissions ▶ Permissions . . . All meaningful permissions for the app are displayed ▶ Grant/deny the required permissions with the switch

Displaying all permissions in detail:
- Tap All permissions

If you revoke or do not grant permissions for an app, it might not work properly.
Security

Android Device Manager
If you have lost your smartphone, you can use the Android Device Manager to locate it, ring it, lock it and delete data on it.

The device is registered with a Google account (p. 58)
Location detection is enabled (p. 60).

Enabling/disabling monitoring by the Android Device Manager:

- **Settings > Google > Security > Find My Device** > Enable/disable the function with the switch

or

- **Settings > Security & location > Find My Device** > Enable/disable the function with the switch

Select the service you want to use for device location, install the app if necessary and log in to your Google account.

Check whether the Android Device Manager can locate the device:

- Log in to your Google account using the selected service and see whether your device is displayed

You can also install the Android Device Manager on mobile devices, such as your smartphone or a tablet (downloaded from Google Play).

Device administrators
Device administrators are apps authorised to create a connection to your smartphone and to exchange data, for synchronisation for example. You can authorise this by setting up an account hosted by a business service, such as for an email, calendar or business app.

- **Settings > Security & location > Manage device admin apps** . . . A list of device administrators is displayed . . . Tick the checkboxes next to the apps to be allowed as device administrators

Displaying device administrator information:

- Touch and hold a service in the list

If you disable a device administrator, you revoke the permission of associated services to synchronise data on your phone.

Google services (Gmail, contacts, calendar, etc.) are not treated as device administrators. Permissions for these services to make changes on the smartphone are managed from the Google account settings.
Certificates
Digital certificates are used to identify your smartphone in secure network connections. You require a certificate for VPN or WLAN connections for example, or for authentication with email servers, browsers or other apps. Some certificates are already stored on your phone by default. You can install further certificates.

Supported formats:
• DER coded X.509 certificates with file extensions .CRT and .CER.
• X.509 certificates in PKCS#12 keystore files with file extensions .P12 and .PFX. If you install a certificate from a PKCS#12 keystore file, the corresponding private key certificates or certification authority (CA) certificates are also installed.

Files with different file extensions cannot be installed. Change the file extension if required.

Managing certificates
Settings ➤ Security & location ➤ Encryption & credentials ➤ Trusted credentials

The installed certificates are displayed.
System: Contains all certificates issued by a certification authority (CA) that are permanently installed in the write-protected memory of your phone.
User: Contains all CA certificates you have installed yourself, when installing a client certificate for example.

If a certificate is corrupt or you do not trust a certificate, you can disable or delete it.
Tap a certificate . . . Information on the certificate is displayed ➤ Scroll down
System certificate: Disable/Enable
User certificate: Remove ➤ OK . . . The certificate is deleted permanently and needs to be reinstalled if required

Installing client and CA certificates
Install additional certificates from a memory card, internal storage, the Download folder or Google Drive.
Save a certificate or keystore file on one of the media mentioned above.

Settings ➤ Security & location ➤ Encryption & credentials ➤ Install from SD card ➤ Open the menu ➤ Select the certificate location ➤ Tap the file name of the required certificate or keystore ➤ Enter the keystore password ➤ OK ➤ Enter the certificate name ➤ OK

CA certificates upon which client certificates are based are also installed.

A display lock with high security level must be set (with PIN or password) if you want to install certificates. You might be prompted to set a display lock (→ p. 52).
Accounts and location detection

Accounts
Use one or more accounts to use personal information such as contacts, pictures and mailbox on multiple devices. An account enables synchronisation of the information and makes it available to all registered devices.

Account types

Google account
You need a Google account for Google services such as Gmail™, Google+™ or YouTube™, and for downloading apps from Google Play™. When you log in with a Google account, emails, contacts, appointments and other information assigned to this account are automatically synchronised with your device. You can set up a new account on the smartphone or log in the smartphone to an existing account.

Email account
If you do not use the Google account for your email, you need to register your smartphone with your mail server. POP3 and IMAP mail servers are supported. You can still use the Gmail app to receive and send emails.

You require information on the service the account uses, such as server address, user name and password. The phone must be able to establish an Internet connection over WLAN.

Exchange account
You set up an Exchange account to synchronise contacts, calendar, tasks and emails with Microsoft Outlook™.

