16 Bluetooth activated (→ page 26)
17 Signal strength
   (high to low)
   flashes: no reception

Please note:
Illustration of handset on a base station with SMS functionality.
Safety precautions

**Warning:**
Read the safety precautions and the user guide before use.
Explain their contents and the potential hazards associated with using the telephone to your children.

Only use the mains adapter supplied, as indicated on the underside of the base station or charging cradle.

Fit only the **approved rechargeable battery pack** (➔ page 31)! That means never use a conventional (non-rechargeable) battery pack as this could result in significant health risks and personal injury.

Battery packs should not be disposed of along with general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority or the dealer you purchased the product from.

The operation of medical appliances may be affected. Be aware of the technical conditions in your particular environment, e.g. doctor’s surgery.

Do not hold the rear of the handset to your ear when it is ringing or when the hands-free function is activated. Otherwise you risk serious and permanent damage to your hearing.

The handset may cause an unpleasant humming noise in hearing aids.

Do not install the base station or charging cradle in bathrooms or shower rooms. The base station and charging cradle are not splashproof (➔ page 29).

Do not use your phone in environments with a potential explosion hazard, e.g. paint shops.

If you give your Gigaset to someone else, make sure you also give them the user guide.

Please remove faulty base stations from use or have them repaired by our Service, as they could interfere with other wireless services.
All electrical and electronic equipment must be disposed of separately from general household waste using the sites designated by local authorities.

If a product displays this symbol of a crossed-out rubbish bin, the product is subject to European Directive 2002/96/EC.

The appropriate disposal and separate collection of used equipment serve to prevent potential harm to the environment and to health. They are a precondition for the re-use and recycling of used electrical and electronic equipment.

For further information on disposing of your used equipment, please contact your local authority, your refuse collection service or the dealer you purchased the product from.

Please note:
Not all of the functions described in this manual are available in all countries.
Gigaset SL37H – More than just a telephone

Your phone, which has a clearly laid out colour display (65K colours), doesn't just offer you the option of saving up to 250 phone numbers and e-mail addresses (→ page 12) – it can do much more than that:

✦ You can programme the keys of your phone with important numbers or frequently used functions. The number is then dialled or the function started by simply pressing a key (→ page 18).
✦ You can designate important people as VIPs so you can tell important calls from the ringer tone (→ page 13).
✦ You can assign pictures to your contacts. You can then tell who is calling you from the picture on your handset's display. Precondition: Calling Line Identification
✦ You can store appointments (→ page 24) and anniversaries (→ page 15) in your phone and it will remind you of them in advance.
✦ You can use Bluetooth™ for wireless communication with other devices (e.g. headsets) that also use this technology (→ page 26).

Enjoy using your new telephone!

First steps

Pack contents

✦ one Gigaset SL37H handset,
✦ one charging cradle with mains adapter,
✦ one battery pack,
✦ one battery cover,
✦ one belt clip,
✦ one user guide.

Installing the base station and charging cradle

The charging cradle is designed to be operated in enclosed, dry areas at temperatures ranging from +5 °C to +45 °C.

Please note:

✦ Never expose the handset to the following influences: heat sources, direct sunlight, other electrical appliances.
✦ Protect your Gigaset from moisture, dust, corrosive liquids and vapours.

Range and reception strength

Range:

✦ Outdoors: up to 300 m
✦ Indoors: up to 50 m

Reception strength:

The display shows the quality of the radio contact between the base station and handset:

✦ Good to poor: ☐ ☐ ☐ ☐ ☐
✦ No reception: ☐ ☐ ☐ ☐ ☐ flashes.
First steps

Setting up the handset for use

The display is protected by a plastic film.
Please remove the protective film!

Fitting the battery pack

Warning:
Only use the rechargeable Gigaset Communications GmbH original battery pack (page 31)!
Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. For example, the batteries could explode. The phone could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

- With the pins to the front, insert the battery pack into the cavity at an angle from the left.
- Then press it into the housing from above until the bracket on the side of the battery back snaps securely into the housing.

Please note:
To remove the battery pack, you must first press the bracket on the side.

Closing the battery cover
- Align the battery cover parallel to the casing and press down until it clicks into place.

Attaching the belt clip
There are notches for attaching the belt clip on the side of the handset at the same height as the display.
- Press the belt clip onto the back of the handset so that the protrusions on the belt clip engage with the notches.

Opening the battery cover
- If fitted, remove the belt clip.
- Hold the device with the keypad facing the palm of your hand.
- Place the thumb of your other hand on the loudspeaker (a) and use the index finger of the same hand to press the groove at the top of the handset (b).
- Lift the cover.
Registering handsets

A Gigaset SL37H handset can be registered to up to four base stations. Once it has been registered, the handset returns to idle status. The internal number of the handset appears in the display, e.g. INT 1. If it does not, repeat the procedure.

On the handset

_registers to base station, e.g. Base1 and press OK._

Select base station, e.g. Base1 and press OK.

Enter the system PIN of the base station (the default is 0000) and press OK. The following flashes in the display, e.g. Base1.

On the base station

To find out how to register the handset to the base station, see the user guide for the base station.

Placing the handset in the charging cradle

Plug the charging cradle mains adapter into a mains power socket.

Place the handset in the charging cradle with the display facing forward.

To charge the battery pack, leave the handset in the charging cradle.

Please note:

- If the handset has switched itself off because the battery pack is flat and is then placed in the charging cradle, it will switch itself on automatically.
- Only place the handset in the charging cradle that is intended for it.

Initial charging and discharging of the battery pack

If the handset is activated, the flashing battery icon in the top right of the display indicates that the battery pack is being charged.

During handset operation, the battery icon indicates the charge status of the battery pack (page 1). The correct charge status can only be displayed if the battery pack is first fully charged and discharged.

- To do this, leave the handset in the charging cradle _continuously_ for ten hours. Your handset need not be switched on for it to charge.
- Afterwards, remove the handset from the charging cradle and do not put it back again until the battery pack is fully discharged.

Please note:

After the first battery charge and discharge, you may place your handset in the charging cradle after every call.

Please note:

- Always repeat the charging and discharging procedure if you remove the battery pack from the handset and insert it again.
- The battery pack may warm up as it is charging. This is not dangerous.
- After a time the charge capacity of the battery pack will decrease for technical reasons.

For questions and problems → page 29.
First steps

Setting the date and time

Set the date and time so that the correct date and time can be assigned to incoming calls, and so that the alarm and the calendar can be used.

- If you have not yet set the date and time, press the display key \( \text{Time} \) to open the input field.

To change the time, open the input field with:

1. \( \text{Date/Time} \)
2. Change multiple line input:
   - \( \text{Date:} \) Enter the day, month and year in 8-digit format.
   - \( \text{Time:} \) Enter hours and minutes as 4 digits (e.g. 07:15 a.m.)

- \( \text{Save} \) Press the display key

Display in idle status

Once the phone is registered and the time set, the idle display looks as shown here (example), depending on the base station:

![Display in idle status](image)

Your phone is now ready for use.

If you have any queries about using your phone, please read the tips on troubleshooting ("Questions and Answers", page 29) or contact our customer service department (Customer Care, page 30).

Operating the handset

Activating/deactivating the handset

\( \text{In idle status, press and hold} \) the end call key (confirmation tone).

Activating/deactivating the keypad lock

\( \text{Press and hold} \) the hash key.

You will hear the confirmation tone. The \( \text{icon appears in the display when the keypad lock is activated.} \)

The keypad lock is deactivated automatically if someone calls you. It is reactivated when the call is finished.

Control key

Below, the side of the control key that you must press in the respective operating situation is marked in black (top, bottom, right, left, centre), e.g. \( \text{for "press right on the control key" or } \) for "press the centre of the control key".

The control key has a number of different functions:

When the handset is in idle status

- \( \text{Open the directory.} \)
- \( \text{Open the main menu.} \)
- \( \text{Open list of handsets.} \)
- \( \text{Call up the menu to set the call volume ( page 21), ringer tones ( page 21), advisory tones ( page 23) and silent alert ( page 22) for the handset.} \)
In the main menu, submenus and lists

- Scroll up/down line by line.
- Open menu or confirm selection.
- Go back one menu level or cancel.

In input fields

You can use the control key to move the cursor up (↑), down (↓), right (→) or left (←).

During an external call

- Open the directory.
- Initiate internal consultation call and mute.
- Change the earpiece volume or handsfree volume.

Display keys

The function of the display keys changes depending on the particular operating situation. Example:

1 Current display key functions are shown in the bottom display line.
2 Display keys

The most important display icons are:

- Left display key, as long as it has not been assigned a function (→ page 18).
- Open the main menu.
- Open a context-dependent menu.
- Delete key: deletes one character at a time from right to left.
- Go back one menu level or cancel operation.
- Fetch e-mail address from the directory.

First steps

- Copy number into the directory.
- On base stations with built-in answer machines: forward external call to answer machine.
- Open the last number redial list.

Reverting to idle status

You can revert to idle status from anywhere in the menu as follows:

- Press and hold the end call key (→). Or:
- Do not press any key: after 2 minutes the display will automatically revert to idle status.

Changes that you have not confirmed or saved by pressing OK, Yes, Save, Send or Save Entry OK will be lost.

An example of the display in idle status is shown on page 1.

Menu guidance

Your telephone's functions are accessed using a menu that has a number of levels.

Main menu (first menu level)

- When the handset is in idle status, press (to open the main menu.

The main menu functions are shown in the display as a list with colour icons and names.

To access a function, i.e. to open the corresponding submenu (next menu level):

- Navigate to the function using the control key (→). Press the display key OK.

Submenus

The functions in the submenus are displayed as lists.

To access a function:

- Scroll to the function with the control key (→) and press OK.

Briefly press the end call key (→) once to return to the previous menu level / cancel the operation.
First steps

Illustration in the user guide
The operating steps are shown in abbreviated form.

Example
The illustration:

- Press the key to display the main menu.
- Use the control key to scroll through submenu Settings and press OK.

Date/Time Scroll to the function with the control key and press OK.

Other types of illustrations:

- Press the matching key on the handset.
- Enter digits or letters.

You will find detailed examples of menu entries and multiple line input in the appendix to this user guide, page 31.

Correcting incorrect entries
You can correct incorrect characters in the text by navigating to the incorrect entry using the control key. You can then:
- press X to delete the character to the left of the cursor
- insert characters to the left of the cursor
- overwrite the character (flashing) when entering the time and date etc.

ECO DECT
ECO DECT reduces power consumption by using an energy efficient power supply.
Your handset also reduces the transmission power depending on the distance to the base station.

Making calls

Making external calls
External calls are calls using the public telephone network.

Enter the number and press the talk key.

Or:
Press and hold the talk key and then enter the number.

You can cancel the dialling operation with the end call key.

You are shown the duration of the call while the call is in progress.

Please note:
Dialling using the directory, call-by-call list (page 1, page 12) or last number redial list (page 16) saves time re-entering numbers and network provider access codes ("call-by-call numbers").

Continuing a call on a Bluetooth headset
Precondition: Bluetooth is activated; a connection has been established between the Bluetooth headset and the handset (page 26).

Press the talk key on the Bluetooth headset; it may take up to 5 seconds to establish a connection to the handset.

For further details on your headset, see the user guide belonging to it.
**Ending a call**

Enter Press the end call key.

**Accepting a call**

The handset indicates an incoming call in three ways: by ringing, by a display on the screen and by the flashing handsfree key.

You can accept the call by:
- Pressing the talk key.
- Pressing the handsfree key.

If the handset is in the charging cradle and the Auto Answer function is activated (page 20), the handset will take a call automatically when you lift it out of the cradle.

If the ringer tone is intrusive, press the Silence display key. You can take the call as long as it is displayed on the screen.

**Accepting a call on a Bluetooth headset**

Precondition: Bluetooth is activated; a connection has been established between the Bluetooth headset and the handset (page 26).

Only press the talk key on the headset when the headset itself rings; it may take up to 5 seconds to establish a connection to the handset.

For further details on your headset, see the user guide issued with it.

**Handsfree talking**

In handsfree mode, instead of holding the handset to your ear you can put it down, for example on the table in front of you, to allow others to participate in the call.

**Activating/deactivating handsfree mode**

**Activating while dialling**

Enter the number and press the handsfree key.

You should inform your caller before you use the handsfree function so that they know someone else is listening.

**Switching between earpiece and handsfree mode**

Press the handsfree key.

Switch handsfree on or off during a call.

If you wish to place the handset in the charging cradle during a call:

Press and hold the handsfree key while placing the handset in the base station. If the handsfree key does not light up, press the key again.

For how to adjust the handsfree volume page 21.

**Muting**

You can deactivate the microphone in your handset during an external call. The other party hears hold music.

Press the control key on the left to mute the handset.

Press the display key to reactivate the microphone.
First steps

Making internal calls

Internal calls to other handsets registered to the same base station are free.

Calling a specific handset
  - Initiate internal call.
  - Enter the number of the handset.

Or:
  - Initiate internal call.
  - Select handset.
  - Press the talk key.

Calling all handsets (”group call”)
  - Initiate internal call.
  - Press the star key. All handsets are called.

Ending a call
  - Press the end call key.