Adding an account

Tap the type of account you want to add ➔ Enter the account details. Follow the instructions on the screen

Removing an account

When an account is removed from a device, all associated content is also removed, such as emails, contacts and settings.

Tap the account to be deleted ➔ Remove account
**Synchronising**

You can specify how apps synchronise messages, emails and other current data in your Google account.

Google apps are automatically synchronised with the Google account as standard. You can enable and disable automatic synchronisation for individual Google apps.

Apps which are not from Google cannot be synchronised using a Google account. Look in the respective settings menu for these apps for a synchronisation option.

**Enabling/disabling automatic synchronisation**

Setting synchronisation for a Google account:

- Settings → Accounts → Enable/disable Auto-sync data option

Disabling automatic synchronisation prolongs the battery life. Enable automatic synchronisation again if you want to continue after charging the battery.

Setting synchronisation for individual apps:

- Settings → Accounts → Select account → Account sync → A list of Google apps with the time of the most recent synchronisation is displayed → Enable/disable synchronisation of an app with the switch

You can only set synchronisation for individual apps if automatic synchronisation is enabled.

**Manually synchronising an account**

In manual synchronisation, the data of all Google apps is updated if automatic synchronisation is not enabled. If automatic synchronisation is enabled, only the apps that do not have automatic synchronisation disabled are synchronised.

- Settings → Accounts → Select account → Account sync → Tap ⚙️ → Sync now
Accounts and location detection

Location detection
Apps with Location detection permission can use the device's location information to offer location-specific services, such as check-in options, traffic information and nearby restaurants.

Enabling/disabling location detection
- From the Status bar, swipe down using two fingers ... The quick settings are displayed. Tap the symbol
- or
  - Settings ➤ Security & location ➤ Location ➤ Enable/disable the function with the switch

Checking location detection by apps
Check which apps are currently accessing your location, or have recently accessed your location.
- Settings ➤ Security & location ➤ Location ... In Recent location requests is a list of apps which have recently accessed the location of the device.

Managing location history
When Location history is enabled, Google can also determine the device's location when no Google app is active. Location history information is stored in your Google account for all devices assigned to the account.
- Settings ➤ Security & location ➤ Location ➤ Google-Location History

The screen is the starting point for all activities pertaining to the location history. You can for example switch off the location history for individual or all devices, view locations visited over a certain period, show information on locations visited or delete all your location history information.

For information on location history ➔ Google Help
Apps

Detailed information on working with apps ➔ p. 24

Default app

If you have several apps with identical functions, you can select which app is used as standard for an action. For example, if you have downloaded from Google Play a different calendar or another app for making calls, you can make these the default apps.

Selecting a default app for an action

If multiple apps are available for an action and a default app is not defined, you are prompted to select an app.

- Tap the app you want to use.
- Select whether this app is used Just once or Always for the action.

If you select Always, the app is set as the default app for all actions of this type.

Resetting the default app

- ➔ ➔ Settings ➔ Apps & notifications ➔ Display all apps ➔ Select the app for which Always was selected before for an action ➔ Open by default ➔ Clear defaults

If you then restart the action, you are prompted again as to which app to use.

Specifying the default app for a frequently used function

For some functions, you can select a default app at any time without performing a corresponding action.

- ➔ ➔ Settings ➔ Apps & notifications ➔ Default apps ➔ Different functions are displayed ➔ Select function ➔ If there are several apps for this function, they are displayed ➔ Select the app
Apps

Changing app settings
Check the current app settings and change them as required.

- Settings → Apps & notifications → Display all apps → Select the app

Which settings are available depends on the respective app.

Uninstall / Disable
Uninstall app from device / disable app ➔ p. 25

Force stop
Stops the app including all background processes. This is a sensible action when an app no longer responds for example, or is running in the background and is using too many system resources (such as memory). The app can easily be started again from the App menu.

Notifications
Specify the procedure for app notifications (➔ p. 23)

Permissions
Apps and system resources the app is permitted to access (➔ p. 55)

Storage
Internal storage used by the app.
Freeing up storage: ➔ Tap Storage ➔ Clear storage
Freeing up temporary app memory: ➔ Tap Storage ➔ Clear cache

Data usage
Data volume downloaded or uploaded by the app over the mobile data network or WLAN (➔ p. 68).

Battery
Battery usage since the last full charge (➔ p. 49).