Using the directory and lists

You can store a total of 250 entries in the directory and call-by-call list.

You create the directory and call-by-call list for your own individual handset. You can also send lists/entries to other handsets (→ page 14).

Directory/call-by-call list

Please note:
For quick access to a number from the directory or the call-by-call list (quick dial), you can assign the number to a key.

Directory

In the directory you can store:
- up to three numbers and associated first names and surnames,
- VIP designation and VIP ringer tone (optional),
- e-mail address (optional),
- CLIP pictures (optional),
- anniversaries with reminder.
  - With the handset in idle status, open the directory by pressing the } key.

Length of the entries (directory)
3 numbers:
each max. 32 digits
First name and surname:
each max. 16 characters
E-mail address:
max. 60 characters

Call-by-call list

The call-by-call list is used to store the access codes for network providers (”Call-by-call numbers”).
  - Open the call-by-call list in idle status by pressing the } key.

Length of entries
Number: max. 32 digits
Name: max. 16 characters

Storing a number in the directory

New Entry
  - Change multiple line input:
First Name / Surname:
Enter a name in at least one of the fields.

Phone (Home) / Phone (Office) / Phone (Mobile)
Enter a number in at least one of the fields.

E-mail
Enter e-mail address.

Annivers.: Select On or Off.
With setting On:
enter Anniversary (Date) and Annivers. (Time) (→ page 15) and select reminder type: Annivers. (Signal).
Caller Picture
If required, select a picture to be displayed when the caller calls (\rightarrow page 22). Precondition: Calling Line Identification (CLIP).

Please note:
For further information on which base station your handset requires to support this feature, please visit our website at www.gigaset.com/customercare.

- Save changes: ( \rightarrow page 32).

Storing a number in the call-by-call list

\rightarrow New Entry
- Change multiple line input:

Name:
Enter name.
Number:
Enter number.

Order of directory/call-by-call list entries
Directory entries are generally sorted alphabetically by surname. Spaces and digits take first priority. If only the first name was entered in the directory, this is incorporated into the sort order instead of the surname.

The sort order is as follows:
1. Space
2. Digits (0–9)
3. Letters (alphabetical)
4. Other characters

To get round the alphabetical order of the entries, insert a space or a digit in front of the first letter of the surname. These entries will then move to the beginning of the directory.

Selecting entries in the directory and call-by-call list

\rightarrow \rightarrow Open directory or call-by-call list.

You have the following options:
- Use \rightarrow to scroll through the entries until the required name is selected.
- Enter the first character of the name (in the directory: first character of the surname or of the first name if only the first name has been entered), or scroll to the entry using \rightarrow.

Dialling with the directory/call-by-call list

\rightarrow \rightarrow \rightarrow (select entry)

Press the talk key. The number is dialled.

Managing entries in the directory/call-by-call lists

\rightarrow \rightarrow (select entry)

Viewing entries

View Press the display key. The entry is displayed.
Back with \rightarrow OK.

Editing entries

View Edit Press display keys one after the other.
- Carry out changes and save.

Using other functions

\rightarrow \rightarrow (select entry)
\rightarrow Options (open menu)

The following functions can be selected with \rightarrow:

Display Number
To edit or add to a saved number, or to save it as a new entry, press \rightarrow after the number is displayed.

Edit Entry
Edit selected entry.
First steps

Delete Entry
Delete selected entry.

VIP Entry (directory only)
Mark a directory entry as a VIP (Very Important Person) and assign a specific ringer tone to it. You can then recognise important calls from the ringer tone.
Precondition: Calling Line Identification.

Copy Entry
Send a single entry to a handset (→ page 14).

Delete List
Delete all entries in the directory/call-by-call list.

Copy List
Send complete list to a handset (→ page 14).

Available Memory
Display the available entries in the directory and call-by-call list (→ page 12).

Using quick dial keys
Press and hold the required quick dial key (→ page 18).

Sending the directory/call-by-call list to another handset

Preconditions:
◆ The sending and receiving handsets must both be registered on the same base station.
◆ The other handset and the base station can send and receive directory entries.

You can send several single entries one after the other, by responding to the prompt Copy next entry? with Yes.

A successful transfer is confirmed by a message and confirmation tone on the receiving handset.

Please note:
You can also send the complete directory via data transfer, without opening the directory:

Data Transfer
Directory

Please note:
◆ Entries with identical numbers are not overwritten on the receiving handset.
◆ The transfer is cancelled if the phone rings or if the memory of the receiving handset is full.

Transferring the directory as a vCard with Bluetooth

In Bluetooth mode (→ page 26) you can transfer directory entries in vCard format, e.g. to exchange entries with your mobile phone.

Select device and press OK.

Receiving a vCard with Bluetooth

If a device from the "Known Devices" list (→ page 27) sends a vCard to your handset, this occurs automatically and you are informed about it via the display.

Enter the PIN for the sending Bluetooth device and press OK.

The transferred vCard is available as a directory entry.
Copying a displayed number to the directory

You can copy numbers to the directory that are displayed in a list, e.g. the call history or the last number redial list, in an SMS (depending on the base station) or during a call to the directory.

If you have CNIP, the first 16 characters of the transmitted name are copied to the Name line.

A number is displayed:

- Options → Copy to Directory
  - Complete the entry, page 12.

While the number is being transferred from the answer machine list (depending on the base station), the message playback is interrupted.

Copying a number or e-mail address from the directory

In many operating situations, you can open the directory to copy a number or e-mail address, for example. Your handset need not be in idle status.

- Depending on the operating situation, open the directory with or Directory.
- Select an entry (page 13).

Saving an anniversary in the directory

For each number in the directory, you can save an anniversary and specify a time at which a reminder call should be made on the anniversary (delivery status: Annivers.: Off).

Anniversaries are automatically recorded in the calendar (page 24).

- (select entry; page 13)
  - Press display keys one after the other.
  - Scroll to the Annivers.: line.
  - Select On.

- Change multiple line input:
  - Anniversary (Date)
    - Enter day/month/year in 8-digit format.
  - Annivers. (Time)
    - Enter the hour/minute for the reminder call in 4-digit format.
  - Annivers. (Signal)
    - Select the type of signal for the reminder.
  - Save changes: (page 32).

Deactivating anniversaries

- (select entry; page 13)
  - Press display keys one after the other.
  - Scroll to the Annivers.: line.
  - Select Off.
  - Press the display key.

Reminder call on an anniversary

A reminder call is signalled on the handset using the selected ringer tone.

You now have the following options:

- SMS
  - Write an SMS.
- OFF
  - Press the display key to acknowledge and end the reminder call.

Viewing missed anniversaries

In idle status, you are reminded of an elapsed and unacknowledged anniversary by the one-off display of Appoint.

- View appointment:
  - Press the display key.

You now have the following options:

- SMS
  - Write an SMS (depending on base station).
- Delete
  - Delete reminder.
  - After deleting, press the or Go Back display key:
    - Back to idle status, Appoint is no longer displayed.

You can also view missed anniversaries afterwards (page 25).
First steps

**Last number redial list**

The last number redial list contains the 20 numbers last dialled with the handset (max. 32 digits). If a number is in the phonebook or the call-by-call list, then the appropriate name will be displayed.

**Manual last number redial**

Press the key briefly.

Select entry.

Press the talk key again. The number is dialled.

When a name is displayed, you can display the corresponding phone number by pressing the View display key.

**Managing entries in the last number redial list**

Press the key briefly.

Select entry.

Options

Open menu.

The following functions can be selected with 

- **Copy to Directory**
  Copy an entry to the directory (page 12).

- **Automatic Redial**
  The selected number is automatically dialled at fixed intervals (at least every 20 seconds). The handsfree key flashes and "open listening" is activated.
  - Party answers: press the talk key . The function is ended.
  - Party does not answer: the call is terminated after approx. 30 seconds. The function is ended after pressing any key or after ten unsuccessful attempts.

- **Display Number** (as in the directory, page 13)

- **Delete Entry** (as in the directory, page 14)

- **Delete List** (as in the directory, page 14)

**Opening lists with the message key**

An advisory tone sounds as soon as a new message arrives in a list. The message key 

flashes (it goes off when the key is pressed). In idle status, the display shows an icon for the new message.

If you press the message key , you access the lists that contain new messages.

**Using a handset as a room monitor**

If the room monitor is activated, a previously stored destination number is called as soon as a set noise level is reached. You can store an internal or external number in your handset as the destination number.

The room monitor call to an external number stops after around 90 seconds. The room monitor call to an internal number (handset) stops after approx. 3 minutes (depending on the base station). While the room monitor is activated, all keys are locked except the end call key. The handset's speaker is muted.

When the room monitor is activated, incoming calls to the handset are indicated without a ringer tone and are only shown on the screen. The display and keypad are not illuminated and advisory tones are also turned off.

If you accept an incoming call, the room monitor mode is suspended for the duration of the call, but the function remains activated.

The room monitor mode is retained if you turn the handset off and on again.
Caution!

- You should always check the operation of the room monitor before use. For example, test its sensitivity. Check the connection if you are diverting the room monitor to an outside number.
- When the function is switched on the handset's operating time is severely reduced. If necessary, place the handset in the charging cradle. This ensures that the batteries do not run down.
- Ideally the handset should be positioned 1 to 2 metres away from the baby. The microphone must be directed towards the baby.
- The connection to which the room monitor is diverted must not be blocked by an activated answer machine.

Activating the room monitor and entering the destination number

1. [Room Monitor]

2. Change multiple line input:

   Room M.:
   Select On to activate.

3. Call to:

   - External number: Select the number from the directory (press display key `)` or enter it directly. Only the last 4 digits are displayed.
   - Internal number: Options → INT → OK
     → (select handset or Call All if all registered handsets are to be called)
     → OK.

4. Level:

   Set noise level sensitivity (Low or High).

5. Press Save to save the settings.

Changing set destination numbers

1. [Room Monitor]

2. Scroll to the Call to: line.

3. Press Delete to delete existing number.

4. Enter and save number as described in "Activating the room monitor and entering the destination number" (page 17).

Deactivating the room monitor remotely

Preconditions: The phone must support touch tone dialling and the room monitor should be set for an external destination number.

- Accept the call from the room monitor and press keys 9; 9.

The room monitor function will deactivate after the call ends. There will be no further room monitor calls. The other room monitor settings (e.g. no ringer tone) on the handset will remain activated until you press the display key Off on the handset.

To reactivate the room function with the same phone number:

- Turn on the activation again and save with Save.

Walky-talky mode

Walky-talky mode allows two handsets to communicate with each other, both inside and outside the range of the base station to which the handsets are registered.

Handsets that are to communicate with each other using walky-talky mode must meet one of the following conditions:

- The handsets are all registered to the same base station.
- The handsets are set to Best Base or are not yet registered.

In walky-talky mode, if you press the talk key , or the handsfree key , the call will go to all handsets that are in walky-talky mode. The connection is made with the first handset to accept the walky-talky call.

Please note:

- The maximum range outdoors is 300 m.
- Handsets that are in walky-talky mode are not available for phone calls.
- The handset operating times are greatly curtailed.
First steps

Activating/deactivating walky-talky mode

Press the display key. Walky-talky mode is switched off.

or

Press the display key to open the menu.

The following functions can be selected with 

- Audio Settings
  You can set Ringer Settings (page 21) and Advisory Tones (page 23) for walky-talky mode.

- Room Monitor
  You can use the handset in walky-talky mode as a room monitor.

Using a handset in walky-talky mode as a room monitor

Change multiple line input:

- Room M.:
  Select On to activate.

- Level:
  Set noise level sensitivity (Low or High).

- Save the changes.

The room monitor will use all the handsets that are in walky-talky mode.

Switch the room monitor off by pressing the display key OFF on the handset that was used to activate the room monitor. The handset reverts to normal walky-talky mode.

Handset settings

Your handset is preconfigured, but you can change the settings to suit your individual requirements.

Shortcuts for functions and numbers

You can assign the left display key and each of the digit keys 0-9 to a number or a function. The right display key has a preset function. You can change the assignment.

The number is then dialled or the function started by simply pressing a key.

Assigning a digit key/left display key

Precondition: The digit key or the left display key has not yet been assigned a number or a function.

- Press the display key or press and hold the digit key.

The list of possible key assignments is opened. The following can be selected:

Quick Dial / Call-by-Call

Assign a key to a number from the directory or call-by-call list.

The directory or call-by-call list is opened.

- Select an entry and press OK.

If you delete or edit an entry in the directory or call-by-call list, this has no effect on the assignment to the digit/display key.

Room Monitor

Assign a key to the menu for setting and activating the room monitor (page 16).

Alarm Clock

Assign a key to the menu for setting and activating the alarm clock (page 24).

Calendar

Open the calendar/enter a new appointment.
Bluetooth
Assign the Bluetooth menu to a key.

More Features...
Depending on which base station you have, further key assignments are also possible.

If the left display key has been assigned a shortcut, the selected function or name of the phone number in the directory or call-by-call list is displayed (abbreviated if necessary) in the bottom display line via the display key.

Starting the function, dialling the number
If the handset is in idle status, press and hold the numerical key or press the display key briefly.
Depending on the key assignment:
◆ Numbers are dialled directly.
◆ The function menu is opened.