Open by default
Specify how the app is to proceed with links.

Modify system settings
Specify whether the app is permitted to change system settings.
Apps

General app settings
Checking and changing the permissions and default values for apps.

Settings ≫ Apps & notifications

Notifications
Set up notifications for apps (p. 22).

Default apps
If several apps with identical function are available, select which one is used by default (p. 61).

App permissions
List of possible authorisations and information about apps to which these authorisations are granted (p. 55).

Special app access
Contains detailed information on the access capabilities of apps to data and system resources.

Resetting app settings
Reset all the changes made to app settings.

Settings ≫ Apps & notifications ≫ Display all apps ≫ Tap ••• ≫ Reset app preferences
Network connections

The smartphone can establish connections to mobile networks, WLANs and other devices via Bluetooth.

Mobile networks

To make and receive calls with the smartphone over a mobile network, you require a SIM card from the relevant mobile network operator. Refer to your mobile contract for which services are available, and which terms and conditions apply.

You can insert two SIM cards into your device, i.e. you can use two mobile networks at the same time.

Enabling/disabling mobile data

Specify whether data can be transferred over the mobile connection when no WLAN is available.

From the Status bar, swipe down using two fingers . . . The quick settings are displayed Tap the symbol

or

Settings | Network & internet | Mobile network | Mobile data | enable/disable with the switch

or

Settings | Network & internet | Data usage | Mobile data | enable/disable with the switch

Editing settings

Settings | Network & internet | Mobile network

If two SIM cards are inserted into the device, the screen includes a tab for each SIM card Select the appropriate tab as required.

Roaming

Permit the sending of data by the device over mobile networks of other operators whilst you are in a region where the network of your operator is not available.

Additional charges can be incurred by data roaming (depending on your mobile contract).

App data usage

Shows all the data usage and its distribution over the individual apps.

Enhanced 4G LTE Mode

Improve speech quality and other communication.

Preferred network type

Select the preferred mobile standard, such as 2G, 3G, 4G. The smartphone uses the network with the best availability as standard.
Network connections

**Wi-Fi calling** (depending on the mobile provider)
Make calls over WLAN.

**Automatically select network**
The network is selected automatically by default.
Selecting a network manually: ➤ Switch off function ➤ Select a provider from the available networks.

**Access point names**
Your mobile network operator can use these settings to determine the correct IP address for your device, and so establish a secure connection for your device.

Using two SIM cards

➤ ➤ ➤ Settings ➤ Network & internet ➤ SIM cards . . . Detected SIM cards in slots 1 and 2 are displayed

Enabling and disabling a SIM card: ➤ Enable/disable the switch

Showing information:
➤ Tap an entry . . . The name of the SIM card, the colour used for the card, the mobile network operator and the phone number are displayed. You can change the name and display colour.

Specify the preferred SIM card for the following functions:

- **Mobile data**
  Only one SIM card can be used for mobile data transmission.

- **Calls**
  You can specify one SIM card for all outgoing calls, or be prompted for which SIM card to use before every call.

- **SMS messages**
  One SIM card can be defined for sending SMS messages.

You might need to perform the assignment anew when you insert a new SIM card or swap out an existing one.
Network connections

WLAN
Use the smartphone to establish a connection to a WLAN, and use the connection to send data and to surf the Internet.
A connection is established automatically if the smartphone is within range of a registered WLAN and the WLAN function is enabled.

Enabling/disabling the WLAN function
- From the Status bar, swipe down using two fingers . . . The quick settings are displayed ▶ Tap the WLAN icon

or
- Settings Wi-Fi Enable/disable WLAN with the switch
When WLAN is enabled, the icon is displayed in the Status bar. The icon shows the signal strength on four levels.

To prolong the battery life, disable the WLAN function when you are not using it. WLAN is disabled in Flight mode.

Establishing a connection to a WLAN
- Settings Wi-Fi . . . All WLANs within range are displayed.
Networks protected by a password have a lock icon next to the entry. Networks without a lock icon are public hot spots.
- Tap the required WLAN Enter the network password Connect . . . If the connection is successful, Connected is displayed under the network name

WLANs registered for the smartphone are shown at the end of the list under Saved networks, even if they are currently out of range and no connection is established.

Showing saved WLANs: Saved networks

Adding more WLANs
WLANs which do not send their name (the SSID) or are not within range are not displayed in the WLAN list. They can still be saved with name and password. The connection is established if the WLAN is within range.
- Settings Wi-Fi Scroll down as required Add a network Enter the network name (SSID) and security details Save . . . The network is included in the Saved networks list

Removing a WLAN
If the requirement is for the device to not automatically connect to a saved WLAN, the WLAN can be removed from the list of saved networks.
- Settings Wi-Fi Saved networks Tap the saved network to be removed Forget

66
Network connections

Viewing WLAN details

- Tap the network name of a connected WLAN... Information on the connection is displayed, such as signal strength, connection status and transmission rate.

Changing the network settings: Tap

Connection configuration

Align the network settings to the requirements of the WLAN to be used to establish a connection.

- Tap the network name Tap Tap the down arrow next to Advanced options...

Metered networks

If your network has a data limit, you can define the WLAN as metered. You then have better control over data usage when downloading and using other apps.

- Under Metered, select option Mark as "metered" Save

Proxy

If a connection to a WLAN is established over a proxy: Tap Proxy

Manually entering the proxy details: Manual Enter the data Save

Automatic proxy configuration: Autom. proxy config. Enter the URL of a PAC file Save

A Proxy Auto Config (PAC) file enables a web browser to automatically find the right proxy server for a required URL.

DHCP

When there is no active DHCP server in the WLAN: Tap DHCP Static Enter the network configuration data Save

Advanced options

- Select option...

Automatically enable WLAN when it is near networks that are stored. Location detection must be enabled.

- Enable/disable Turn on Wi-Fi automatically using the switch

Display powerful public network.

- Enable/disable Open network notification using the switch

Digital certificates are used to identify the device for WLAN access. You can install additional certificates if not all those required are available.

- Install certificates Select the source for the certificate

Certificates p. 57
Network connections

Data usage
The data usage is the amount of data uploaded or downloaded by the device over a certain period over the mobile data connection or WLAN. Most tariffs include a restriction of data volume. So as not to incur any additional costs, you can check the data usage of the device and limit it as required.

Checking data usage

Mobile network
Data usage in the mobile network is displayed in a bar - for a certain time period and in relation to the warning limit for mobile data usage.
- Tap App data usage . . . More information is displayed, such as the apps involved in data usage.

Display another time period:
- Tap the arrow next to the time period displayed  Select the time period

WLAN
- Tap Wi-Fi data usage . . . The data volume sent over WLAN within the time period set is shown. Listed underneath are the apps that sent data over WLAN, with the data volumes they each sent.

Display another time period:
- Tap the arrow next to the time period displayed  Select the time period
Network connections

Setting a limit and warning for mobile data usage

Specifying the data usage cycle

Data usage is recorded in a monthly cycle, starting as standard on the 1st of every month. If the billing cycle of your mobile provider is different, you can select a different day as the start day.

Entering a data limit

Enter the maximum data volume made available by your provider as a data limit. Once the limit set for data usage is reached, mobile data usage is disabled automatically. You receive a notification.

Re-enabling data usage:

Setting a warning for data usage

Set a value for data volume usage at which you want to receive a warning.

Enabling/disabling Data save mode

Mobile data usage is reduced when Data save mode is enabled. Most apps and services can only retrieve background data over WLAN.

Restricting background data can impact the performance of the app. For example, you receive no more notifications until the app is opened the next time.
Network connections

Other ways to reduce data usage

Disabling automatic synchronisation
When automatic synchronisation is enabled, the data of apps is updated automatically (such as contacts and appointments).
Disabling automatic synchronisation: ➔ p. 59

Disabling roaming
If the network of your mobile network operator is not available, roaming enables the device to use the networks of other operators.

Settings ➔ Network & internet ➔ Mobile networks ➔ Enable/disable the option with the switch next to Roaming

Roaming can entail additional costs, but is in some places the only way to establish an Internet connection.

Bluetooth

Use the smartphone to establish a connection to a Bluetooth device.
If you are using a Bluetooth device for the first time, it must first be coupled with the smartphone by the Pairing process to enable a secure connection between the two devices. Then the connection is established automatically.

Enabling/disabling Bluetooth

From the Status bar, swipe down using two fingers . . . The quick settings are displayed ➔ Tap the Bluetooth icon

or

Settings ➔ Bluetooth ➔ Enable/disable Bluetooth with the switch

When Bluetooth is enabled, the icon is displayed in the Status bar.