Changing key assignments

Display key
◆ Press and hold the left or right display key.
The list of possible key assignments is opened.
◆ Proceed as is described when first assigning the key with a shortcut ( page 18).

Digit key
◆ Press the digit key briefly.
Change Press the display key. The list of possible key assignments is displayed.
◆ Proceed as is described when first assigning the key with a shortcut ( page 18).

Changing the display language
You can view the display texts in different languages.

The current language is indicated by .
Select a language and press OK. Press and hold (idle status).

If you accidentally choose a language you do not understand:
Press keys in sequence.
Select the correct language and press OK.

Setting the display
You have a choice of four colour schemes and several different contrasts.

Colour Scheme
Select and press OK.
Select a colour scheme and press OK ( current colour).
Press briefly.

Contrast
Select and press OK.
Select contrast.
Save Press the display key.
Press and hold (idle status).
First steps

Setting the screensaver

You can set a picture from the Resource Dir. (page 22) to be displayed as a screensaver when the handset is in idle status. This will replace the idle status display. It may conceal the date, time and name.

The screensaver is not displayed in certain situations, e.g. during a call or if the handset is de-registered.

If a screensaver is activated, the Screen Saver menu option is marked with ✓.

Display ➔ Screen Saver

The current setting is displayed.

 выбрать

Activation:
Select On (screensaver is displayed) or Off (no screensaver).

Selection:
If required, change the screensaver (see below).

➤ Save changes: ( ➔ page 32).

If the screensaver conceals the display, briefly press or to show the idle display with time and date.

Changing the screensaver

Display ➔ Screen Saver

Scroll to the Selection line.

Press the display key. The active screensaver is displayed.

Select screensaver and press Change.

➤ Save changes: ( ➔ page 32).

Setting the display backlight

Regardless of whether or not the handset is in the charging cradle, you can activate or deactivate the backlighting. If the handset is switched on, the display is permanently dimmed.

Display ➔ Backlight

The current setting is displayed.

➤ Change multiple line input:

In Charger
Select On or Off.

Without Charger
Select On or Off.

Please note:
With the On setting, the standby time of the handset can be significantly reduced.

Save Press the display key.

Press and hold (idle status).

Activating/deactivating auto answer

If you activate this function, when you receive a call you can simply lift the handset out of the charging cradle without having to press the talk key .

Handset
Auto Answer
Select and press OK (✓ = on).

Press and hold (idle status).
Changing the handsfree/earpiece volume

You can set the loudspeaker volume for handsfree talking to five different levels and the earpiece volume to three different levels.

In idle status:

1. \(\text{Handset Volume}\)
   - Set the earpiece volume.
   - Scroll to the **Speaker** line.
   - Set the handsfree volume.
   - **Save**
     - Press display key if necessary to save the setting.

Setting the volume during a call:

1. \(\text{Press the control key.}\)
2. \(\text{Set the volume.}\)
3. \(\text{Save}\)
   - Press display key to save the setting.

If \(\text{Handset Volume}\) is assigned with another function, e.g. when toggling:

1. \(\text{Options}\)
   - Open menu.
2. \(\text{Volume}\)
   - Select and press **OK**.
   - Configure setting (see above).

**Please note:**
You can also set the call volume, the ringer tones, the advisory tones and the silent alert via the menu.

Changing ringer tones

- **Volume:**
  - You can choose between five volumes (1–5; e.g. volume 2 = \(\text{ Crescendo }\)) and the "Crescendo" ring (6; volume increases with each ring = \(\text{ Crescendo }\)).

- **Ringer tones:**
  - You can select various ringer tones, melodies or any sound from My stuff (\(\rightarrow\) page 22).

You can set different ringer tones for the following functions:

- **Ext. Calls:** for external calls
- **Internal Calls:** for internal calls
- **Appointments:** for set appointments (\(\rightarrow\) page 24)
- **All:** the same ringer tone for all functions

**Settings for individual functions**

Set the volume and melody depending on the type of signalling required. You can activate the time control for external calls to regulate the volume of a call (e.g. quieter at night-time than in daytime).

In idle status:

1. \(\text{Ringer Settings}\)
   - Select setting, e.g. **Ext. Calls** and press **OK**.
   - Set volume (1–6).
   - Scroll to the next line.
   - Select melody.
   - **Save**
     - Press the display key to save the setting.

   Additionally for external calls:

   - **Time C.**
     - Press display key.

   - Change multiple line input:

   **Time control:**
   - **Select On or Off.**
   - **From:**
     - Enter the start of the period in 4-digit format.
   - **Until:**
     - Enter the end of the period in 4-digit format.
   - **Volume:**
     - Set the volume (1–6).
First steps

Same settings for all functions
In idle status:

- \(\text{Ringer Settings} \rightarrow \text{All}\)
  
- Set volume and ringer tone (see "Settings for individual functions").

**Save** Press the display key to confirm the prompt.

**Silent** Press and **hold** (idle status).

**Please note:** You can also set the call volume, the ringer tones, the advisory tones and the silent alert via the menu.

Activating/deactivating the ringer tone
You can deactivate the ringer tone on your handset before you answer a call or when the handset is in idle status; the ringer tone can be deactivated permanently or just for the current call. The ringer tone cannot be reactivated while an external call is in progress.

**Deactivating the ringer tone permanently**
Press and **hold** the star key.
The \(\text{Silent}\) icon appears in the display.

**Reactivating the ringer tone**
Press and **hold** the star key.

**Deactivating the ringer tone for the current call**
Press the display key.

**Activating/deactivating the alert tone**
In place of the ringer tone you can activate an alert tone. When you get a call, you will hear a short tone ("Beep") instead of the ringer tone.

Press and **hold** the star key and within **3 seconds**:

**Beep** Press the display key. A call will now be signalled by **one** short alert tone. You will now see \(\text{Silent}\) in the display.

Vibration alarm
Incoming calls and other messages are indicated by vibration.
In idle status:

- \(\text{Silent Alert}\)

Press **OK** to activate or deactivate (\(\checkmark\) = on).

**Please note:** You can also set the call volume, the ringer tones, the advisory tones and the silent alert via the menu.

My stuff

My stuff on the handset manages sounds, which you can use as ringer tones, and pictures (CLIP pictures and screensavers), which you can use as caller pictures or as screensavers. Precondition: Calling Line Identification (CLIP). My stuff can manage the following media types:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Sound</th>
<th>Format</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔔</td>
<td>Ringer tones</td>
<td>Standard</td>
</tr>
<tr>
<td>🎵</td>
<td>Monophonic</td>
<td>Standard</td>
</tr>
<tr>
<td>🎼</td>
<td>Polyphonic</td>
<td>.mid</td>
</tr>
<tr>
<td>🕰</td>
<td>Picture (CLIP picture, screensaver)</td>
<td>BMP (128 x 128 or 128 x 64 pixels)</td>
</tr>
</tbody>
</table>

The icon is displayed in front of the name in My stuff. Various mono- and polyphonic sounds and pictures are preconfigured on your handset.