The device can be seen by all nearby devices with Bluetooth function.
To prolong the battery life, disable the Bluetooth function when you are not using it. Bluetooth is disabled in Flight mode.
Network connections

Pairing
Before you can connect a phone or tablet to a Bluetooth device, you must perform a pairing between these devices. After a pairing is performed, the devices keep this status until the pairing is ended.

Settings  Bluetooth  Pair new device  . . . Bluetooth devices available in the vicinity are displayed  Tap the name of the required Bluetooth device  . . . Follow the subsequent instructions on the screen to complete the pairing  . . . If performed successfully, the device is included in the Currently connected list

If requested to enter a password, try the popular 0000 and 1234 passwords, or read the documentation for the Bluetooth device.

Changing the names of connected Bluetooth devices or ending pairing
Settings  Bluetooth  Next to the device connected, tap . . .
Changing the name:  . . . Enter the name of the device  Rename
Ending a pairing:  Forget

Changing the Bluetooth name of the smartphone
The smartphone can be seen by other Bluetooth devices under name Gigaset GS290. You can change this name.

Settings  Bluetooth  Device name  . . . Enter the new device name  Rename

Displaying data transmission information
Settings  Bluetooth  Received files  . . . Data received via Bluetooth is displayed
Network connections

**Flight mode**
WLAN, mobile networks and Bluetooth are disabled in Flight mode.

- From the Status bar, swipe down using two fingers . . . The quick settings are displayed ▶ Tap the ⬇️ Flight mode icon

or

- 🌐 ➜ 📷 Settings ➜ Network & internet ➜ Airplane mode ➜ Enable/disable Flight Mode with the switch

When Flight mode is enabled, the ⬇️ icon is displayed in the Status bar.

**Virtual Private Networks (VPN)**
A Virtual Private Network (VPN) enables you to connect the smartphone to your private or a company network. When you are out and about and have access to a WLAN, use the VPN connection to surf free of eavesdroppers, to make free calls over your landline number, and to access your mailbox or data in the company network.

A VPN server is set up in the private or company network.

A VPN client is preinstalled on the smartphone. You need the configuration details of the VPN to set up a VPN connection.

- You might require another VPN client for the VPN with which you want to connect the smartphone. Various VPN apps are available from the Google Play Store. Once you have installed a VPN app, configuration is done via the app.

**Adding a VPN**

- 🌐 ➜ 📷 Settings ➜ Network & internet ➜ VPN ➜ Tap ➜ Enter the configuration details ➜ Save

**Establishing a connection to a VPN**

- 🌐 ➜ 📷 Settings ➜ Network & internet ➜ VPN . . . The VPNs set up are listed ➜ Select a VPN ➜ Enter Username and Password ➜ Connect

Once the device is connected to a VPN, the ⬗ icon is shown in the Status bar.

**Ending a VPN connection**

- 🌐 ➜ 📷 Settings ➜ Network & internet ➜ VPN ➜ Next to the VPN to disconnect, tap ⬇️ Disable VPN with the switch

**Deleting a VPN**

- 🌐 ➜ 📷 Settings ➜ Network & internet ➜ VPN . . . The VPNs set up are listed ➜ Next to the VPN to be deleted, tap ⬇️ Forget
Network connections

Editing VPN settings

- Settings > Network & internet > VPN > Next to the VPN to be changed, tap Edit the VPN settings > Save

If you are using a VPN app, it is opened and you can make the required changes.

Enabling/disabling “always-on” VPN

With some VPNs, the device remains always connected when the VPN connection is not active. This is a sensible option when moving between insecure public WLANs.

- Settings > Network & internet > VPN > Next to the VPN to change, tap Enable/disable Always-on VPN with the switch > Save

You receive a notification that "always-on" VPN is enabled, and when the connection to an "always-on" VPN is down.

Once you have set up a VPN from an app, the option Always-on VPN is not displayed.

Tethering with WLAN hotspot, Bluetooth or USB

With mobile WLAN hotspots, Bluetooth tethering and USB tethering, you can enable the data connection of the smartphone to other devices. For example, use a smartphone connection to surf the Internet with your notebook.

- Using hotspot or tethering connections might entail additional charges.
- Contact your mobile operator as required.
- Hotspots and tethering require high levels of battery power.
- Connect the smartphone to a power source when using hotspot and tethering.
- Disable hotspot and tethering when you do not need them.

Enabling and disabling WLAN hotspot

Set up your own device as a WLAN hotspot.

- Settings > Network & internet > Hotspot & tethering > Wi-Fi hotspot > Enable/disable the function with the switch

When the hotspot is enabled, the icon is displayed in the Status bar.
The icon is displayed in the Notifications bar. The number of connected and blocked users is displayed in the message.

Changing WLAN hotspot settings

Change the network name, security, password and frequency band for access points.

- Settings > Network & internet > Hotspot & tethering > Wi-Fi hotspot > Change the required option > Save
Network connections

Connecting a device to the WLAN hotspot
To connect, you need the name and password of the hotspot. The name is displayed under Hotspot name. Show password:

- Settings ➤ Network & internet ➤ Hotspot & tethering ➤ Wi-Fi hotspot ➤ Tap Hotspot password... The password is shown

Connecting to the hotspot on the other device:
- Open the list of WLANs within range ➤ Select network with the network name of the hotspot ➤ Enter the password for the hotspot ➤ Connect.

Setting up and using Bluetooth tethering
Share the Internet connection with other devices via Bluetooth.

- The mobile data connection is active ➤ p. 64

- Carry out pairing between the smartphone and the device with which you want to share the Internet connection (➤ p. 71)
- Set up the other device so that it establishes a network connection over Bluetooth. For more information, read the instructions for the device.

Enabling and disabling the Internet connection of the phone via Bluetooth tethering:

- Settings ➤ Network & internet ➤ Hotspot & tethering ➤ Enable/disable the Bluetooth tethering function with the switch... You can now establish an Internet connection with the other device.
Setting up and using USB tethering
Share the Internet connection with another device over a USB cable.

⚠️ The mobile data connection is active ➔ p. 64

- Use a USB cable to connect a smartphone to another device ➔ Open the notification over the USB connection ➔ Select USB tethering

Enabling/disabling USB tethering:

- ➔ ➔ Settings ➔ Network & internet ➔ Hotspot & tethering ➔ Enable/disable the USB tethering function with the switch ➔ You can now establish an Internet connection with the other device

When USB tethering is enabled, the ⚡ icon is displayed in the Notifications bar.

USB tethering is disabled permanently if you unplug the USB cable.

USB tethering is not available on Mac computers.

System

Date and time

- ➔ ➔ Settings ➔ System ➔ Date & time...

Automatic setting
The date and time are set automatically using a time server:
- Activate Automatic date & time
or: ➔ Disable it and set the date and time manually

Manual setting
- Set date ➔ Select a date in the calendar ➔ OK
- Set time ➔ Drag the hour display to the correct position ➔ OK
  - Use the outer ring for 12-hour display
  - Use the inner and outer rings for 24-hour display
- Tap the minutes display of the time displayed ➔ Drag the pointer to the correct position ➔ OK

Setting the time zone
The time zone is set automatically by default. Selecting the time zone yourself:
- Disable the switch next to Automatic time zone ➔ Tap Select time zone ➔ Select the time zone from the list

75
System

Setting the date and time format
Use Date and time format appropriate for the country set (p. 47).
   - Enable the switch next to Automatic 24-hour format
or
Displaying the time in 24-hour format (e.g. 18:30) / 12-hour format (6:30 pm):
   - Enable/disable the switch next to Use 24-hour format

Software updates

Checking the Android version
   - Settings > Phone info . . . The current version is displayed under Android version

Downloading Android updates
You will be informed when a new Android system update is available for your device.

   Updates use up power and entail high data volumes.
   So before an installation, check the battery charge level (p. 49) and data usage (p. 68). Connect the device to the power if required and establish a WLAN connection.

Installing an update after receiving a notification
Display not locked:   - From the Notifications bar, swipe down  Tap the update notification
Display locked:      - Double tap the update notification on the lock screen
Start the installation:  - Tap Download

Installing an update without receiving a notification
   - Settings > Phone info > System updates > Check for updates . . . The system is checked
If there is a more up-to-date version:  - Tap Download

System update settings
You can configure different settings for downloading updates:
   - Settings > Phone info > System updates > Tap > Settings
You can define the following:
• How often updates are searched for automatically
• Updates should only be performed when the device has a WLAN connection
• Update downloads may only be performed automatically
On this screen, you have access to the data protection policy and declaration of agreement.
Back up and restoring the system

Backing up data and settings
Use the Android Backup Service to backup data linked to one or more Google accounts. If you have to swap your device or delete data, you can restore the data from every Google account backed up beforehand.