You can listen to the available sounds and view the pictures.

You can download pictures from a PC (page 34). If too little memory is available, then you will have to delete one or more pictures first. The pre-configured pictures are labelled with \(\text{Silent}\). You cannot rename or delete them.
Playing back sounds/viewing CLIP pictures

Press the display key. Sounds are played back or pictures are displayed. Press the ( ) key to switch between entries.

End / Press the display key. Playback of the sound or the display of the picture ends.

While you are playing back sounds, you can also interrupt playback with the ( ) key.

Press and hold (idle status).

If you have saved a picture in an invalid file format, an error message will be displayed after you make your selection. Cancel the operation with ( ). Delete the picture with ( ).

Sounds: setting the volume

During playback:

Volume Press the display key.
Set volume.
Save Press the display key.

Renaming/deleting a picture

You have selected an entry.

Options Open menu.

If a picture cannot be deleted ( ), these options are not available. Depending on the situation, you can select the following functions:

Delete Entry The selected entry is deleted.

Delete List All entries in the list that can be deleted are deleted.

Rename Change the name (max. 16 characters) and press ( ). The entry is stored with the new name.

Checking memory

You can check the available memory for screensavers and CLIP pictures.

Capacity Back: press the display key.

Activating/deactivating advisory tones

Your handset uses "advisory tones" to tell you about different activities and statuses. The following advisory tones can be activated and deactivated independently of each other:

Key click: every key press is confirmed.

Advisory tones:

– Confirmation tone (ascending tone sequence): at the end of an entry/setting and when an SMS (depending on the base station) or a new entry arrives in the call history

– Error tone (descending tone sequence): when you make an incorrect entry

– Menu end tone: when scrolling at the end of a menu

Battery low tone: the battery pack requires charging.

In idle status:

Advisory Tones

Change multiple line input:

Key Tones: Select On or Off.

Confirm.: Select On or Off.

Battery:

Select On, Off or In Call. The battery warning tone is only activated/deactivated and only sounds during a call.

Save changes: ( page 32).

You cannot deactivate the confirmation tone for placing the handset in the base station.
Setting the alarm clock

Precondition: The date and time have already been set (→ page 8).

Activating/deactivating the alarm clock and setting the wake-up time

- Change multiple line input:
  - **Activation:**
    - Select **On** or **Off**.
  - **Time:**
    - Enter the wake-up time in 4-digit format.
  - **Occurrence:**
    - Select **Daily** or **Monday-Friday**.
  - **Volume:**
    - Set the volume (1–6).
  - **Melody:**
    - Select melody.
  - Save changes: (→ page 32).

The icon is displayed.

A wake-up call with selected ringer tone (→ page 21) is signalled on the handset. The wake-up call sounds for 60 seconds. is shown in the display. If no key is pressed, the wake-up call is repeated twice at five minute intervals and then switched off.

During a call, the wake-up call is signalled by a short tone.

Deactivating the wake-up call/repeating after a pause (snooze mode)

Precondition: A wake-up call is sounding.

- **OFF**
  - Press the display key. The wake-up call is deactivated.
- **Snooze**
  - Press the display key or any key. The wake-up call is deactivated and then repeated after 5 minutes. After the second repetition the wake-up call is deactivated completely.

Setting an appointment (calendar)

You can have your handset remind you of up to 30 appointments (volume and melody, → page 21).

Saving an appointment

Precondition: The date and time have already been set (→ page 8).

- Change multiple line input:
  - **Appoint.:**
    - Select **On** or **Off**.
  - **Date:**
    - Enter day/month/year in 8-digit format.
  - **Time:**
    - Enter hours/minutes in 4-digit format.

Please note:
You can also set the call volume, the ringer tones, the advisory tones and the silent alert via the menu.
Notes:
Enter text (max. of 16 characters).The text appears as the appointment name in the list and will be displayed on the screen during the appointment reminder. If you do not enter any text, only the date and time of the appointment are displayed.

Press the display key.
Press and hold (idle status).
The appointment is marked with ✓ in the appointments list. The list of appointments is sorted by date.

An appointment reminder is signalled with the selected ringer tone ( → page 21). The appointment reminder sounds for 60 seconds. The entered text, date and time are displayed.

During a call, the appointment reminder is signalled by a short tone.

Managing appointments
Select the day in the graphical calendar and press OK or ●. (Days on which appointments have already been saved are highlighted in black in the calendar.)
Select appointment for the day.
Open menu
Back with ●.

You have the following options:

View Entry
View selected appointment, open the menu Options for editing, deleting and activating / deactivating.

Edit Entry
Edit selected appointment.

Delete Entry
Delete selected appointment.

Activate / Deactivate
Activate / deactivate the selected appointment.

Delete List
Delete all appointments.

Switching off or accepting an appointment reminder

Precondition: An appointment reminder is sounding.
OFF
Press the display key to switch off the appointment reminder.
Or:
SMS
Press the display key to accept the appointment reminder with an SMS (depending on base station).

Displaying missed appointments and anniversaries

Missed appointments/anniversaries ( → page 15) are displayed in the Missed Alarms list if:
✦ You do not accept an appointment/anniversary.
✦ The appointment/anniversary was signalled during a phone call.
✦ The handset is deactivated at the time of the appointment/anniversary.
✦ Automatic redial was activated at the time of an appointment/anniversary ( → page 16).

The most recent entry is at the head of the list.

If there is a new appointment/anniversary in the list, the display shows Appoint. Pressing the display key will also open the Missed Alarms list.
First steps

To open the list from the menu:

- Press the icon > 
- Press the menu icon 
- Missed Alarms

Select appointment/anniversary.
Information about the appointment/anniversary is displayed. A missed appointment is displayed with the appointment name and a missed anniversary is displayed with the last name and first name. The date and time will also be given.

Delete appointment

Delete

SMS

Write an SMS.

Press and hold (idle status).

If 10 entries are already stored in the list, the next appointment reminder will delete the oldest entry.

Using Bluetooth devices

Your Gigaset SL37H handset can communicate wirelessly via Bluetooth™ with other devices using this technology.

Before you can use your Bluetooth devices, you must first activate Bluetooth and then register the devices to the handset.

You can register 1 Bluetooth headset to the handset. You can also register up to 5 data devices (PC, PDA) to send and receive directory entries as vCards or to exchange data with a computer (page 34).