The following data is backed up:
- Google calendar settings
- WLAN networks and passwords
- Wallpaper of start screens
- Gmail settings
- Apps installed with Google Play (apps backed up in the Play Store app)
- Screen settings (i.e. brightness and sleep mode)
- Language and input settings
- Date and time
- Settings and data of third party apps (different depending on app)

The Android Backup Service is not used by all apps. Not all data might be backed up or restored for certain apps.

Setting up another backup account:
- Touch and hold Account ▶ Add account ▶ Enter the PIN, pattern or password ▶ Enter the account details

You can set up more than one backup account.

Resetting network settings
Reset WLAN, mobile and Bluetooth data.

Resetting app settings
You can reset settings for apps such as disabling, notifications, standard settings. All app data are retained.
System

**Resetting the device to the default settings**

You can remove all personal data when you pass on the device to another person.

![Warning icon] When resetting the device to the default settings, the internal storage is cleared, downloaded apps, music, photos, etc. are removed and registration to the Google account is cancelled.

> Settings ▶️ System ▶️ Reset options ▶️ Erase all data (factory reset) ▶️ Reset phone

Service Hotline: 020 36953111
(local call cost charge)
Ireland
Service Hotline: 0818 200 033
(6.6561 Ct./Call)

Please have your proof of purchase ready when calling.
Please note that if the Gigaset product is not sold by authorised dealers in the national territory the product may not be fully compatible with the national telephone network. It is clearly specified on the box near the CE mark for which country/countries the equipment has been developed. If the equipment is used in a manner inconsistent with this advice or with the instructions of the manual and on the product itself, this may have implications on the conditions for warranty or guarantee claims (repair or exchange of product).

In order to make use of the warranty, the product purchaser is asked to submit a receipt which proves the date of purchase (date from which the warranty period starts) and the type of goods that have been purchased.
Customer Service & Assistance

Do you have any questions? As a Gigaset customer, you can find help quickly in this User Manual and in the service section of our Gigaset online portal www.gigaset.com/service.

Please register your phone online right after purchase. This enables us to provide you with even better service regarding questions or a warranty claim. In order to contact our customer service via email, please use the email contact form from our Gigaset online portal after selecting your home country.

Our representatives are also available on the telephone hotlines for consultation.

Customer Service & Assistance

Guarantee Certificate - United Kingdom and Ireland

Without prejudice to any claim the user (customer) may have in relation to the dealer or retailer, the customer shall be granted a manufacturer’s Guarantee under the conditions set out below:

• In the case of new devices and their components exhibiting defects resulting from manufacturing and/or material faults within 24 months of purchase, Gigaset Communications shall, at its own option and free of charge, either replace the device with another device reflecting the current state of the art, or repair the said device. In respect of parts subject to wear and tear (including but not limited to, batteries, keypads, casing), this warranty shall be valid for six months from the date of purchase.

• This Guarantee shall be invalid if the device defect is attributable to improper care or use and/or failure to comply with information contained in the user manuals. In particular claims under the Guarantee cannot be made if:
  • The device is opened (this is classed as third party intervention)
  • Repairs or other work done by persons not authorised by Gigaset Communications.
  • Components on the printed circuit board are manipulated
  • The software is manipulated
  • Defects or damage caused by dropping, breaking, lightning or ingress of moisture. This also applies if defects or damage was caused by mechanical, chemical, radio interference or thermal factors (e.g.: microwave, sauna etc.)
  • Devices fitted with accessories not authorised by Gigaset Communications
  • This Guarantee shall not apply to or extend to services performed by the authorised dealer or the customer themselves (e.g. installation, configuration, software downloads). User manuals and any software supplied on a separate data medium shall be excluded from the Guarantee.
  • The 24 months guarantee also applies to the built in battery.
  • The purchase receipt, together with the date of purchase, shall be required as evidence for invoking the Guarantee. Claims under the Guarantee must be submitted within two months of the Guarantee default becoming evident.

• Ownership of devices or components replaced by and returned to Gigaset Communications shall vest in Gigaset Communications.

• This Guarantee shall apply to new devices purchased in the European Union. For Products sold in the United Kingdom and in the Republic of Ireland the Guarantee is issued by: Gigaset Communications UK Limited, 2 White Friars, Chester, CH1 1NZ.

• Any other claims resulting out of or in connection with the device shall be excluded from this Guarantee. Nothing in this Guarantee shall attempt to limit or exclude a Customers Statutory Rights, nor the manufacturer’s liability for death or personal injury resulting from its negligence.

• The duration of the Guarantee shall not be extended by services rendered under the terms of the Guarantee.

• Insofar as no Guarantee default exists, Gigaset Communications reserves the right to charge the customer for replacement or repair.

• The above provisions do not imply a change in the burden of proof to the detriment of the customer.

To invoke this Guarantee, please contact the Gigaset Communications helpdesk. This number is also to be found in the accompanying user guide.
Manufacturer’s advice

Exclusion of liability
The display is made up of pixels. Each pixel consists of three sub-pixels (red, green, blue).
It may be the case that a sub-pixel is missing or has a colour deviation.
A warranty claim is only valid if the maximum number of permitted pixel errors is exceeded.

<table>
<thead>
<tr>
<th>Description</th>
<th>Maximum number of permitted pixel errors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colour illuminated sub-pixels</td>

</tr>
</tbody>
</table>

Signs of wear on the display and casing are excluded from the warranty.

Certain content and services which can be accessed using this device are the property of third parties and are protected by copyrights, patents, trademarks and/or other laws for the purpose of safeguarding intellectual property. Such content and services are provided solely for non-commercial, private usage. You may not use content or services which has/have not been authorised by the owner of particular content or a service provider. Without limiting the generality of the foregoing, except as expressly specified by the owner of the content or the service provider, the modification, reproduction, dissemination, uploading, publication, transmission, translation, sale, creation of derived works, distribution of content or services shown on this device are not permitted in any form and on any medium.

Manufacturer’s advice

Authorisation
This device is intended for use in all member states of the EU and Switzerland. Use outside EEA, excluding CH, is depending on national type approval.
Country-specific requirements have been taken into consideration.
Hereby, Gigaset Communications GmbH declares that the radio equipment type Gigaset GS290 is in compliance with Directive 2014/53/EU.
The full text of the EU declaration of conformity is available at the following internet address: www.gigaset.com/docs.
This declaration could also be available in the “International Declarations of Conformity” or “European Declarations of Conformity” files.
Therefore please check all of these files.

The 5150 - 5350 MHz band is restricted to indoor use only for the following countries.

Waste and environmental protection

Correct disposal of this product

(Directive for electric and electronic equipment (WEEE))
(Applicable in countries with waste separation systems)

This label on the product, accessory or in documentation indicates that the product and its electronic accessories (such as charger, headphones and USB cable) may not be disposed of in household waste.

To avert potential environmental harm and health risks from unmanaged waste disposal, recycle responsibly with the aim of encouraging sustainable reuse of raw materials.

Private users should turn to the dealers from where they bought their products, or contact the authorities responsible, who are able to provide information on where parts can be taken for disposal in an environmentally friendly manner.

Commercial users should please contact their suppliers and check the general terms of their purchase agreement.

This product and the electronic accessory parts may not be disposed of with other commercial waste.

This “WEEE” is compatible with the RoHS Directive.

About radiation

Information on SAR certification (specific absorption rate)

THIS DEVICE SATISFIES THE INTERNATIONAL DIRECTIVES FOR EXPOSURE BY RADIO WAVES.

Your mobile device has been developed so as not to exceed internationally recommended exposure thresholds for radio waves.

These directives have been specified by an independent scientific organisation (ICNIRP) and include a high margin of safety which should guarantee the safety of all regardless of age and state of health. The directives on exposure to radio waves use a unit called the specific absorption rate (SAR). The SAR threshold for mobile devices is 2.0 W/kg. The highest SAR values in the ICNIRP Directives for this device model:

Highest SAR value for this phone model and measurement conditions

- SAR for head: 0.46 W/kg (10g)
- SAR for wearing on body: 0.44 W/kg (10g)

The SAR values for wearing on the body are determined at a distance of 5 mm. To comply with the HF exposure directives for wearing on the body, the device should be positioned at least this distance away from the body.