In order to transfer phone numbers via Bluetooth connections, it is essential that area codes (international and local area codes) are stored on the phone (page 28).

You will find a description of how to operate your Bluetooth devices in the user guides for these devices.

Please note:

- You can only operate headsets on your handset that have the headset profile.
- It can take up to 5 seconds to create a connection between your handset and a Bluetooth headset. This applies both when a call is accepted using the headset and one is transferred to the headset, and when a number is dialled from the headset.

Activating/deactivating Bluetooth mode

- Press OK to activate or deactivate Bluetooth mode ( = activated).

In idle status, the icon on the handset shows that Bluetooth mode is activated:

Please note:

- If Bluetooth is activated and accessories (e.g. data cables page 34) are plugged into the connection socket (page 1), Bluetooth is automatically deactivated.
- If a Bluetooth voice connection has already been established, Bluetooth is not deactivated until it is ended.
- If a Bluetooth data connection has already been established, the response depends on the receiving device.
- Bluetooth is automatically reactivated when the accessories are removed.
- If Bluetooth is deactivated and accessories are plugged in, then Bluetooth cannot be activated.
Registering Bluetooth devices

The distance between the handset in Bluetooth mode and the activated Bluetooth device (headset or data device) should be no more than 10 m.

Please note:
- If you register a headset, any headset that is already registered will be overwritten.
- If you would like to use a headset with your handset that is already registered to another device (e.g. to a mobile phone), please deactivate this connection before you start the registration process to the Gigaset.

Data Transfer
 Bluetooth
 Search Headset / Search Data Device

The search can take up to 30 seconds.

Once the device has been found, its name will be shown on the display.

Options Press the display key.

Trust Device Select and press OK.

Enter the PIN for the Bluetooth device you want to register and press OK.

The device is saved in the list of known devices.

Cancelling/repeating current search

To cancel search:
Cancel Press the display key.

Repeat search if necessary:
Options Select and press OK.
Repeat Search Select and press OK.

Editing the list of known (trusted) devices

Open the list

Bluetooth → Known Devices

A corresponding icon appears next to each device name in the list displayed:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bluetooth headset</td>
<td></td>
</tr>
<tr>
<td>Bluetooth data device</td>
<td></td>
</tr>
</tbody>
</table>

Viewing entries

Open list → Bluetooth → Search Headset / Search Data Device

Options Press the display key.

View Entry Select and press OK.

Device name and address are displayed.
Back with OK.

De-registering a Bluetooth device

Open list → Bluetooth → Search Headset / Search Data Device

Options Press the display key.

Delete Entry Select and press OK.
Back: press and hold key.

Please note:
If you de-register an activated Bluetooth device, it may try to reconnect as an "unregistered device".

Changing the name of a Bluetooth device

Open the list → Bluetooth → Search Headset / Search Data Device

Options Press the display key.

Rename Select and press OK.
Change name.
Save Press the display key.
Back: Press and hold key.
First steps

Rejecting/accepting an unregistered Bluetooth device

If a Bluetooth device that is not registered in the list of known devices tries to connect with the handset, you will be prompted on the display to enter the PIN for the Bluetooth device (bonding).

\[\text{Reject}\]

Press the display key.

\[\text{Accept}\]

Enter the PIN for the Bluetooth device you want to accept and press \text{OK}.

If you have accepted the device, you can use it temporarily (i.e. as long as it is within receiving range or until you deactivate the handset) or save it to the list of known devices.

Once the PIN has been confirmed, save to the list of known devices:

- Press the display key \text{Yes}.
- Press the display key \text{No}: use temporarily.

Changing the Bluetooth name of the handset

You can change the handset name used to identify it on the display of another Bluetooth device.

\[\text{Change}\]

Press the display key.

\[\text{Save}\]

Press the display key.

Back: Press and \text{hold} key.

Setting your own area code

In order to transfer phone numbers between Bluetooth connections and phone, it is essential that your area code (international and local area code) is stored on the phone. Some of these numbers are already preset.

- \text{Change multiple line input:}
  - Select/change input field.
  - Navigate in the input field.
  - If necessary, delete number: press the display key.
  - Enter number.
  - Press the display key.

Example:

<table>
<thead>
<tr>
<th>Area Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>International code:</strong></td>
</tr>
<tr>
<td>0000 - 49</td>
</tr>
<tr>
<td><strong>Local area code:</strong></td>
</tr>
<tr>
<td>0 - [89 ]</td>
</tr>
</tbody>
</table>

Restoring the handset to the factory settings

You can reset any individual settings and changes that you have made. Entries in the directory, the call-by-call list, the call history, the SMS lists (depending on the base station) and the handset’s registration to the base station as well as the content of My stuff are retained.

- \text{Yes} Press the display key.
- Press and \text{hold} (idle status).
Appendix

Care

- Wipe the charging cradle and the handset with a damp cloth (do not use solvent) or an antistatic cloth.

Never use a dry cloth. This can cause a build up of static.

Contact with liquid

If the handset has come into contact with liquid:

1. **Switch off the handset and remove the battery pack immediately.**
2. Allow the liquid to drain from the handset.
3. Pat all parts dry, then place the handset with the battery compartment open and the keypad facing down in a dry, warm place **for at least 72 hours** (**not** in a microwave, oven etc.).
4. **Do not switch on the handset again until it is completely dry.**

When it has fully dried out, you will normally be able to use it again.

Questions and answers

If you have any questions about using your handset, visit us at any time at [www.gigaset.com/customercare](http://www.gigaset.com/customercare). The table below contains a list of common problems and possible solutions.

<table>
<thead>
<tr>
<th>Registration or connection problems with a Bluetooth headset.</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Reset the Bluetooth headset (see the user guide for your headset).</td>
</tr>
<tr>
<td>- Delete registration data from the handset when de-registering the device (→ page 27).</td>
</tr>
<tr>
<td>- Repeat the registration process (→ page 27).</td>
</tr>
</tbody>
</table>

**The display is blank.**

1. The handset is not switched on.
   - Press **and hold** the end call key.

2. The battery pack is flat.
   - Charge/replace the battery pack (→ page 6).

**The keys of a handset do not respond when pressed.**

The keypad lock is activated.
- Press and hold the hash key # (→ page 8).

**"Base station x" flashes on the display.**

1. The handset is outside the range of the base station.
   - Move the handset closer to the base station.

2. The handset has been de-registered.
   - Register the handset (→ page 7).

3. The base station is not switched on.
   - Check the base station mains adapter.

**Base Search flashes in the display.**

The handset is set to Best Base and no base station is switched on or within range.
- Move the handset closer to the base station.
- Check the base station mains adapter.

**Handset does not ring.**

The ringer tone is switched off.
- Activate the ringer tone (→ page 22).

**The other party cannot hear you.**

You have pressed the (INT) key. The handset is "muted".
- Switch on the microphone again (→ page 11).

**You hear an error tone when keying an input (a descending tone sequence).**

Action has failed/invalid input.
- Repeat the operation.
  - Watch the display and refer to the user guide if necessary.

Please have your record of purchase ready when calling.
Replacement or repair services are not offered in countries where our product is not sold by authorised dealers.
Authorisation

This device is intended for use within the European Economic Area and Switzerland. If used in other countries, it must first be approved nationally in the country in question.

Country-specific requirements have been taken into consideration.

We, Gigaset Communications GmbH, declare that this device meets the essential requirements and other relevant regulations laid down in Directive 1999/5/EC.

A copy of the 1999/5/EC Declaration of Conformity is available at this Internet address: www.gigaset.com/docs.

Bluetooth® Qualified Design Identity

The Bluetooth QD ID for your Gigaset SL37H is: B011264.

Specifications

Recommended battery pack

(Valid at the time of going to press)

Technology: Lithium ion (Li-Ion):
Voltage: 3.7 V
Capacity: 700 mAh
Type: V30145-K1310-X250
V30145-K1310-X322
V30145-K1310-X401

The handset is supplied with the recommended battery pack. Only the original battery pack may be used.

Handset operating times/charging times

The operating time of your Gigaset depends on the capacity and the age of the batteries and the way they are used. (All times are maximum possible times and apply when the display backlight is switched off.)

Notes on the user guide

This section explains the meaning of certain typographical conventions that are used in this user guide.

Example of a menu input

The steps you need to perform are shown in abbreviated form in the user guide. This is illustrated below using the example of “Setting the contrast for the display”. The things you have to do are explained in the boxes.

- When the handset is in idle status, press the control key in the centre (○) to open the main menu.
- Use the (□) control key to select the (□) Settings icon.
- Press (●) or press the display key OK to confirm the Settings function.

The Settings submenu is displayed.
- Press on the bottom of control key (□) until the Display menu function is selected.
- Press (●) or press the display key OK to confirm the selection.
First steps

Contrast
Select and press **OK**.
- Press on the bottom of control key ( ) until the Contrast menu function is selected.
- Press or press the display key **OK** to confirm the selection.

Select contrast and press or press the display key **Save**.
- Press on the right or left of the control key to set the contrast.
- Press or press the display key **Save** to confirm the selection.

Press and hold (idle status).
- Press and hold the end call key until the handset returns to idle status.

Example of multiple line input

In many situations you can change settings or enter data in several lines of a display.
In this user guide, the multi-level input is illustrated in abbreviated form. This is illustrated below using the example of "Setting the date and time". The things you have to do are explained in the boxes.

You will see the following display (example):

<table>
<thead>
<tr>
<th>Contrast</th>
<th>Select and press <strong>OK</strong>.</th>
</tr>
</thead>
<tbody>
<tr>
<td>-</td>
<td>Press on the bottom of control key ( ) until the Contrast menu function is selected.</td>
</tr>
<tr>
<td>-</td>
<td>Press or press the display key <strong>OK</strong> to confirm the selection.</td>
</tr>
</tbody>
</table>

Date:
Enter the day, month and year in 8-digit format.
The second line is marked with [ ] to show it is active.
- Enter the date using the digit keys.

Time:
Enter hours/minutes in 4-digit format.
- Press the ( ) key.
The fourth line is marked with [ ] to show it is active.
- Enter the date using the digit keys.

Save the changes.
- Press the display key **Save**.
- Then press and hold the [ ] key.
The handset switches to idle status.

Writing and editing text

The following rules apply when writing a text:
- Control the cursor with ( ), ( ), ( ), ( ).
- Characters are inserted on the left of the cursor.
- Press the star key ( ) to show the table of special characters.
- The first letter of the name of directory entries is automatically capitalised, followed by lower case letters.

You can call up the table of special characters when writing an SMS using the ( ) key. Select the required SMS and insert it with **Insert**.
Writing an SMS/name (without predictive text)

Press the relevant key several times to enter letters/characters.

</table>

1) Space
2) Line break

When you press and hold a key, the characters of that key appear in the display and are highlighted one after the other. When you release the key, the highlighted character is inserted into the input field.

Setting upper/lower case or digits

Press the hash key # briefly to switch from "Abc" mode to "123" and from "123" to "abc" and from "abc" to "Abc" (upper case: 1st letter upper case, all others lower case). Press the hash key # before entering the letter.

You can see in the display whether upper case, lower case or digits is selected.

Writing SMS (with predictive text)

EATONI predictive text helps you when you are writing text messages.

Each key between [0-9] and [9] is assigned several letters and characters. These appear in a selection line immediately under the text panel (over the display keys) as soon as you press a key. The letter you are most likely looking for is shown in reversed highlights and is at the beginning of the selection line. It is copied into the text panel.

Activating/deactivating predictive text

Precondition: you are writing a text message.

Options

Press the display key.

Predictive Text

Select and press OK (✓ = on).

Press the end call key briefly to return to the text field. Enter the text.
First steps

Additional functions via the PC interface

You can connect the handset to your computer via Bluetooth (page 26) or a data cable (page 34). If you want to use the Bluetooth connection, your computer must be equipped with a suitable dongle.

Your handset can communicate with a computer using the "Gigaset QuickSync" program (free download at www.gigaset.com/gigasetSL370).

You can
- access your handset’s directory and synchronise it with Outlook, or copy contact details to the handset,
- download CLIP pictures (.bmp) from the computer to the handset,
- download pictures (.bmp) for the screensaver from the computer to the handset.

During the transfer of data between handset and PC, you will see a symbol on the display. During this time the keypad is disabled, and incoming calls will be ignored.

Please note:
- If Bluetooth is activated and accessories (e.g. data cables page 34) are plugged into the connection socket (page 1), Bluetooth is automatically deactivated.
- If a Bluetooth voice connection has already been established, Bluetooth is not deactivated until it is ended.
- If a Bluetooth data connection has already been established, the response depends on the receiving device.
- Bluetooth is automatically reactivated when the accessories are removed.
- If Bluetooth is deactivated and accessories are plugged in, then Bluetooth cannot be activated.

Accessories

Mobile handsfree set with PTT key

With the mobile handsfree set you can make a call while keeping your hands free.

In addition, conversations can be heard on the handset.

Data Cable USB DCA-510

For connecting your phone to the USB interface of your computer.

All accessories and battery packs are available from your mobile phone retailer.

Only use original accessories. This will avoid possible health risks and damage to property, and also ensure that all the relevant regulations are complied with.
